Javelin Vigorelli

JAVELIN® | TRACK

Intimidation is a factor in racing. Let the other guy rethink their gear, their training regiment, wondering if all of those days spent running, climbing, spinning and lifting are enough. Let them wonder if their gear is good enough. Let them question if their technique can overcome technical superiority. Make them sweat it out while they stare at you at the starting line, cool, calm and ready to explode towards that first left turn.

Make them sweat. Put a bike under you that has multiple wins at the National Championships. Ride something that asks more of you instead of the other way around for a change.

Don't settle for mediocre. Settle for perfection.

If you don't ride a Javelin, you just aren't competitive with those who do.

VIGORELLI

A championship winning track frame for unrivaled power at the Velodrome.

- o 7005-butted aluminum frame for lowered weight and added stiffness
