RALEIGH

The Complete Cycling Experience

THE BEST KNOWN NAME IN CYCLING – WORLDWIDE – AND THE NO.1 BRAND IN THE UK

For over 120 years, Raleigh have been creating market leading bikes in Nottingham. Today, our product development engineers and graphic designers ensure that the innovation continues and every Raleigh bike has a special level of quality and attention to detail. The functionality of every bike is important at Raleigh, it must be "fit for purpose" and reliable. To achieve this high quality we carefully select the best materials and components for every bike. At Raleigh, we are proud of what we do and we are very excited about the new developments shown within this catalogue.

MOUNTAIN BIKES

This covers many products but generally you choose between hard tails and full suspension.

Hard tail bikes have rigid frames and a suspension front fork whereas a full suspension bike incorporates rear suspension.

All-terrain bikes are versatile and can handle off road conditions from rough rocky conditions to less challenging towpaths and bridleways. Hard tails are more responsive with the front suspension forks helping absorb the bumps with all the power pushed through the pedals transferring into momentum. Full suspension bikes are designed to handle more aggressive downhill conditions by adsorbing impacts whilst maintaining traction but on the flat some of your power will be lost due to the rear suspension. Not all all-terrain bikes are designed for serious off road riding. You need to look at the component specification in detail to ensure the function and quality are right for your requirements, especially the gear set and shifters, brakes, saddle, grips and tyre tread pattern. Riding position is important – the more upright the less impact will be placed on your lower back plus your vision will be improved.

Take a look at our Freeride AT and Voyager ranges.

TOWN & COMFORT BIKES

This category is a hybrid of road and all terrain bikes. Designed for tarmac riding with occasional off road riding on towpaths, bridleways or cycle trails. These are sleeker framed bikes with slimmer wheels and tyres for faster rolling.

Some are equipped like our Pioneer Elite and Metro range and others are more sporty like our Pioneer Urban series. Ideal for commuters and recreational riders.

Colours printed in this catalogue are as near as possible to the manufactured Raleigh product. For an accurate comparison we recommend you see the actual product on display at your Raleigh retailer. Due to our policy of continual improvement, product specifications and appearance may change while this catalogue is still in use.

SIZE AND FIT

You must sit on a bike to ensure it is comfortable. This will allow you to judge the reach and if your feet can touch the ground comfortably on both sides. Specific frame geometries and components will affect the riding position and adjustment. Sizing chart is for guidance only.

Frame Size	Inside Leg Range
14"	24" – 29"
15"	25" – 30"
16"	26" – 31"
17"	27" – 32"
18"	28" – 33"
19"	29" – 34"
20"	30" – 35"
21"	31" – 35"
22"	32" – 37"
23"	33" – 37"

WOMENS DESIGNED BIKES

Throughout the range of bikes we have our female specific versions. These bikes have been specifically designed for the female body.

Our bikes include subtle geometry changes that make the bike a more comfortable fit. There are other features which make the bikes more user friendly like step-through frames which reduce the height you have to lift your leg when mounting the bike.

CHOOSING THE RIGHT BIKE

There are many options available and selecting the correct type of bike is important. First you must decide what your requirements are and the type of riding you will be doing. This will determine which type of bike is right for you. There are many types of bike available for every day use, recreational leisure or specific cycling disciplines.

Town & Comfort

PIONEER ELITE

The Pioneer Elite range is the perfect blend of classic looks and cutting edge technology. A vintage sophisticated look is supported by an exceptional high specification package that includes a lightweight comfort geometry frame and the best internal gear sets for reliability and versatility. With a high level of attention to detail these bikes are the definition of a modern city bike.

PIONEER METRO

Our Pioneer Metro range is perfect for city riding and leisurely cruises along country lanes. These equipped bikes are designed to be functional, solid and reliable. Developed around modern comfort components they give you traditional styling with up to date performance. Durable high quality component packages make these bikes ideal for the modern commuter and family fun.

PIONEER URBAN

The Pioneer Urban bikes are built to be sleek, stylish and agile about town. These utility bikes are lightweight and upgradeable as they are mudguard and carrier ready. The new frames benefit from eye catching hydro-formed tubing for added strength and a high quality and reliable specification. The ride will be effortless with the easy rolling wheels and semi slick tyres.
So if you are looking for a fast but comfortable bike for your daily commute, trips to the local coffee shop or weekend jaunts into the countryside these are simply the best for the recreational rider.

Pioneer Elite 2 **MENS**

FOLDING BIKES

Folding bikes have evolved from the need for a lightweight practical bike that can be easily folded and stored or carried on other forms of transport. The Raleigh folding bikes are ideal for commuting, boating or caravanning. Although these bikes have smaller wheels than more traditional bikes the ride and handling is similar to that of a larger wheeled bike

BOARDWALK LITE

The Boardwalk Lite is the ultimate folding bike. Its lightweight aluminium frame, Dahon designed folding mechanism and a component package to match gives you a ride performance simular to any larger wheeled bike

FRAME AIRLite alloy frame with Dahon patented folding mechanism
FORKS Rigid unicrown

MOUNTAIN ALL TERRAIN

FREERIDE AT

If you're looking for a weekends adventure then our Freeride All Terrain range of recreational mountain bikes are a great way to explore the country lanes or slightly more rugged off road trails. Using our proven AIRLite lightweight aluminium frames you will get an agile ride with steady handling. Shimano gear systems and high spec components mean these bikes represent superb performance and value.

VOYAGER

Our well established Voyager series are the ultimate comfort mountain bikes. We have refined the frame geometry to give you a more comfortable and relaxed riding experience leaving you wondering where the miles went. You will be able to cycle further and with the more upright riding position you will be able to see the road ahead and take in the views. Everything about these bikes is designed with your comfort in mind - luxury cycles for town and trails.

Recreational

Need a fun and relaxing way to get exercise and enjoy the outdoors but think riding a bike sounds like too much hard work? Then, take a look at these bikes as they have been designed to take you around town, down trials and along towpaths. The lightweight frames are responsive and dependable making them great recreational bikes. The agility of this bike makes it ideal for fun and fitness.

FREERIDE AT40 MENS

The AT40 is a classy mountain bike, the new hydro-formed frame giving you a remarkable ride quality with added strength where it matters.
This bike benefits from a high level of components; Shimano 24 speed gears – giving more choice for those challenging moments, Suntour "lock out" forks mean you can "stop" the suspension letting you to ride more efficiently on the roads between the trails and Quad hydraulic disc brakes giving tremendous stopping power – all allowing you to ride your local trails with confidence.

FRAME AIRLite hydroformed aluminium MTB frame with down tube mudguard mounts
FORKS Suntour XCM suspension fork with 100mm travel and lockout function
GEARSET 24 speed Shimano Acera gears with Sram TRX shifters and Suntour triple alloy chainset
BRAKESET Quad Axis hydraulic disc brakes with 160mm rotors
WHEELSET Lightweight Accedo double-wall alloy rims running on alloy disc hubs and finished with WTB Mutano Raptor tyres
CONTROLS Alloy A-headset 4 bolt stem and MTB low riser bars
FINISHING KIT Selle Royal Viper gel saddle, Avenir soft dual density grips and alloy pedals
UPGRADES OVER AT30 Sram TRX shifters, WTB Mutano Raptor tyres, Quad Axis hydraulic brakes, Suntour XCM fork with "Lockout"

FREERIDE AT10 WOMENS

This is our most popular women's mountain bike. Assembled with a spec to give style and comfort this lightweight cycle uses our women's step thro' frame and with quick shifting gears so you never have to get off. Great for weekend rides with the family or that quick burst to be first to the summit! A superb blend of premium parts makes it best in class.

FRAME AIRLite aluminium women's specific mountain bike frame. - Our women's specific frames are designed with a shorter distance from the saddle to the handlebars than the same size men's bikes as this is more suited to women's physique and gives a more comfortable riding position.
FORKS Suntour M2000 suspension fork with 50mm travel - to soak up the bumps making steering easier on the rougher trails
GEARSET 21 speed Shimano gears with EZ Fire shifters and Suntour triple alloy chain-set. - The Shimano EZ – Fire gears give you precise and reliable gear changing with minimal effort –so you go straight into the next gear with no fuss - 21 choices to make your ride "Easy".
BRAKESET Powerful alloy V-brakes
WHEELSET Lightweight alloy rims running on alloy hubs and finished with mountain trail tyres – these tyres have a finer tread which give good handling on looser surfaces without taking too much effort to "push along" on tarmac roads.
CONTROLS Quill stem with low-rise bars. The "quill" stem allows for easy up & down adjustment of the handlebar to let you find your most comfortable position.
FINISHING KIT Avenir Sport women's saddle, soft dual density grips and flat MTB pedals. - all designed to give a secure and comfortable feel to your cycling experience.
UPGRADES OVER AT05 WOMENS 21 speed Shimano gears with EZ Fire shifters, Suntour M2000 suspension fork and mountain trail tyres

RALEIGH Exclusive UK Distributor - www.raleigh.co.uk

ESSENTIAL UPGRADES

Many bicycles come without any additional equipment. Equipping you and your bike with some essential accessories will greatly improve your cycling experience.

At Raleigh we all ride bikes and know what equipment works best, we are constantly testing out new items ensuring any Raleigh, Avenir or RSP branded product represents the best value for money.

1 SADDLES & GRIPS

The most common upgrades for bikes are more comfortable grips and saddles. The saddle and grips are the 2 key contact points with your bicycle, upgrading these items is a quick and effective way of improving your cycling experience.

The Avenir suspension gel saddle with gel inserts & shock absorbing elastomer system, along with the ergonmically designed comfort grips will greatly improve your cycling enjoyment

2 PUMPS

It's always advisable to carry a mini pump with you in case of emergencies, RSP have a range of lightweight and feature packed products. The RSP alloy barrel mini pump with the clever valve head system, makes it easy to use whether you have a Schrader or Presta valve. This model also has kraton rubber insert panels for added comfort and grip.

3 MUDGUARDS

In order to keep dry and mud free, mudguards are a necessity in the UK. The RSP stinger and tracker mudguards are ideal for mountain bike use, quick and easy to fit, whilst providing effective protection from mud and dirt.

4 COMPUTERS

Whatever your performance level it adds to your cycling experience to use a computer. Computers can present you with all kinds of additional information for example:

Speed, Distance, Time, Temperature, Heart rate, Calories burned

The RSP slimline computer is a lightweight cycle computer, making it easy to keep in your pocket when not with your bike. This model is packed with 20 cycling specific features in total to monitor your progress.

ESSENTIAL UPGRADES

5 COMBINATION LOCK

There are many levels of cycle security, from heavy duty shackle and chain locks, to lightweight flexible coil cables. When your out and about it is not always practical to carry a heavy duty shackle lock, in this scenario a coil cable lock can deter the opportunistic thief. The RSP coil combination lock is easy to use and lightweight enough to be carried around when your riding, the unique integrated LED light illuminates the combination in the dark.

6 LIGHTS

In order to be safe you need to be seen, if you're cycling in the evenings or commuting then you need a reliable light set.

The RSP Night Burst set consists of a super bright 5 LED front, 5 super bright LED rear and performance cycle computer. All items are easily mounted to any bike.

7 BAGS

Depending on your cycle usage you will require different levels of additional cycle luggage. Saddle bags are a common and great addition, with just enough space to keep spare tube, tools, loose change and keys. The Avenir saddle bag is easily fitted to any saddle and is an easy fit saddle bag that comes complete with a trail tool kit. If you require more storage then Avenir offer a range of single / double and triple panniers. For commuters the 100% welded seam waterproof pannier is a must, guaranteed to keep your belongings dry and safe.

HELMETS

Although helmets are not a legal requirement yet, they are certainly the common sense choice. Anyone who has seen the damage inflicted on a helmet from a minor accident will appreciate the need to stay safe and wear a helmet, whatever your age.

Helmets are available in a variety of specification and styles, all Raleigh helmets are designed in the UK, and so have all the key features you will need. When selecting a helmet, it is always advisable to try before you buy; getting a helmet that fits your particular head shape is key for comfort and safety. Always check the model you are considering complies with CE EN 1078, all Raleigh models exceed this safety standard.

ADULT HELMETS

XTREME

The Xtreme is a fully in-moulded helmet, during the construction the micro shell is permanently fused to the protective expanded polystyrene liner.
The benefits of in-mould technology are that it adds rigidity to the helmet and provides greater protection extending the life of your helmet.

Key features include:

- 14 airflow vents for cooling
- Cam lock side strap adjusters for quick and safe strap adjustment.
- Sealed inner pads provide added comfort.
- The ratchet chin buckle allows quick and easy single hand adjustment.

COOLING AIR VENTS

WOMENS
DESIGNED HELMET

MISSILE

The Missile is a lightweight micro shell constructed helmet, providing all round safety and comfort. The Missile includes the LED dial fit retention system, which not only provides a quick and simple method of adjusting the helmet, but also has an integrated rear light for added visibility.

JUNIOR HELMETS

ROGUE

The Rogue is a fully in-moulded junior helmet; with all the features of the Raleigh adult helmets, but in a junior designed shell. This model has the LED dial fit retention system, fitted as standard.

LED Dial fit system

The integrated peak provides frontal protection, the flat back makes it ideal for use with child seats. Other features includecam lock side strap adjusters for quick and secure adjustment, anti pinch buckle, and new softer straps for added comfort and enjoyment

KIDS HELMETS

For the smaller head the Little Terra and Rascal models are ideal, made to the same high standard as the rest of the Raleigh range but in a specifically designed smaller shell size.

LITTLE TERRA

- Zip fit head adjustment system
- Microshell construction
- Anti pinch buckle
- Side lock strap adjusters
- Bright and fun
- Super soft straps for added comfort

RASCAL

- Microshell construction
- Designed to be your Childs first cycle helmet
- Comfort foam padding
- Bright & fun graphics
- Super soft straps for added comfort

YOUTH HELMETS

The Urban and Style are fully in-moulded and stylish cycle helmets. The bright and fun graphics are ideal for the older child.

- In-mould construction
- 23 airflow vents
- Detachable peak
- Cam lock side strap adjusters
- Sealed inner pads
- Dial adjust fitting system
- Soft comfort straps

STYLE

URBAN

Buying the right saddle

Making the right purchase when considering saddles is arguably one of the most important decisions you can make in your cycling life.

Before you make this all important 'comfort' decision there are a number of points you should consider, which if acknowledged properly should help to give you many hours of comfortable cycling.

- The more mileage you do then choose a gender specific saddle, the fact is that women and men are a different shape, and therefore have different needs from saddle shape and design – Your saddle must have an anatomic fit.
- Riding style: Are you a daily commuter, long distance tourer or weekend leisure rider? Your type of riding should strongly influence your saddle choice, the range of saddles developed by Avenir has an offering suitable to every rider style. Your type of riding and the style of bike you ride will effect how you sit on the saddle and the type of support you need.

Suspension gel Saddle
(available in gents and ladies)

Designed for regular leisure and commute riders, with a moderate to high mileage (10 - 70 miles per week)

Comfy classic Gel

For the leisure rider, with Comfort in mind, and where cycling specific clothing is not always a need for shorter journeys Gel filled and spring supported for optimum comfort.

Comfy zone sport foam

For the leisure to sporting rider, who prefers a slimmer cut and rides at a regular interval

AVENIR

The journey begins…

: Avenir Bags :

Cycle luggage covers many areas, when deciding upon which products you need; it is worth considering what you will need carryand how often. The Avenir luggage range offers a variety of bags with different features depending on the cycling you intend to do.

WATERPROOF

: Avenir waterproof range :

This 100% welded seam bag range, means that your belongings are always safe and dry whatever the weather. These types of bags are ideal for touring holidays and commuting. The volume and shape of the Avenir luggage range ensure that whether you're packing for the week or the trek to work there is enough space for all you needs clothing / laptops etc.

: Saddle bags :

Avenir saddle bags range in size from small to large with expandable storage pockets, and even 1 model with an integrated trail tool kit.

: Double and Triple panniers :

These panniers provide a great source of additional storage, ideal for days out and holidays. The storage capacity means you will never be struggling for space.

: Carriers :

Whatever your need or level of performance, Avenir has the perfect luggage carrier for you.

: Pioneer Touring :

This rack is ideal for year round touring and commuting, constructed from lightweight 8mm tubing it's going to stand the test of time. The added feature of the second pannier rail, has 2 benefits, firstly it lowers the centre of gravity to aid stability and also holding the pannier lower means that the top plate can be accessed more easily for an additional rack bag.

: Pioneer Urban :

This lightweight carrier mounts directly to the seatpost so is ideal for full suspension bikes and commuting. The quick release bracket means that no time is wasted at the weekend un bolting the rear carrier.

Avenir Child seats – Buying the right child seat

The superb range of Avenir child seats are packed with design features to ensure your child's safety and comfort. All our products are tested to the stringent EN14344 child seat safety standard. An essential quality stamp when making your child seat choice.

Choosing your Avenir child seat

Avenir child seats offer a range of specification features to suit you and your child.

Snooze Deluxe (OKB020AV)

Ergonomically designed for your child's comfort

- Child proof 5 point safety harness for optimum safety – including safety belt pads for added comfort
- Reclining posture for added comfort and perfect for smaller children who need to rest while your on the move
- Head protection system
- ESS Easy Slide System allowing for optimum positioning of your child seat, providing additional room with child growth
- Adjustable foot rests for optimum fit with growth
- Simplified mounting bracket for any type of frame
- Childs weight range 9-22kg

Snooze Deluxe (OKB020AV)

Snug OKB003AV (Black red)

Snug OKB003AV (Black red)

- Perfect ergonomics for you and your child
- Child proof 3 point safety harness
- Height adjustable foot rests ensure the seat grows with your child
- Childs weight range 9-22kg

For younger children, the reclining Avenir Snooze and Snooze Deluxe are ideal, with the multi positioning of the seat, the reclining back rest for sleepy heads and the secure 5 point child proof harness, the Snooze offers a seat for their youngest riding and with the adaptive footrests will see them through until they're ready for their own wheels!

The Avenir Snug is a great intermediate alternative to the Snooze, with the same simplified mounting system, it can be fitted to almost any conventional bicycle, ergonomically moulded, with adjustable footrests and the safe 3 point harness the Snug is a great value seat.

AVENIR
The journey begins…

Avenir Tags and trailers – family fun

Avenir tag a longs present the perfect introduction to cycling, giving you the parent the peace of mind of the added control – while at the same time giving the unforgettable fun experience of first time rides for your child.
All Avenir Tag a longs are fitted with comfort soft kraton rubber handle bar grips, front and rear mudguards to keep clothes clean and a high visibility flag mounted to the rear of the tag.

All our tags are designed to fold away with the minimum of fuss – for the greatest convenience when in storage

Shimano Gears

Twist grip gear change

Rear mudguard

Down tube mudguard

Folding mechanism

Safety flag

Steel, 6 Speed
When your child is keen to rider further and for longer, gears can help the journey along, the second model in our range is the perfect introduction to geared cycling while still keeping you in control.

Single Speed
Our entry level model offers the simplest of gears – single speed which is perfect for younger riders, allowing them to get on with the riding, their road perception, and awareness of the traffic around them.

Alloy, 6 speed
For those longer expeditions, the lightweight airlite alloy 6 speed geared tag a long offers a true longer distance tag, the weight benefits and gearing offering far more range in your family rides.

Kiddie Trailers

Our easy to store, lightweight yet rugged range of Avenir trailers present a great way to introduce young children to the delights of cycling.

Avon
The steel framed Avenir Shetland offers a rugged choice for taking your younger children out on family expeditions, the steel wrap bumper offering great protection, and the rear cargo pocket will allow you to take along their must have essentials!

Cleveland
The premium Avenir Cleveland, with its rugged hard base, lightweight alloy frame, 16" quick release wheels, rain shield and high visibility flag will easily attach to most conventional bicycles. Your child will be comfortably seated, and secure via the built in safety belts.

All Avenir child trailers offer a maximum capacity of 40kg weight

Avon

Cleveland

AVENIR
The journey begins…

Avenir Car Racks

Avenir cycle carriers make transportation of your cycles easy and safe in any journey. Avenir have designed a range of cycle carrier products to meet the requirements of any rider, and most types of vehicle. Using lightweight alloy construction, 100% assembly, secure overstraps, Avenir Cycle carriers have been constantly revised and developed to give you the upmost performance. Each cycle rack is delivered fully assembled and with a detailed fitting guide.

Avenir Clothing

The importance of appropriate cycle clothing cannot be overstated, the effect of your clothing upon your enjoyment, performance and efficiency is almost as important as the bike you ride.

Weather and Comfort:

2 key factors that should affect your choice of garments are the weather you are likely to experience – which is dictated by the type of rider you are – a commuter is likely to see more wet conditions that a weekend leisure rider for example. Your type of riding also dictates your comfort requirements for example the comfort needs of a road race cyclist are a very different to those of the daily urban commuter.

Weather:

Avenir offer a full range of garments for weather protection for all riders. The Performance waterproof jacket offers 100% protection to all rider types; being 100% waterproof, wind resistant and breathable, this cycling specific jacket can meet all rider needs though especially good for the daily commute. For the longer distance road race cyclist and for riders where the weight they carry is more of an issue than full waterproofing the Avenir lightweight shower proof jacket (W89SML-XXL) offer a cycling posture specific cut, reflective patches and elasticated waist and wrists.
For those wet days where you need to protect the 'civilian' clothing you wear Avenir also present a super range of breathable water proof trousers; offering technical features such as rip stop fabric, Velcro straps to taper fit, and elasticated draw cords.

The cold is a formidable enemy of the cyclist, and we at Avenir have developed a range of garments to help you keep riding when the temperature drops, our winter overshoes (AOS100-102) are designed using neoprene a material renound for its insulating properties. Our winter tights and bib tights (AVTO1S-XXL/ ABTO1S-XXL) are constructed from insulating Roubaix type fabric and are double seated for comfort. Indeed our Roubaix bib tights are also Teflon coated for extra water repellence!
Windtex material and fleece lining have been used on the Avenir winter jersey (AWJO2S-XXL) to offer protection against the cold chill of winter wind. All together the Avenir range is designed to keep you riding, whatever the weather.

Comfort/Performance:

Whether you're an adrenalin junkie mountain biker, speed focused roadie or simply getting to work in the greenest healthiest way you can to beat the traffic. Our Avenir range of clothing has been designed to meet your needs.The New Avenir Casual Jerseys and T-Shirts offer high wicking technology fabrics to keep you dry and cycling specific multi panel construction for optimum fit while riding – and new for 2009 they're available in women's and men's designs.

For Mountain bikers and casual riders where full lycra is not an option, the new MTB Casual and Elite casual shorts offer high performance with modern styling, lightweight and breathable yet hard wearing materials. For the more road orientated rider, the Avenir lycra range of garments offer a range of technical features to aid your comfort and performance, high quality wicking fabrics, multi panel construction for optimum fit, flat lock stitching and silicon grippers all add to your performance on the day.

Locks & Security

Many people these days insure their bikes, independently or part of their contents insurance. The best and most hassle free method is not to have your bike stolen in the first place. Using the correct and most relevant lock can minimise the chance of theft.

When your bike is stored at home, it is advisable to use a heavy duty shackle lock like or chain and padlock like, to secure the bike to an immoveable object. The optimum solution would be to install a ground anchor that can be permanently fixed to the ground of your garage etc.The thief who targets bikes in this way is likely to be better equipped and have more time.

When you're out, it is not always practical to carry a heavy duty shackle lock. There are many alternatives available to protect against the opportunistic thief including:

Coil locks – Shackle locks – Plate locks – Armoured locks

Another consideration is to use an additional flexible cable to ensure that not only the frame is secure but also the wheels.

Another consideration is to use an additional flexible cable to ensure that not only the frame is secure but also the wheels. When leaving your bike it is always advisable to secure or remove any accessories you have on your bike.

The ideal method of securing your bike where possible is to use a shackle lock to secure the frame to an immoveable object, and a coil lock or flexible cable to secure the wheels to the frame.

Lights

Prior to purchasing your new lights, you need to consider what you're going to use the lights for, the range of lights available is vast and there are models tailored to all manner of activities. Standard LED's like the Night Beam provide a great means of additional visibility for occasional riding in well lit areas. The Night Flux front light is specifically design to be a slim line ergonomic shape that is perfect for keeping in your pocket when not in use.

For more frequent usage and commuting RSP have a range of more powerful lights including:

Super bright ½ watt rear lights that provide superb visibility for urban use.
Night Sabre – 1 watt intense light, that is a great front light, and an ideal addition to your bikes lighting

RSP also offer 2 & 3 LED Night Eye micro lights. These have 2 great practical uses. Firstly the bungee cord means that the lights can be attached to clothing and bags and thus providing additional personal lights. Secondly the bungee cord means that they can be fitted to seat posts, handlebars & stays, so they can be used as additional lighting for your bike or as an emergency if you're normal lights fail.
