# 08 FRAMES

## SPECIFICATIONS

**Frame:** HM (High Modulus) and HR (High Resistance)  
**Weight:** 1550 grams  
**Fork weight:** 700 grams (integrated fork)  
**Frame + Fork weight:** 2250 grams with integrated headset, and stem  
**Headset section:** Monobloc and fully integrated while the complete frame is molded  
**Rear Dropouts:** Alloy replaceable on the right side  
**Rear brake passage:** Internal cable guide  
**Bottom bracket:** BSA Diameter - 68 mm  
**Seat post clamp:** Caliper, elliptical, 76 seat angle  
**Sizes:** XS - S - M  
**Warranty:** Frame and Fork - 5 years  
 Paint Job and clear coat - 1 year

**CODE**

## SPECIFICATIONS

**Frame:** VHM (Very High Modulus) carbon, Ultra Tubes, UD finishing.  
**Weight:** 1080 grams with full length seatpost  
**HSC 6 Fork weight:** 315 grams  
**Frame + Fork weight:** 1395 grams  
**Integrated headset:** Steering tube diameter 1 1/8 on top - 1 1/4 at bottom, Diameter on top - 41.7 mm, Diameter at the bottom - 46.8 mm, Slides 45/45  
**Bottom Bracket:** BSA Length - 68 mm  
**Lugs:** HM (High Modulus) carbon, High pressurised bottom bracket, Carbon nanotubes NTC  
**Rear Dropouts:** Compressed carbon monobloc dropouts which are directly molded with the wishbone and the bases  
**Rear brake passage:** Internal cable guides  
**Seat Post clamp:** Integrated E-Post  
**Sizes:** XS to XXL  
**Warranty:** Frame and Fork - 5 years  
 Paint Job and clear coat - 1 year

## FOR EVEN GREATER PERFORMANCE

The 595 ULTRA is different from the 595 PRO TEAM by the stiffness obtained. Due to its specific tube design, recognised by its UC (unidirectional Carbon) finish, a 15% more stiff frame is obtained.

Look is the first frame manufacturer to offer a same product having different degrees of stiffness. Each cyclist is able to adapt his equipment to his type of use.

The 595 ULTRA is suitable therefore for very powerful racers (heavily built, sprinters...) looking for a frame with extra stiffness.

## STIFFNESS ABOVE ALL

A second Ultra and Pro team Model for equally greater performance. As with the 595 model, the 585 Ultra differs from the 585 PRO TEAM by its degree of stiffness.

The 585 Optima Grey has all the characteristics of the 585 Origin, but with a special geometry to achieve an even more comfortable ride. The top tube has been shortened by 15mm and the head tube heightened by 16mm, resulting in a more upright position.

## SPECIFICATIONS

Frame: Mix of HM (High Modulus) and HR (High Resistance)  
 Weight: 1100 grams  
 HSC 4 Fork weight: 360 grams  
 Frame + Fork weight: 1460 grams  
 Integrated headset: 1" 1/8 top and bottom, Diam 41mm, Slides - 36 int/45ext  
 Lugs: No Lugs "Tube to Tube" - technology with carbon straps  
 Rear Dropouts: Alloy, replaceable at the rear  
 Rear brake passage: External cable guide  
 Bottom bracket:  
 BSA Diameter - 68 mm  
 Seat post caliper:  
 Seat post diameter - 31.6 mm  
 Sizes: S to XL  
 Warranty: Frame and Fork - 5 years  
 Paint Job and clear coat - 1 year

## 3T technology

The 555 uses "Tube to Tube" technology. So, for this model there are no aluminum or carbon lugs, nor monobloc construction. For the 555, oversized tubes are molded then cut, shaped at the ends in order to be assembled as if they were welded. Welding is replaced by bonding reinforced by carbon strips in order to ensure perfect cohesion of the frame assembly.

To optimise frame comfort, our engineers have developed a special geometry for the chain and seat stays. The Comfort Concept chainstays present a centre section inversion which is achieved by flattening. This creates an inflection point at the middle of the base and so improves vertical flexibility. At the same time, this shape increases the base horizontally, and improves lateral stiffness. The seat stays are slightly curved in order to encourage the absorption of vibrations and so optimizing comfort.

\* The 555 is only available as a complete bike.

## HSC 4 SL

CODE: FORK/HSC4SL

- Diameter: 1 1/8"  
- Height: 300mm  
- Weight: 325g

Lightness, rigidity, comfort. The use of solid HM fiber (no aluminium insert inside) results in outstanding comfort thanks to the absorption of vibrations. Excellent lateral rigidity due to the triangular section of its arms

## HSC 5 SL

CODE: FORK/HSC5

- Diameter: 1 1/8"  
- Height: 300mm  
- Weight: 295g

The new HSC5 SL fork for integrated headsets: 295 grams (stem not cut). 100% monobloc carbon. Lightness, rigidity, steering accuracy, safety and comfort have been optimized through the use of very high modulus fiber. Carbon dropouts. Conical flange molded in fork crown.

## ERGO STEM

CODE: STEM/HSC

- Al 7075 cold forged  
- Fitting: 0 to 150mm in length  
- From: -120 to +120mm  
- Diameters: 1 1/8" (1" adapter incl.)  
- Diameter: 38.1mm  
- Weight: 400g

Can be fitted to the ideal position, with a maximum rigidity. Used by the track team and the pro team. Conical flange molded in fork crown.

## ERGO POST 4 + 4 TI

CODE: EP4

CODE: EP4TI

Material: 100% Carbon HR  
Saddle Clamp UD Carbon  
Length: 300mm  
Diameter: 27.2mm  
Bolts: Titanium  
Weight: 180g

## M T B

### 4x4 PEDAL

CODE PP/44 SRP \$199.00

Provides unrestricted movement of the cleat in the pedal. Also allows for easy, no look, no kick step in. Excellent mud flow through. Body made of stainless steel. Spindle CrMo.

### QUARTZ RANGE

### NEW NEW NEW

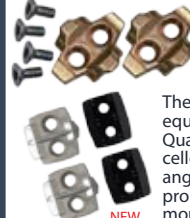

CODE PP/QTZ/C/TI TBA  
CODE PP/QTZ/C TBA  
CODE PP/QTZ TBA

The Quartz shows very light weight for a product at less than 125 grams. It is by far the lightest weight on the market in this price range. Completely hollowed around the axis line, excellent evacuation of mud.

### 4X4 CLEAT

CODE CLEAT/44 TBA  
CODE (QUARTZ) TBA

Cleats for the LOOK 4X4 pedals, compatible with all Shimano SPD-compatible shoes.

The steel micro toe-clip that equips the whole range of Quartz pedals ensures an excellent friction coefficient. The angular and lateral liberties proposed protect the knees of mountain bikers.

## C L E A T S

### KEO GRIP

CODE CLEAT/K/G 4.5°

The new KEO Grip Cleats are non slip and thus more reassuring when one gets off the bike. The memory position is another asset of KEO Cleats. This asset allows for quick cleat replacement.

### KEO CLEATS + COVER

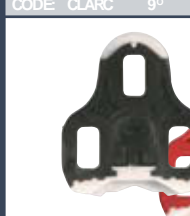

CODE CLEAT/K 0°  
CODE CLARC/K 9°  
CODE COVER/KEO

CODE CLARC 9°

# 08 MTB - ALL NEW

## SPECIFICATIONS

**Frame:** HM Carbon Fibre MIXTE MONOBLOC - TTT

**Weight:** 1200 grams

**Headset section:** HALF INTERGRATED - FSA carbone

**DIAM:** 41mm - PENTES : 36 int / 45 ext

**Rear Dropouts:** Black light alu, replaceable right hanger, rear dropout

**Bottom bracket:** BSA Diameter - 68 mm

**Seat post:** Look E-Post 'Reverse 5'

**Sizes:** XS - S - M

**Warranty:** Frame - 5 years

Paint Job and clear coat - 1 year

Lightness, comfort and ease of use are the main features of this new model. Owing to the use of HM carbon fibres, in its mixed conception, single shell and tube to tube, the engineers have optimized the frame's weight. The 986 Pro Team bike effectively only weighs 9.4kg (in S size with pedals).

The bases and the braces have a specific design that improves comfort.

The new saddle stem and its elastomers allow filtering vibrations and absorb shock, which usually increase fatigue as the kilometres go by.

For Miguel Martinez Olympic champion in Sydney and four times world champion who took part in the development of the new frame, The 986 is astonishingly easy to use and comfortable. I have only used aluminium frames. I am sure that my performances would have been even better if I had a bike like this one.

### 4x4 PEDAL

Provides unrestricted movement of the cleat in the pedal. Also allows for easy, no lock, no kick step in. Excellent mud flow through. Body made of stainless steel. Spindle CrMo.

### QUARTZ RANGE

The Quartz shows very light weight for a product at less than 125 grams. It is by far the lightest weight on the market in this price range. Completely hollowed around the axis line, excellent evacuation of mud.

### 4X4 CLEATS

Cleats for the LOOK 4X4 pedals, compatible with all Shimano SPD-compatible shoes.

The steel micro toe-clip that equips the whole range of Quartz pedals ensures an excellent friction coefficient.
