## PURE ENERGY.

**[Pas|sion** Middle English via old French and late Latin passio, -ionis from Latin pati -'suffer'  
1. strong, barely controllable emotion,  
2. strong enthusiasm.]  
(Excerpts from the Oxford dictionary of contemporary English)

### MAGURA 2008 – Quality made in Germany!

Our customers are among the most demanding on earth. They demand innovation, quality, performance, value and rock-solid backup. Satisfying and exceeding their expectations is what drives MAGURA on, year on year.

Our products begin life with a good helping of inspiration, backed up by German thoroughness and an eye for detail. We carefully plan our products using theoretical calculations and Finite Element Analysis to determine the safest, strongest but lightest way of making our brakes and forks.

Our in-house test facilities then stress, strain and pound these designs to ensure they meet the highest standards while we inspect them, refining and improving them as we go.

More testing is done using on-board data-logging in the lap and in the real world as we set up and tune these chassis.

Finally, the prototypes are given a thorough and merciless testing by our external test riders. Whether they're World Cup racers, lunatic Alps crossing crash test dummies, global cycle-tourists in hot deserts and freezing mountains or hard-riding, fast-living, 500 km-a-week bike messengers in Stuttgart, our products are expected to perform under all conditions with no excuses.

Only when everyone is satisfied; from our engineers to our test riders, do we put these new products into production. Production that is done, by hand, in Germany. You don't think that we would trust anyone else to make our products after all that effort, do you?

We have done it like this in the past and will continue to do so in the future. MAGURA has been in existence since 1893 and we have been building top-notch bike brakes for 20 years and high quality, German-made suspension forks for the past five years.

At a time when our rivals are outsourcing their manufacturing to the Far East, we feel that our insistence on making our products in-house counts for a lot.

We hope you do too!

For you, our customers, this uncompromising attitude represents a promise. A long-term tradition of quality made in Germany – this is our pledge to you!

Have fun seeing what we have in store for you for 2008!

**MADE IN  
GERMANY**

[www.magura.com](http://www.magura.com)

There are a lot of brands out there that talk about offering an open communication with the end consumer. At MAGURA action has always spoken louder than words. Every month we welcome more than 120,000 bikers from all over the world to [magura.com](http://magura.com). It's no wonder; after all, our website is a valuable information source that offers first class information on our current range and also stuff on previous model years going back to 2000. You can also check out cool, limited edition MAGURA gear in our shop and buy stuff round the clock.

Only @MAGURA: The forum where you can get help and advice on our products directly from MAGURA staff, quickly and for free.

As you can see – there are a lot of good reasons to stay tuned to [www.magura.com](http://www.magura.com)!

✓ When it comes to test our stuff among others the Stuttgart based bike courier company "Die Radler" have been a solid partner of MAGURA over years.

## WHY CHOOSE MAGURA BRAKES AND SUSPENSION?

### Know-how

MAGURA has always been a pioneer of hydraulic brakes for bikes producing the first widely accepted stoppers as early as 1987. The knowledge gained from over 50 years experience developing brakes for BMW motorcycles made the technology transfer possible.

There are good suspension forks and good disc brakes out there. However, the interaction between the two can often be a let down. Not so with MAGURA forks, that are built with the main specification that they are to be used with powerful disc brakes (cf. page 23).

### Reliability

The reliability of MAGURA products is legendary. Our components have been celebrated by the bike press for years. German consumers are very demanding (have a look on their cars ...!) and bike components are no exception to that rule. Since 1998 every year more than 25,000 readers of German Bike Magazine, "Mountain Bike", have voted for MAGURA, seven times in a row, as the "Best Brand", in the category brakes.

MAGURA brakes work with mineral oil, are therefore uncomplicated to work with, (no poisonous/carcinogenic brake fluid) giving years of trouble free service.

### Guarantee\*

MAGURA gives a unique 5-year leakproof guarantee for the lever assembly and caliper of all brakes, if you register the brakes you've bought at [magura.com](http://magura.com)

### MAGURA Passion Point Dealers

What's the point of having the best parts on your bike, if they are not set up properly or dialled into your riding style and weight? It's for this reason that, in the last few years, MAGURA has built up a qualified dealer-network of specialists to give you the best service possible.

- > Complete stock of all MAGURA products
- > Spare parts supply within 48 hours
- > Great service and technical know-how that guarantees a long-term enjoyment of your MAGURA product
- > Passion Point dealer listing at [magura.com](http://magura.com)\*

### Online

Using our very popular website [magura.com](http://magura.com) (over 120,000 visitors per month) we're able to keep you right up to date with what's important at MAGURA. We offer both dealers and end-users, years of experience and hot lines that are among the most competent of the biz out there.

\* Both guarantee and Passion Point handling differs in the USA. Checkout [magurausa.com](http://magurausa.com) or give the US colleagues a call for details (details on the last page of this catalogue).

✓ Regular training seminars for retailers guarantee a good product knowledge from our Passion Point Dealers – recognisable by the Passion Point badge. Check them out at [magura.com](http://magura.com)

^ German expertise: Continuous quality control during the production care for reliable products featuring exemplary longevity.

^ More than 100 racing service activities per year worldwide sharpen our high-end brand profile.

^ The R & D department in the shadow of Bad Urach Castle.

Picture: Marco Toniolo

^ Data logging also directly on the trails!

^ Before the series start of every product it has to undergo merciless endurance tests both in our test labs and outside on the trails around Bad Urach.

## MADE BY MAGURA | GERMANY

### The technology

Every MAGURA product is designed and made in Germany – the slogan made in Germany isn't marketing blah-blah, but fact.

All MAGURA products are tested by the German "TÜV", (the German technical testing/safety department), the actual production in Bad Urach meets the most stringent demands in industrial standards.

This is a necessity for the customers of our motor-bike products, for companies such as BMW and KTM, but the resulting advantages are also an important factor for our bike parts. State-of-art production units, highly motivated, bike-obsessed staff, and testing trails as far as you can see guarantee high quality products.

### The human factor

It has often been said, that many products are increasingly interchangeable. The human element as a competitive factor? MAGURA is well known for its lasting staff continuity – the Passion People are well known and respected by many as competent partners. We have kept a good and close relationship with end-customers for many years. Whether it's at one of the more than 100 shows, races or outdoor events, via the world wide web or through our competent service department – with MAGURA you are well looked after, not only before, but also after the sale.

As you can see, there are many good reasons to go for MAGURA components.

v The German bike legend MAGURA. Obsessed bikers with the best motivation right at the front door: Forest hills and single trails as far as the eye can see ...  
[www.badurach.de](http://www.badurach.de)

Taking a short break during a testride in fall 2006.

Picture: Jens Staudt

Ground contact isn't that important to you. There is (almost), no terrain where a **Freerider** won't go. Tough and stable components are a must have. Here they are.

There are bikers out there for whom uphill is just a means to an end. The downhill fun is having absolute priority for them. With lots of travel and robust components the **Enduros** must cope with technically hairy downhills and bikepark weekends.

You're an all-rounder. You love long and sweeping trails, up as well as down. The optimum mix of light weight and stability is the hall mark of your **All Mountain** components meant for a broad spectrum of use.

Mile after mile over the dusty trails as well as hard fast tarmac. On every ride your bike should be the epitome of uncomplicated – and naturally the parts for your **Touring** adventures shouldn't cost the earth.

Race-orientated means for us the minimum weight that is technically possible. Every gram extra weight can be the decisive factor between winning or losing for you, the **X-country** maniac.

## WOTAN. PUSHING THE LIMITS.

Enduro and Freeride air spring fork featuring an awesome and absolutely unique Double Arch Design (DAD) offering maximum stiffness (cf. page 25) with thru-axle and Postmount 8" disc mounts. Designed and manufactured in Germany.

**New 2008** | New RCL remote lever, new decals.

**Technical features** | Unique Albert Select system featuring an adjustable platform compression damping, optionally with remote lever (details cf. page 24). Superstiff 36 mm upper legs. Cold forged Aluminium 6082 T6 fork crown with integrated cablestops for the new RCL remote control. Maxle™\* thru-axle system with q/r (cf. page 25). All adjuster knobs made of high quality aluminium.

**Adjustment possibilities** | Comfortable Flightcontrol Remote System, that allows adjustable on-the-fly adjustment of the travel from 160 mm to 120 mm (details cf. page 24). Adjustable platform compression damping. Rebound, Preload (air pressure).

**Travel, (target) weight** | 160 mm, 2,505g/5.52 lbs (without Maxle™ 20 mm axle and FCR Remote lever).

**Disc mounts** | PM 8".

**Versions, colour** | Disc only/matt black. Custom colours in the MAGURA Customize program (cf. page 23).

**Note** | Approved for disc brake use up to 210 mm/8.5". Delivered with air pump. Also available with 2<sup>nd</sup> RCL remote lever for Albert Select.

### MAGURA CCS: VITAMINS FOR YOUR CANNONDALE HEADSHOK FORK

Our Cannondale Cartridge System (CCS) has won a lot of friends among Cannondale riders.

No wonder, after all it enhances sensitively the comfort and performance of a Fatty Ultra fork. CCS, Viagra from the Passion People for the Headshok forks of the American bike legend.

**Compatibility** | Headshok fork "Fatty Ultra" and "P-Bone" from model year 2000 with 80 mm travel.

**Technical details** | Actual 80 mm travel with lockout and externally adjustable compression damping. Allowing your Fatty to be substantially easier to adjust to your individual riding style. Greatly reduced progression owing to an increased air-chamber, allowing more usable travel.

**Weight** | 230 g/0.507 lbs.

Contact your local Cannondale dealer or MAGURA Passion Point or [eighty-aid.com](http://eighty-aid.com) – these specialists shops will have the suitable tools for the conversion and will be able to advise you. Detailed information at [magura.com](http://magura.com)

## MAGURA CUSTOMIZE PROGRAM.

You want a suspension fork that comes in an intriguing colour that you do not find everywhere? The MAGURA Customize Program was realized to make your dreams come true. Check out which of the nine different colours fit best to your bike. The Customize Program is possible with every MAGURA fork of model year 2008. Just click [magura.com](http://magura.com) and check out your factory tuned MAGURA suspension fork delivered to your favourite dealer.

## PERFECTLY SYNCHRONIZED BIKE BITS. FOR MAXIMUM PERFORMANCE.

You will not find any allegedly cool suspension forks with us. You know, the ones that look great, yet buckle at the knees through the braking force of a powerful disc brake.

The forces that are transferred from a disc brake to the suspension fork are enormous. The larger the disc (particularly over 200 mm), the greater are the forces produced. These can lead to early fatigue or to breakages with inferior suspension forks.

With MAGURA suspension there is no need to worry in that context.

All our products have been designed constructionally from the start for use with large disc brakes. This is why all our forks are approved for discs up to 210 mm/ 8.5", we consequently give a full warranty to this effect as well. You will not find this with many other suspension manufacturers.

The perfect synergy between our products is apparent. The characteristics of our forks and rearshocks are synchronized in such a way that the combination of both will always be the guarantee for the perfect ride.

The computerized stress analysis of the new DAD lower legs are a clear proof that our suspension forks are particularly suited to being used with disc brakes. On the contrary to many other manufacturers, careful calculations ensure that even at the most sensitive areas of the suspension fork loads are spread evenly ensuring that stress and high bending loads are kept to a minimum.

**All MAGURA suspension forks are approved for disc brakes up to 210 mm/8.5"!**

√ Suspension fork stress analysis.

MADE IN  
GERMANY

## GERMAN SUSPENSION TECHNIK – 100 % MAGURA.

**Riders out there have been relying on our brakes for a long time. What could then be better than doing the same when it comes to suspension systems? There are many good reasons for this.**

Genuine quality shows up in the detail. Constructional solutions shouldn't just be gimmicks that give up the ghost after the third weekend, but should be so technically developed that they keep on fulfilling their function, even after many years of demanding use.

At MAGURA products are more and more carefully integrated – offering our customers indescribable advantages – you've just got to experience. Our suspension program is being completely developed and manufactured at our main factory in Bad Urach, Germany, which gives our suspension range the quality seal of "Made in Germany" as well.

**albertselect**  
adjustable platform technology

^ External on/off of platform compression damping, trade version comes with remote control as standard equipment with Laurin. Toolless externally adjustable height of the platform, cf. adjust range in graphic, no pump necessary! All adjuster knobs are made of high quality aluminium.

**Standard with Wotan and Laurin.**

**DLO**  
Dynamic Lock Out

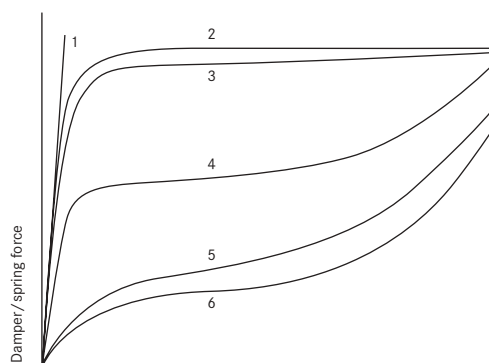

^ Dynamic lockout (DLO), that maintains the sag, thus featuring better ground traction than standard LO systems.

**Available with Durin, Menja, Odur.**

**flightcontrol**  
remote

^ Adjustable travel on-the-fly features easier climbing without any negative impact on frame geometry. Ensures more-over automatic adaption of the main and negative spring curve in the lowered position, thus no bottoming.

**Available with Wotan and the new Laurin FCR 130.**

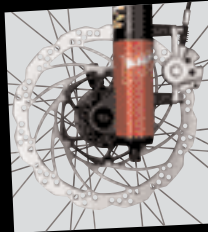

Travel

Compression damping curves

- 1 Standard LO
- 2 LO with Blow off
- 3 Albert Select ON upper Platform boundary
- 4 Standard Platform
- 5 Albert Select ON lower Platform boundary
- 6 Albert Select OFF/sensitive standard compression

The rider has the easy choice with Albert Select, just with a adjuster turn on the fork (optional with remote lever on the handlebar), to switch in between a widely adjustable platform mode (between line 3 and 5) and an open sensitive rock eating mode (line 6).

Maxle™ is a registered trademark of Sram Corp.

Double Arch Design

^ **Maxle™**  
Quick release thru-axle system. Maxle™ is a registered trademark of Sram Corp. Combines the stiffness of thru-axle systems with the comfort of quick releases.  
**Available with Wotan.**

^ The unique Double Arch Design (DAD), ensures maximum torsional stiffness, ultimate steering precision and minimum torsion while braking.  
**Standard with all suspension fork models.**

Disc brake installation on MAGURA forks:

^ Wotan with 20 mm thru-axle and and PM 8" disc mounts.

^1 Laurin, Menja and Odur with 100 mm standard hubs and IS 6" disc mounts.

^2 Durin with 100 mm standard hubs and PM 6" disc mounts.

^ **New:** Remote Control Lever (RCL) featuring perfect ergonomics, easy mounting and perfect function.  
Just 52 g/0.115 lbs including cables!  
**Standard equipment with Wotan, Durin and all Laurin models.**

√ Corrosion at the drop-outs, nightmares about mounting your disc brake? Not with MAGURA! Both dropouts and disc mounts are protected by stainless steel inserts that we call corrosion protectors. Corrosion doesn't stand a chance. Mounting a disc brake becomes a breeze.  
**Corrosion protectors come standard with all suspension fork models except Wotan and Durin.**

√ **Safety dropout (SDO):** 45° opening for perfect hub engagement (less quick release load, as the brake torque onto the hub is transferred directly into the dropout).  
**Standard with all forks except Wotan.**

< Not just an air pump but one of the best products you can find on the market (according to the magazines) – the MAGURA suspension air pump.  
**Standard equipment with Wotan, Durin, Laurin, Menja.**

REARSHOCK

In winter the MAGURA test crews visit regularly the Canary island La Palma for comprehensive testing.

## HUGIN. THE AIR REARSHOCK.

Being uncompromisingly lightweight and offering various adjustment possibilities, our air rearshock is the ideal partner for a Laurin, Menja or Odur air suspension fork. Designed and manufactured in Germany!

**New 2008** | New decals.

**Technical features** | Air shock with auto-inflate negative chamber and damping unit. High quality ball-and-socket are standard equipment. The negative spring is ensured by elastomers which have been proven millions of times in the automotive industry.

**Adjustment possibilities** | Preload (air pressure), rebound, high-/low-speed compression (Albert Plus system).

**Length, travel** | 165 mm/6.5", 38 mm/1.5", 190 mm/7.5", 50 mm/2", 200 mm/7.88", 50 mm/2", 222 mm/8.75", 65 mm/2.55".

**Weight** | From 255 g/0.56 lbs onwards.

**Recommended forks** | Durin, Laurin, Menja, Odur.

^ Delivered with  
air pump.

## GUSTAV M. THE WAR-HORSE.

More brake power doesn't exist. The by far most powerful disc brake on the market! The Gustav M is available in a number of versions with a selection of disc diameters as well as for various fork models that don't come with the International Standard mounts (see table above). Designed and manufactured in Germany!

No changes to previous model year.

**Technical features** | Open hydraulic disc brake system with reservoir. Super stiff dual piston floating caliper with automatic pad wear adjustment. Aluminium brake lever with 3-finger blade and integrated reach adjust. Quick fit hinge type fitting for rapid mounting and dismounting. SL-rotor for optimal cooling.

**Weight** | Front from 640 g/1.7 lbs per brake including disc, rear from 580 g/1.3 lbs per brake including disc (depending on model).

**Colours** | Brake lever and caliper black/silver.

**Gear shifter compatibility** | Compatible with all Shimano STI, Sram trigger and Sram and Rohloff twist grip shifters. Not compatible with Shimano Dual Control.

**Note** | Available in several versions (cf. table below). We warmly recommend Gustav M also for tandem use!

**Guarantee** | 5-year leakproof warranty after end consumer online registration at [magura.com](http://magura.com)

# marta<sup>®</sup>SL

### MARTA SL. THE XC BENCHMARK.

The lightest full hydraulic disc brake on the market-period. Designed and manufactured in Germany.

**New 2008** | 203 mm rotors for All Mountain use.

**Technical features** | Open hydraulic disc brake system with completely integrated reservoir. Dual piston fixed caliper with automatic pad wear adjustment in a smart one-piece design for maximum stiffness. Pad wear thickness can be checked without removal of the pads. Awesome looking SL rotor for improved cooling. Featherlight carbon 2-finger blade with integrated reach adjust.

**Weight** | 324 g/0.7 lbs.

**Colours** | Brake lever and caliper red or silver.

**Gear Shifter compatibility** | Compatible with all Shimano STI, Sram trigger and Sram and Rohloff twist grip shifters. Not compatible with Shimano Dual Control. Dual Docking. Trigger shifters can be mounted both inside and outside the brake lever.

**Note** | Available in several versions (cf. table on the right).

**Guarantee** | 5-year leakproof warranty after end consumer online registration at [magura.com](http://magura.com)

MAGURA has been the  
pioneer of this technology  
in 2002. Main benefits  
are a weight saving and  
increased stiffness.  
**Available with Gustav  
M, all Marta models and  
Julie.**

## MAGURA – GERMAN DISC BRAKE TECHNOLOGY.

MAGURA disc brakes are not just simple me-too products. MAGURA was one of the pioneers launching fully hydraulic disc brakes. We never dealt with anything else, cables suck, when it comes to brakes!

Right from the start we have been increasing our lead over the competitors. A bike obsessed team of German engineers is permanently refining and improving our stoppers. Those who know what solid state-of-art German engineering know-how can realise might agree that often those small details are making the difference.

**MAGURA – where technology meets character.**

√ **BAT –  
Bite Adjust Technology**  
Individual bite point  
adjustment on-the-fly.  
BAT makes it possible!  
**Available with Louise  
Carbon and BAT.**

#### Attention!

1. Disc brake calipers can generate a lot of heat during extreme riding conditions. The resulting heat transfer from the caliper to the fork and/or frame can have a negative influence on the mechanical characteristics of both the fork and/or frame.
2. Insufficient heat transfer from the brake caliper to the frame and the fork, caused by fork and/or frame components having low heat transfer characteristics (e.g. carbon rear triangles) can cause the brake caliper to overheat, with the possibility of a total failure of the brake system. This can cause serious personal injury to yourself and/or others. With respect to product liability we remind you that in this context the manufacturer is responsible for the correct function of the complete bicycle.
3. We expressly point out that no MAGURA disc brake is compatible with Shimano Dual Control units.

Specifications are subject to change without prior notice.

**^1 Gustav M brake pads**  
Type 1.2 Endurance  
(series pad). Delivered  
with screw and spring!

**^2 MAGURA hose guides**  
A smart way to fix your  
rear brake hose.  
Installation is a snap.

**Compatible with Louise  
from model year 2007  
onwards and all Marta  
models.**

## THE TUNING CORNER. ACCESSORIES FOR MAGURA DISC BRAKES.

### Attention!

We stipulate clearly and precisely that for all our disc brakes only GENUINE MAGURA brake pads and accessories must be used! Otherwise the 5-year leakproof warranty and all warranty claims in respect to MAGURA will become null and void! The use of brake pads from other manufacturers can lead to over-heating and the complete loss of brake power, endangering not only yourself but also others! Pay attention when buying new pads that they are the genuine from MAGURA, he can be easily checked by the included cotter pins and screws!

### Compounds disc brake pads:

Performance: For maximum brake power  
Endurance: With optimized longevity.

**✓ MAGURA service kit**  
for disc brakes – contains  
everything you need to  
bleed your MAGURA disc  
brake.

**✓ Professional  
Bleed-Kit**  
Bleeding a MAGURA disc  
brake is a breeze with  
this kit. Comes with a  
250 ml bottle Royal  
Blood and accessories.

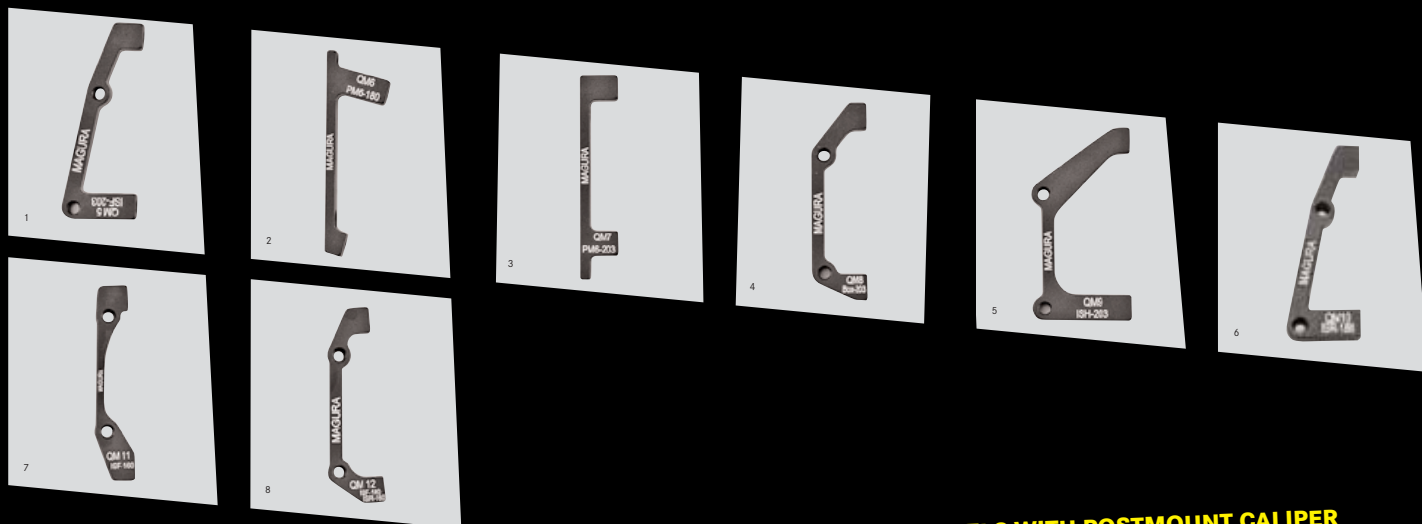

**✓ MAGURA foldable  
tool**  
Includes all allen and  
torx keys that you'll  
find on your MAGURA  
stoppers and will be a  
versatile friend in case  
of problems.

**✓ MAGURA Royal Blood  
mineral oil**  
Available in bottles of  
50 ml, 250 ml and 1 litre.

**✓ Disc brake cleaner.**  
MAGURA Racing Service  
proven.

**✓ Centerlock adaptor**  
makes wavy MAGURA  
SL rotors compatible  
with Shimano, DT or  
Mavic centerlock hubs.

## ADAPTORS FOR LOUISE FROM MODEL YEAR 2007 ONWARDS AND ALL MARTA MODELS WITH POSTMOUNT CALIPER

HS 33

MADE IN GERMANY

### HS 33. THE LEGEND.

**Indestructible, legendarily reliable. The best rim brake on the market. Period. Designed and manufactured in Germany!**

**New 2008** | Now also available with 4-finger aluminium lever blade! Good news then for trial maniacs!

**Technical features** | Closed hydraulic rim brake system without reservoir. Streamlined aluminium brake lever with a cold forged aluminium lever blade and integrated Turbo Pad Wear Adjuster (TPA). Thanks to the EVO 2 mounting system OE installation is a piece of cake. Compatible with tyres up to 2.5". There's no doubt about it – the MAGURA classic is more vital than ever!

**Weight** | 920 g/2 lbs/set (incl. EVO 2 Booster).

**Colours** | Matt black, silver.

**Gear Shifter compatibility** | Compatible with all Shimano STI, Sram trigger and Sram and Rohloff twist grip shifters. Not compatible with Shimano Dual Control.

**Note** | Also available as FIRM-tech version (cf. page 51).

**Guarantee** | 5-year leakproof warranty after end consumer online registration at [magura.com](http://magura.com)

HS 33

FREERIDE

ENDURO

test results at [magura.com](http://magura.com)

**LIMITED EDITION HS 33 20<sup>th</sup> ANNIVERSARY.  
NOW OR NEVER!**

**MAGURA rim brakes are having their 20<sup>th</sup> anniversary!**

**Technical features** | Cf. HS 33, red anodized lever blade and CNC booster.

**Weight** | 920 g/2 lbs/set.

**Note** | Only 800 sets worldwide. Delivered in a casual shoulder bag.

**Colours** | Titanium with red anodized lever blade and CNC booster.

**Gear shifter compatibility** | Cf. HS 33.

**Guarantee** | Cf. HS 33.

# HS 11

## HS 11. THE APPETIZER.

The entry into the MAGURA hydraulic brake world!  
Designed and manufactured in Germany!

No changes to previous model year.

**Technical features** | Closed hydraulic rim brake system without reservoir.  
Composite brake lever with a cold forged aluminium lever blade.

**Weight** | 950 g/2 lbs/set (incl. EVO 2 Booster).

**Colours** | Matt black, lever blade silver.

**Shifter compatibility** | Compatible with all Shimano STI, Sram trigger and Sram and Rohloff twist grip shifters. Not compatible with Shimano Dual Control.

**Guarantee** | 5-year leakproof warranty after end consumer online registration at [magura.com](http://magura.com)

# HS 33

## HS 33 FIRM-TECH. FEATHERLIGHT, HYDRAULIC, UNIQUE!

Our rim brakes HS 33 and HS 11 are also available in the featherlight FIRM-tech version. In combination with a state-of-art MAGURA suspension fork or a fork of 28" market leader Suntour, you will get a unique system only available from the MAGURA Passion People! Designed and manufactured in Germany!

No changes to previous model year.

**Technical features** | FIRM-tech is a featherlight high-tech package consisting of a slimline HS 33 rim brake fully integrated into a state-of-art MAGURA suspension fork. The brake is mounted behind the upper legs of the fork for maximum brake power. A fresh and unique look of the bike is another aspect not to neglect. FIRM-tech is not only the abbreviation for **Fully IntegRated Magura Technology**. FIRM-tech is 100% function. No adapters, no boosters, just full integration.

**Weight** | 544 g / 1.19 lbs per set, plus weight of the matching MAGURA fork.

**Colour** | Silver.

**Gear Shifter compatibility** | Compatible with all Shimano STI, Sram trigger and Sram and Rohloff twist grip shifters. Not compatible with Shimano Dual Control.

**Note** | FIRM-tech is compatible with rim widths from 22 - 26 mm.

**Guarantee** | 5-year leakproof warranty after end consumer online registration at [magura.com](http://magura.com)

### Attention!

We expressly point out that no MAGURA rim brake is compatible with Shimano Dual Control units.

Specifications are subject to change without prior notice.

Picture: Vaude

#### MAGURA brake pads

for rim brakes. The Passion People offer 4 different brake pad compounds for all rim surfaces

- > **Black**, standard pad supplied with all our brakes. Ideal for polished rim surfaces.
- > **Grey**, standard pad for anodised (= black) and ceramic coated rim surfaces.
- > **Red**, race-oriented soft pad for polished rim surfaces.
- > **Green**, race-oriented soft pad for anodised (= black) and ceramic coated rim surfaces.

All pads come in a package of 4 pads.

#### ^ MAGURA 90° connection kit

(banjo fitting) makes the necessary 90° hose connection possible onto brake levers for recumbents, HPV's or on time trial bars. Only compatible with HS 33 rim brakes! Kit for 2 brakes.

#### ^ MAGURA braided hose kit

Cool look and bomb proof. No weight penalty compared to standard hose. Watch out for the original with the yellow MAGURA marker! The braided hose kit is available as either a complete kit for a pair of rim brakes or as a single hose with a length of 1,700 mm with both 0° or 90° fitting. Can be easily shortened with cable pliers!

#### ^ MAGURA service kit

for rim brakes Contains everything you need to repair or bleed your MAGURA rim brake. 230 cm spare hose, 50 ml bottle MAGURA Royal Blood, syringe, filling and bleeding tube and various small parts.

#### ^ MAGURA hose guides

A smart way to fix your rear brake hose. Installation is a snap. The guides are just screwed into the cable stops. The hydraulic hose just clips in. Hose guides supplied as a pair.

#### ^ Dedicated MAGURA mounts (Trial kit)

Standard mounting parts on many trial bikes. No q/r and booster option! 120 g/0.265 lbs.

### THE TUNING CORNER. ACCESSORIES FOR MAGURA RIM BRAKES.

#### Attention!

We stipulate clearly and precisely that for all our rim brakes only genuine MAGURA brake pads and accessories must be used! Otherwise the 5-year leakproof warranty and all warranty claims in respect to MAGURA will become null and void!

#### √ MAGURA Royal Blood mineral oil

We cannot repeat it often enough. The bleeding of a MAGURA brake is not a routine chore, because the MAGURA Royal Blood mineral oil does not absorb water (like DOT). It also lubricates the whole braking system. If ever filling or bleeding is necessary, after a crash, use only MAGURA Royal Blood hydraulic oil, never DOT. Available in bottles of 50 ml, 250 ml and 1 litre.

#### √ MAGURA foldable tool

Includes all allen and torx keys that you'll find on your MAGURA stoppers and will be a versatile friend in case of problems.

#### √ MAGURA torque tool

A professional tool for serious bikers.

#### √ MAGURA bitbox

contains bits of all keys that you'll find on your MAGURA stoppers. Smart!

#### √ The MAGURA bicycle care line.

Bike cleaner, chain oil and other stuff.
