Ergo Short Inserts

Ergo Fit Insoles

Ergo Grip

Ergo Lite construction

Energy Ride

Perfect energy transmission

Energy Outsoles

Energy Lock

Terra Grip Outsoles

Footwear **Energy Ride**

TERRA GRIP OUTSOLES

High performance cross-mountain outsoles. Rugged combination of rubber lugs for excellent grip and tuned composite inserts for trail riding

Terra Grip Carbon Outsole

The ultimate cross-mountain outsole. Rugged combination of Contragrip rubber lugs for excellent grip and tuned carbon insert for trail riding comfort, durability and control.

Terra Grip Outsole

Cross-mountain specific outsoles that offer a precise combination of Contragrip rubber lugs for traction and a tuned insert. The aim is to provide maximum comfort and optimal trail performance on and off the bike.

ENERGY LOCK

Full carbon 3D heel counter for maximum heel hold and minimal weight. It precisely holds the heel above the calcaneus bone. Its ultra light full carbon construction lowers weight by over 50% compared to injected heel counters

ENERGY OUTSOLES

Lightweight outsoles featuring advanced composite materials for maximum energy transfer, comfort and minimal stack height

Energy Full Carbon SL Outsole

Super light, high modulus carbon outsole for the perfect balance of stiffness, lightweight and comfort. 4mm sole thickness. The lightest of our 5 road and triathlon outsoles.

Energy Full Carbon Outsole

Patented technology, developed with top pros, extremely lightweight, stiff and thin (5.5 mm). Low stack height (7.5 mm) closer to the pedal for optimal energy transfer.

Energy Alutex Outsole

The bi-density Alutex outsole with aluminum enhanced nylon and glassfiber insert assures increased stiffness with a thin profile for racing performance.

Energy Race 2D Outsole

The bi-density nylon and glassfiber outsole assures stiffness and comfort for great racing performance.

Energy Race Outsole

The nylon and glass fiber outsole assures stiffness and comfort for excellent racing performance.

Energy Grip Carbon Outsole

Optimal energy transfer and grip for cross-country. Full carbon insert with Contragrip rubber lugs. World Cup proven.

Energy Grip Carbon Composite Outsole

Optimal energy transfer and grip for cross-country. Composite carbon, glass fiber and nylon insert with Contragrip rubber lugs.

Energy Grip Outsole

Optimal energy transfer and grip for cross-country. Glass fiber enhanced nylon insert with Contragrip rubber lugs.

ERGO FIT INSOLES

Mavic insoles are constructed of multiple density pre-shaped vibration dampening foams, to optimize moisture management, fit and comfort

Ergo Fit SL

Preshaped 3 density lightweight composite insole with vibration absorbing heel and metatarsal elastomer inserts. Agion anti bacterial treatment.

Ergo Fit 3D

Preshaped 3 density composite insole with a high density rear heel cradle, and vibration absorbing heel and metatarsal elastomer inserts. Agion anti bacterial treatment.

Ergo Fit 2D

Preshaped 2 density composite insole with a high density rear heel cradle. Agion anti bacterial treatment.

Ergo Fit

Preshaped composite insole. Mesh for moisture transfer with Agion anti bacterial treatment.

Ergo Fit 2D Women

Preshaped Womens specific 2 density composite insole with a high density rear heel cradle. Agion anti bacterial treatment.

Ergo Fit Women

Preshaped Womens specific composite insole. Mesh for moisture and Agion anti bacterial treatment.

ERGO LITE CONSTRUCTION

Innovative bonded construction which eliminates stitched seams for exceptional comfort, pressure free foot hold and light weight

Ergo Lite Upper

Innovative bonded upper construction which eliminates upper stitched seams for exceptional comfort pressure-free foot hold and lightweight.

Ergo Lite Toe Cap

Lightweight bonded toe cap for light protection and support.

ERGO STRAP

Advanced closure system with kevlar, 25% stronger than traditional straps with better ventilation

Ergo Strap SL

Lightweight version of this advanced closure system. Lighter, more precise, 25% stronger than traditional straps with better ventilation.

Ergo Strap Custom

Adjustable version of this advanced closure system. Strap length can be customized based upon individual foot shape and preference.

Ergo Strap

Highly functional Ergo Strap combines aramid kevlar cables, hook and backed synthetic and aluminum alloy eyelets for optimal performance and durability.

Apparel Ergo Ride

ERGO SHORT INSERTS

A combination of progressive cushioning to enhance comfort, moisture wicking and durability

Ergo 3D Insert

The state of the art in comfort. Engineered mesh for excellent moisture wicking. Progressive cushioning with 3 different densities and 6 different thicknesses of preshaped foam.

Ergo 3D Pro Insert

Maximum comfort with minimum bulk. Progressive cushioning with 3 different densities and 4 different thicknesses. High density preshaped foam for form fitting comfort.

Ergo 3D Endurance Insert

Our plushest insert for unbeatable long distance comfort. Perforated stretch Alcantara. Progressive cushioning with 3 different densities and 4 different thicknesses of preshaped foam.

Ergo 2D Insert

High performing insert with 2 densities and 2 different thicknesses of perforated foam for maximum comfort, support and moisture management.

Ergo 3D Insert Womens

The state of the art womens specific comfort. Engineered mesh for excellent moisture wicking. Progressive cushioning with 3 different densities and 6 different thicknesses of preshaped foam.

Ergo 2D Insert Womens

High performing Womens specific insert with 2 densities and 2 different thicknesses of perforated foam for maximum comfort, support and moisture management.

ERGO GRIP

Unique double layer elastic mesh construction and silicone printing assure maximum grip, breathability and light weight feel

ERGO BIB

Extremely elastic open mesh bib with a fully seamless construction for support, comfort and breathability

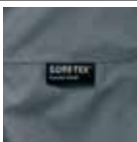

HIGH END MATERIALS

In addition to Mavic's proprietary fabric developments we also work with technical fabric manufacturers and Mavic apparel features many well known branded materials

Gore-Tex® Paclite®

Featuring the lightest, most packable Gore-Tex® fabrics. Gore-Tex® Paclite® offers extremely breathable extreme wet weather protection.

Gore-Tex® Windstopper®

Specially designed to keep you warm and comfortable in cold and windy conditions. Soft, climate protection and light insulation. Water resistant and breathable.

Super Roubaix®

A highly elastic, abrasion resistant brushed fabric featuring fast-recovery, air permeability, soft hand feel and comfort. 85% polyamide, 15% elastane.

Lycra® Power

Lycra® Power garments are designed to reduce muscle vibration - a major cause of muscle fatigue, improve the efficiency of movement and provide superior comfort and fit.

Primaloft® Sport

Primaloft® Sport insulation combines light weight multi-diameter fibers for superior insulation, water resistance, durability and fast drying loft.

X-Static

Synthetic yarn with a layer of silver bonded to its surface. X-Static eliminates almost all bacteria and therefore makes transpiration antimicrobial.

DURA LITE CONCEPT

A family of light weight materials offering functionality and protection from wind, rain and cold

Dura Lite SL

An extremely light weight fabric with an exceptionally high weight / protection ratio. DWR coating and tight weave provide a high degree of wind resistance and light rain protection. Wind Ride. 100% polyester.

Dura Lite

A lightweight fabric with a high weight / protection ratio. DWR coating and tight weave provide a high degree of wind resistance and light rain protection. Wind Ride. 100% polyamide.

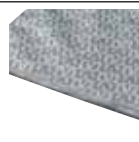

Dura Lite Rain SL

An extremely light weight rain proof fabric. Its unique elastic construction incorporates a waterproof breathable membrane. Rain Ride. 100% polyamide.

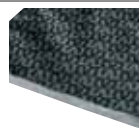

Dura Lite Warm

A lightweight insulating fabric. High wind resistance and DWR for light rain protection with extra light (40 gm / M²) Primaloft insulation. 95% polyester 5% polyamide.

Dura Lite Warm+

A lightweight insulating fabric. High wind resistance and DWR for light rain protection with light (60gm / M²) Primaloft insulation. 95% polyester 5% polyamide.

CLIMA VENT CONCEPT

Strategically placed ventilation which maximizes cooling and moisture vapor evacuation while cycling

Clima Vent

Strategically placed zipped vents offer maximum cooling and moisture vapor evacuation while cycling.

Micro Vent

Strategically placed micro laser perforations that increase breathability and moisture management.

XL Vent

A full length front zipped vent that allows maximum ventilation while keeping the jacket in place.

996317 white / black
