

THEY SAY THAT THE SOUL OF A BICYCLE IS IN THE FRAME. NO MATTER WHICH COMPONENTS AND WHEELS YOU FIT ON YOUR BIKE, YOU CAN NEVER MAKE IT BETTER THAN ITS STARTING POINT: THE FRAME. AT THE HEART OF PRINCIPIA'S FRAME DESIGN IS OUR NEVER-ENDING QUEST TO CREATE THE PERFECT BICYCLE FRAME COMBINING MAXIMUM POWER TRANSFER, PERFECT HANDLING AND COMFORT. OUR 2008 RANGE BRINGS US CLOSER TO OUR GOAL THAN EVER BEFORE.

DOWN TO THE SMALLEST DETAIL, EVERY PRINCIPIA BIKE IS A TESTIMONY TO YEARS OF CONCENTRATED EFFORT AND R&D. EVERY TUBE PROFILE AND EVERY DROPOUT DESIGN HAS BEEN ANALYSED OVER AND OVER AGAIN AND BROUGHT TO PERFECTION.

OUR INSPIRATION HAS ALWAYS BEEN THE PRINCIPLES OF THE FOUNDER OF MODERN PHYSICS, SIR ISAAC NEWTON. ALWAYS WILLING TO THINK OUTSIDE THE BOX, WE HAVE BEEN ABLE TO REMOVE ALL EXCESS MATERIAL AND CONCENTRATE ON THE ESSENTIALS IN OUR CONSTANT EFFORT TO ACHIEVE THE PERFECT FRAME DESIGN.

INTEGRAL POST SYSTEM

Our extended INTEGRAL POST SYSTEM seat tube makes the necessary overlap between seat tube and seat post on traditional frames redundant. This allows us to remove excess material achieving an even better stiffness-to-weight ratio.

FROM DAY ONE, IT HAS BEEN PRINCIPIA'S PHILOSOPHY TO MANUFACTURE BICYCLE FRAMES THAT MAXIMISE THE TRANSFER OF POWER INTO PROPULSION. TODAY, WE HAVE COME ONE STEP CLOSER TO THE GOAL: THE HIGHEST POSSIBLE STIFFNESS, THE LOWEST POSSIBLE WEIGHT AND THE LEAST POSSIBLE FRICTION. ANYTHING ELSE WOULD BE A WASTE OF YOUR PRECIOUS ENERGY.

INTEGRATED BOTTOM BRACKET

Newly developed Principia feature that integrates low-friction precision bearings directly into the bottom bracket for maximum power transfer and the lowest possible weight. This new adapter system ensures compatibility with the FSA Mega Exo and Shimano Hollowtech II crank standards.

"TRUTH IS EVER TO BE FOUND IN SIMPLICITY, AND NOT IN THE MULTIPLICITY AND CONFUSION OF THINGS", A WISE MAN ONCE SAID. WE COULDN'T AGREE MORE. WHY STICK WITH TRADITIONAL EXTERNAL CABLE ROUTING IF YOU CAN HAVE THE SMOOTH AND SIMPLE LINES OF A CABLE-FREE DOWN TUBE WHILE THE CABLES ARE GENTLY PROTECTED INSIDE THE TUBE?

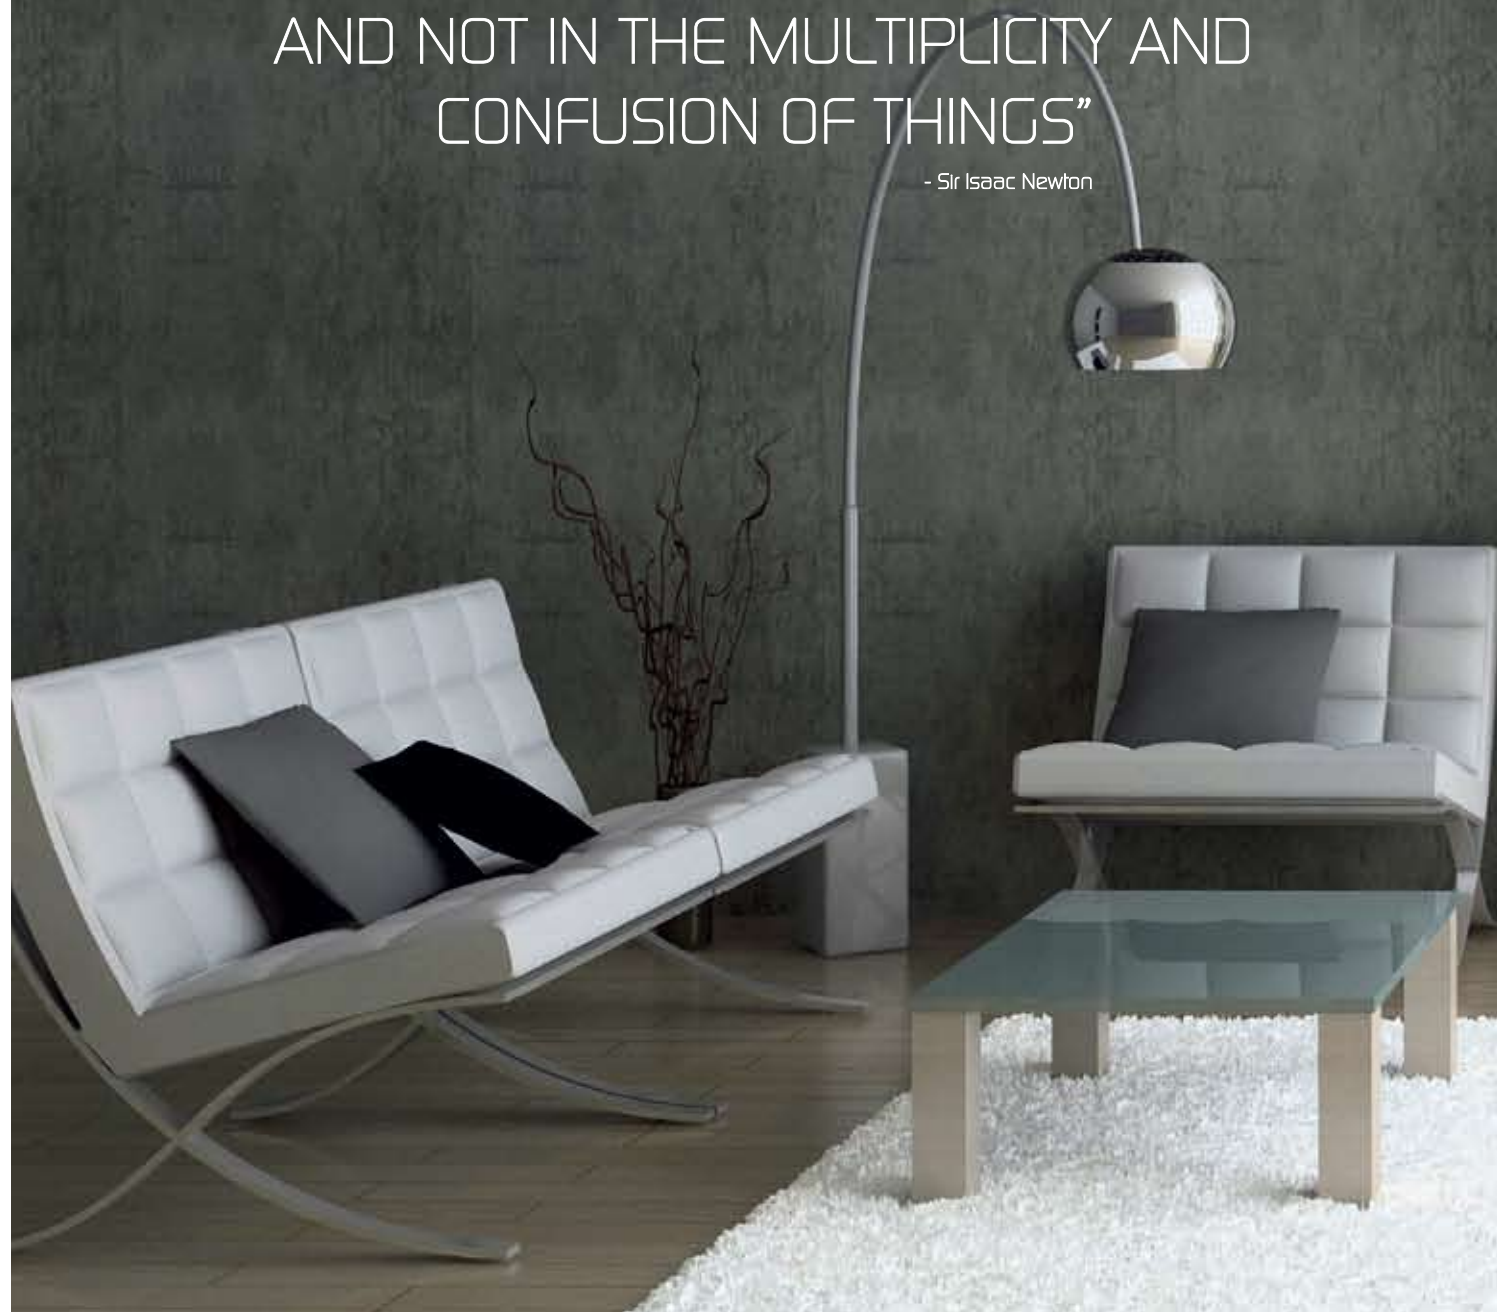

INTERNAL CABLE ROUTING

Principia's INTERNAL CABLE ROUTING allows the gear cables to disappear discretely into the head tube giving the frame a unique, streamlined appearance while ensuring that the cables are protected from dirt and grime at the same time. Principia ICR has a completely sealed liner from entry to exit for easy maintenance and wire replacement.

"TRUTH IS EVER TO BE FOUND IN SIMPLICITY,
AND NOT IN THE MULTIPLICITY AND
CONFUSION OF THINGS"

- Sir Isaac Newton

P.O.D
Principia Of Denmark

“TO ME THE PERFECT BIKE MUST BE
LIGHT AND STIFF. THE PRINCIPIA IS BOTH.
IN TECHNICAL TERMS IT IS BY FAR THE
BEST BIKE I’VE EVER RIDDEN”

- Nikola Aistrup, Team GLS

REVOLUTION integral team C40T

Danish professional cycling team, Team GLS, has chosen Revolution Integral Team C40T for 2008. A choice which meets the talented GLS riders' request for maximum power transfer. The newly developed Integral version of Principia's full carbon flagship model unites market leading carbon technology with well-known Principia virtues: maximum power transfer and stability. With the addition of Integral Post System seat tube and Integrated OBB bearings the Revolution Integral Team C40T is a piece of highly efficient racing equipment.

Manufactured from high-strength carbon filaments classified to a tensile strength of 40 tonnes per square centimetre.

With the choice of either Shimano Dura Ace or SRAM Force 10-speed groupsets with FSA K-Force Light cranks with Ceramic Improved bearings, FSA SL-K carbon handlebars with improved ergonomics, exclusive Prologo Choice saddle and Mavic Ksyrium SL wheels the Revolution Integral Team C40T offers you a superior ride. Available in Carbon Weave/Team Blue as complete bicycle or as frameset only including Principia Full Monocoque Carbon fork and Integrated Principia headset.

A PIECE OF HIGHLY EFFICIENT RACING EQUIPMENT WITH UNPARALLELED POWER TRANSFERRING CHARACTERISTICS

REVOLUTION integral C40T

The newly developed Integral version of Principia's full carbon flagship model unites market leading carbon technology with well-known Principia virtues: maximum power transfer and stability. With the addition of Integral Post System seat tube and integrated OBB bearings the Revolution Integral C40T is a piece of highly efficient racing equipment with unparalleled power transferring characteristics. Manufactured from high-strength carbon filaments classified to a tensile strength of 40 tonnes per square centimetre. With the choice of either Shimano Dura Ace or SRAM Force 10-speed groupsets with FSA K-Force Light cranks with Ceramic Improved bearings, FSA SL-K carbon handlebars with Improved ergonomics, exclusive Prologo Choice saddle and Mavic Ksyrium SL wheels the Revolution Integral C40T offers you a superior ride. Available in Carbon Weave/Red as complete bicycle or as frameset only including Principia Full Monocoque Carbon fork and integrated Principia headset.

INTEGRAL POST SYSTEM SEAT TUBE, INTEGRATED IBB BEARINGS AND INTERNAL ICR CABLE ROUTING

ellipse integral c24T

Newly developed full carbon model from the Weaved Principia Carbon series combining superior carbon technology with classic Principia virtues: maximum power transfer and stability. Features Integral Post System seat tube, Integrated IBB bearings and Internal ICR cable routing from head tube to crank and a comfortable ride comparable to that of Revolution Integral C40T.

Manufactured from high-strength carbon classified to a tensile strength of 24 tonnes per square centimetre.

With the choice of either Shimano Ultegra or SRAM Rival 10-speed groupsets with FSA SL-K Light carbon cranks, FSA Wing Pro handlebars, exclusive Prologo Choice saddle and high-quality DT-Swiss R1900 wheels the Ellipse Integral C24T offers you a superior ride. Available in Carbon Weave/White & Carbon Weave/Green as complete bicycle or as frameset only, including Principia Full Monocoque Carbon fork and Integrated Principia headset.

REVOLUTION weave C40T

Principia's full carbon flagship model unites market leading carbon technology with well-known Principia virtues: maximum power transfer and stability. With its unique Weaved Principia Carbon technology, Revolution Weave C40T achieves an unparalleled level of comfort while maintaining superior stiffness and power transfer to provide a fantastic ride. Manufactured from high-strength carbon filaments classified to a tensile strength of 40 tonnes per square centimetre. With the choice of either Shimano Dura Ace or SRAM Force 10-speed groupsets with FSA K-Force Light cranks with Ceramic Improved bearings, FSA SL-K carbon handlebars with improved ergonomics, exclusive Prologo Choice saddle and Mavic Ksyrium SL wheels the Revolution Weave C40 offers you a superior ride. Available in Carbon Weave/Red as complete bicycle or as frameset only, including Principia Full Monocoque Carbon fork and integrated Principia headset.

ELLIPSE weave C24T

Full carbon model of the Weaved Principia Carbon series combining superior carbon technology with classic Principia virtues: maximum power transfer and stability. Features internal ICR cable routing from head tube to crank and a comfortable ride comparable to that of Revolution Weave C40T. Manufactured from high-strength carbon classified to a tensile strength of 24 tonnes per square centimetre. With the choice of either Shimano Ultegra or SRAM Rival 10-speed groupsets with FSA SL-K Light carbon cranks, FSA Wing Pro handlebars, exclusive Prologo Choice saddle and high-quality DT-Swiss R1900 wheels the Ellipse Integral C24T offers you a superior ride. Available in Carbon Weave/Blue as complete bicycle or as frameset only, including Principia Full Monocoque Carbon fork and integrated Principia headset.

BASED ON THE EXACT SAME
TECHNOLOGIES AS THE REVOLUTION
WEAVE C40T

***EVOLUTION** weave C16T*

Based on the exact same technologies as Principia's full carbon flagship model, the Revolution Weave C40T, the Evolution Weave C16T delivers the uncompromised Principia trademark performance and riding characteristics of the Weaved Principia Carbon series. Manufactured from high-strength carbon classified to a tensile strength of 16 tonnes per square centimetre. With Shimano 105 10-speed groupsets with FSA Team Issue carbon cranks, FSA Wing Pro handlebars, Prologo Nago Pas saddle and Mavic Aksium wheels the Evolution Weave C16T offers you a superior ride. Available in Carbon Weave/White & Carbon Weave/Red as complete bicycle or as frameset only, including Principia Full Monocoque Carbon fork and integrated Principia headset.

***RSL** weave c12T*

New for 2008 the RSL Weave C12T brings the acclaimed riding characteristics of the Weaved Prinopia Carbon series to a popular price level. The RSL Weave C12T features internal ICR cable routing from head tube to crank as well as Prinopia trademark power transfer and optimized riding characteristics.

Manufactured from high-strength carbon classified to a tensile strength of 12 tonnes per square centimetre.

With Shimano 105 10-speed groupsets with FSA Team Issue carbon cranks, FSA Wing Pro handlebars, Prologo Nago Pas saddle and Prinopia SL wheels the RSL Weave C12T offers you a superior ride. Available in Carbon Weave/Red & Carbon Weave/Pink as complete bicycle or as frameset only, including Prinopia Full Monocoque Carbon fork and integrated Prinopia headset.

... THIS MAKES REVOLUTION ONE OF THE FASTEST BIKES IN ITS CLASS

REVOLUTION

Principia's flagship aluminium model with incredible stiffness and low weight that transforms all your power to speed. Principia Diet Process takes weight off the frame without compromising stiffness and stability, and in combination with the Ellipse Project technology, this makes Revolution one of the fastest bikes in its class.

With the choice of either Shimano Dura Ace or SRAM Force 10-speed groupsets with FSA K-Force Light cranks with Ceramic Improved bearings, FSA SL-K carbon handlebars with improved ergonomics, exclusive Prologo Choice saddle and Mavic Ksyrium SL wheels the Revolution offers you a superior ride. Available in Jet Black Anodised & Ocean Blue Anodised as complete bicycle or as frameset only including Principia Full Monocoque Carbon fork and integrated Principia headset.

ellipse

A quick up-shift and you accelerate out of the saddle. Principia Ellipse is unrivalled when it comes to a sprint. Named after Principia's Ellipse Project technology, this model is the stiffest and strongest frame of the entire Principia range. This makes the Ellipse the obvious choice for fast and powerful riders – or for those of us who want the most efficient transfer of power into forward motion.

With the choice of either Shimano Ultegra or SRAM Rival 10-speed groupsets with FSA SL-K Light carbon cranks, FSA Wing Pro handlebars, exclusive Prologo Choice saddle and high-quality DT-Swiss R1900 wheels the Ellipse offers you a superior ride. Available in Titan Anodised & Diamond Black as complete bicycle or as frameset only including Principia Full Monocoque Carbon fork and Integrated Principia headset.

evolution

With its highly advanced Principia Magnum Aluminium frame and Principia core features such as Ellipse Project, Integrated Shifting Precision and SX Geometry, the Evolution provides superior strength and power transfer that matches the more expensive bikes of the Principia range.

With Shimano 105 10-speed groupsets with FSA Team Issue carbon cranks, FSA Wing handlebars, ProLogo Nago saddle and Mavic Aksium wheels the Evolution offers you a superior ride. Available in Gun Anodised & Gold as complete bicycle or as frameset only including Principia Full Monocoque Carbon fork and Integrated Principia headset.

AN IMPRESSIVE LIST OF ESSENTIAL PRINCIPIA FEATURES

RSL[®] PRO

Though being named after the legendary Principia RSL, the RSL[®] Pro is a newly developed Principia model that boasts an impressive list of essential Principia features such as Ellipse Project, Integrated Shifting Precision and SX Geometry; all of which contributes to making the RSL[®] Pro one of the finest rides of its class.

With a Principia Full Monocoque Carbon fork, Shimano 105 11-speed groupset with compact cranks, FSA handlebar, stem and seatpost, Principia saddle and Principia SLE wheels the RSL[®] Pro offers you a superior ride. Available in Pearl White & Wine Red.

WELL-BALANCED RIDING CHARACTERISTICS YOU CAN RELY ON

RSL^e

With advanced features such as Ellipse Project tube design, Integrated Shifting Precision derailleur hanger and SX Geometry, the newly developed RSLe carries on the Principia trademark virtues: superior power transfer and well-balanced riding characteristics you can rely on.

With a Principia Full Monocoque Carbon fork, Shimano Tiagra 9-speed groupset with compact cranks, FSA handlebar, stem and seatpost, Principia saddle and Principia SL wheels the RSLe offers you a superior ride. Available in Night Blue & Neo Gray

PROUDLY CARRIES THE TORCH OF THE LEGENDARY RSL

RSL

The 2008 RSL proudly carries the torch of the legendary Principia RSL model. The brand new RSL includes advanced Principia features such as Ellipse Project, Integrated Shifting Precision and SX Geometry, making the RSL a true high-performance racing bike at an entry-level price point. With a Principia Full Monocoque Carbon fork, Shimano Sora 9-speed groupset with compact cranks, FSA handlebar, stem and seatpost, Principia saddle and Principia SL wheels the RSL offers you a superior ride. Available in Diamond Black & Lite Blue

"A MAN MAY IMAGINE THINGS THAT ARE FALSE, BUT HE CAN ONLY UNDERSTAND THINGS THAT ARE TRUE, FOR IF THE THINGS BE FALSE, THE APPREHENSION OF THEM IS NOT UNDERSTANDING"

- Sir Isaac Newton

TT weave team

The new for 2008 TT Weave Team is created by combining the Principia heritage of time trialing and triathlon with the latest Weaved Principia Carbon technology and the use of high-strength carbon filaments. With its superior aerodynamics it is the weapon of choice for top-level athletes racing against the clock.

Manufactured from high-strength carbon filaments classified to a tensile strength of 40 tonnes per square centimetre. Available in Carbon/White as frameset only including Principia Full Monocoque Carbon fork, seatpost and integrated Principia headset.

TT6 LIGHT

Featuring the latest generation of the acclaimed Principia Magnum Aluminium tubing with its improved stiffness and comfort characteristics and frame geometry specifically optimised for time trialing, the TT6 Light gives you the leading edge over the competition. Available in Jet Black Anodised as frameset only including Principia Full Monocoque Carbon fork and integrated Principia headset.

"WE ARE TO ADMIT NO MORE CAUSES OF
NATURAL THINGS THAN SUCH AS ARE BOTH
TRUE AND SUFFICIENT TO EXPLAIN THEIR
APPEARANCES"

- Sir Isaac Newton

42 |

evolve disc

Based on Principia Magnum Aluminium and Ellipse Project technologies the Evolve Disc delivers power transfer og control true to the Principia tradition. A dedicated frame geometry specifically optimised for flatbars gives the Evolve Disc a stable and well-balaced ride. With Shimano 105 10-speed groupset with hydraulic disc brakes, Linus Comp Disc wheels, Selle Italia C2 saddle and FSA compact cranks the Evolve Disc offers you a superior ride. Available in Jet Black Anodised & Gold.

A STABLE AND WELL-BALANCED RIDE

| 43

evolve

With a Principia Magnum Aluminium technology frame identical to that of the Evolve Disc, the Evolve delivers power transfer og control true to the Principia tradition. A dedicated frame geometry specifically optimised for flatbars gives the Evolve a stable and well-balaced ride. With Shimano 105 10-speed groupset, Linus Pro CD wheels, Selle Italia C2 saddle and FSA compact cranks the Evolve Disc offers you a superior ride. Available in Jet Black Anodised & Gold.

"TO EVERY ACTION THERE IS ALWAYS
OPPOSED AN EQUAL REACTION"

Sir Isaac Newton

A SUPERLIGHT AND SUPERFAST XC AND MARATHON BIKE

MSL^{FS}

Principia's first full-suspension mountainbike is a superlight and superfast XC and marathon bike with Ellipse Project frame design for maximum power transfer and 4-bar linkage technology for optimum suspension performance. Handlebar-mounted lockout control allows you to lock the suspension on flat sections and for out-of-the-saddle climbs.

DT XMC 100 RTCC fork, SRAM XO shifters, Avid Juicy Carbon brakes, FSA K-Force Light cranks with Ceramic Improved bearings and Mavic CrossMax ST wheelset completes this designated XC and marathon mountainbike. Available in Titan Anodised as complete bicycle or as frameset only including integrated Principia headset.

MSLe PRO

Superlight XC mountainbike with built-in winning instinct, based on acclaimed Principia technologies such as Ellipse Project, Design 2 Size, Tube Inserted Welding II and the weight reduction method Principia Diet Process. With the improved shock absorption of the rear triangle the already legendary handling properties of the MSLe Pro are taken to an even higher level. One of the best hardtails ever has become better.

DT XRC 80 RL fork, SRAM XO shifters, Avid Juicy Carbon brakes, FSA K-Force Light cranks with Ceramic Improved bearings and Mavic CrossMax ST wheelset completes this designated XC mountainbike. Available in Jet Black Anodised as complete bicycle or as frameset only including integrated Principia headset.

MSL

Light, strong and lightning fast mountainbike based on the top model MSLe Pro. Balanced XC Geometry frame geometry gives you the power and control to handle difficult sections. The Ellipse Project and Tube Inserted Welding II technologies contribute to the Principia feeling of direct power transfer.

The specifications include Rockshox Recon fork with PopLoc remote lockout, Avid Juicy Five disc brakes, FSA cranks, DT Swiss X1 800 wheelset and Principia carbon seatpost giving you first class performance and low weight. Available in Pearl White as complete bicycle or as frameset only including integrated Principia headset.

FOLLOWS THE PRINCIPIA TRADITION
FOR HARDTAIL MOUNTAINBIKES WITH
WINNING POTENTIAL

MXCe PRO

The newly developed MXCe Pro follows the Principia tradition for hardtail mountainbikes with winning potential. The well-balanced XC Geometry allows you to control the bike on tricky sections and Ellipse Project design features contributes to trademark Principia power transfer performance.

With a RockShox Dart 2 fork with Remote Lockout, Shimano XT 2008 groupset with hydraulic disc brakes, Deore LX cranks, FSA handlebar, stem and seatpost, Principia saddle and Principia XCe wheels the MXCe Pro offers you a superior ride. Available In Wine Red

THE TRUE PRINCIPIA FEELING OF DIRECT POWER TRANSFER

MXC^e

Based on the MXCe Pro, the new for 2008 MXCe offers you maximum control in all situations while the Ellipse Project design features contribute to the true Principia feeling of direct power transfer.

With a RockShox Dart 2 fork with Remote Lockout, Shimano XT 2008/LX/Deore groupset with hydraulic disc brakes, FSA handlebar, stem and seatpost, Principia saddle and Principia XC wheels the MXCe offers you a superior ride.

Available in Diamond Black

MXC

When a country with no mountains at all can create mountainbike world champions, why should it not be able to create world-class mountainbikes as well? Principia have for more than a decade designed and manufactured mountainbikes generally acclaimed for their world-class handling. MXC carries the torch with its fine-tuned riding characteristics that leaves you in control. With an XCR fork with Remote Lockout, Shimano LX/Deore groupset with hydraulic disc brakes, FSA handlebar, stem and seatpost, Principia saddle and Principia XC wheels the MS offer you a fine ride. Available in Neo Gray

MS

With its Ellipse Project design features the MS offers you trademark Principia performance; superior power transfer and well-balanced riding characteristics, at an entry-level price point. With an XCR fork with Remote Lockout, Shimano Deore groupset with hydraulic disc brakes, FSA handlebar, stem and seatpost, Principia saddle and Principia XC wheels the MS offer you a fine ride. Available in Night Blue

ELLIPSE PROJECT

The great advantage of Principias karaktistiske ellipseformede kramboksar og krammerar med rodet design. The increased strength of the elliptical design allows for more control when it counts.

CARBON FRIENDLY SEAT TUBE

Carbon friendly seat posts are generally lighter and stronger than carbon fiber seat posts. On the other hand, the pressure of the seat post is reduced when riding on a carbon friendly seat post. The carbon friendly seat post is made of carbon fiber and is stronger than a regular seat post. It is also lighter and stronger than a regular seat post. It is also lighter and stronger than a regular seat post. It is also lighter and stronger than a regular seat post.

DESIGN 2 SIZE

Principias Design 2 size uses a unique design that makes it stronger and lighter than other sizes. The design is made of carbon fiber and is stronger than a regular size. It is also lighter and stronger than a regular size. It is also lighter and stronger than a regular size. It is also lighter and stronger than a regular size.

TUBE INSERTED WELDING 2

The tube inserted welding 2 is a unique design that makes it stronger and lighter than other designs. The design is made of carbon fiber and is stronger than a regular design. It is also lighter and stronger than a regular design. It is also lighter and stronger than a regular design. It is also lighter and stronger than a regular design.

WEAVED PRINCIPIA CARBON

The Principia Carbon is a unique design that makes it stronger and lighter than other designs. The design is made of carbon fiber and is stronger than a regular design. It is also lighter and stronger than a regular design. It is also lighter and stronger than a regular design. It is also lighter and stronger than a regular design.

INTEGRAL POST SYSTEM

The Integral Post System is a unique design that makes it stronger and lighter than other designs. The design is made of carbon fiber and is stronger than a regular design. It is also lighter and stronger than a regular design. It is also lighter and stronger than a regular design. It is also lighter and stronger than a regular design.

INTERNAL CABLE ROUTING

The Internal Cable Routing is a unique design that makes it stronger and lighter than other designs. The design is made of carbon fiber and is stronger than a regular design. It is also lighter and stronger than a regular design. It is also lighter and stronger than a regular design. It is also lighter and stronger than a regular design.

SX GEOMETRY

The SX geometry is a unique design that makes it stronger and lighter than other designs. The design is made of carbon fiber and is stronger than a regular design. It is also lighter and stronger than a regular design. It is also lighter and stronger than a regular design. It is also lighter and stronger than a regular design.

PRINCIPIA DIET PROCESS

The Principia Diet Process is a unique design that makes it stronger and lighter than other designs. The design is made of carbon fiber and is stronger than a regular design. It is also lighter and stronger than a regular design. It is also lighter and stronger than a regular design. It is also lighter and stronger than a regular design.

INTEGRATED SHIFTING PRECISION

The Integrated Shifting Precision is a unique design that makes it stronger and lighter than other designs. The design is made of carbon fiber and is stronger than a regular design. It is also lighter and stronger than a regular design. It is also lighter and stronger than a regular design. It is also lighter and stronger than a regular design.

XC GEOMETRY

The XC geometry is a unique design that makes it stronger and lighter than other designs. The design is made of carbon fiber and is stronger than a regular design. It is also lighter and stronger than a regular design. It is also lighter and stronger than a regular design. It is also lighter and stronger than a regular design.

PRINCIPIA MAGNUM ALUMINIUM

The Principia Magnum Aluminium is a unique design that makes it stronger and lighter than other designs. The design is made of aluminium and is stronger than a regular design. It is also lighter and stronger than a regular design. It is also lighter and stronger than a regular design. It is also lighter and stronger than a regular design.

INTEGRATED BOTTOM BRACKET

The Integrated Bottom Bracket is a unique design that makes it stronger and lighter than other designs. The design is made of carbon fiber and is stronger than a regular design. It is also lighter and stronger than a regular design. It is also lighter and stronger than a regular design. It is also lighter and stronger than a regular design.

BOTTOM BRACKET: With the exception of Integral models all BBs are 68 mm wide, with BSA threading.

SEAT POSTS: The D2S models use 27,2 mm seat posts up to size 55. Sizes 57 and larger use 31,6 mm seat posts. All other models use 31,6 mm seat posts.

SUSPENSION FORKS: All 2008 Mountain Bike frames are built for 80 or 100mm travel forks. Shorter, or longer, travel forks will compromise the overall handling.
