RUDY PROJECT
Technically Cool

Celebrating Our 25th Anniversary

In 1985 Rudy Barbazza created Rudy Project with the firm conviction to improve the performance of athletes all over the world.

A love of progress, a passion for style and a keen eye for quality all contributed to give life to his Vision: the world's most technologically advanced sports eyewear.

Rudy Project works in cooperation with athletes from all fields, listening to what they want and what they need.

Rudy Project never stops researching to find the latest and best materials available to realize cutting edge products.

Technically Cool: the two words that can best sum up this Vision; the two words that best express the DNA of each and every design carrying the brand Rudy Project.

why rudy project is better

Rudy Project is a modern, marketing oriented company that has established itself as a leading brand worldwide. Rudy Project designs and manufactures hi-tech sunglasses, goggles, helmets and accessories using the application of science, advanced materials and computer technology to create functional, aesthetically superior and technologically advanced products.

Rudy Barbazza, a pioneer in the Italian sunglass and sporting goods industry, founded Rudy Project in 1985. Through his vision and dogged commitment to technology and innovation, Rudy has created a company and a creative environment that has achieved many "firsts" in manufacturing eyewear, goggles and helmets.

Rudy throughout the years has been a champion of sponsoring and supporting athletes at every level of competition. Rudy Project is today the preferred choice of thousands of world class athletes and Olympians in cycling, triathlon, cross-country ski, golf, inline skate, and sailing to name a few.

Rudy Project's are designed to provide total comfort, fog-free performance and technically cool styling. Our RPOPTICS™ Advanced Performance Lens Technology, free hard case and cleaning cloth with every sunglass and advanced materials keep us on the cutting edge.

wingspan wind tunnel test

John Cobb has been actively involved in the cycling industry since 1972. He first proved himself as a pioneer in the area of cycling aerodynamics when his positioning and aero knowledge were used with Greg LeMond, thus shocking the traditional European bicycle racing world. John developed a system, early on, for positioning riders in order to gain more speed and comfort. This has led riders from around the globe to search John out for cycling help.

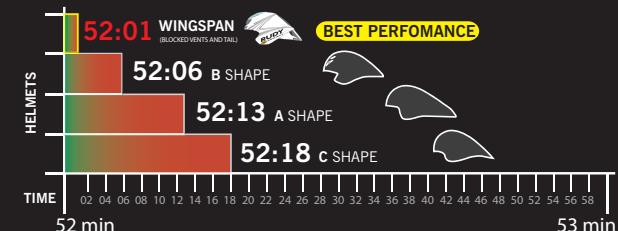

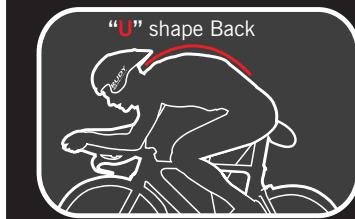

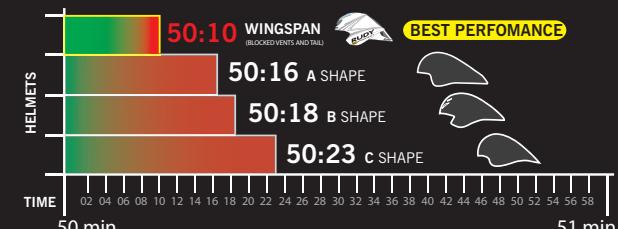

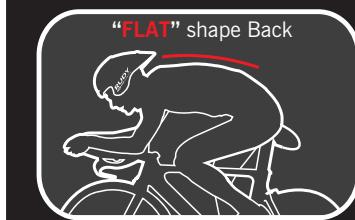

Special Thanks to Aerodynamic Test Team:
Norberto Fava, Chris Olson, Herbert Krabel , John Cobb, Mike Giraud, Mike Barbaza

AERODYNAMICALLY ENGINEERED BY JOHN COBB

Realistic 40K TT time Race*

* Simulation of a 40K TT time race represented by an elite rider of 5'10" size and 160 lbs weight that averages 390 watts.

It is very clear that the RUDY PROJECT WINGSPAN is the BEST on any back shape the riders may have.

helmets features

SAFETY

IN-MOLD TECHNOLOGY

US - The construction of our helmets is based on the new In-Mold architecture. This innovative technology is used to inject styrofoam in the mold containing the cap in polycarbonate at very high pressure, merging the two elements to form a seamless rigid structure, more impact resistant and lighter than any other helmet produced up to now.

I - La costruzione dei nostri caschi prevede l'utilizzo dello stampaggio In-Mold. Questa innovativa tecnologia permette di iniettare il polistirolo nello stampo contenente la calotta in policarbonato fondendo così assieme i due componenti, ciò consente di realizzare una struttura molto più rigida, resistente agli urti ed estremamente leggera.

D - Die Konstruktion unserer Helme beruht auf der neuen In-Mold-Technologie. Nach diesem innovativen Verfahren wird Polystyrol-Hartschaum unter sehr hohem Druck in eine Form gespritzt, in der die Polykarbonat-Außenschale enthalten ist; die beiden Elemente verschmelzen dabei vollflächig zu einer nahtlosen, steifen Struktur, die stoßunempfindlicher und leichter ist als alle bisher produzierten Helme.

F - La fabrication de nos casques se base sur le nouveau procédé de moulage In-Mold. Cette technologie innovante est utilisée pour injecter de la styrémousse sous pression dans le moule contenant la calotte en polycarbonate, de façon à mélanger les deux éléments pour former une structure rigide et sans joints, plus résistante aux chocs et plus légère que tout autre casque produit jusqu'à maintenant.

COMFORT

FLOW THROUGH VENTILATION

US - Thanks to the shape and scientific positioning of the external air openings and the unique air channel designs carved inside the shell, our helmets are extremely ventilated and comfortable to wear.

I - Grazie alla forma e al posizionamento delle aperture di aerazione esterne e delle particolari canalizzazioni interne alla calotta, i nostri caschi risultano perfettamente aerati e confortevoli.

D - Dank ihrer Form und der wissenschaftlich fundierten Anordnung der Belüftungsöffnungen sowie der einzigartigen Luftkanäle, die in die Schale eingearbeitet werden, sind unsere Helme extrem gut belüftet und angenehm zu tragen.

F - Grâce à sa forme et au positionnement scientifique des ouvertures vers l'extérieur, ainsi qu'à la configuration des rainures de la canalisation d'air à l'intérieur du casque, nos articles sont parfaitement aérés et confortables à porter.

INTERNAL PADDING

BugStop interchangeable

US - Our latest invention for riders protection and comfort. Two interchangeable and washable paddings, made of a new non-allergic and antiperspiration pile fabric with and without protective net let you manage the flow-through ventilation.

I - La nostra ultima invenzione per la protezione ed il confort. Due imbottiture realizzate in spugna microporosa, intercambiabili e lavabili, con e senza rete di protezione per permettere di controllare la ventilazione.

D - Unsere jüngste Erfindung für Sicherheit und Komfort. Zwei austausch- und waschbare, mikroporöse Polster, mit oder ohne Netzschatz, sorgen für wirksame Durchlüftung.

F - Notre toute dernière invention pour la protection et le confort. Deux rembourrages microporeux interchangeables et lavables, avec et sans filet de protection pour vous permettre de diriger le courant d'air de ventilation.

FreePad interchangeable

US - The internal padding is made of a microporous foam bonded with an extremely new elastic, antiperspiration soft fabric. Its design and position inside the shell, combined with the action of the retention system make our helmets extremely safe and comfortable.

I - Imbottitura interna realizzata in spugna microporosa accoppiata con vellutino antiallergico e antisudore. Il suo design e il suo posizionamento all'interno della calotta, combinato all'azione del sistema antiscalamento, rendono l'uso del casco estremamente sicuro e confortevole.

D - Innenpolster werden aus einem mikroporösen Schaum in Verbindung mit einem antiallergischen, schwitzfesten Fleecegewebe hergestellt. Ihre Form und Position in der Schale, in Kombination mit der Wirkung von Retention System, macht unsere Helme extrem sicher und bequem.

F - Le rembourrage interne est fait d'un complexe de mousse microporeuse et de tissu anallergique, anti-transpiration en fibre polaire. Sa forme et son emplacement à l'intérieur du casque, ainsi que l'action du système de rétention, rendent nos casques extrêmement sûrs et confortables.

Team Focus Milram

RETENTION SYSTEM

US - The latest development in Rudy Project technology: a micrometric disc with reinforced runners, special protective wings and a rear panel with diagonal holes for fixing straps. Precise micrometric regulation and height adjustment provide a perfect, personal fit and excellent stability. Easily adjusted even while wearing the helmet.

I - L'ultima evoluzione della tecnologia Rudy Project: un disco rotante frizioniato con cursori rinforzati, speciali ali protettive e plancia posteriore a fori trasversali per il fissaggio dei cinghiali. La precisa regolazione micrometrica e l'aggiustabilità in altezza, consentono una perfetta personalizzazione della calzata ed una eccezionale stabilità. Regolabile con facilità anche durante l'utilizzo.

D - Die neueste technische Entwicklung von Rudy Project: eine drehbare Kupplungsscheibe mit verstärkten Schiebern, speziellen Schutzzflügeln und hinterem Steg mit Querlöchern zur Befestigung der Gurten. Millimetergenaue Einstellbarkeit und Höhenverstellung garantieren einen perfekt individuellen Sitz und hervorragende Stabilität. Leicht verstellbar auch während des Gebrauchs.

F - La dernière évolution de la technologie Rudy Project : un disque rotatif avec friction et curseurs renforcés, des ailes de protection spéciales et un support arrière à fentes transversales pour la fixation des sangles. Le réglage micrométrique précis et l'adaptation en hauteur permettent une personnalisation parfaite de l'adaptation au crâne et une stabilité exceptionnelle. Réglable facilement y compris durant l'utilisation

US - The Helmet Holding R.S.R Disk is an integral part of the helmet and makes it safe and comfortable. The system is based on a rotary disk that ensures simple, rapid adjustment while wearing the helmet.

I - L'antiscalzamento R.S.R Disc è parte integrante del casco e lo rende sicuro e confortevole. Il sistema è basato su un disco rotante che permette una facile e totale regolazione anche durante l'utilizzo del casco.

D - Rückhaltesystem ist ein wesentlicher Bestandteil des Helms und macht diesensicher und bequem. Das System gründet auf einer Drehscheibe, die selbst beim Tragen des Helms eine leichte, vollständige Einstellung erlaubt.

F - L'anti-déchaussement R.S.R Disc fait partie intégrante du casque et il le rend sûr et confortable. Le système est basé sur un disque tournant qui permet une régulation facile et totale même pendant l'utilisation du casque.

SAFETY REFLEX SYSTEM

US - Helmets are equipped with high-special glow stickers which ensure visibility in dark light conditions.

I - Tutti i caschi sono provvisti di speciali stickers riflettenti che assicurano la visibilità in mancanza di luce.

D - Die Helme sind mit hoch spezialisierten Glow-Stickers ausgestattet, die gute Sichtwirkung auch bei diffusen Lichtverhältnissen garantieren.

F - Les casques sont équipés d'autocollants fluorescents spéciaux, assurant la visibilité même lorsqu'il y a peu de lumière.

STRAP ADJUSTER new

twist loop buckle

US - The new Strap Loop system features to regulate and block straps quickly and precisely even while riding.

I - Studiato per consentire una regolazione rapida e precisa dei cinghiali, il nuovo sistema permette di controllare il bloccaggio mediante un cursore azionabile anche in movimento.

D - Das neue System ist eine spezielle Entwicklung, um die Gurten rasch und präzise verstellen zu können und ermöglicht die Kontrolle der Befestigung über, der auch während der Bewegung betätigt werden kann.

F - Étudié pour permettre un réglage rapide et précis des sangles, le nouveau système permet de contrôler le blocage à l'aide d'un curseur, actionnable même en mouvement.

fastex® buckle

US - The Fastex® system is a simple and quick snap lock buckle, extremely user-friendly, which ensures a perfect fit and maximum stability.

I - Il sistema Fastex® consiste in una chiusura a pressione semplice e rapida, che assicura una regolazione perfetta e massima stabilità.

D - Fastex® System ist ein einfacher, schneller Gurtstraffer, äußerst bedienungsfreundlich, der perfekte Passform und maximale Stabilität garantiert.

F - Le système Fastex® est une boucle à pression simple et rapide, tout à fait à la portée de tous, qui assure un réglage parfait et la stabilité maximum.

Athletes are at the core of Rudy Project's heritage and mission; in fact, our products have been worn and tested by thousands of world-class athletes and premiere organizations in a variety of sports.

Everyday, all over the world.

For more than 25 years Rudy Project has been committed to technology and technological innovations that offer unique solutions for athletes and weekend warriors.

Have fun, Play Harder.

actyum

US - Actyum now has new, advanced characteristics. Like every other Rudy Project creation, Actyum is the fruit of hands-on experience in competitive sport and of a decade of collaboration with the world's top athletes in order to meet fundamental, stringent safety and comfort requisites.

I - Rudy Project presenta la migliore proposta in assoluto nel settore caschi: come ogni nuova creatura Rudy Project, anche Actyum nasce dalla fondamentale esperienza in gara e dalla decennale collaborazione con atleti di spessore internazionale, per rispondere ad indispensabili e severi requisiti di sicurezza e confort.

D - Das Modell Actyum bereichert sich durch innovative, technisch modernste Eigenschaften: wie jede neue Schöpfung von Rudy Project, ist auch Actyum ein Produkt der Erfahrung im Kampfsport und der langjährigen Zusammenarbeit mit internationalen Sportgrößen, um den rigorosen, unerlässlichen Anforderungen an Sicherheit und Komfort zu entsprechen.

F - Le modèle Actyum s'enrichit de caractéristiques innovantes et techniquement avancées : comme chaque nouveau produit Rudy Project, Actyum + naît lui aussi de l'expérience fondamentale en compétition et de dix ans de collaboration avec des athlètes de calibre international, pour assurer la conformité aux conditions de sécurité et de confort les plus intransigeantes.

US - Supertex is a Rudy Project system designed for high-spec apparel, employing a mixture of exclusive, treated materials for top textile performance. Each garment is specially devised - from design to choice of textiles - for its specific use. The result is a line of products that are not only of superior quality, but truly well balanced with each sportsperson's real needs.

I - Supertex è il sistema Rudy Project studiato per l'abbigliamento tecnico.

Si tratta dell'accostamento di materiali esclusivi trattati per ottenere il massimo delle prestazioni tessili; ogni capo viene progettato, dal design alla scelta dei tessuti, a seconda del tipo di impiego. Il risultato è una linea di prodotti non solo di alta qualità, ma concretamente vicina alle esigenze di ogni sportivo.

D - Supertex ist das Rudy Project System für Funktionskleidung. Dabei werden exklusive Materialien mit unterschiedlichen Ausrüstungen eingesetzt, um Stoffe mit bester Performance zu erhalten; Design und verwendete Stoffe werden bei jedem Modell je nach Einsatz festgelegt. Das Ergebnis ist eine Linie, die nicht nur extrem hochwertig ist, sondern auch den Anforderungen der jeweiligen Sportart voll entspricht.

F - Supertex est le système Rudy Project étudié pour des vêtements techniques. Il s'agit d'une association de matériaux exclusifs traités pour obtenir le maximum des performances textiles ; tous les vêtements sont conçus - du dessin jusqu'au choix des tissus - en fonction de l'usage qui doit en être fait. Le résultat est une collection de produits de haute qualité tenant également compte des exigences des sportifs.

FEATURES

ELASTIC

Adapts perfectly to the body and keeps its shape over time.

Si adatta perfettamente alla corporatura e mantiene la sua forma nel tempo.

Passt sich dem Körper perfekt an und behält seine Form auf Dauer.

S'adapte parfaitement à la corpulence de l'utilisateur et maintient sa forme dans le temps.

BREATHABLE

The fabric's micro ventilation holes allow perspiration to evaporate.

Il tessuto permette l'evaporazione del sudore grazie a dei microfori di aerazione.

Durch Mikro-Luftauslässe im Gewebe kann die Schweißflüssigkeit verdunsten.

Le tissu permet l'évaporation de la sueur grâce à des microperforations d'aération.

WIND RESISTANT

The garment is resin-treated to make it resistant to the wind.

La struttura del capo è trattata con delle resine che lo rendono resistente all'azione del vento.

Das Gewebe wird mit Harzen behandelt, die es für Wind undurchlässig machen.

La structure du vêtement est traitée avec des résines qui le rendent résistant à l'action du vent.

WATER REPELLENT

Treated fabric; rain and other liquids run off easily.

Tessuto trattato che permette lo scivolamento dei liquidi e dell'acqua.

Ein imprägniertes Gewebe, von dem Flüssigkeiten und Wasser abperlen.

Tissu traité qui permet le glissement des liquides et de l'eau.

WATERPROOF

Specially treated to prevent seepage of liquids, such as the rain, thus keeping the body dry.

Il corpo rimane asciutto grazie a trattamenti che impediscono l'entrata di liquidi come la pioggia.

Die Haut bleibt trocken, da eine spezielle Ausrüstung das Eindringen von Flüssigkeit wie Regenwasser verhindert.

Le corps reste sec grâce aux traitements qui empêchent la pénétration de liquides tels que la pluie.

gloves

US - The new line "Supergloves" by Rudy Project guarantees perfect freedom of movement in addition to comfort and breathability thanks to the use of superior high-tech fabrics designed to follow the hand's shape and movement. This results in a glove that ensures great comfort from every point of view and was studied, like all Rudy Project products, for the discerning sportsperson.

I - La nuova linea "Supergloves" by Rudy Project garantisce la massima facilità di movimento unita al confort e alla respirazione. Questo grazie all'utilizzo di tessuti di alta qualità tecnica, studiati per rispettare l'ergonomia e il movimento della mano. Il risultato è un guanto comodo e confortevole, pensato, come ogni prodotto Rudy Project, per lo sportivo esigente.

D - Die neue Linie "Supergloves" by Rudy Project garantiert maximale Beweglichkeit in Verbindung mit Komfort und Atmungsaktivität. Dies dank der Verwendung von technisch hochwertigen Stoffen, die Ergonomie und Bewegungsverhalten der Hand unterstützen. Das Ergebnis sind bequeme, angenehm zu tragende Handschuhe, die wie alle Produkte Rudy Project, für Sportler mit hohen Ansprüchen entwickelt wurden.

F - La nouvelle ligne "Supergloves" By Rudy Project garantit une grande aisance de mouvement associée au confort et à la respiration. Ce résultat est rendu possible par l'emploi de tissus de haute qualité technique, étudiés pour respecter l'ergonomie et le mouvement de la main. Le résultat est un gant pratique et confortable, étudié, comme tout produit Rudy Project, pour le sportif exigeant.

ZOOM

In addition to researching state-of-the-art materials, Rudy Project also takes charge of model-making and accessories to create high-spec garments ensuring all-round comfort.

As one of the last remaining independent eyewear companies in the world....our mission is simple:
research, develop, apply and promote innovations to create a comfortable, practical and cutting-edge product
that meets the needs of even the most demanding athletes.

Reach higher, Play harder !
