

2008<sup>⚡</sup>

\* INNOVATE OR DIE

## A HISTORY OF INNOVATION

FOR OVER 25 YEARS, we've had a passion for riding and innovation.

First built in 1981, the original Stumpjumper was the first mountain bike that riders could find at their local shop. Pre-Stumpjumper, we were riding dirt fire roads and smooth trails on our road bikes, but we wanted to go farther and faster and push the limits of what was possible on dirt. So we created the Stumpjumper.

As you can see on the right, we didn't stop innovating with our first version. Nope, we learned a long time ago that if we were to make riding better, we would have to imagine new ways to ride and develop technologies to make that vision possible. A ceaseless drive to innovate is what makes us Specialized, and it's what'll make your next ride better.

**2008 STUMPJUMPER FSR PRO** Thankfully we didn't stop innovating back in '81.

In the spirit of the original, the 2008 Stumpjumper FSR Pro is the best bike for the kinds of trails that most of us ride most of the time. Total Suspension Integration has allowed

us to custom tailor the design of all critical suspension parts to guarantee the highest performance possible.

**1981 ALLEZ** Long before we discovered dirt, we had a passion for pavement.

Back before we ever rode a mountain bike, we were road bike fiends, so it only makes sense that the first bikes and equipment we sold were for the road. The original Allez, which came in road, track and a

Shimano Dura-Ace AX equipped 'aero' model, was designed by Tim Neenan—the lead architect of the original Stumpjumper.

**2008 S-WORKS TARMAC SL2** Built for Boonen. Built for Bettini. Built for you.

Just like the original Allez, the SL2 is the state-of-the-art in go-fast hardware. Designed to satisfy the needs of performance fanatics like Tour de France Green jersey winner

Tom Boonen, the SL2 is the lightest and stiffest frame we've ever made and features vertical compliance that is only second to our revolutionary S-Works Roubaix SL.

A PASSION FOR MAKING EVERYONE'S  
TIME ON A BIKE BETTER

BACK WHEN WE WERE JUST GETTING STARTED some 35 years ago, we decided that Specialized would focus on high-end bicycle components and equipment. I had realized it was the right thing to do when I took a long trip through Europe in 1974. I was impressed with the passion people there had for making the absolute best bikes and equipment and knew that my riding buddies back home in California would go wild for these high performance bikes and bits if they could find them in local bike shops.

Our founding principle—to focus on the rider's need for functional, technically advanced products that provide a true performance benefit—is what makes us Specialized, and our drive to improve your time on a bike is what pushed us to develop the best XC Trail bike on the market—our new Stumpjumper FSR.

At the same time, we know that more women than ever are getting into cycling and many have been waiting for something like our Designs for Women line-up. Designed by a team of passionate female cyclists here in our Morgan Hill, CA, headquarters and tested by all kinds of female riders, our D4W line is the only complete line of women's bikes and equipment designed from the ground-up exclusively for female riders.

Our passion is to make your ride, our ride, any rider's time on a bike better. For 2008, we believe we've done that with a multitude of incredible new products. For 2009 and beyond, we'll continue because we love to ride and can't stop thinking of ways to make every pedal stroke more fun.

Mike Singhal

**WARNING:** The actions depicted in this catalog are potentially dangerous. The riders seen are experienced experts or professionals. Refer to your owner's manuals for instructions regarding the safe use of your bicycle or equipment. Do not attempt to duplicate any stunts that are beyond the capabilities of your bicycle or your own capabilities. Always wear the appropriate safety equipment.

WHO WE ARE

## OUR DEVELOPMENT PROCESS

# YOUR RIDE **STARTS HERE**

**SPECIALIZED STARTED IN 1974** with a keen focus on a rider's needs for functional and technically advanced cycling equipment that provided a real performance benefit. Over three decades later, this founding principal is still the beating heart of the company.

A rider's need stems from the experience that an individual rider wants to have while out on a bike. A bike or piece of equipment offers a real performance benefit if it has the right stuff to enable the rider to achieve that experience—whether it's winning a stage in the Tour de France or riding without training wheels for the first time.

That's where our development process comes into play. Once the product manager (the person here at Specialized that drives the development of a bike or piece of equipment) develops an acute insight and understanding of a specific experience, they distill the specific product attributes required to deliver the experience.

To create a bike or piece of equipment that truly allows someone to get more out of riding takes a lot of effort from a wide range of experts including engineers, designers, fabricators and testing specialists. These developments result in new technology, inventions so new they are awarded patents, and first-place medals. While we like medals and pats on the back, all our effort is in the name of making your time on a bike better.

Tom Boonen tightens his grip on the sprinter's Green jersey during his 2nd victory in the 2007 Tour de France.

# BIKE HEADLINERS

## TARMAC PRO

An all-out road racing machine, the Tarmac® Pro earns its reputation for pure performance potential through design input from road champions like Paolo Bettini and Tom Boonen. Its top shelf list of ingredients—including one super strong and lightweight Az1 carbon frame, an integrated FACT carbon crank, Specialized Mondo™ Pro tires and Body Geometry Toupé™ Team saddle—create a bike with lightning speed, unmatched drive efficiency and precision handling.

## SAFIRE

The new Safire® women's mountain bike is the ultimate compliment to the female XC Trail rider who wants to ride long and hard, while covering every inch of trail possible. Its dynamic FSR suspension includes all the requisite technologies for trail domination: lightweight FACT Az1 carbon chassis, Future Shock® S120, Flow Control Brain and AFR Shock™. Paired with its women's-specific geometry, custom carbon lay-ups, smaller diameter tubing, optimal tube angles and thoughtful component selection, the Safire is every woman's answer to superior handling, efficiency and control.

## GLOBE CENTRUM

Part adventure, part performance and altogether perfect for dodging traffic congestion while exploring every inch of the city, the all-new Globe Centrum™ is a modern, urban commuter with a sleek, simple and stylish design. Reminiscent of old messenger bikes with its thicker tires and flat handlebar, but modernized with a lightweight integrated frame, low standover height, internally geared hub and pressure-sensitive Body Geometry saddle.

## STUMPJUMPER FSR

Now the legendary mountain bike that started it all has even more to offer in the way of XC performance, giving XC Trail riders the ammo they need for gunning prime sections of trail. A FACT Az1 carbon frame and proprietary suspension hardware like our Future Shock® S120 fork and AFR Shock™ with Brain technology make the 120mm-travel Stumpjumper® FSR the lightest, most efficient and best handling trail bike ever.

## TRANSITION

The wind won't even know you're there. For time trials and triathlons, we've found no faster partner in the battle against the clock than the completely redesigned Transition®. Our engineers used every aerodynamic advantage possible to create a ludicrously narrow profile built for raw speed that even the best athletes like Ironman winning Chris McCormack ride to win. Dialed geometry for perfect positioning and stability, Roval Rapide Star™ wheels for less drag, an integrated brake system for maximum aerodynamics and control and a four-position seatpost for pedaling efficiency.

# EQUIPMENT HEADLINERS

## ROVAL CONTRÔLE XC RACE WHEELSET

Ridden by Pro cross-country racers like Specialized-sponsored Christoph Sauser and Liam Killeen, our Roval Contrôle™ XC Race wheelset is one of the lightest and fastest on the market—only 1,400 grams a pair—while still maintaining durability. Performance-optimized with tubeless E5 alloy rims, double drive lacing, DT Swiss spokes and DT Pro Lock nipples for razor-sharp handling, phenomenal efficiency and strength.

## PHENOM SADDLE

This off-road saddle strikes the perfect balance between the minimalist design of a road saddle and the more plush form of an aggressive MTB saddle, making it the most ideal saddle choice for off-road racers and XC Trail riders in search of all-day comfort. The Phenom™ combines a carbon reinforced shell for support and flexibility with a micromatrix cover, scuff guards and Ti rails for durability. Its multi-width options, foam padding and Body Geometry cut-out provide sensitive tissue relief and sit-bone comfort.

## S-WORKS 2D HELMET

Lids don't get much lighter, more ventilated or better fitting than the new S-Works 2D™ helmet. Every dimension of the 2D is created for ultimate performance beyond any competitor's wildest dreams: Dual Density foam shell technology reduces weight and still meets CPSC testing standards, while the Kevlar® InnerMatrix builds internal strength and protection. The Pro Fit 360 retention system provides maximum adjustment for a truly customized fit, and the Mega Mouthport™ creates incredible cooling.

## S-WORKS ROAD SHOE

When a gram here or there means everything, finding the lightest, stiffest, most high performance shoe that also offers ergonomic comfort is irreplaceable. Even with its advanced Boa closure and new Powerzone lacing for extra security, Body Geometry® Footbeds for better hip, knee and foot alignment and uber-efficient FACT carbon sole, the S-Works Road still remains the lightest shoe available with a mechanical closure.

## S-WORKS THE CAPTAIN TIRE

This aggressive XC Trail tire was designed by Specialized MTB Factory Team Captain Ned Overend to excel in a wide range of trail conditions with the perfect balance of speed and traction. The Captain™ is not only light, supple, durable and puncture-resistant, but features a mixed tread, dual compound design for speed, grip and dexterity no matter what the terrain. Also available in a 29-inch version.

# DESIGNS FOR WOMEN

THE POSSIBILITIES are as endless as your ride.

**SPECIALIZED DESIGNS FOR WOMEN™** line is synonymous with diversity and individuality. There are many women, all with different reasons for riding, and at Specialized, we develop products with the potential to satisfy every single one of them. Products so in tune with the anatomies and physiologies of female riders that you'll never want anything but "women's-specific" from here on out.

These bikes and equipment offer real benefits for real women, without compromise or limitation. Full suspension mountain bikes, fitness and performance road bikes, shoes, saddles, gloves, optics, handlebars—the list goes on. All with fit, function, performance and style to suit your every need. Because we like revolutionizing the way cycling equipment fits and fuels women on the road and trail.

Your ride only gets better from here.

DESIGNS FOR WOMEN

**START OF STAGE 1 OF THE 2007 TOUR DE FRANCE** at London's Tower Bridge: This year, Specialized had five teams running our new S-Works 2D helmet and tons of individual riders using our optics, shoes and gloves.

# BG FIT

**RIDING YOUR BIKE SHOULD FEEL GOOD** With our proprietary BG FIT bicycle fit system, a trained Specialized dealer can help you ride faster, longer and in greater comfort.

**FOUND ONLY AT YOUR LOCAL SPECIALIZED DEALER,** BG FIT (Fit Integration Technology) is a proprietary bicycle fit system consisting of a trained fit technician, DATA motion capture software and fit assessment process, a range of frame geometries, ergonomically tuned bicycle components (such as stems, handlebars and headset spacers), efficient gearing, and scientifically proven Body Geometry saddles, footbeds, shoes, gloves and shorts.

Andy Pruitt, EdD, PA and the Director of the Boulder Center for Sports Medicine, has been helping cyclists for over 30 years, and he helped our team of fit experts fine-tune the BG FIT DATA (Dual Angle Technical Assessment) proprietary motion capture software and fit assessment process.

The BG FIT technician at your local Specialized dealer has been trained to analyze your pedal stroke and body position. Using the data gained during this assessment, they personally optimize your bicycle and equipment to match your biomechanical profile. In essence, they'll enable you to ride faster, longer and in greater comfort.

Contact a BG FIT trained dealer to schedule a complete BG FIT biomechanical analysis.

# BG FIT BY THE NUMBERS

**SPECIALIZED** is the only brand that provides the bikes, equipment and training that can improve every rider's comfort, efficiency, power output and enjoyment.

- 1 **Bicycle Geometries** A range of geometry options have been engineered for specific riding experiences and differences in rider physiology
- 2 **Handlebars** A full range of ergonomically enhanced bars in multiple bends and widths ensure maximum comfort and performance
- 3 **Stems** An outstanding selection of stems including exclusive 4-position models to perfectly tune bar position
- 4 **Integrated Headtube Extender** Raises bar position when needed for a safe and seamless fit
- 5 **Spacer Stack** Allows for micro-adjustments of position
- 6 **Gearing** A range of gear options are offered to suit different experiences and levels of fitness
- 7 **Body Geometry Saddles** Available in multiple widths and medically proven to enhance blood flow and reduce pressure to sensitive areas
- 8 **BG Shoes** Clinically proven to decrease heart rate and improve endurance through patented ergonomic features
- 9 **BG High Performance Footbeds** Ensure optimized foot, knee and hip alignment, enhancing performance and decreasing chance of injury
- 10 **BG Varus/Valgus Wedges** Further help to optimize foot, knee and hip alignment
- 11 **BG Shorts** Two different families of multi-density pads are tuned for specific riding experiences and help ensure the last mile feels as good as the first
- 12 **BG Gloves** Clinically proven to reduce the numbness experienced by most cyclists
- 13 **BG Bar Coverings** Proven to reduce both hand pressure and vibration

# BG FIT DATA

**THE NEXT LEVEL OF FIT** BG FIT DATA is the only program that combines a dual angle motion capture software and fit assessment system, extensive technician training, and a full range of ergonomic bikes and equipment to take every rider's comfort, power, efficiency and enjoyment to the next level.

**BG FIT DATA (DUAL ANGLE, TECHNICAL ASSESSMENT)** is a proprietary motion capture software and fit assessment process, which allows a BG FIT technician to capture any rider's pedaling motion and body position on video in multiple angles, perform a quantitative assessment and implement changes to the rider's position that result in more comfort, efficiency and enjoyment.

Developed by the fit experts at Specialized and Dr. Andy Pruitt EdD, PA of the Boulder Center for Sports Medicine, BG FIT DATA increases the accuracy and repeatability of the bicycle fit process and provides the bicycles, equipment and apparel to ensure maximum comfort and efficiency for any rider. There's no better way to ensure that your next ride is more enjoyable than to schedule a BG FIT DATA session with a trained technician at your Specialized dealer.

**BG FIT DATA SYSTEM** will lead to better performance because it increases the accuracy and repeatability of pedaling and fit analysis thanks to our Dual Angle motion capture technology.

- BG FIT DATA is the only bicycle fit system that is complimented by a full line of ergonomically enhanced bicycles, equipment and apparel
- BG FIT DATA features a proprietary set of tools that allow for a qualitative analysis of video footage and measurement of 2D data
- Thanks to a dual-camera set-up, BG FIT DATA can capture a rider's pedaling motion from two different angles
- BG FIT DATA enables the trained technician at your local dealer to perform a 'before' and 'after' analysis by splitting the video screen into two halves
- Proprietary drawing and measurement tools allow a BG FIT technician to accurately measure and record key variables such as back, knee, ankle extension
- A copy of a BG FIT DATA session can be easily saved and presented to any rider for later review and use

**SPLIT SCREEN BG FIT DATA** enables the trained technician at your local dealer to perform a 'front / side and before / after' analysis of your position while pedaling by splitting the video screen into two halves to accurately measure and record key variables such as back, knee, ankle extension. This assessment allows your bike to be adjusted to perfectly suit your body, resulting in optimized comfort, power output and efficiency.

ROAD LIGHT TRANSMISSION RANGE

MOUNTAIN LIGHT TRANSMISSION RANGE

# OPTICS TECH

**NO NEED TO CHECK THE WEATHER CHANNEL** Adaptalite® photochromic lenses have the forecast built in. Automatically shifting from a dark to light state in mere seconds based on the conditions outside. The only question left for you is, road or mountain?

**ADAPTALITE®  
PHOTOCHROMIC LENSES**

Between the sun's intense rays, shifting clouds and the occasional downpour, your eyes are hard at work with every ride. But you're too busy climbing hills and bombing trails to bother changing your shades.

The answer is one very smart pair of optics. Specialized Adaptalite® photochromic\* lenses respond to varying light conditions in mere seconds. They darken with the sun and lighten with the shade, giving you maximum visual clarity without distortion. Now your eyes can take a rest, even while your legs are hard at work.

\*Optics also available in non-photochromic, fixed-tint versions intended for use in strong sunlight

**TERRAIN-SPECIFIC  
COLOR OPTIMIZATION**

Different terrain brings different challenges to your vision. That's why we offer a road and MTB version of our light-sensing optics. Our mountain formula (amber tint) enhances contrast for a perfectly calibrated ride in mixed light conditions. The road formula (red tint) dampens glare and improves red-spectrum contrast so you'll most definitely see brake lights and other potential hazards, not feel pavement.

**NXT® LENS MATERIAL**

If it's built for bullets, we're pretty sure you won't be shattering your shades. Our lenses are made out of NXT®, a special polymer formula originally developed to bullet-proof the windshields of Apache helicopters.

With that kind of superhuman strength, plus optical superiority, light weight, scratch and static resistance—NXT®, is the closest you get to optical immortality. Polycarbonate simply doesn't measure up.

**PANTOSCOPIC ANGLES**

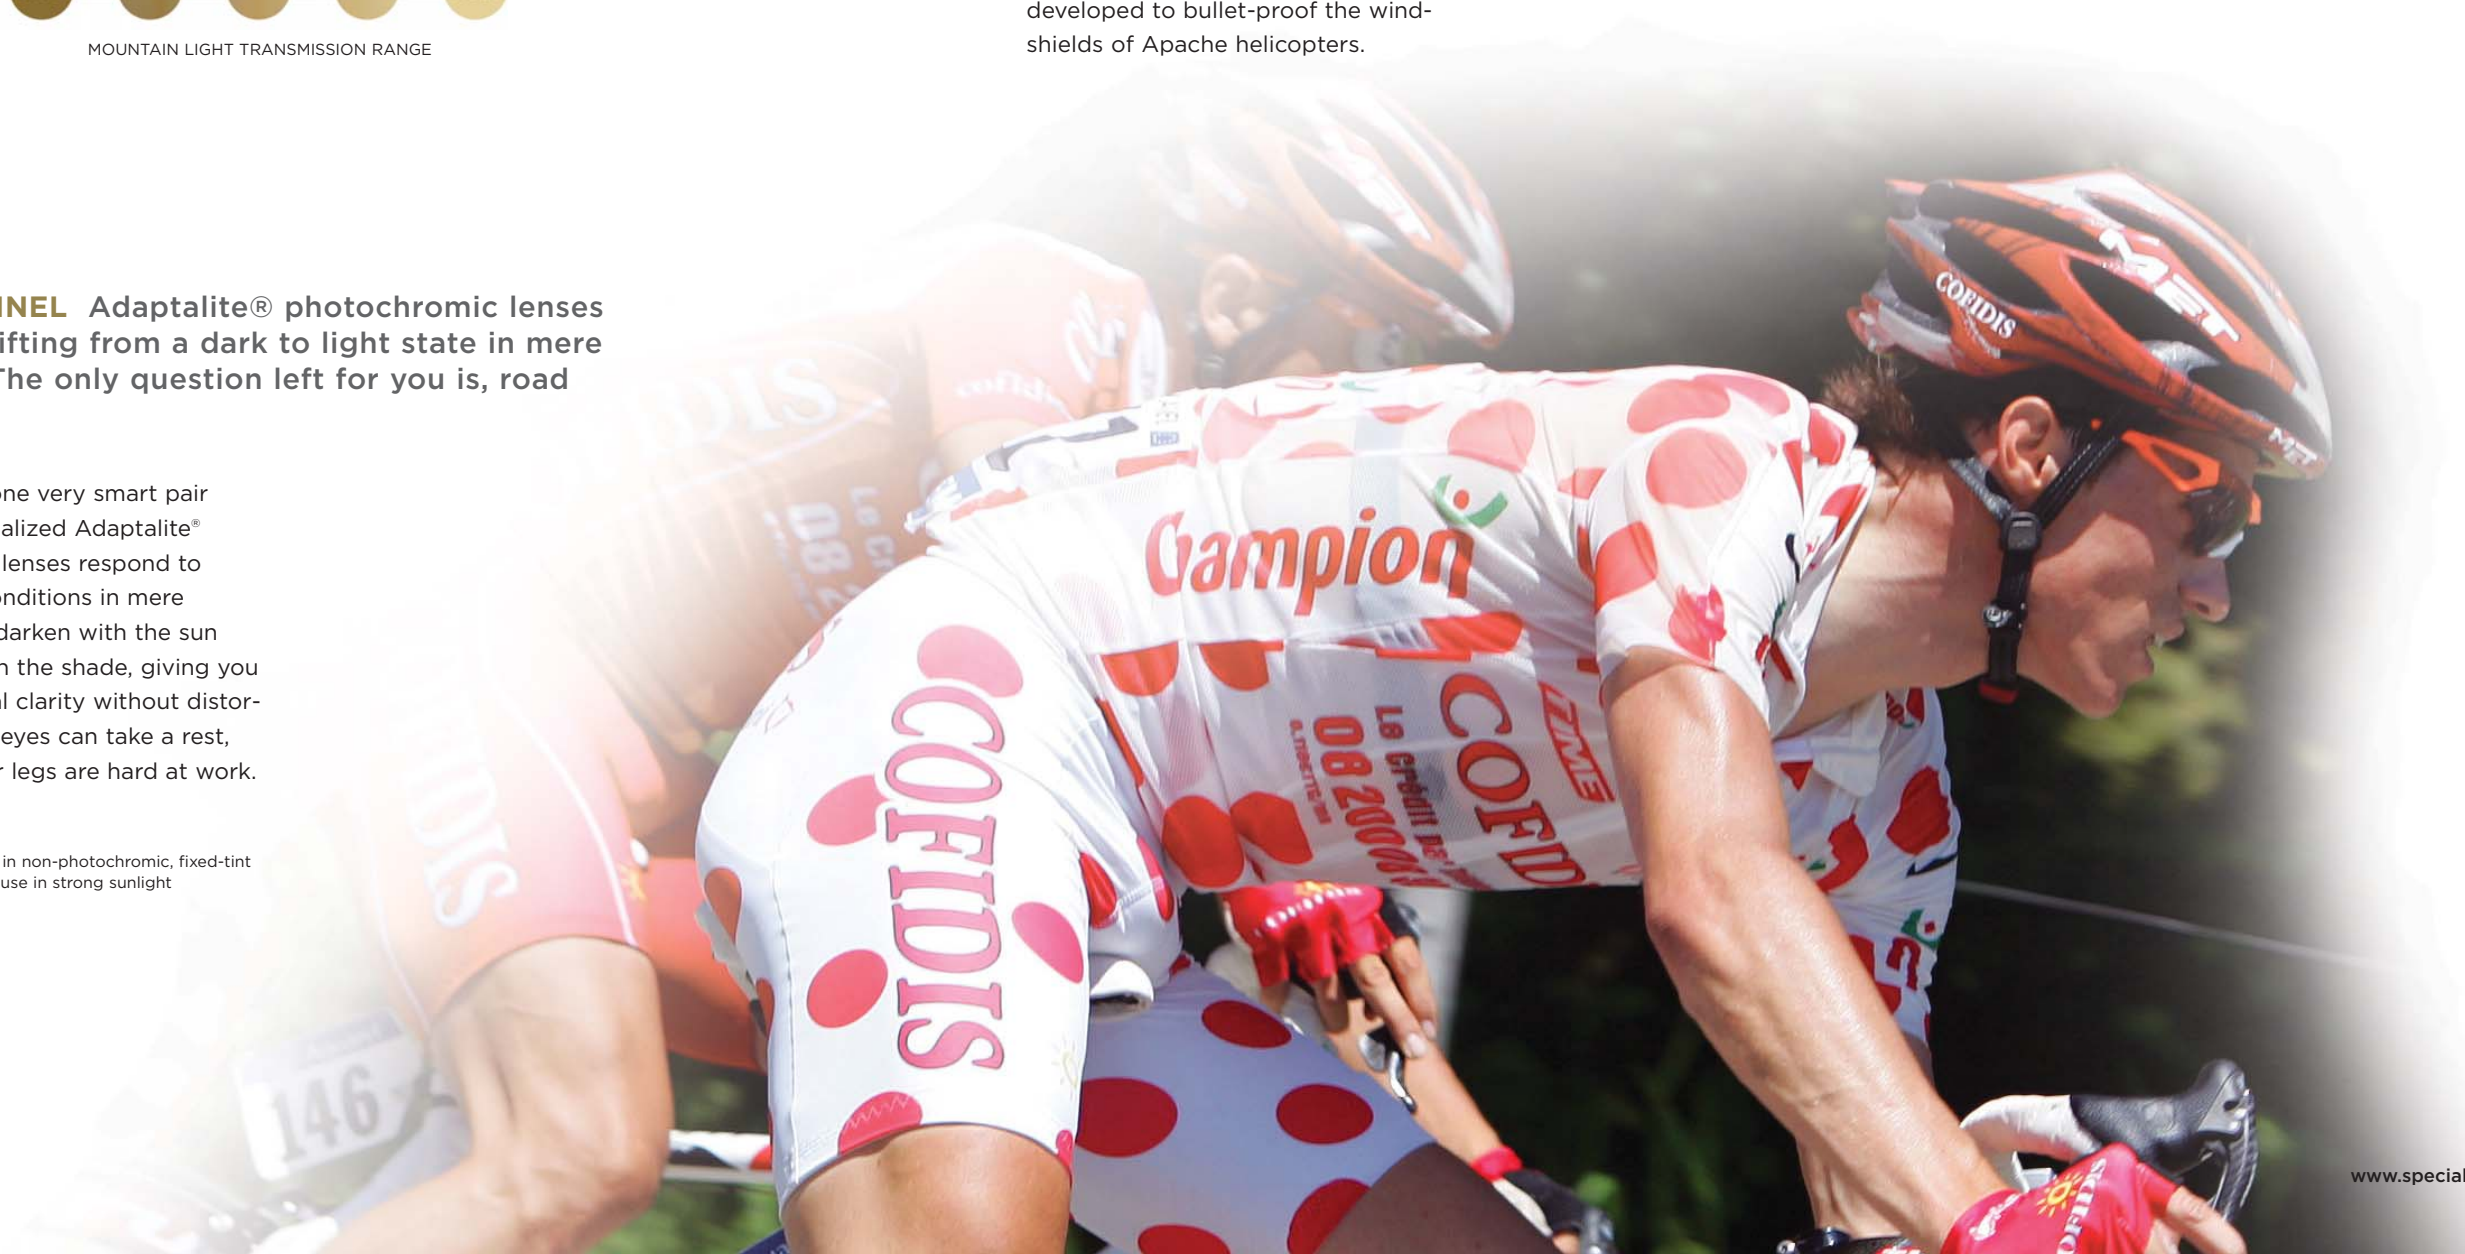

Cyclists have to see further down the road and trail than the average Joe. Specialized optics are called cycling-specific for a reason—their pantoscopic angles let you see the periphery and all the way down the road or trail. We're not claiming 360 degrees, but maybe someday.

Our MTB optics are specifically angled for a more upright riding position, and a close cheekbone fit keeps out the pesky

mud and debris. Our road lenses adhere to a tilted head and body position, with a close-to-the-forehead fit that ensures you're looking at the road, not over the rim.

**ANTI-FOG VENTING**

Anti-fog means fog is the enemy, and our breezy shades are the solution. When you're caught in a haze, you can't concentrate on the ride. By designing lenses to allow air flow behind the frame, we eliminate the hot air pocket that causes fogging. So there's no end to your crisp, clear, uninterrupted vision.

# OPTICS ROAD

**LIKE A BIRD** With its eyecatching, ultra high-tech “flying lens” design and combination of shatterproof NXT material and Adapталite photochromic technology, the Miura is as noteworthy for its high performance in the Pro Peloton as for its bold good looks.

### ARC™II & ARC II SMALL

Our groundbreaking Arc optics evolve for even better performance, with updated comfort and functionality. Improved coverage and contact points make the Arc II models the ultimate in lightweight optical function.

- Available in Adapталite photochromic or non-shifting dark state NXT
- Unique filters in the road formula enhance reds for improved safety
- Molded Grilimid frames are strong and durable
- Molded Megol nosepiece and ear tabs hold comfortably
- Adapталite model includes molded hardcase for storage
- Adapталite version provides 39%-12% light transmission
- Non-Adapталite NXT version is fixed at 12% light transmission (dark state)

### MIURA™ & MUIRA SMALL

The boldest Specialized style yet, the Miura is the flagship for an entire new collection of molded frame models that show the continued evolution of our optics line. This aggressive shield will benefit everyone from racers in the Pro Peloton to dedicated weekend warriors.

- Available in Adapталite photochromic or non-shifting dark state NXT
- NXT lens material is superior in its light weight and shatterproof qualities
- Molded Grilimid frames are strong and durable
- Adjustable, dual density ear pieces allow for customized fit and comfort
- Adapталite model includes molded hardcase for storage
- Compatible with Helix prescription insert
- Adapталite version provides 39%-12% light transmission
- Non-Adapталite NXT version is fixed at 12% light transmission (dark state)

### TARZO

This aggressively styled model frequently shows up in breakaways and sprints in the European peloton. With its unique look and fantastic function, it clearly embodies the identity of our optics collection

- Available in Adapталite photochromic or non-shifting dark state NXT
- Unique filters in the road formula enhance reds for improved safety
- Molded Grilimid frames are strong and durable
- Molded Megol nosepiece and ear tabs hold comfortably without slipping
- Adapталite model includes hardcase for storage
- Adapталite version provides 39%-12% light transmission
- Non-Adapталite NXT version is fixed at 12% light transmission (dark state)

### CORTINA

One of the original members of our Optics collection, the Cortina is a great option for those with smaller faces or who desire less coverage on their face.

- Available in Adapталite™ Photochromic or non-shifting dark state NXT™
- Unique filters in the Road formula enhance reds for improved safety
- NXT™ Adapталite™ lens in a standard configuration for a more traditional look and performance
- Molded Grilimid frames are strong and durable
- Molded Megol nosepiece and ear tabs hold comfortably without slipping
- Adapталite™ model includes molded Hardcase for storage
- Non-Adapталite NXT version is fixed at 12% light transmission (dark state)

### HELIX™

Destined for greatness, the Helix provides the incredible performance of our unique lenses in a silhouette that cyclists of all types can appreciate.

- Available in both Adapталite photochromic models or non-shifting dark state NXT
- Unique filters in the Road formula enhance reds for improved safety
- Molded Grilimid frames
- Molded Megol nosepiece and ear tabs hold comfortably
- Adapталite model includes molded hardcase for storage
- Prescription insert available as a separate item
- Adapталite version provides 39%-12% light transmission
- Non-Adapталite NXT version is fixed at 12% light transmission (dark state)
- Aftermarket lenses in mountain formula are available

### SAN REMO

One of our most versatile models, the San Remo provides excellent coverage and a unique look for those wanting a larger sized road silhouette

- Available in Adapталite photochromic or non-shifting dark state NXT
- Unique filters in the road formula enhance reds for improved safety
- Molded Grilimid frames are strong and durable
- Molded Megol nosepiece and ear tabs hold comfortably without slipping
- Adapталite model includes molded hardcase for storage
- Adapталite version provides 39%-12% light transmission
- Non-Adapталite NXT version is fixed at 12% light transmission (dark state)

### KAVA™

The Kava is our first model that is primarily designed towards women's styling. Smaller width and circumference provide a more comfortable fit and better function for smaller faces.

- New for 2008 Model Year
- Available in Adapталite photochromic or non-shifting dark state NXT
- Exclusive Specialized Adapталite lens (road formula) adjusts to existing light conditions
- Unique filters in the road formula enhance reds for improved safety
- NXT lens material is superior in its light weight and shatterproof qualities
- Molded Grilimid frames are strong and durable
- Molded Megol nosepiece and ear tabs hold comfortably
- Adapталite model includes molded hardcase for storage
- Adapталite version provides 39%-12% light transmission
- Non-Adapталite NXT version is fixed at 12% light transmission (dark state)

# OPTICS OFF-ROAD

**SPACE AGE FOR THE DIRT AGE** Defying gravity with its lightweight, non-hinged, single lens simplicity, the Arcterra™ offers the most frills-free coverage for your trail riding adventures.

### ARCTERRA & ARCTERRA SMALL

For those who like to add a little fashion to their riding, this model offers all the performance benefits of our other optics, plus loads of style.

- ArcTerra models are now available in Adaptalite photochromic or non-shifting dark state NXT
- Lightweight stainless steel, non-folding frame
- Updated MTB formula lens starts lighter and shifts faster
- NXT Adaptalite lens in a shield construction
- Frontal bridge provides rigidity and sweat management
- Molded Megol nosepiece and ear tabs hold comfortably
- All versions include a hardcase for safe storage
- Adaptalite version provides 78%-22% light transmission
- Non-Adaptalite NXT version is fixed at 22% light transmission (dark state)

### DIVIDE™

The Divide represents our new generation of mountain bike styles. With styling derived partially from our popular Chicane, it has an updated design, larger coverage and improved fit.

- Available in Adaptalite photochromic or non-shifting dark state NXT
- Exclusive Specialized Adaptalite lens (mountain formula) adjusts to existing light conditions
- NXT lens material is superior in its light weight and shatterproof qualities
- Lens and frame are designed to permit venting for reduction of fogging
- Molded Grilimid frame is light and durable
- Adjustable, dual density ear pieces allow for customized fit and comfort
- Adaptalite model includes hardcase for safe storage
- Adaptalite version provides 78%-22% light transmission
- Non-Adaptalite NXT version is fixed at 22% light transmission (dark state)

### BERM™

One of our most versatile models, the Berm provides excellent coverage and a unique look for those wanting a larger-sized road silhouette.

- New for model year 2008
- Available in Adaptalite photochromic or non-shifting dark state NXT
- Exclusive Specialized Adaptalite lens (mountain formula) adjusts to existing light conditions
- NXT lens material is superior in its light weight and shatterproof qualities
- Lens and frame are designed to permit venting for reduction of fogging
- Molded Grilimid frame is light and durable
- Molded Megol nosepiece and ear tabs hold comfortably
- Adaptalite model includes hardcase for safe storage
- Adaptalite version provides 78%-22% light transmission
- Non-Adaptalite NXT version is fixed at 22% light transmission (dark state)

### ENDO

For those who like to add a little fashion to their riding, this model offers all the performance benefits of our other optics, plus loads of style.

- Available in Adaptalite photochromic or non-shifting dark state NXT
- Exclusive Specialized Adaptalite lens (mountain formula) adjusts to existing light conditions
- NXT lens material is more shatterproof and lightweight than polycarbonate
- Molded Grilimid frame is light and durable
- Molded Megol nosepiece and ear tabs hold comfortably
- Adaptalite model includes Specialized hardcase for safe storage
- New colors for the 2008 model year

### EL TORO

This exciting model boasts a versatile style that is suitable for any situation or event.

- Available in Adaptalite photochromic or non-shifting dark state NXT
- Exclusive Specialized Adaptalite lens (mountain formula) adjusts to existing light conditions
- NXT lens material is superior in its light weight and shatterproof qualities
- Molded Grilimid frame is light and durable
- Molded Megol nosepiece and ear tabs hold comfortably
- Adaptalite model includes hardcase for safe storage

### HALF TIME™

The Half Time combines an open frame design with our Adaptalite™ lens to create a great-fitting and great-performing cross-country model that is lightweight and fully ventilated.

- Available in Adaptalite photochromic or non-shifting dark state NXT
- Frame design is open on the bottom for more weight savings
- Molded Grilimid frame is light and durable
- Molded Megol nosepiece and ear tabs hold comfortably
- Adaptalite model includes hardcase for safe storage
- Adaptalite version provides 78%-22% light transmission
- Non-Adaptalite NXT version is fixed at 22% light transmission (dark state)

### CHICANE™

One of our original models, the Chicane is still a top performer due to its incredible fit and great looks.

- Available in Adaptalite photochromic or non-shifting dark state NXT
- Molded Grilimid frame is light and durable
- Molded Megol nosepiece and ear tabs hold comfortably
- Adaptalite model includes hardcase for safe storage
- Adaptalite version provides 78%-22% light transmission
- Non-Adaptalite NXT version is fixed at 22% light transmission (dark state)

### SINGLETRACK™

Another of our original designs, the Singletrack has a smaller frame that's more suitable for those who prefer or need less coverage on the face.

- Available in Adaptalite™ Photochromic or non-shifting dark state NXT™
- Exclusive Specialized Adaptalite™ Lens (Mtn. formula) adjusts to existing light conditions
- NXT™ lens material is superior in its light weight and shatterproof qualities
- Frame design is open on the bottom for even more weight savings
- Molded Grilimid frame is light and durable
- Molded Megol nosepiece and ear tabs hold comfortably
- Adaptalite™ model includes Specialized Hardcase for safe storage

### SHIFTY™

Its style influence is from the street, but its function is for the trail. The unique performance of our exclusive lens formula and its up-to-date look create a great combination.

- The Shifty is only available as an Adaptalite model.
- Exclusive Specialized Adaptalite™ Lens (Mtn. formula) adjusts to existing light conditions
- NXT™ lens material is superior in its light weight and shatterproof qualities
- Styled for a great look on or off the bike

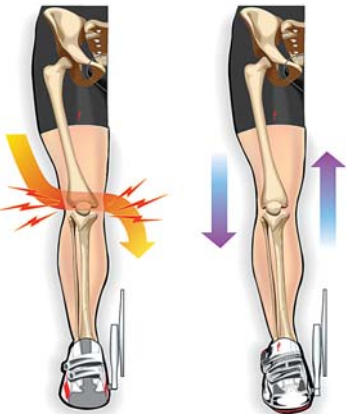

# SHOE TECH

**FOOT FETISH** Finding the right shoe size is only the first step. Specialized Body Geometry® shoes and footbeds are built to make the marriage between body and bike more productive, more comfortable and less painful.

We wouldn't have spent countless hours developing our Body Geometry shoes with Dr. Andy Pruitt from the Boulder Center for Sports Medicine if we didn't realize the benefits behind a perfect fitting shoe. After all, your feet are your power transfer. Every watt you put into those pedals should move you forward, not waste your energy. The BG shoe works in three ways.

### VARUS WEDGE

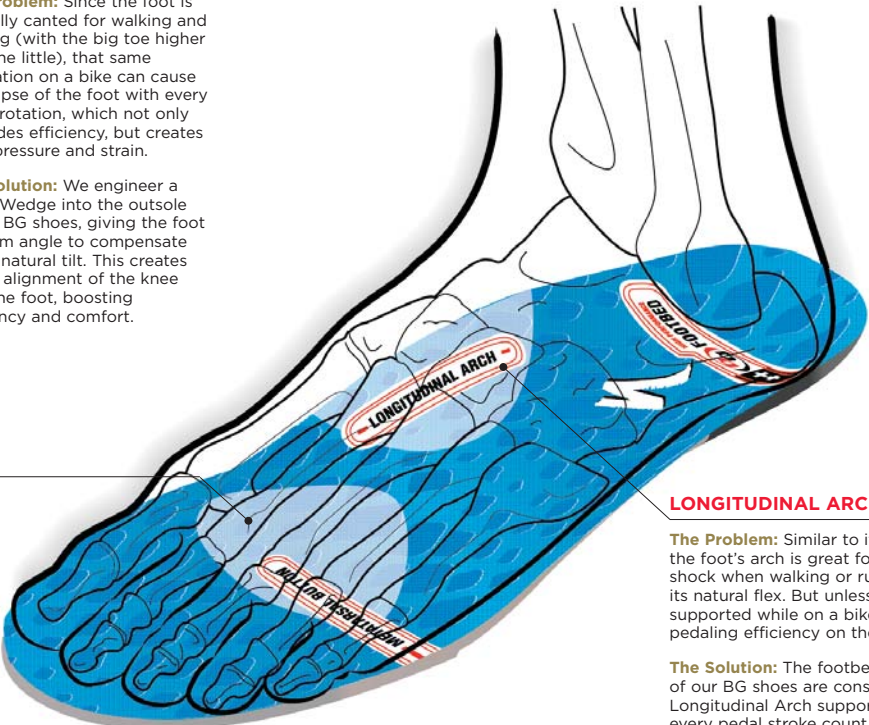

**The Problem:** Since the foot is naturally canted for walking and running (with the big toe higher than the little), that same angulation on a bike can cause a collapse of the foot with every pedal rotation, which not only degrades efficiency, but creates knee pressure and strain.

**The Solution:** We engineer a Varus Wedge into the outsole of our BG shoes, giving the foot a 1.5mm angle to compensate for its natural tilt. This creates better alignment of the knee over the foot, boosting efficiency and comfort.

### METATARSAL BUTTON

**The Problem:** Cyclists often experience "hot spots" or numbness in the forefoot while riding, due to the fact that a snug shoe can lead to the compression of nerves and arteries in between the metatarsals (long bones of the forefoot).

**The Solution:** The Metatarsal Button in our BG shoes works against this problem by lifting and separating the metatarsals to eliminate related compression and discomfort.

### LONGITUDINAL ARCH

**The Problem:** Similar to its angulation, the foot's arch is great for absorbing shock when walking or running, thanks to its natural flex. But unless the arch is supported while on a bike, it can hinder pedaling efficiency on the downstroke.

**The Solution:** The footbeds and outsoles of our BG shoes are constructed with Longitudinal Arch support, truly making every pedal stroke count in your favor.

# SHOES ROAD

**TWO SMOKING BARRELS** Feathery enough for the Pro Peloton racer and re-vamped with Powerzone lacing for even more precision adjustability, the S-Works® Road shoe provides world-class caliber jet fuel for your feet.

### S-WORKS ROAD

Our featherweight S-Works shoe is the lightest cycling shoe with a closure system, while still meeting the demanding performance needs of the European pro racer. For this season the Boa closure dial system is entirely redesigned to reduce weight and enhance tunability.

- Lightest production road shoe with a mechanical closure-approximately 250g (1/2 pr #42)
- Full BG features in the High Performance BG+ footbed and outsole:
  - Exclusive Metatarsal Button and Longitudinal Arch Support reduce hot spots and swelling
  - Varus Wedge adjustment angles foot slightly for improved ergonomics
- Redesigned Boa rotary closure for lighter weight and super secure function
- Powerzone lacing system lets the rider adjust tightening forces for the top and mid zones
- Light, tough, water-resistant Micromatrix upper for supple comfort
- Fully vented tongue for improved breathability
- Stiff and light full FACT carbon sole - 10.0 stiffness index
- Limited Edition Flo-Orange & white shoe as raced by select Specialized riders

### PRO ROAD

The choice of top pro riders everywhere, our phenomenal fitting road racing shoe is redesigned for improved performance.

- Patent pending X-link™ closure system offers secure ankle control and unmatched adjustability
- New M-lock Pro buckle for secure closure
- Lightweight FACT full carbon sole - 10.0 stiffness
- Engineered Micromatrix upper is light, durable and supple fitting
- Performance enhancing BG contours in the outsole and High Performance BG+ Footbed
- Approximate weight 560g pair

### EXPERT ROAD

Patented BG technology increases comfort and efficiency with Varus Wedge, Metatarsal Button, medial arch support

- Lightweight and stiff FACT carbon/glass fiber sole - 8.5 stiffness index
- 3 straps for snug and supple fit
- Two density performance-tuned Body Geometry insole
- Engineered Micromatrix synthetic leather is extremely supple, durable and lightweight
- Approximate weight 590g pair (#42)

### PRO WOMEN'S ROAD

A high performance road race shoe contoured to fit a women's foot.

- Patent pending X-link™ closure system offers secure ankle control and unmatched adjustability
- Women's lasted fit
- Lightweight FACT full carbon sole - 10.0 stiffness
- New M-lock Pro buckle for secure closure
- Performance enhancing BG contours in the outsole and High Performance BG+ Footbed
- Light and durable Micromatrix upper for supple fit
- Approximate weight 505g pair

# SHOES ROAD

**A WINDY WIND-UP** The purpose-built Trivent™ shoe makes the most of your multi-sport miles with easy on-and-off and plenty of cool/dry ventilation. Providing the most comfort and function from transition to transition.

## TORCH WOMEN'S

Designed to properly fit women, the Torch combines proven performance-enhancing Body Geometry ergonomics and our form fitting M-lock ratchet closure. The soft upper, contoured footbed and tuned stiffness of the outsole ensure the Torch is a perfect match to the unique shape of a woman's foot.

- Women's lasted fit
- Stiff injection molded and glass reinforced sole with generous vent ports at the front and rear - 5.0 stiffness index
- Micro adjusting M-lock buckle for secure closure
- Performance enhancing BG features in the outsole & BG footbed
- Light & durable Micromatrix upper for supple fit
- Approximate weight 550g pair

## TRIVENT TRIATHLON

When 3x Ironman World Champion Peter Reid described his vision of the ultimate tri shoe, we listened, and our collaboration with the planet's fastest triathlete manifested in the Trivent. Its venting system floods the shoe with cooling airflow, keeping your feet dry and cool no matter how hot the course-even the FACT carbon sole is vented and heat reflecting to control temperature. The Trivent will ensure your feet are primed and ready for peak performance during the run.

- The patented BG outsole and footbed design is scientifically proven to measurably increase performance in elite riders
- FACT carbon/glass fiber reinforced outsole is directionally rigid for outstanding power transfer - 8.5 stiffness index
- The chromed fibers of our FACT carbon outsole work as a heat shield, reflecting road heat for cooler feet, even in the hottest racing conditions
- Ergonomic BG footbed is fully perforated for ventilation
- Ventilated FACT sole, molded toe and open mesh upper
- Shoehorn-style heel pull is attached on the inside of the heel
- Ultra wide opening and wide main strap for fast shoe changes in the transitions
- Light and durable Micromatrix upper for supple fit
- 3-Bolt cleat patterns fit Shimano SPD-SL, Look, Time and Speedplay
- Approximate weight 590g pair

## TRIVENT WOMEN'S

The ultimate woman's tri shoe is a favorite for its venting system that floods the shoe with cooling airflow, keeping your feet cool and dry. Even the FACT carbon sole is vented and reflects heat. Combined with our patented and scientifically proven Body Geometry ergonomic technologies, the Trivent will ensure your feet are ready for peak performance during the run.

- Women's lasted fit
- FACT carbon / glass-fiber sole uses chromed fibers to act as a heat shield and reflect road heat
- Ultra-wide opening and wide main strap for fast shoe changes in transitions
- Shoe-horn-style heel-pull for easy on and off
- Fully mesh lined for barefoot comfort
- Ergonomic BG footbed is fully perforated for ventilation
- Approximate weight: 530g pair

## COMP ROAD

Similar to our Pro shoes in features and fit, but at a more affordable price.

- Stiff injection molded and carbon plate reinforced sole with generous vent ports at the front and rear - 7.0 stiffness index
- Micro adjusting M-lock buckle for secure closure
- Performance enhancing BG features in the outsole and footbed
- Real leather upper
- Approximate weight 605g pair

## ELITE ROAD

All-new road shoe model offers the performance and fit of a high-end shoe in a more-affordable design.

- Performance enhancing BG features in the footbed and outsole
- Stiff injection molded and carbon-plate-reinforced sole with generous vent ports at the front and rear - 7.0 stiffness index
- Performance-enhancing BG features in the outsole and BG footbed
- Real leather upper
- Secure-fitting 3-strap Velcro closure
- Approximate weight: 640g pair

## SPORT ROAD

The essential performance and fit of our high-end road shoes in a more casual design that's ideal for beginning racers or road enthusiasts.

- Full BG features in the footbed and outsole
- Secure fitting 3-strap Velcro closure
- Glass reinforced nylon sole
- Real leather and mesh upper
- Fits 3-bolt Time, Look, Shimano SPD-SL and 2-bolt Shimano SPD-R cleat systems
- Approximate weight 690g pair

## SONOMA

This sleek shoe feels great on the bike or walking around and is styled to look good cruising around the city. A great fitting comfort shoe that is ideal for everything from touring to spinning.

- Secure 3-strap Velcro closure
- TrailTraction midsole plate is stiff for efficient cycling, but flexible enough for walking
- Real suede leather and vented mesh upper
- Comfort tuned BG footbed
- SPD-compatible sole has smooth, walkable, rubber tread
- Reflective toe and heel
- Approximate weight 930g pair

## SONOMA WOMEN'S

Leave the mountain and road shoes at home and slide into the stylish Sonoma for those casual days around town. Features a women's-specific fit, and is SPD-compatible with a smooth, walkable sole.

- Secure 2-strap Velcro closure
- TrailTraction midsole plate is stiff for efficient cycling, but flexible enough for walking
- Real leather and vented mesh upper
- Supportive BG footbed
- SPD-compatible sole has smooth, walkable, rubber tread
- Approximate weight 795g pair

## SPIRITA ROAD

Our women's sport road shoe is a great performer. Casually styled with a subtle debossed poppy motif. This affordable shoe offers an efficient sole and supple upper that make it ideal for any road enthusiast.

- Built around our women's last to ensure it fits the unique shape of the female foot
- Full BG features in the footbed and outsole
- Secure fitting 3-strap Velcro closure
- Glass reinforced nylon sole is stiff yet efficient
- Supple synthetic and vented mesh upper
- Approximate weight 530g pair

## SHOES OFF-ROAD

**STEP TO THIS** The S-Works MTB shoe continually ranks podium-high in durability, efficiency and light weight among the likes of Christoph Sauser, Lene Byberg and the rest of the Specialized Pro Mountain Bike Team.

### S-WORKS MTB SHOE

The great fit and phenomenally lightweight S-Works road shoe with enough protection for bouncing along singletrack. Race proven by our pro squad when they want an ultralight carbon shoe with the fit benefits of the enhanced Boa rotary and Powerzone lacing systems.

- Full BG features in the footbed and outsole:
  - Exclusive Metatarsal Button and Longitudinal Arch Support reduce hot spots
  - Varus Wedge adjustment angles foot slightly for improved ergonomics and knee/foot/hip alignment
- Redesigned Boa rotary closure for lighter weight and super secure function
- Powerzone lacing system lets the rider adjust tightening forces for the top and mid zones of the shoe to provide unprecedented fit and comfort
- Replaceable high strength braided steel lace
- "Set & forget" Velcro front strap adjusts forefoot width and volume
- Light, tough, water-resistant Micromatrix upper for supple comfort
- Fully vented tongue for improved breathability
- Durable thermoplastic rubber outsole for confident traction
- Light and stiff FACT carbon midsole runs the full length of the shoe
- Engineered Micromatrix upper is light, durable and supple fitting with welded reinforcement in the toe and high wear panels
- Welded toe and side panel protection
- Light and durable-approximately 335g

### PRO MTB WOMEN'S

High performance, no compromise women's XC race shoe as worn by our MTB pro female racers.

- Women's lasted upper, and narrow straps for enhanced fit
- Performance enhancing BG contours in the outsole and High Performance BG+ Footbed
- Patent pending X-link™ closure system offers secure ankle control and unmatched adjustability
- Micro adjusting M-lock buckle for super secure retention
- Durable thermoplastic rubber outsole for confident traction
- Light and stiff FACT carbon midsole runs the full length of the shoe
- Hard molded toe kick protector
- Engineered Micromatrix upper is light, durable and supple fitting with welded reinforcement in high wear panels
- Approximate weight 635g pair

### EXPERT MTB

Owens up to the World Cup level performance of our pro shoes in an ultralight 3-strap closure.

- Full length FACT carbon midsole is ultralight and rigid, with a small amount of flex engineered in the toes to reduce heel-lift during hike-a-bike section
- Hard molded toe kick protector
- Durable thermoplastic sole for confident traction
- Engineered Micromatrix upper is light, durable and supple fitting, with welded reinforcement in high wear panels
- Performance enhancing BG contours in the outsole and BG+ High Performance Footbed
- 2-bolt SPD-style cleat pattern, compatible with all major MTB pedals
- Approximate weight 680g pair

### PRO MTB

Our best fitting high performance XC shoe is race proven with Christoph Sauser and the Specialized MTB race squad.

- Performance enhancing BG contours in the outsole and High Performance BG+ Footbed
- Patent pending X-link™ closure system offers secure ankle control and unmatched adjustability
- Micro adjusting M-lock buckle for super secure retention
- Durable thermoplastic rubber outsole for confident traction
- Light and stiff FACT carbon midsole runs the full length of the shoe
- Hard molded toe kick protector
- Engineered Micromatrix upper is light, durable and supple fitting with welded reinforcement in high wear panels
- Approximate weight 730g pair

### MOTODIVA WOMEN'S MTB

Feature packed, yet affordable, our women's MTB shoe combines Body Geometry ergonomics with our secure M-lock ratchet closure. The soft upper and women's-specific fit ensure the Motodiva will fit the unique shape of a woman's foot.

- Micro adjusting M-lock buckle for secure retention
- Lightweight nylon sole with sturdy co-molded lugs for off-the-bike traction
- Hard molded toe kick protector
- Engineered Micromatrix upper is light, durable and supple fitting, with welded reinforcement in high wear panels
- Performance enhancing BG contours in the outsole and footbed
- 2-bolt SPD-style cleat pattern, compatible with all major MTB pedals
- Approximate weight 700g pair

### TRAIL 120 SL

The inspired combination of XC weight and efficiency, paired with DH protection and durability.

- Super lightweight-approximately 380g
- Full BG features in the footbed and outsole:
  - Exclusive Metatarsal Button and Longitudinal Arch Support reduce hot spots
  - Varus Wedge adjustment angles foot slightly for improved ergonomics and knee/foot/hip alignment
- 3/4 cuff ankle for enhanced protection without inhibiting mobility
- Full length FACT carbon midsole is ultralight and rigid, with a small amount of flex engineered in the toes to reduce heel-lift during hike-a-bike section
- Durable thermoplastic outsole for confident traction
- Light, tough, water-resistant Micromatrix upper with strategic welded protection
- Hard molded toe kick protector
- 2-bolt SPD-style cleat pattern, compatible with all major MTB pedals

### RIATA WOMEN'S MTB

This popular women's "sport" level shoe uses a subtle, yet stylish suede leather upper. Women's lasted fit and unique upper is contoured for a women's fit.

- Lightweight nylon sole with sturdy co-molded lugs for off-the-bike traction
- Suede leather and mesh upper is supple and breathable
- Performance enhancing BG contours in the outsole and footbed
- Reflective heel accent for visibility
- 2-bolt SPD-style cleat pattern, compatible with all major MTB pedals
- Approximate weight 630g pair

### TRAIL 110

This shoe perfectly melds XC weight and DH durability. The 3/4 collar offers light-weight protection that doesn't restrict ankle mobility. Inspired by the Trail 120, but in a more affordable model.

- Full BG features in the footbed and outsole
- 3/4 cuff ankle for enhanced protection without inhibiting mobility
- Lightweight nylon sole with sturdy co-molded lugs for off-the-bike traction
- Hard molded toe kick protector
- Engineered Micromatrix upper is light, durable and supple fitting
- Welded reinforcement in high wear panels
- 2-bolt SPD-style cleat pattern, compatible with all major MTB pedals
- Approximate weight 810g pair

**Name:** Ned Overend

**Ride:** 2008 S-Works Stumpjumper FSR

**Favorite Ride:** Durango to Silverton Ironhorse Road Race

**Profile:** Ned's lived in Durango for almost 30 years now. 30! Head down to the Four Corners region, and you're sure to see The Captain bombing down Coal Bank pass or out on The Colorado Trail.

## SHOES OFF-ROAD

**PUT A SOCK IN IT** Depending on your trail of choice, these off-road options are built for high protection, versatility, all-weather performance or a little leisure. From the most aggressive descent to the ego-building victory walk, they've got you covered.

### SPORT MTB

Our classic high performance, yet affordable MTB shoe. Light, durable and ergonomically enhanced with BG technology, this shoe is always top rated by editors.

- Full BG features in the footbed and outsole: Exclusive metatarsal button and longitudinal arch support reduce hot spots and Varus Wedge adjustment angles foot slightly for improved ergonomics and knee/foot/hip alignment
- Secure-fitting 3-strap Velcro closure
- Real leather and mesh upper
- Compatible with 2-bolt SPD-style systems
- Approximate weight: 790g pair

### COMP MTB

The combination of pro-inspired fit, Body Geometry ergonomics and affordability makes this the best performing shoe in its category.

- Micro adjusting M-lock buckle for secure retention
- Lightweight nylon sole with sturdy co-molded lugs for off-the-bike traction
- Hard molded toe kick protector
- Engineered Micromatrix upper is light, durable and supple fitting, with welded reinforcement in high wear panels
- Performance enhancing BG contours in the outsole and footbed
- 2-bolt SPD-style cleat pattern, compatible with all major MTB pedals
- Approximate weight 810g pair

### BUZZSAW

Best all-mountain to freeride shoe with optional SPD compatibility.

- Durable nubuck leather upper with high protection 3/4 collar to protect the ankle and keep out trail grit, without inhibiting ankle movement
- Umma Gumma rubber outsole uses DH tire technology for the best traction and durability
- TrailTraction outsole is stiff for pedaling, flexible in front of the cleat for hiking
- Compatible with 2-bolt SPD style systems
- Full BG features in the footbed:
  - Exclusive metatarsal button and longitudinal arch support reduce hot spots and swelling
- Lace up closure with LaceLock to keep laces out of the chain rings

### TAHO MTB

The Tahoe is designed for cycling, but with many of the attributes of a lightweight hiking shoe, so it's truly trail ready whether you're in the saddle or hiking off the bike.

- Rubber sole inspired by an MTB tire tread pattern
- TrailTraction cycling plate is stiff for cycling, but flexible in front of the cleat for comfort when walking
- Padded BG insole for ergonomic comfort
- Suede leather upper with breathable mesh panels
- A single top strap keeps laces safely out of the chainrings
- 2-bolt SPD-style cleat pattern, compatible with all major MTB pedals
- Approximate weight 925g pair

### TAHO MTB WOMEN'S

This is a stable riding shoe for female MTB riders who also need a comfortable off-the-bike hiking platform. Patterned around a women's fit.

- Our women's last uses reduced heel width and lower forefoot volume for an optimal fit
- The patented BG footbed design increases comfort
- Rubber sole inspired by an MTB tire tread pattern
- TrailTraction cycling plate is stiff for cycling, but flexible in front of the cleat for comfort when walking
- Padded BG insole for ergonomic comfort
- Suede leather upper with breathable mesh panels
- A single top strap keeps laces safely out of the chainrings
- 2-bolt SPD-style cleat pattern, compatible with all major MTB pedals.
- Approximate weight 830g pair

### STUMPY TRAINER

Perfect for the victory walk from bike to podium, the Stumpy Trainer is a full-leather, retro-sport shoe with all the added comfort of our BG footbeds.

- Supple full suede and leather upper
- Contoured BG+ footbed straight out of our race shoes
- Cushioned EVA sole with a gum rubber tread

### DEFROSTER MTB

When training rides are wet and cold, this waterproof and lightly insulated shoe will keep the rider warm and dry every time.

- Waterproof and seam-sealed upper keeps out the water
- Toe area uses a light insulating layer for added warmth
- Thermal fleece-lined BG footbed uses a reflective metallic barrier to trap heat around the foot
- Snug fitting collar forms a gusset to lock out moisture
- Lightweight nylon sole with sturdy co-molded lugs for traction
- Waterproof synthetic upper with 2 secure Velcro straps
- Performance enhancing BG contours in the outsole and footbed
- Compatible with all major MTB pedals
- Reflective heel accent for visibility on dark training rides
- Approximate weight 800g pair

### BG HIGH PERFORMANCE FOOTBED

Developed with Andy Pruitt from the Boulder Center for Sports Medicine, the BG Footbed system improves efficiency, increases comfort, and reduces potential injury. This system allows any rider to achieve a semi-custom fit in their cycling shoes, combining advanced insoles with Varus/Valgus Wedge shims to align cant angle - an upgrade to any cycling shoe.

- By standing on the Specialized "Arch-O-Meter," a rider can determine the optimum level of foot contour:
- "+" = minimal (the standard BG footbed contour available in all our shoes)
- "++" = moderate
- "+++" = significant
- By combining the correct contour insole with an appropriate amount of BG shims, the rider can alter forefoot angle to optimize biomechanical foot/knee/hip alignment (+/- 1.5mm Varus/Valgus wedges included)

# ROVAL WHEEL TECH

**TWO STRONG WHEELS, ONE BIG MOUNTAIN** The newest big shots in a drastically expanded wheel line, our Contrôle™ and Traversée™ mountain wheels are more than up to the task, as long as it involves rocks and dirt.

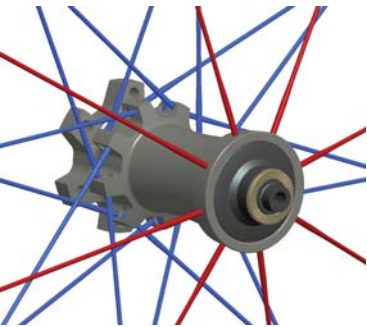

**CONTRÔLE AND TRAVERSÉE MOUNTAIN WHEELS**

Like the classic tale of David and Goliath, our new Contrôle and Traversée wheels are the unassuming hero in a battle against the giant—the mountain. Already winning races and carving the trails, these new Roval™ MTB wheels are designed to meet the highest performance standards of the aggressive cross-country racer or all-mountain rider.

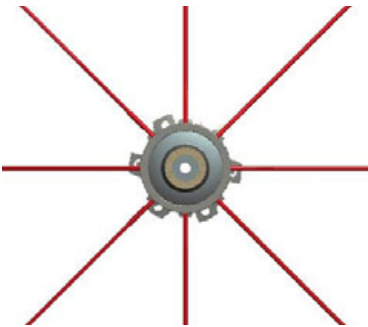

Hand-built from the highest quality parts, the rims, hubs and spokes found on our new models wield strength, durability and light weight, giving you the extra boost of confidence and power you need to handle the tough stuff: E5 welded rims and additional rim eyelets give rock-solid strength, DoubleDrive lacing balances spoke tension, and DT Swiss straight pull spokes add life to the front wheels. Our Roval designed rear hub is also Swiss-made, and we use the lightest star ratchets to reduce weight.

Get a little Contrôle for your rockiest XC race or ride the biggest name when it comes to the whole mountain, the Traversée.

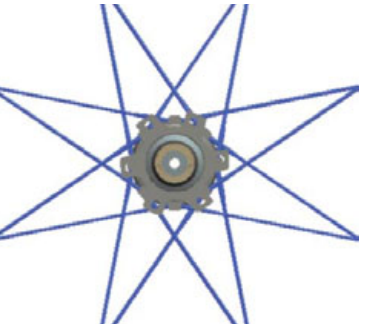

**CONTRÔLE FRONT WHEEL**

**DoubleDrive spoking:** Forget the typical 32 spoke wheel. We deliver the same drive efficiency with 24, while adding the benefit of balanced spoke tension. DoubleDrive lacing allows your 24 spoke Contrôle wheel to run 16 spokes on the drive side and 8 on the radial side, saving the added weight of those extra 8 spokes without sacrificing efficiency. A little creativity goes a long way.

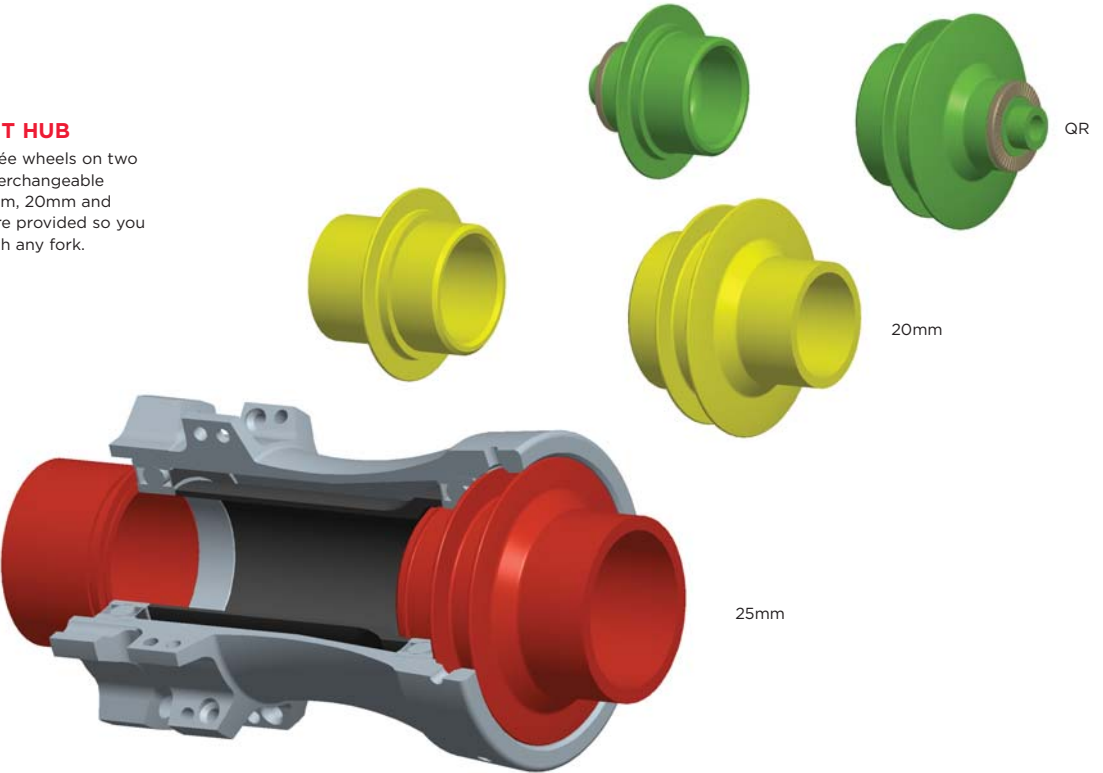

**Disc side/Cross spoking:** Since disc brakes transfer force from the rotor, through the hub, spokes, rim and tire down to the trail, having a smartly designed wheel system is essential. 16, 3-cross, drive side spokes provide maximum power transfer from the brakes to the trail through a more efficient lacing pattern that eliminates needless spokes.

**Non-disc side/Radial spoking:** Non-disc side spokes don't get the action like their disc-side counterparts, so we can use shorter, lighter radial spokes.

**TRAVERSÉE FRONT HUB**

Want to use your Traversée wheels on two different bikes? Easily interchangeable (no tools necessary) 25mm, 20mm and quick-release end caps are provided so you can ride these wheels with any fork.

# ROVAL WHEELS

## ROAD

**ONWARD AND UPWARD** An all-new carbon tubular built to be incredible light, the Alpiniste™ SL will give you wings for every climb, in any situation where gram vs. grade really counts.

### ROVAL ALPINISTE™ SL CARBON

Built to considerable light weight and drive efficiency, these wheels are ideal for rapid climbing, when gram vs. grade really counts.

- 100% FACT composite LP-24 low-profile tubular rims (21mm W x 24mm H)
- Front hub: carbon center tube with alloy flanges
- Rear hub: CNC-machined alloy body, high quality Swiss-made with light internal ratchet and cassette body
- DT Aerolite butted spokes, 2.0mm round / 2.3mm x 0.9mm bladed
- 20/24 spoke pattern, DoubleDrive rear pattern
- Roval custom self-aligning lightweight alloy hidden nipples
- Equipped with Shimano 9-10 spd compatible cassette body
- Replacement Campagnolo 10 spd and Shimano 9-10 spd compatible cassette bodies available separately
- Roval carbon red brake pads powered by Swisstop
- Roval Titanium quick releases
- Roval padded cordura nylon double wheel bag
- Available in black/white
- Wheelset: 1060g Q/R: 106g/set

COMPETITIVE TT / TRIATHLON

### ROVAL RAPIDE STAR CARBON

Great for solo breakaways, this all-out rocket ship racing wheel is designed to be the lightest and most aero of its kind, with wind-cutting advantages that even the road racer will appreciate.

- Aerodynamically superior Star hub design reduces frontal area by 50%, minimizing wind drag
- 100% FACT composite DP-48 high-profile tubular rims (21mm W x 48mm H)
- Roval carbon red brake pads powered by Swisstop
- Super stiff and strong cold forged 7075 A1 5-point Star hubs
- 20/20 2-into-1 spoke pattern maximizes power transfer
- Custom DT Aerolite butted spokes, 2.0mm round / 2.3 x 0.9mm bladed
- Roval custom self-aligning hidden nipples with nylon thread-lock
- Equipped with Shimano 9-10 spd compatible cassette body
- Replacement Campagnolo 10 spd; Shimano Dura-Ace and 9-10 spd compatible cassette bodies available separately
- Roval Titanium quick releases
- Roval padded cordura nylon double wheel bag and Roval carbon brake pads
- Available in black/red
- Wheelset: 1587g Q/R: 106g/set

COMPETITIVE ROAD RACING

### ROVAL RAPIDE™ SL CARBON

The best all-around performance wheel-from the highest level of competition to everyday riding-earns its name for its lightweight efficiency and speed.

- 100% FACT composite MP-33 mid-profile clincher rims (21mm W x 33mm H)
- Front hub: carbon center tube with alloy flanges
- Rear hub: CNC-machined alloy body, high quality Swiss-made with light internal ratchet and cassette body
- DT Aerolite butted spokes, 2.0mm round / 2.3mm x 0.9mm bladed
- 20/24 spoke pattern, DoubleDrive rear pattern
- Roval custom self-aligning lightweight alloy hidden nipples
- Equipped with Shimano 9-10 spd compatible cassette body
- Replacement Campagnolo 10 spd and Shimano 9-10 spd compatible cassette bodies available separately
- Roval carbon red brake pads powered by Swisstop
- Roval Titanium quick releases
- Roval padded cordura nylon double wheel bag and Roval carbon brake pads
- Available in black/red
- Wheelset: 1450g Q/R: 106g/set

### ROVAL RAPIDE™ STAR CARBON CLINCHER

This semi deep section clincher handles flawlessly in cross winds without sacrificing any aero advantage, offering the ultimate combination of performance and convenience.

- Star hub design reduces frontal area by 50%, minimizing wind drag
- 100% FACT composite MP-33 mid-profile clincher rims (21mm W x 33mm H)
- Roval carbon red brake pads powered by Swisstop
- Super stiff and strong cold forged 7075 A1 5-point Star hubs
- 20/20 2-into-1 spoke pattern maximizes power transfer
- Custom DT Aerolite butted spokes, 2.0mm round / 2.3 x 0.9mm bladed
- Roval custom self-aligning hidden nipples with nylon threadlock
- Equipped with Shimano 9-10 spd compatible cassette body
- Replacement Campagnolo 10 spd; Shimano Dura-Ace and 9-10 spd compatible cassette bodies available separately
- Roval Titanium quick releases
- Roval padded cordura nylon double wheel bag
- Available in black/red
- Wheelset: 1800g Q/R: 106g/set

### ROVAL FUSÉE™ SL

The Fusée SL melds our lightest alloy rim, aero features and unique low-flange hub to create a very lightweight package that gives the rider time to spare on climbs, while keeping durability and efficiency intact for every-day rides.

- E5 alloy low-profile aero seamless, machined rim (21mm W x 24mm H)
- Front hub: carbon center tube with alloy flanges
- Rear hub: CNC-machined alloy body, high quality Swiss-made internals, ratchet and cassette body
- DT Aerolite butted spokes, 2.0mm round / 2.3mm x 0.9mm bladed
- 20/24 spoke pattern, DoubleDrive rear pattern
- Roval custom self-aligning lightweight alloy hidden nipples
- Equipped with Shimano 9-10 spd compatible cassette body
- Replacement Campagnolo 10 spd and Shimano 9-10 spd compatible cassette bodies available separately
- Roval Titanium quick releases
- Available in black/red or black/silver
- Wheelset: 1450g Q/R: 106g/set

### ROVAL FUSÉE STAR

This wheel provides all the aero advantages and style of the Star hub such as aerodynamics and drive efficiency, but with a more traditional, lightweight aluminum rim.

- Aerodynamically superior design yields 50% less frontal area, minimizing wind drag
- E5 alloy low-profile aero seamless, machined rim (21mm W x 24mm H), precision machined braking surface
- Super stiff and strong cold forged 7075 A1 5-point Star hubs
- 0/20 2-into-1 spoke pattern maximizes power transfer
- Custom DT Aerolite butted spokes, 2.0mm round / 2.3 x 0.9mm bladed
- Roval custom self-aligning hidden nipples with nylon threadlock
- Equipped with Shimano 9-10 spd compatible cassette body
- Replacement Campagnolo 10 spd; Shimano Dura-Ace and 9-10 spd compatible cassette bodies available separately
- Roval Titanium quick releases
- Available in white/black or black/black
- Wheelset: 1750g Q/R: 91g/set

### ROVAL FUSÉE™

This year-round, versatile and lightweight wheel is just as suited to competitive road races as everyday training.

- E5 alloy low-profile aero seamless, machined rim (21mm W x 24mm H),
- Cold forged low-profile hubs, aluminum front axle
- DT Aerolite butted spokes, 2.0mm round / 2.3mm x 0.9mm bladed
- 20/24 spoke pattern, DoubleDrive rear pattern
- Roval custom self-aligning lightweight brass hidden nipples
- Equipped with Shimano 9-10 spd compatible cassette body
- Replacement Campagnolo 10 spd; Shimano Dura-Ace and 9-10 spd compatible cassette bodies available separately
- Roval steel quick releases
- Available in black/red or grey/gold
- Wheelset: 1550g Q/R: 125g/set

ROVAL WHEELS

ROVAL ÉCHAPPÉE™

Geared toward the larger, more powerful rider, the Échappée offers the same everyday advantage as the Fusée, with a greater emphasis on durability.

- E5 alloy mid-profile aero seamless, machined rim (21mm W x 28mm H),
- Cold forged low-profile hubs, aluminum front axle
- DT New Aero butted spokes, 2.0mm round / 3.2mm x 1.25mm bladed
- 20/24 spoke pattern, DoubleDrive rear pattern
- Roval custom self-aligning lightweight brass hidden nipples
- Equipped with Shimano 9-10 spd compatible cassette body
- Replacement Campagnolo 10 spd; Shimano Dura-Ace and 9-10 spd compatible cassette bodies available separately
- Roval steel quick releases
- Available in black/red or black/grey
- Wheelset: 1720g Q/R: 115g/set

ROVAL WHEELS ROAD

**TRIED AND TRUE** The Échappée™ packs just as much drive efficiency as our popular Fusée™ wheel, with added durability. To give the larger, more powerful rider a great all-around partner for anything from competitive road races to everyday training.

ROVAL ROUBAIX™ 322X

A Classics-styled, endurance-ready wheel, the Roubaix uses a unique spoke pattern to create incomparable compliance-enough to carry you through 8 hours of cobbles and the velodrome sprint-while maintaining exceptionally high drive efficiency.

- E5 alloy super low-profile seamless, machined rim (19mm W x 21mm H)
- Front hub: carbon center tube with alloy flanges
- Rear hub: CNC-machined alloy body, high quality Swiss-made internals, ratchet and cassette body
- 24/30 322X spoke pattern, DoubleDrive rear pattern
- DT Aerolite butted spokes, 2.0mm round / 2.3mm x 0.9mm bladed
- Roval custom self-aligning lightweight alloy hidden nipples
- Equipped with Shimano 9-10 spd compatible cassette body
- Replacement Campagnolo 10 spd and Shimano 9-10 spd compatible cassette bodies available separately
- Roval Titanium quick releases
- Available in silver/red or black/silver
- Wheelset: 1550g Q/R: 91g/set

ROVAL PAVÉ™ SL

Competition-caliber, freeroad wheel designed for the cyclo-cross enthusiast, the Pavé SL is equally at home under the adventure rider or urban commuter.

- E5 alloy mid-profile seamless aero rim (21mm W x 28mm H), precision machined braking surface
- DT New Aero butted spokes, 2.0mm round / 3.0mm x 1.25mm bladed
- Cold forged five-spoke high flange hubs
- 20/24 spoke lacing pattern
- DT Pro Lock brass nipples
- Equipped with Shimano 9-10 spd compatible cassette body
- Replacement Campagnolo 10 spd and Shimano 9-10 spd compatible cassette bodies available separately
- Roval steel quick releases
- Available in black/silver
- Wheelset: 1625g Q/R: 115g/set

ROVAL PAVÉ™

Built with bomb-proof durability, this is the ultimate wheel for your freeroad adventure or traffic-dodging urban commute.

- Anti-pinch rim edge with stainless steel eyelets
- DT Competition Round DT 2.0mm round spokes
- Cold forged five-spoke high flange hubs
- 20/24 spoke lacing pattern
- DT Pro Lock brass nipples
- Equipped with Shimano 9-10 spd compatible cassette body
- Replacement Campagnolo 10 spd and Shimano 9-10 spd compatible cassette bodies available separately
- Roval steel quick releases
- Available in black/silver
- Wheelset: 1815g Q/R: 115g/set

ROVAL BRAKE PADS

Carbon Red

- Excellent for wet or dry conditions
- Quiet and durable compound
- Recommended for Roval alloy composite rims
- Available for Shimano and Campagnolo brakes

All-Condition Black

- Excellent for multiple conditions
- Recommended for Roval alloy rims
- Available for Shimano brakes only

ROVAL CASSETTE BODIES

- 3008-1030 (DT Swiss, Shimano compatible)
- 3008-1035 (DT Swiss, Campagnolo compatible)
- Fits: 08 Rapide SL, Alpiniste SL, Fusée SL, Roubaix 322X, Traversée, Contrôle XC Race
- 3007-1005 (Shimano 9-10 spd, 12mm axle)
- 3007-1025 (Campagnolo 10 spd, 12mm axle)
- -NOTE: Requires axle spacer for proper cassette alignment
- Fits: 06/08 Pavé, 07 Pavé SL, 06 Rapide
- 3007-1010 (Shimano 9-10 spd, 15mm axle)
- 3007-1015 (Shimano Dura-Ace 10 spd, 15mm axle)
- -NOTE: Optimized for 10 spd Dura-Ace cassette only (improved cassette-to-body interface, no spacing necessary)
- 3007-1020 (Campagnolo 10 spd, 15mm axle)
- Fits: 08 Rapide Star, Rapide, Fusée Star, Fusée, Échappée

ROVAL QUICK RELEASE

- Titanium axles with alloy hardware
- Steel cam mechanism for longevity
- Self-lubricating brass bushing

ROVAL DOUBLE WHEEL BAG

- Padded compartments for two wheels
- Reinforced axle contact points
- Inner pocket for quick-releases
- Handle and removable shoulder strap

# ROVAL WHEELS OFF-ROAD

**BIG SHOTS** Built for the backwoods, not the bunny slopes, our new Contrôle™ and Traversée™ mountain wheels are mighty tough and mighty light. If you're an All Mountain rider or XC racer, you won't want to leave home without 'em.

### ROVAL CONTRÔLE™ XC RACE

This weight-comes-first, cross-country racing wheel helps you climb to the top of the peak faster, with enough strength to handle rocky, muddy and serpentine terrain year after year.

- E5 alloy lightweight disc rim with eyelets, tubeless compatible
- Rear hub: CNC-machined alloy body, high quality Swiss-made internals, ratchet and cassette
- Front: 24 spoke DoubleDrive pattern
- Rear: 28 spoke 3x pattern supports disc brakes and loads to the rear wheel
- DT revolution 2.0/1.5/2.0mm round spokes
- DT hexagonal pro lock alloy nipples
- Roval Titanium quick releases
- Includes tubeless valve stems and tubeless rim tape
- Available in silver/black
- Wheelset: 1425g Q/R: 106g/set

### ROVAL TRAVERSÉE™

For aggressive trail riders that aren't afraid to take risks and go big, this wheel gives you the durability to traverse the whole mountain, while still compensating for light weight.

- E5 alloy high strength disc rim with eyelets, tubeless compatible
- Front hub: includes quick-change 25/20mm/QR axle caps
- Rear hub: CNC-machined alloy body, high quality Swiss-made internals, ratchet and cassette
- Front: 24 spoke DoubleDrive pattern
- Rear: 28 spoke 3x pattern supports disc brakes and loads to the rear wheel
- DT super comp 2.0/1.7/1.8mm round spokes
- DT hexagonal pro lock alloy nipples
- Roval steel quick releases
- Includes tubeless valve stems and tubeless rim tape
- Available in black/silver
- Wheelset: 1579g Q/R: 125g/set

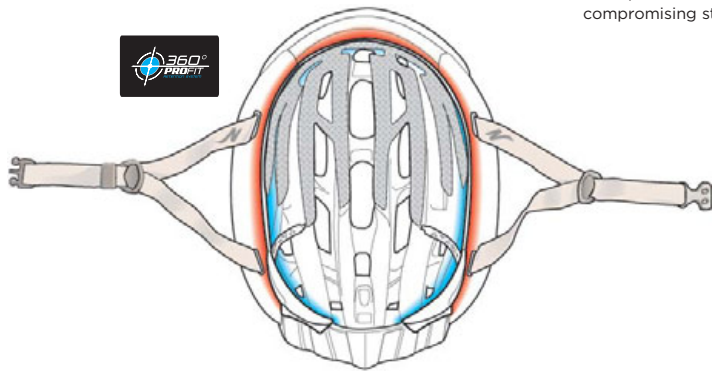

# HELMET TECH

**KEEP YOUR HEAD IN THE GAME** Specialized helmets are cooler, lighter and smarter than their competitors, for a full 360 degrees of unabridged protection and performance every time you ride. Your most important asset has never gotten so much attention.

**KEVLAR® INNERMATRIX**

We reinforce your thinking cap with a patented Kevlar InnerMatrix that acts as a strong skeleton inside the helmet. This smart structure effectively supports the dual density foam, allows wide-open airflow to vents, and since it's made of bulletproof Kevlar fiber, decreases overall weight without compromising strength.

**PRO FIT™ 360 FIT SYSTEM**

Introducing the no-frills fit system that provides 360 degrees of horizontal and vertical adjustability for a completely customized fit on any head. A lightweight design and secure attachment points built directly into the foam ensure you'll get the most stability and security out of your lid, without needless bulk.

**4X DRYLITE HELMET STRAPS**

Our all-new helmet webbing material is four times lighter than the standard and won't absorb sweat or water or stretch out of adjustment. The ultra-dry, soft straps provide unsurpassed comfort in a thin, minimalist construction.

**INSTRAP**

Webbing straps are attached directly to the InnerMatrix, eliminating tangles and improving comfort.

**PATENTED MEGA MOUTHPORT™**

If you're like us, you feel that a cooler head is also a clearer head. Our 4th Dimension Cooling system has always provided optimal ventilation, but now our wind tunnel-tested Mega Mouthport with its ultra large front vent forces even more air through the front and down the in-line vents (S-Works 2D and Propero™ helmets). Keeping the steam off for good.

**DUAL DENSITY**

Our newest helmet, the S-Works 2D™, earns its namesake for a reason. Its patented Dual Density (2D) foam construction has a double purpose: Higher density sidewalls withstand close-to-the-edge impacts, and a lower density top saves weight and optimizes performance for the most demanding race scenarios.

*\*These features represent our newest tech found exclusively on the S-Works 2D, unless otherwise noted. Proprietary technologies such as Form Fit™, Pro Fit™ and U-Turn™ adjusters are still found on many of our helmet models.*

# HELMETS ROAD

**SET YOUR SAILS** The all-new S-Works 2D helmet is our most advanced lid yet. Supplying world-class air flow, protection and light weight, with 360 degrees of all-over adjustability, dual density foam and massive vents to keep your noggin cool.

**S-WORKS 2D**

Perfect for performance-minded riders and racers, the S-Works 2D is the lightest helmet in the world, hands down, weighing in at a mere 225g (size medium). The 2D pays attention to details that other helmets miss, from its extremely minimal weight to increased ventilation, comfort and effortless security. Every component has been redesigned, from the weight-savings patented construction to the details of the fit system, retention system, webbing, U-Turn and even the buckle.

- Complies with one or more of the following safety standards for bicycle helmets: CPSC, SNELL B90A, CE and AS/NZS
- Patented Dual Density EPS foam to save weight and optimize performance
- Patented Kevlar-reinforced InnerMatrix enables larger, deeper channeled vents
- New slimmed down Pro Fit 360 fit system secures helmet and provides easy adjustment, even on-the-fly
- 4th Dimension Cooling System:
  - Mega Mouthport
  - In-line vent configuration
  - Deep internal vent channeling
  - Rear exhaust ports
- Wind tunnel tested for maximum cooling
- Instrap system minimizes strap length and reduces strap contact, improving comfort
- New thin, soft and lightweight 4X DryLite webbing won't stretch as it absorbs sweat or water
- New lighter U-Turn 2 strap adjusters guide webbing better
- New thinner and lighter buckle
- Quadruple in-molded shells protect the foam and your head
- Patented clip-on matching color visor included

**S-WORKS 2D TEAM**

Perfect for performance-minded riders and racers, the S-Works 2D is the lightest helmet in the world, hands down, weighing in at a mere 225g (size medium). The 2D pays attention to details that other helmets miss, from its extremely minimal weight to increased ventilation, comfort and effortless security. Every component has been redesigned, from the weight-savings patented construction to the details of the fit system, retention system, webbing, U-Turn and even the buckle.

- Complies with one or more of the following safety standards for bicycle helmets: CPSC, SNELL B90A, CE and AS/NZS
- Patented Dual Density EPS foam to save weight and optimize performance
- Patented Kevlar-reinforced InnerMatrix enables larger, deeper channeled vents
- New slimmed down Pro Fit 360 fit system secures helmet and provides easy adjustment, even on-the-fly
- 4th Dimension Cooling System:
  - Mega Mouthport
  - In-line vent configuration
  - Deep internal vent channeling
  - Rear exhaust ports
- Wind tunnel tested for maximum cooling
- Instrap system minimizes strap length and reduces strap contact, improving comfort
- New thin, soft and lightweight 4X DryLite webbing won't stretch as it absorbs sweat or water
- New lighter U-Turn 2 strap adjusters guide webbing better
- New thinner and lighter buckle
- Quadruple in-molded shells protect the foam and your head
- Patented clip-on matching color visor included

Silver Blue Women's Red

**PROPERO**

With a very similar shape and design to its big brother, the Propero offers all the security and ventilation necessary in a race-inspired helmet, but without the extra features of the 2D.

- Complies with one or more of the following safety standards for bicycle helmets: CPSC, SNELL B90A, CE and AS/NZS
- Patented Dual Density EPS foam to save weight and optimize performance
- Patented Kevlar-reinforced InnerMatrix enables larger, deeper channeled vents
- New slimmed down Pro Fit 360 fit system secures helmet and provides easy adjustment, even on-the-fly
- 4th Dimension Cooling System:
  - Mega Mouthport
  - In-line vent configuration
  - Deep internal vent channeling
  - Rear exhaust ports
- Wind tunnel tested for maximum cooling
- Instrap system minimizes strap length and reduces strap contact, improving comfort
- New thin, soft and lightweight 4X DryLite webbing won't stretch as it absorbs sweat or water
- New lighter U-Turn 2 strap adjusters guide webbing better
- New thinner and lighter buckle
- Quadruple in-molded shells protect the foam and your head
- Patented clip-on matching color visor included

# HELMETS OFF-ROAD

**UP, UP AND AWAY** Engineered for aggressive off-road use, the Deviant Carbon helmet doesn't let its full-face construction and bomb-proof durability get in the way of being comfortably airy and deceptively light.

## DEVIANT CARBON

This highly ventilated full-face helmet is as breezy as many XC helmets, and thanks to its full carbon fiber shell, it's the lightest in its class at just 868g (size medium). It's the perfect choice for riders looking for full-face protection, full ventilation and light weight. These unique characteristics make it ideal for freeride, aggressive XC or any conditions that benefit from extended coverage.

- Complies with all of the following safety standards for bicycle helmets: CPSC, SNELL B-95, CE and ASTM 1952 (standard for downhill mountain bike racing helmets)
- EPS foam with carbon shell
- Rear vertical adjustable Pro Fit 2 retention system secures helmet and provides easy adjustment, even on-the-fly
- Inner mesh net to keep out bugs and debris
- Removable washable liner and cheek pads
- Adjustable visor
- Carrying bag
- 2 colors

Utilizing advanced carbon composite construction, it took Specialized engineers 14 revisions before they found the perfect balance of light weight, ventilation, and strength.

## DEVIANT

A highly ventilated full-face helmet that's as breezy as many XC helmets, but built for riders looking for full-face protection. Its 21 vents and tough fiberglass shell makes it ideal for freeride, aggressive XC or any conditions that benefit from extended coverage.

- Complies with all of the following safety standards for bicycle helmets: CPSC, SNELL B-95, CE and ASTM 1952 (standard for downhill mountain bike racing helmets)
- EPS foam with fiberglass shell
- Rear vertical adjustable Pro Fit retention system secures helmet and provides easy adjustment even on-the-fly
- Inner mesh net to keep out bugs and debris
- Removable washable liner and cheek pads
- Adjustable visor
- Carrying bag
- 3 colors

## INSTINCT

Our rugged mountain-inspired Instinct has large vents, including massive rear exhaust ports and deeper profile for those looking for a little more coverage in trail environments. It's the ideal helmet for epic singletrack adventures, keeping your head cool and vented, even in low-speed technical sections.

- Rear vertical-adjustable Pro Fit retention system keeps helmet secure, and is easy to adjust on the fly
- Wind tunnel tested to verify maximum cooling
- In-molded shell and foam maximizes strength and minimizes weight
- Light and simple U-Turn strap adjusters
- Patented Clip-on color-matching visor included

## HELMETS CASUAL

**CATCH MY DRAFT** We know you want security, so why not reach for a helmet that's not only safety-certified, but also leverages fit, function, style and value?

ridersclub

www.specializedriders.com

Can we get an Amen?

**Name:** Nathan Phelps

**Ride:** 2007 Tarmac Elite

**Favorite Ride:** Penokee Range Classic Road Race in Mellen, Wisconsin

**Profile:** Here's what Nathan has to say about himself: "My name isn't Bettini or Boonen. I live in Wisconsin, not Tuscany. But I still want a bike that is beautiful, fast, light and precise. I am Nathan Phelps. I am Specialized."

### AIR-8

A great helmet for the rider looking for a balance of performance and value. Many features from our other proven models, including our ProFit 2 retention system.

- Complies with one or more of the following safety standards for bicycle helmets: CPSC, SNELL B90A, CE and AS/NZS
- Rear vertical adjustable Pro Fit 2 retention system secures helmet and provides easy adjustment, even on-the-fly
- In-molded shell and foam maximizes strength and minimizes weight
- Light and simple U-Turn strap adjusters
- Patented clip-on visor included

### CHAMONIX

The minimalist, race-inspired shape and lightweight design of the Chamonix make it a great racing helmet, even on hot days. Complimented by our secure Form Fit retention and breezy 4th dimension cooling system, the Chamonix is as comfortable as it is cool.

- Complies with one or more of the following safety standards for bicycle helmets: CPSC, SNELL B90A, CE and AS/NZS
- Adjustable updated Form Fit retention system keeps helmet secure
- 4th Dimension Cooling System:
  - Mouthport
  - In-line vent configuration
  - Deep internal vent channeling
  - Rear exhaust ports
- In-molded shell and foam improves strength while reducing weight
- Wind tunnel tested for maximum cooling
- Light and easy to use U-Turn strap adjusters

### AIR FORCE 3

The Air Force 3 offers all of the protection required by serious cyclists and many of the technical features found in our top models, with the advantage of great value and our easiest fit system ever.

- Complies with one or more of the following safety standards for bicycle helmets: CPSC, SNELL B90A, CE and AS/NZS
- Updated Form Fit retention system adjusts to fit most riders with just three adult sizes
- Elegant, sleek shape around wind-channeling vents
- In-molded shell and foam improves strength and reduces weight
- Light and easy to use U-Turn strap adjusters
- Patented clip-on visor included
- New reflective webbing for extra safety

### AIR FORCE 3 WOMEN'S

The Air Force 3-W is designed for women, with all the protection required by serious cyclists and many of the technical features found in our top models. Accented by women's-specific graphics and colors, with the advantage of great value and our easiest fit system ever.

- Complies with one or more of the following safety standards for bicycle helmets: CPSC, SNELL B90A, CE and AS/NZS
- Updated Form Fit retention system adjusts to fit most female riders with just two women's sizes
- Beautiful, sleek shape around wind-channeling vents
- In-molded shell and foam improve strength and reduce weight
- Light and easy to use U-Turn strap adjusters
- Patented clip-on visor included
- New reflective webbing for extra safety

# HELMETS BMX/YOUTH

**HEADS UP** Trick-ready or fun-fueled, these helmets are every ounce tough, safety-certified and stylish enough for even the pickiest kids.

**SKILLET**

For the aggressive rider that wants a helmet to match their style and image. The Skillet has a tough abuse-resistant shell and unlike many skate helmets, it complies to the CPSC standard for bicycle use. Worn by Darren Berreclough and other Specialized aggro riders.

- Complies with one or more of the following safety standards for bicycle helmets: CPSC, SNELL B90A, CE and AS/NZS
- EPS foam with high-impact thermoplastic injection molded shell
- 3 colors, including a Darren Berreclough version
- 3 sizes: small, medium, large
- New for 2008 - large size available

**AIR FORCE 3 YOUTH**

The Air Force 3-Y matches young riders' need for style, while still complying with demanding CPSC standards. Technical features and youth-oriented graphics and colors combine with exceptional value and adjustable fit to make this helmet an extremely sensible choice.

- Complies with one or more of the following safety standards for bicycle helmets: CPSC, SNELL B90A, CE and AS/NZS
- Form Fit retention system adjusts to fit most young riders with just one size
- Stylish design with youth-oriented graphics
- In-molded shell and foam improve strength and reduce weight
- Light and easy to use U-Turn strap adjusters
- Patented clip-on visor included
- New reflective webbing for extra safety

**SMALL FRY**

A kid's helmet that fits great even through growth spurts, thanks to our Form Fit retention system, and also complies with demanding CPSC standards. Mom and dad will love its comfort and security; your kids will love the fun colors and patterns.

- Complies with one or more of the following safety standards for bicycle helmets: CPSC, SNELL B90C (toddler) and B90A (child), CE and AS/NZS
- Updated Form Fit system adjusts to fit most young riders comfortably and securely with two sizes
- In-molded shell and foam improve strength and reduce weight
- Integrated visor/sun brim provides shelter from sunlight
- 2 sizes: toddler (approx. up to 3 years of age), and child (approx. 3-7 years of age)
- Kid-friendly graphics
- Light, easy to use U-Turn strap adjusters that won't pinch skin
- Front bug mesh covered vents
- Shape designed to accommodate child trailer use
- New reflective webbing for extra safety

# SADDLE TECH

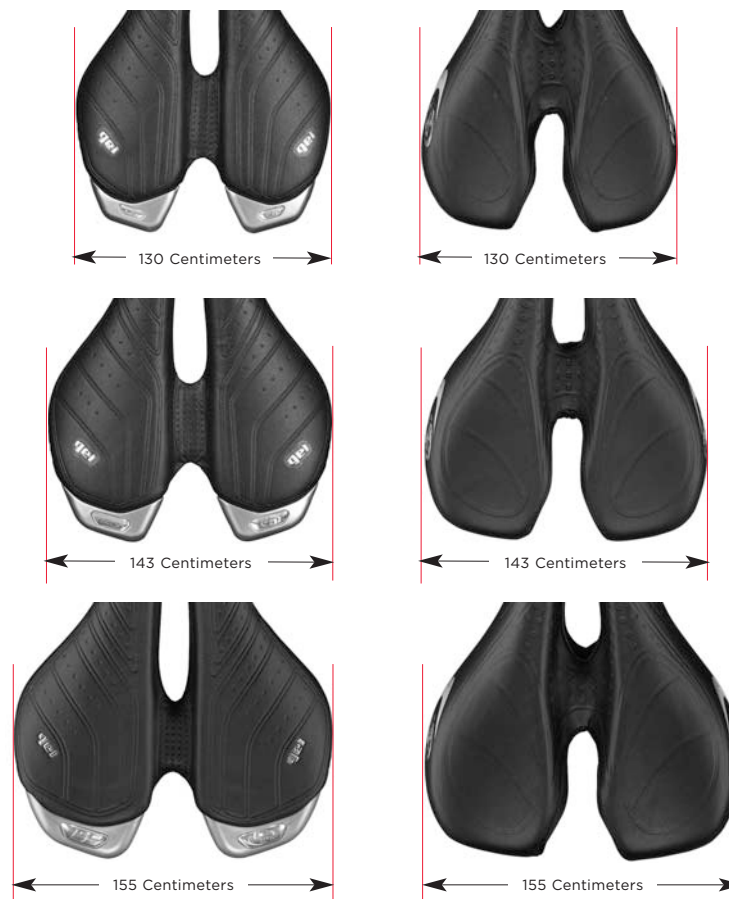

**WE GOT YOUR BACK** When it comes to the question of comfort in the saddle, we've got the technology to keep both men and women happily perched all day long. Because saddles that work with your body are saddles you'll actually like to ride.

## DIFFERENT WIDTHS FOR DIFFERENT RIDERS.

No two pairs of sit bones are the same. Skinnier saddles don't necessarily work best for smaller riders, wider saddles for larger riders, and so on. Even the difference in sit bone width when riding in an upright or aero position is significant. There's simply no generalized way to pick the best sized saddle for your body—meaning the one that will keep you riding longer in more comfort—besides accurately measuring the distance between your sit bones.

Our Body Geometry Saddle Fit System precisely measures your actual sit bone width, then you can choose with confidence between a broad selection of Body Geometry saddles, all offered in multiple widths. No more blind choices. No more dealing with uncomfortable, poor fitting saddles. Just take a seat.

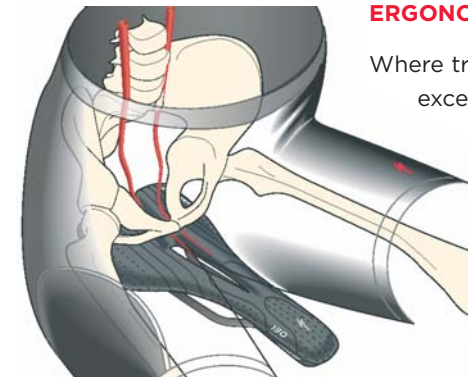

**DIFFERENT RIDERS** have different width sit bones. Body Geometry multi-width saddles optimize performance, fit and comfort.

**MEN'S TOUPE GEL**

**WOMEN'S JETT**

## ERGONOMIC CONSTRUCTION

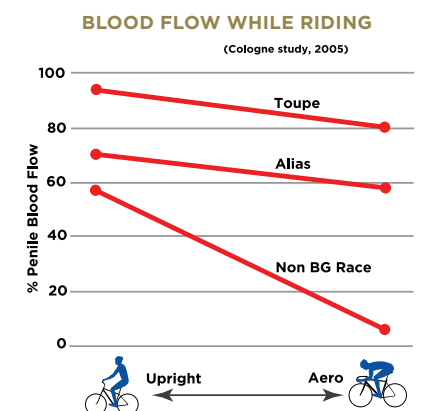

**MEN'S BG SADDLE** design reduces blood-flow impairing pressure on arteries and nerves with a center cut-away.

Where traditional saddles can cause soreness and numbness from excess pressure on the sensitive nerves and arteries during your ride, Body Geometry designs can help eradicate that problem through built-in ergonomic details.

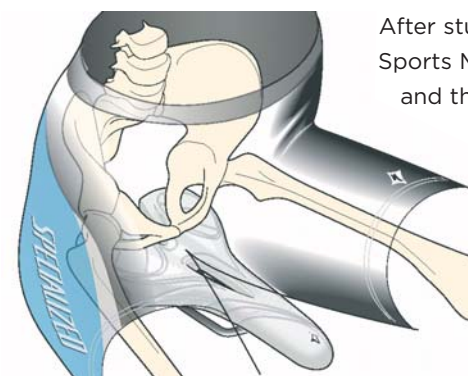

designs reduce this pressure by cutting away a precise center section of the saddle, thereby producing results comparable to sitting in a padded chair. Hard to believe? Just talk to Frank Sommer at the University of Cologne in Germany who performed the blood flow studies, and he'll set you straight.

## MEN'S SADDLES - FEELING THE FLOW

You've heard the rumors, and sadly they're a reality. Studies prove that the pressure conventional saddles put on the pudendal nerves and arteries reduces penile blood flow within just a few minutes. But Body Geometry

## WOMEN'S SADDLES - GOING THE DISTANCE

After studying pressure scans of female cyclists at the Boulder Center for Sports Medicine, we formulated a saddle cutout that functions purely for women and their anatomy. The resulting hourglass shape and beveled foam contours remove padding from the high pressure central area of the saddle, lending every woman more comfort and endurance.

**WOMEN'S BG SADDLE** design significantly reduces soft tissue pressure with an hourglass central cut-away and beveled foam contours.

# SADDLES ROAD

**LIGHT AND LEAN** If you're looking to lighten your load for race day, our Toupe™ saddle stands alone in its ability to maintain ultra lightweight and incredible compliance, while treating your seat well all day long.

### TOUPÉ TEAM 130/143

- Don't let the sleek minimalist design fool you...this saddle consistently out-ranks other high performance race saddles for its compliancy and comfort. With these special graphics, the Toupe Team will enhance the look and lower the weight of any race bike.
- Patented and lab tested BG design for pressure relief
  - Carbon reinforced shell is tuned for the perfect combination of flex and stiffness
  - Ultralight foam padding
  - Lightweight hollow titanium rails
  - Tough, lightweight and water-resistant Micromatrix cover
  - Available in 130 and 143 widths for optimum fit
  - Includes matching S-logo bar tape (\*except WC Stripe)
  - Approximate weight: 130mm = 170g, 143mm = 175g (+/- 5%)
  - Length: 270mm

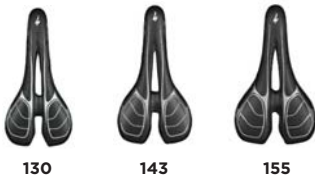

### TOUPÉ & TOUPE GEL 130/143/155

- Minimalist competition road saddle with medically-tested, scientifically proven Body Geometry technology. The shell flexibility is tuned to offer a compliant ride even in this low profile design.
- Patented Body Geometry design is lab tested to assure blood flow to sensitive arteries
  - Available in 3 widths for optimum fit and comfort
  - Carbon reinforced shell is tuned for the perfect combination of flex and stiffness
  - Hollow titanium rail
  - Ultralight foam padding
  - Tough, light and water resistant Micromatrix cover
  - Available in black or white
  - Approximate weight: 130mm = 150g, 143mm = 155g, 155mm = 195g (+/- 5%)
  - Length: 270mm

### ALIAS™

- Our proven pro-level saddle is restyled and lighter weight. Combined with our medically-tested Body Geometry blood flow technology to reduce numbness, the Alias redefines the crossing point between ergonomic comfort and top performance.
- BG design is patented and lab tested in Cologne Germany for pressure relief
  - Available in 130, 143 and 155 widths for optimum fit for a range of riders and seating positions
  - Lighter weight tuned density foam padding
  - Seamless Micromatrix cover
  - Lightweight hollow titanium rails
  - Lightweight carbon reinforced shell
  - Approximate weight: 130mm = 250g, 143mm = 255g, 155mm = 265 (+/- 5%)
  - Length: 270mm

### AVATAR GEL 130/143/155

- This proven saddle shape is redesigned with seamless styling for enhanced comfort and a modern look, with 3 width options to fit any rider in a range of seating positions. A great choice for long days in the saddle when you want the additional comfort of gel padding.
- Gel padding and softer Tuned Density Foam for enhanced comfort
  - Patented and lab-tested BG design for pressure relief
  - Tough, lightweight and water-resistant Micromatrix cover
  - Available in 130, 143 and 155 widths for optimum fit
  - Hollow Cro-Mo rails
  - Approximate weight: 130mm = 305g, 143mm = 340g, 155mm = 370g (+/- 5%)
  - Length: 270mm

### TRITIP™ SL GEL & TIPTIP GEL 40/50

- Our premiere tri-position saddle comes in two styles: an ultra lightweight SL version and more economical Gel version. Both feature a thickly padded nose and Body Geometry cutout for pressure relief even when riding in a forward TT position. Nose is available in wide 50mm width or narrower 40mm width for riders who prefer more leg clearance.
- Tuned density foam nose is available in either 40 or 50mm widths for optimum leg clearance; SL utilizes ultra lightweight foam in comparison to Gel version.
  - Patented Body Geometry design is lab tested to ensure adequate blood flow
  - Gel padding in the nose and rear seating area for comfort
  - Lightweight hollow Ti rails (SL) / hollow chromoly rails (Gel)
  - Rear stabilizer for hanging the bike in transitions
  - Approximate weight: SL: 40mm = 240g, 50mm = 245g (+/- 5%) Gel: 40mm = 280g, 50mm = 290g (+/- 5%)
  - 130mm wide x 270mm long

# SADDLES OFF-ROAD

**THE PERFECT PERCH** Backed by MTB Marathon World Champion Christoph Sauser, our all-new Phenom™ race saddle combines lightweight simplicity with a firm, snag-free finish and body geometry cut-away for carefree trail performance.

### PHENOM™ SL 130/143

- This minimalist race-profile saddle is the perfect balance between our World Cup MTB riders' obsession with ultra lightweight and the rocky reality of offroad racing. Christoph Sauser asked for a saddle that delivered a Toupé shape, but with recessed scuff guards for snag-free racing and a slightly down turned perch for seated climbing. This versatile saddle is also ideal for road riders who prefer a shell that is slightly more firm than our popular Toupé.
- Patented Body Geometry design is lab tested to assure blood flow to sensitive arteries
  - Available in 2 widths for optimum fit and comfort
  - Carbon reinforced shell is tuned for sitbone flex
  - Flush mounted scuff guards
  - Lightweight hollow titanium rail
  - Ultralight tuned density foam padding
  - Tough, light and water-resistant Micromatrix cover
  - Approximate weight: 130mm = 190g, 143mm = 195g (+/- 5%)
  - Length: 270mm

### PHENOM 130/143

- The sleek shape of our minimalist Phenom SL race saddle, but tuned for longer off-road rides. The slightly enhanced foam padding improves comfort and hollow chromoly rails provide reliable off-road durability. With Body Geometry technology, the low profile design is ideal for road or MTB riders.
- Patented Body Geometry design is lab tested to assure blood flow to sensitive arteries
  - Available in 2 widths for optimum fit and comfort
  - Carbon reinforced shell is tuned for sitbone flex
  - Flush mounted scuff guards
  - Hollow chromoly rails
  - Tuned density foam padding
  - Tough, light and water-resistant Micromatrix cover
  - Approximate weight: 130mm = 230g, 143mm = 240g (+/- 5%)
  - Length: 270mm

### PHENOM TI GEL 130/143

- The same great ride as our race-profile Phenom in an off-road specific profile for improved control. Riding the generously padded front end of this saddle vastly increases stability on steep off-road climbs by firmly anchoring the front wheel to the trail. Low profile back end is smoothly sculpted to minimize catching baggy shorts on steep terrain.
- Patented Body Geometry design is lab tested to assure blood flow to sensitive arteries
  - Available in 2 widths for optimum fit
  - Carbon reinforced shell is tuned for sitbone flex
  - Lightweight hollow titanium rails
  - Gel and tuned density foam padding
  - Tough, light and water-resistant Micromatrix cover
  - Approximate weight: 130mm = 260g, 143mm = 275g (+/- 5%)
  - Length: 270mm

### PHENOM GEL 130/143

- Riding the generously padded front end of this saddle vastly increases stability on steep off-road climbs by firmly anchoring the front wheel to the trail. Low profile back end is smoothly sculpted to minimize catching baggy shorts on steep terrain. This model uses more affordable and highly durable hollow chromoly rails.
- Patented Body Geometry design is lab tested to assure blood flow to sensitive arteries
  - Available in 2 widths for optimum fit
  - Carbon reinforced shell is tuned for sitbone flex
  - Hollow chromoly rails for off-road durability
  - Gel and tuned density foam padding
  - Abrasion-resistant shoulder panels
  - Tough, light and water resistant Micromatrix cover
  - Approximate weight: 130mm = 280g, 143mm = 295g (+/- 5%)
  - Length: 270mm

### RIVAL™ SL 130/143

- Performance MTB saddle is equal parts gram-shaver and all-day trail-ride comfort.
- Patented Body Geometry design is lab tested to assure blood flow to sensitive arteries (Sports Medicine University, Cologne, Germany, 2005)
  - BG V-groove cutout for pressure relief in a more upright position with frequent rider position changes
  - Available in 2 widths for optimum fit and comfort
  - Ti rails for strength and light weight
  - Ultralight foam padding
  - Abrasion-resistant shoulder panels
  - Foam padding extends 1cm beyond the shell for off the back safety
  - Tough, light and water-resistant Micromatrix cover
  - Available in black or white/silver
  - Approximate weight: 130mm = 225g, 143mm = 235g (+/- 5%)
  - Length: 280mm

### RIVAL 130/143

- Durable performance MTB saddle with comfort for all day trail rides.
- Patented Body Geometry design is lab tested to ensure adequate blood flow to sensitive arteries
  - BG V-groove cutout for pressure relief in a more upright position with frequent rider position changes
  - Available in 2 widths for optimum fit
  - Synthetic upper with abrasion-resistant shoulder panels
  - Hollow chromoly rails for off-road durability
  - Tuned density foam padding extends 1cm beyond the shell at the back for comfort even on steep drops
  - Approximate weight: 130mm = 275g, 143mm = 290g (+/- 5%)
  - Length: 280mm on steep drops
  - Approximate weight: 130mm = 275g, 143mm = 290g (+/- 5%)
  - Length: 280mm

INDIE SPORT 143/155

This enthusiast saddle blends performance contours, BG technology and our plush, forgiving E.S.T. seating area. Ideal for road or MTB riding.

- Patented Body Geometry design is lab tested to assure blood flow to sensitive arteries (Sports Medicine University, Cologne, Germany, 2005)
- BG V-groove cutout for pressure relief in a more upright position
- Available in 2 widths for optimum fit
- Elastic Shell Technology (E.S.T.) for enhanced sit-bone comfort
- Ultralight foam padding
- Tough, light and water-resistant Micromatrix cover
- Strong hollow Cro-Mo rails
- Approximate weight:  
143mm = 265g, 155mm = 280g (+/- 5%)

INDIE 143/155

This affordable saddle blends performance contours, BG technology and our plush, forgiving E.S.T. seating area. Ideal for road or trail riding.

- Patented Body Geometry design is lab tested to assure blood flow to sensitive arteries (Sports Medicine University, Cologne, Germany, 2005)
- BG V-groove cutout for pressure relief in a more upright position
- Available in 2 widths for optimum fit
- Elastic Shell Technology (E.S.T.) for enhanced sit-bone comfort
- Tuned Density foam padding
- Synthetic upper
- Strong, hollow Cro-Mo rails
- Approximate weight:  
143mm = 330g, 155mm = 345g (+/- 5%)

SONOMA 155/175

An affordable version of our Gel Sonoma, the Body Geometry cutout combined with our Zertz and E.S.T. comfort technologies ensure a plush seating area. A comfort upgrade for any recreational bike.

- Body Geometry V-groove design to improve comfort and reduce perineal pressure
- Generous soft durometer foam padding to ensure comfort
- Zertz rail attachments for vibration damping
- E.S.T. for flexible shell comfort
- Synthetic cover and steel rails
- Available in 2 width options
- Approximate weight:  
155mm = 390g, 175mm = 415g (+/- 5%)

SONOMA GEL 155/175

We combine our best saddle technologies to build the ultimate comfort saddle, without sacrificing style. Gel padding, Zertz and E.S.T. ensure a plush seating area, and the beautifully crafted cover borrows styling cues from our high-end race saddles. Luxurious seating makes this saddle the perfect upgrade for any recreational or trekking bike.

- Patented and lab-tested Body Geometry cutout to improve comfort and reduce perineal pressure
- Gel inserts are combined with soft durometer foam padding to ensure comfort
- Zertz rail attachments for vibration damping
- E.S.T. for flexible shell comfort under the sit bones
- Micromatrix synthetic upper with debossed graphics
- Hollow chromoly rails
- Available in 2 width options
- Approximate weight: 155mm = 345g, 175mm = 370g (+/- 5%)

SADDLES MULTIUSE

**DOUBLE DUTY** These versatile options for road or mountain can't be beat when it comes to carefully tuned comfort, performance contours and Body Geometry pressure-relieving technology.

SONOMA™ SPORT 155/175

The ultimate Body Geometry comfort saddle, without sacrificing style. Zertz & E.S.T. assure a plush seating area, and the richly designed cover borrows styling cues from our high end race saddles. Luxurious seating at a reasonable weight make this saddle the perfect upgrade for any recreational or trekking bike.

- Patented and lab-tested Body Geometry cutout to improve comfort and reduce perineal pressure
- Generous soft durometer foam padding to ensure comfort
- Zertz rail attachments for vibration damping
- E.S.T. for flexible shell comfort
- Micromatrix synthetic upper
- Hollow chromoly rails
- Available in two width options - 155mm or 175mm
- Approximate weight:  
155mm = 335g, 175mm = 360g (+/- 5%)

BG2 SPORT

This saddle is a favorite for road or MTB riders who want BG advantages in a comfortable sport saddle. Proven Body Geometry vascular-pressure relief, developed for our high-end saddles, in a more affordable format.

- Proven Body Geometry technology for vascular relief
- Elastic Shell Technology for sit-bone cushioning
- Synthetic cover
- Hollow Cro-Mo rails
- 265mm long x 150mm wide
- 380 grams (production weights will vary)

# SADDLES COMFORT

**MORE BOUNCE TO THE OUNCE** These plush seat warmers are a dream come true for your sit bones, with generous amounts of Body Geometry gel and foam padding or plenty of spring action for instant comfort.

- MILANO 175**
- A redesign of our proven recreational luxury saddle for comfort riders.
- Patented Body Geometry design is lab tested to assure blood flow to sensitive arteries (Sports Medicine University, Cologne, Germany, 2005).
  - Tuned-density foam padding for comfort
  - Synthetic upper
  - Steel rail

- MILANO GEL 175**
- A redesign of our proven recreational luxury saddle is gel padded to increase comfort.
- Patented Body Geometry design is lab tested to assure blood flow to sensitive arteries (Sports Medicine University, Cologne, Germany, 2005).
  - Gel padding for increased comfort and pressure dispersion
  - Synthetic upper
  - Hollow Cro-Mo rail

- BG COMFORT PLUS**
- Saddles designed with Body Geometry™ Technology for protection and the ultimate in comfort.
- Proven Body Geometry V-groove design
  - Gel and foam at the sit bones—where you need it
  - More padding than Comfort model
  - Synthetic cover
  - Steel rails

- BG COMFORT**
- Saddles designed with Body Geometry™ Technology for protection and the ultimate in comfort.
- Proven Body Geometry™ V-groove design
  - Gel and foam at the sit bones—where you need it
  - Synthetic cover
  - Steel rails

- EXPEDITION**
- Padding and spring saddle construction for maximum comfort when riding in a more upright position.
- Ergonomic design
  - Web spring base and spring rails for instant, plush comfort
  - Grid-textured, patterned synthetic leather

- EXPEDITION PLUS**
- Padding and spring saddle construction for maximum comfort when riding in a more upright position. Like the Expedition but with more usable seating area.
- Web spring base and spring rails for instant, plush comfort
  - Grid-textured, patterned synthetic leather

- SONOMA W GEL 155/175**
- We combine our best saddle technologies to build the ultimate women's comfort saddle, without sacrificing style. Zertz and E.S.T. ensure a plush seating area, and the beautifully crafted cover borrows features from our high end race saddles. Luxurious seating at a reasonable weight make this saddle the perfect upgrade for any recreational bike.
- Women's contoured Body Geometry cutout to improve comfort and reduce pressure
  - Gel inserts are combined with soft durometer foam padding to ensure comfort
  - Zertz rail attachments for vibration damping
  - E.S.T. for flexible shell comfort
  - Micromatrix synthetic upper
  - Hollow chromoly rails
  - Available in 2 width options

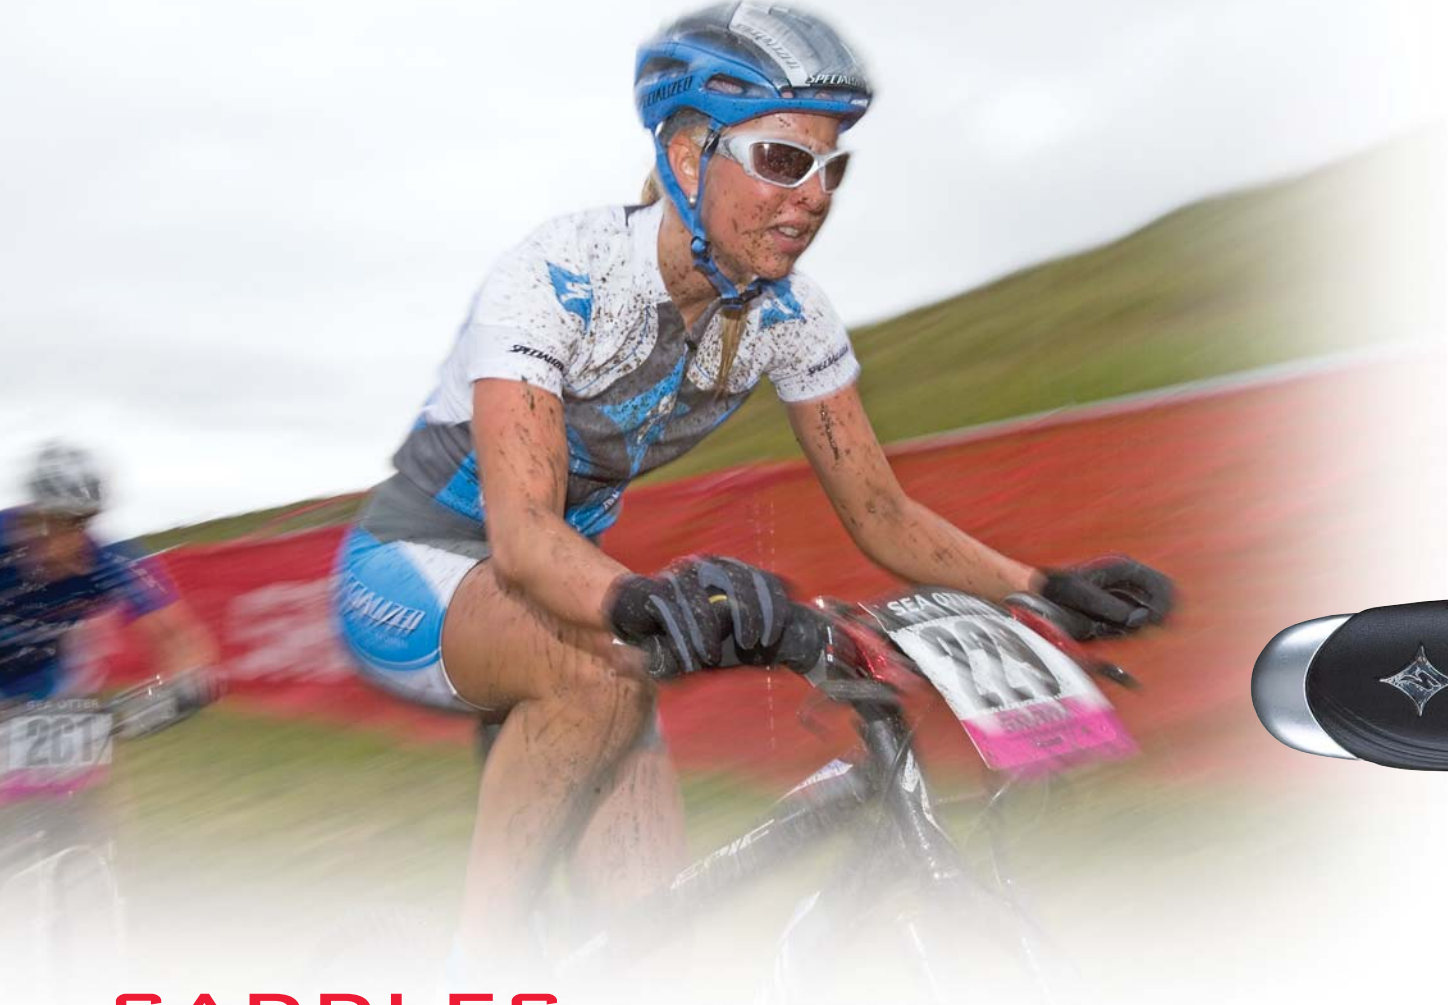

- SONOMA W SPORT 155/175**
- The ultimate women's Body Geometry comfort saddle, without sacrificing style. Zertz and E.S.T. ensure a plush seating area, and the beautifully crafted cover borrows styling cues from our high-end race saddles.
- Women's contoured Body Geometry cutout to improve comfort and reduce pressure
  - Generous soft durometer foam padding to ensure comfort
  - Zertz rail attachments for vibration damping
  - E.S.T. for flexible shell comfort
  - Micromatrix synthetic upper
  - Hollow chromoly rails
  - Available in 2 width options

- SONOMA W 155/175**
- This affordable Sonoma is designed with the women's Body Geometry cutout, Zertz and E.S.T. comfort technologies to ensure a plush seating area.
- Women's contoured Body Geometry cutout to improve comfort and reduce pressure
  - Generous soft durometer foam padding to ensure comfort
  - Zertz rail attachments for vibration damping
  - E.S.T. for flexible shell comfort
  - Synthetic cover and steel rails
  - Available in 2 width options

## SADDLES WOMEN'S

**ALL THE RAGE ON THE ROAD** A fresh new find, the Ruby saddle instantly earns race-tier status among female riders for its thin profile, optimal fit and carbon reinforced shell with just the right amount of give.

### ARIEL SL

This Pro-level women's-specific MTB saddle combines a lightweight design with enough cushion for all-day riding comfort.

- Tested BG women's shape will redistribute pressure along the ergonomic cutout to enhance comfort
- Tough, lightweight and water-resistant Micromatrix cover
- Available in 130 and 143 widths for optimum fit
- Ultralight Tuned Density Foam padding
- Foam padding extends 1cm beyond the shell for off-the-back safety
- Hollow titanium rails
- Approximate weight: 130mm = 245g, 143mm = 250g, 155mm = 280g (+/- 5%)
- Length: 280mm

130 143 155

### ARIEL

Inspired by the shape of the Ariel SL, this women's-specific MTB saddle has enough cushion for all-day riding in a more affordable design.

- Tested BG women's shape will redistribute pressure along the ergonomic cutout to enhance comfort
- Available in 130 and 143 widths for optimum fit
- Tuned Density Foam is slightly thicker than the SL padding for generous comfort
- Foam padding extends 1cm beyond the shell for off-the-back safety
- Hollow Cro-Mo rails
- Synthetic cover
- Approximate weight: 130mm = 300g, 143mm = 315g, 155mm = 330g (+/- 5%)
- Length: 280mm

130 143 155

### JETT WOMEN'S 130/143/155

Completely redesigned, this is a no-compromise women's saddle. Available in 3 different widths to ensure a comfortable fit.

- Newly developed Women's Body Geometry cutout is medically tested to reduce soft tissue pressure (Boulder Center for Sports Medicine, 2005).
- Race tested by the Victory Team
- Softer durometer Tuned Density Foam
- Carbon-reinforced shell and hollow Ti rails
- Tough, light and water-resistant Micromatrix cover
- Approximate weight: 130mm = 245g, 143mm = 260g, 155mm = 295g (+/- 5%)
- Length: 270mm

130 143 155

### LITHIA™ GEL

A subtle poppy motif is debossed across this saddle, stylishly complementing the generous padding and gel inserts that ensure a comfortable ride. Available in 3 widths, this is a great comfort saddle for any enthusiast road or MTB rider.

- Women's Body Geometry cutout is medically tested to reduce soft tissue pressure
- Tuned density foam and generous Gel padding for pressure dispersion
- Micromatrix upper is tough and light weight
- Hollow chromoly rails
- Approximate weight: 130mm = 245g, 143mm = 260g, 155mm = 295g (+/- 5%)
- Length: 270mm

130 143 155

### RUBY® WOMEN'S 130/143/155

This low profile saddle is chosen by the Victory Cycling Team for its light weight and slim design. The thin profile is surprisingly comfortable thanks to our compliant shell construction.

- Women's Body Geometry cutout is medically tested to reduce soft tissue pressure
- Raced by the Victory Cycling Team
- Available in 3 widths for optimum fit
- Tuned density foam combined with Gel padding at the sit bones
- Compliant carbon reinforced shell
- Lightweight hollow Ti rails
- Tough, light and water resistant Micromatrix cover
- Approximate weight: 130mm = 200g, 143mm = 210g, 155mm = 230g (+/- 5%)
- Length: 270mm

130 143 155

# SADDLES WOMEN'S

**SADDLE SORES NO MORE** All it takes is a little extra gel padding and one handy ergonomic cutout to make our Dolce Gel saddle a supremely comfortable choice for all female riders.

### DOLCE GEL 155

A great-fitting saddle with great style has ensured this saddle has all-day comfort for women riders. Enhanced comfort with the addition of gel padding.

- Newly developed Women's Body Geometry cutout is medically tested to reduce soft tissue pressure (Boulder Center for Sports Medicine, 2005).
- Gel padding for pressure dispersion
- Synthetic upper
- Hollow Cro-Mo rails

### DOLCE 155

A great-fitting saddle with great style has ensured this saddle has all-day comfort for women riders.

- Newly developed Women's Body Geometry cutout is medically tested to reduce soft tissue pressure (Boulder Center for Sports Medicine, 2005)
- Generous Tuned Density Foam
- Synthetic upper
- Cro-Mo rails

### WINDIE XC

A more affordable version of the sport-level Windie, this saddle is ideal for road or MTB riding.

- Body Geometry women's design for soft tissue comfort
- Tuned density foam padding for comfort
- Synthetic upper
- Steel rail
- Approximate weight: 143mm = 380g, 155mm = 295g (+/- 5%)
- Length: 270mm

### WINDIE™ XC SPORT

This affordable sport level saddle is ideal for road or MTB riding.

- Body Geometry women's design for soft tissue comfort
- Light tuned density foam padding for comfort
- Synthetic upper
- Hollow chromoly rail
- Approximate weight: 143mm = 355g, 155mm = 370g (+/- 5%)
- Length: 270mm

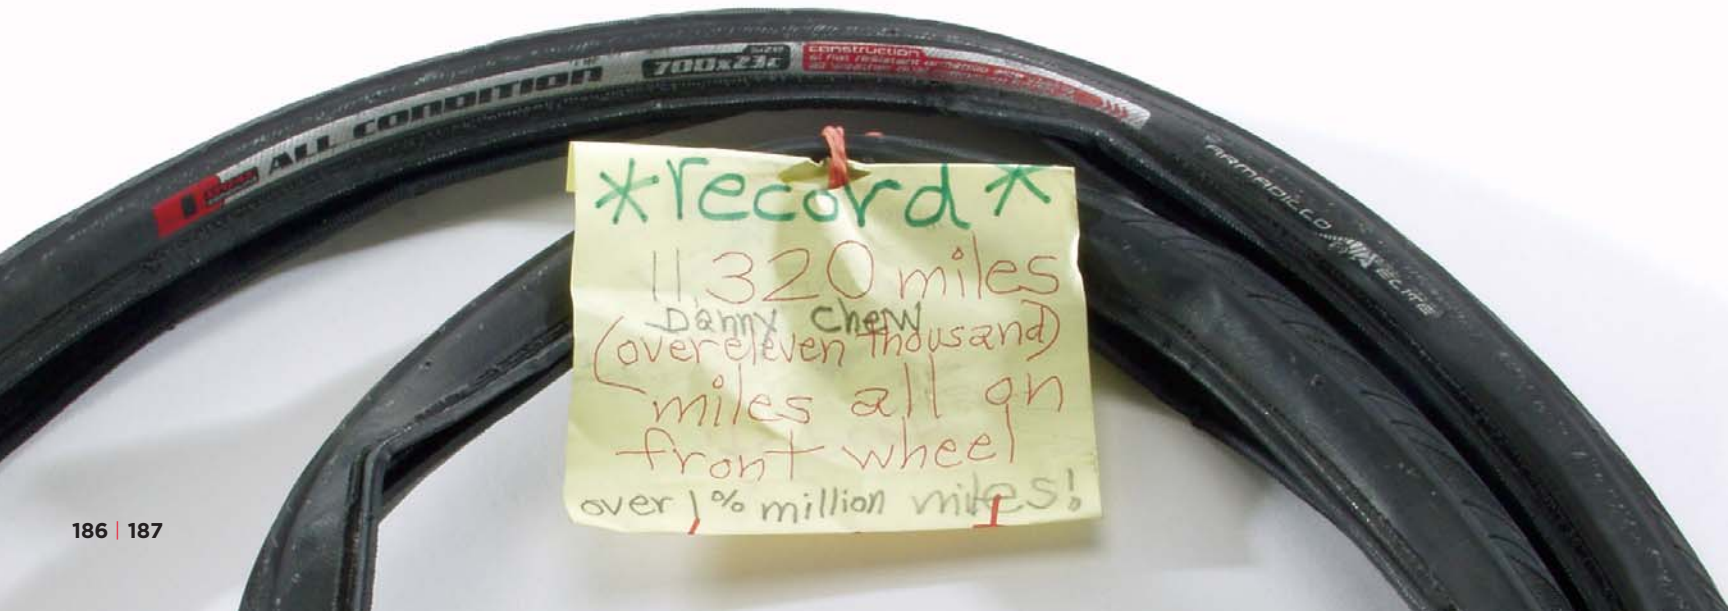

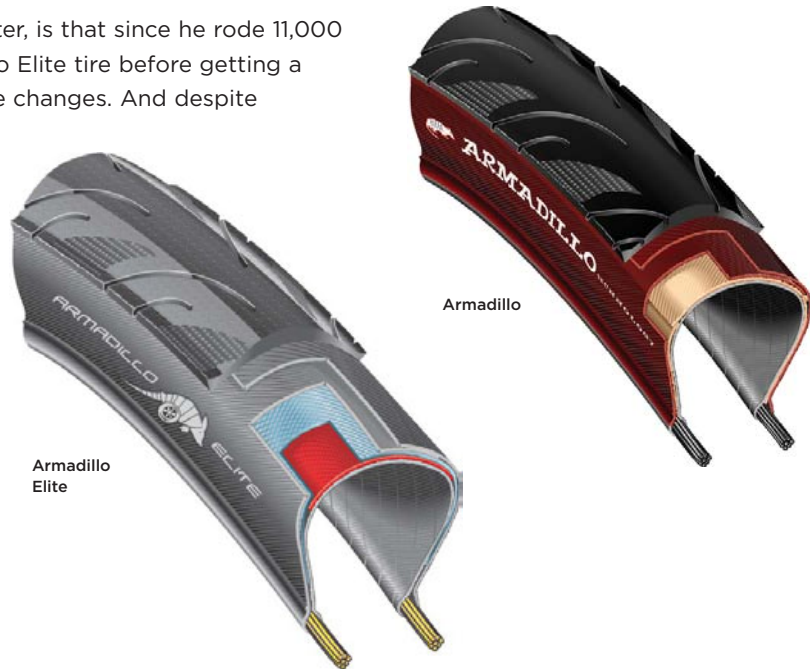

# TIRE TECH

**11,000 MILES WITH NO FLATS!** Specialized Armadillo Elite® tires keep the good times rolling. Just ask RAAM Champion Danny Chew. Our elite puncture-proof technology is the most reliable and lightweight security you can get for your tires, period.

## ARMADILLO ELITE

17 mph for 5 hours a day, 6 days a week, 52 weeks a year for 40 years... that's the kind of time and mileage you'd be looking at to match Danny Chew's lifetime goal of 1 million miles on his bike. At age 44, the two-time RAAM Champion has ridden 600,000 miles, which gives him little time to waste on the side of the road changing tires.

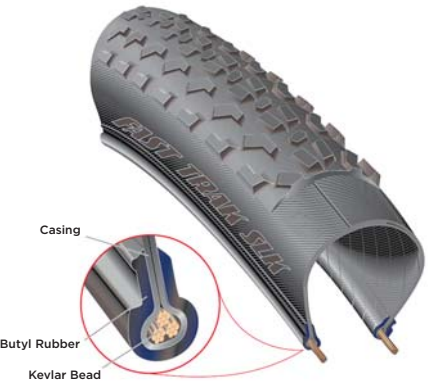

The good news for Chew, and all riders for that matter, is that since he rode 11,000 miles on one (count it... one!) All Condition Armadillo Elite tire before getting a puncture, he won't have to worry about frequent tire changes. And despite its moto-inspired, dual compound Dual Radius Tread (DRT) design, the 120 TPI, folding bead Armadillo tire still weighs a mere 240 grams. So how long do you think it will take you to wear out our tires?

## 2BLISS

There's a reason why our MTB pro team rides 2Bliss™ tires—they want a tire that can handle running on low pressure (sometimes 25 psi) for durability and better traction, but they also want light weight.

Specialized 2Bliss blends the best of both worlds. It's not your standard tubetype (TT), which is lightweight, but can fall short on puncture resistance and “burps” when used with sealant. And it's not your standard tubeless (UST) that reduces pinch flats and the need for sealant, but often adds 200+ grams. 2Bliss is a whole new design that uses TT casing with a special UST bead, replacing the standard UST heavy backing with strategically placed rubber only around the bead. The result is a perfect tire for discerning Trail riders: low pressure allowance, no burping and fewer grams than its forefathers.

## CONTROL SERIES MTB TIRES

New for 2008, our resilient Control series gives serious off-road riders more options in tread and bigger performance out of their MTB tires. They're tuned to provide unprecedented control, durability and reduced pinch flats without taking a toll on weight and responsiveness. Available in multiple tread patterns and sizes, all Control series tires feature our new 420/D1 casing to increase puncture and cut resistance by 15% over our S-Works series and 12% over our previously offered Pro tires. All while adding as little as 35 grams to the tire's already lightweight design.

The durable casing construction with aramid beads and dual compound tread provides great rolling and long-lasting wear without sacrificing traction or cornering ability. Couple all of this with our 2Bliss design, and you have the best trail tire available... we guarantee it.

# TIRES

## PERFORMANCE ROAD

**TIRELESS TREAD** Capable of rolling 11,000 miles without a flat, our All Condition™ Pro tire goes for distance and speed with its all-weather traction, puncture resistance and moto-inspired Dual Radius Tread.

### MONDO™ S-WORKS TUBULAR

World-Class Race Performance

The Mondo road tire was carefully engineered to be the fastest, best handling race tire in the world. Combines extremely low rolling resistance, puncture resistance and light weight, plus increased contact surface and traction while cornering via our proprietary Dual Radius Tread design.

- Tubular design
- Casing: 290 TPI Gossamer Spun Casing
- DRT design for low rolling resistance and great cornering
- Dual compound 70/60

### MONDO S-WORKS OPEN TUBULAR

World-Class Race Performance

- Open tubular design
- 700 x 23c 290 TPI Gossamer Spun Casing
- DRT design for low rolling resistance and great cornering
- Compound Center: 70a
- Compound Shoulder: 60a
- Bead: Kevlar

### MONDO™ PRO

High-End Race Performance

- Casing: 120 TPI
- Compound Center: 70a
- Compound Shoulder: 60a
- Bead: Aramid
- Flat Protection: Flak Jacket
- DRT design for low rolling resistance and great cornering

# TIRES MULTI-USE

**THROUGH THE MUCK & THE MIRE** Dodgy urban environments and blistering cyclocross races call for one of these diverse hybrid treads, built to tackle water, mud and debris with ease.

**HOUFFALIZE™ CX**

World-Class Race Cyclo-Cross  
Performance-intermediate conditions

Inspired by the harsh racing environments of Belgium that are often rain-soaked and muddy, the Houffalize CX is designed for cyclo-cross racers who need a tire to traverse the toughest conditions. Its unique fast-rolling tread pattern cleans well and provides great traction in off-camber situations.

- Casing: 127 TPI
- Compound Center: 70a
- Compound Shoulder: 60a

# TIRES MTB

**SERIOUS RACERS NEED APPLY** The SauserWind™ tire was developed with all the right goods to handle the toughest World-caliber race conditions by MTB Marathon World Champion Christoph Sauser himself.

### FAST TRAK™ SLK S-WORKS 2BLISS

World-Class XC Race Performance-hardpack to intermediate conditions

How do you make the best mountain bike race tire in the world? By listening to our Pro teams' suggestions. We answered the call with clipped center knobs for lower rolling resistance and shorter side knobs for a more secure bite under heavy cornering loads, all in a package that's lighter and sealant friendly.

- Casing: 127 TPI
- Center Compound: 70a
- Shoulder Compound: 60a
- Bead: Aramid
- Butyl wrapped bead to prevent low pressure burping
- 1.8mm knob heights for the center tread
- 2Bliss

### FAST TRAK LK S-WORKS 2BLISS

World-Class XC Race Performance-hardpack to intermediate conditions

Even the best mountain bikers in the world need a large volume tire that rolls fast, and the Fast Trak LK is that tire. With a 30% reduction in knob height from the original model, this tire still has all the speed a rider like Christoph Sauser needs, without sacrificing any traction. The large footprint with reinforced side knobs hooks up in the fastest turns without slowing you down.

- Casing: 127 TPI
- Center Compound: 70a
- Shoulder Compound: 60a
- Bead: Aramid
- Butyl wrapped bead to prevent low pressure burping
- Reinforced side knobs
- 2Bliss

### FAST TRAK LK S-WORKS 2BLISS

### S-WORKS SAUSERWIND™ 2BLISS

World-Class XC Performance-intermediate to wet conditions

Designed for those days when the race course shows no mercy, whether hard pack, loose-over-hard, sandy, muddy or wet, the SauserWind will roll fast, clean well and bite in the soft corners. The SauserWind was developed by Christoph Sauser to meet the rigorous demands of the World Cup Cross country circuit, making it a true "all around" for any serious racer. Comes in 2Bliss configuration, allowing the tire to be used with a tube or sealant.

- New for 2008

# TIRES MTB

**ALL HAIL THE CAPTAIN** Consider yourself the master of XC riding with The Captain™, a Ned Overend-designed tire that’s fast rolling, hard biting and perfect for attacking any trail.

### S-WORKS THE CAPTAIN™

World-Class XC/Traii Performance-hardpack /intermediate/loose conditions

We asked The Captain himself, Ned Overend, to help us design the perfect tire for control and predictability over any trail, just like those in his demanding XC racing days. The result is The Captain, with fast-rolling center knobs for excep-tional transition and edge knobs to attack any trail.

- New for 2008
- Casing: 120 TPI
- Bead: Aramid
- Center Compound: 70a
- Shoulder Compound: 60a
- 2BLISS
- Butyl wrapped bead

### S-WORKS STORM™ 2BLISS

World-Class XC Race Performance-muddy condi-tions

There are days when Mother Nature doesn't want you to ride, so she throws out wind, rain, sleet or whatever kind of storm fits the season. The Storm is the tire for those conditions and the riders who don't shy away from an environmental challenge. With soft rubber compounds that stick to wet roots and rocks and large, well-spaced knobs to allow the tire to clean well, this tire offers the trac-tion needed for sections that most riders wouldn't even consider hiking over. Comes in 2Bliss configu-ration, allowing the tire to be used with a tube or sealant.

- Updated tread for 2008
- 2BLISS
- Casing: 120 TPI

### CHUNDER™ CONTROL (1PLY) 2BLISS

High-End All Mountain Performance-interme-diate/loose conditions

The Chunder Control (1ply) is designed for extreme, but varying trail conditions, for those who love the DH version of the Chunder, but want a better rolling and lighter weight tire for their trail bikes. By lowering the knob heights, using a different compound and only a single ply casing, we can offer exactly what those riders want—a tire with predictable drift, reasonable weight, large volume, pedal-ability and sure-footed traction. Comes in 2Bliss configuration, allowing the tire to be used with a tube or sealant.

- Casing: 420/D1 for 15% improved cut resistance
- Bead: Aramid
- Center Compound: 65a
- Shoulder Compound: 55a
- 2BLISS
- Butyl wrapped bead

### PINN'ER™ S-WORKS

World-Class DH Race Performance-hardpack/intermediate conditions

For DH racers seeking the ultimate in speed, the Pinn'er is our fastest DH tire ever. This fast-rolling tire maintains traction and control with improved stiffness in its sidewalls to prevent pinch flats and improve cornering ability.

- Casing: 60 TPI
- Center Compound: 42a
- Shoulder Compound: 40a
- Umma Gumma
- Dual ply casing
- Butyl stiffened sidewalls

Size	Casing (Bead)	Compound*	Protection

### RHYTHM™ CONTROL

High-End Performance-dirt/street

Your terrain can vary from skate parks to city streets and seems invariably to end up with a session at the trails. That requires a tire like the Rhythm with a fast-rolling center section, similar to our Compound tread, but with a larger and deeper knob on the shoulders for better traction in the dirt.

- Casing: 420/D1 for 15% improved cut resistance
- Compound: 60a
- Shoulder Compound: 50a
- Bead: Aramid

Size	Casing (Bead)	Compound*	Protection
Rhythm Control	26x2.3	60TPI Aramid	C60 S50
Rhythm Control	26x2.3	60TPI Aramid	C60 S50

\*center/shoulder

### COMPOUND™ CONTROL

High-End Performance-street/dirt

Simply the best urban assault tire on the market. The Compound Control is a 26" tire that's great for street, vert or trails, with the perfect mix of high pressure capability, dual compound traction, low rolling resistance and rounded profile with bead-to-bead tread.

- Casing: 420/D1 for 15% improved cut resistance
- Compound: 60a
- Shoulder Compound: 50a
- Bead: Aramid

Size	Casing (Bead)	Compound*	Protection
Compound Control	26x2.2	60TPI Aramid	C60a S50a —

\*center/shoulder

### RESOLUTION™

Entry-Level Trail

Versatile trail tire with a fast-rolling center section and a wider center knob. Excellent trac-tion provides stability and predictability for all skill levels.

- Casing: 30 TPI
- Compound: 70a
- Bead: Wire

Size	Casing (Bead)	Compound*	Protection
Resolution Sport	24x2.1	60TPI Wire	70a
	26x2.1	60TPI Wire	70a

### HARDROCK'R™

Entry-level MTB

This long-lasting, recreational mountain bike tire features a smooth rolling tread with ample traction for trails and bike paths.

- Casing: 30 TPI
- Compound: 70a
- Bead: Wire
- Flat Protection: Flak Jacket

Size	Casing (Bead)	Compound*	Protection
Hardrock'r	26x1.95	60TPI Wire	70a

\*center/shoulder

### FATBOY®

Performance Road Slick

Our classic mountain bike slick rolls fast, making it ideal for road and trainer use.

- Casing: 60 TPI
- Compound: 70a
- Bead: Wire
- Flat Protection: Flak Jacket

Size	Casing (Bead)	Compound*	Protection
Fatboy	26x1.25	60TPI Wire	70a

\*center/shoulder

# TIRES BMX & ACCESSORIES

**SAVE FACE** Street, park, trail, dirt jump and vert, we’ve got all the best tread options to keep you as in-control or out-of-control as you like during every session.

**RHYTHM™ BMX**  
High-End Performance-dirt/street

Your terrain can vary from skate parks to city streets and seems invariably to end up with a session at the trails. That requires a tire like the Rhythm BMX with a fast-rolling center section, similar to our Compound tread, but with a larger and deeper knob on the shoulders for better traction in the dirt.

**TURBO ULTRALIGHT WITH TALC**

The cheapest way to ditch 40 grams of rotating weight.

- Talc in the pack for a better ride and fewer flats

**FLATBOY™**

Set of six self-adhesive patches plus sand-paper and instructions in a snap shut kit. 50 to a case.

**RIM STRIPS**

Ultimate protection between rim and tube for mountain and road applications.

- Proven to be durable even at road pressures

**AIRLOCK®**

Best performing self-sealing tubes available. The in-tire solution for flat prevention.

- Non-toxic, non-separating formula
- Coats the tube for permanent protection
- Works with road or mountain tubes
- Works continuously to prevent slow leaks
- Completely homogenous, doesn't "puddle"
- Desert protection combines thorn-resistant tubes with Airlock sealant for the best puncture protection

# APPAREL TECH

**IT'S WHAT'S ON THE INSIDE THAT COUNTS** All-new Specialized RBX and SL chamois pads make you want to get back in the saddle again.

**ALONG WITH OUR FOCUS ON HIGH QUALITY FABRICS** and cycling-specific construction methods, we've put top priority on enhancing your comfort in the saddle this year. So we've expanded the form and function of the most integral part of your seat (yep, the chamois!) to better serve every type of rider and riding experience. No more compromising between a higher end, thicker pad or lower end, thinner pad.

With the help of our Body Geometry master Dr. Roger Minkow, we now offer two BG pro-level pads of varying thickness and function: one for maximum protection from pressure or for longer, endurance rides; the other for shorter rides or those who prefer a more direct feel on the bike; but both for riders who refuse to sacrifice quality or function. The only question left is, what type of rider are you? RBX, SL or both?

**SL CHAMOIS** lower level of padding for freedom of movement

**Experience:** Ideal for your shorter, more intense rides or when you're looking for a more supple feel on the bike.

**Benefit:** Focused cushioning, lighter weight, flexibility, more freedom of motion in the saddle.

**Construction/Material:** Dual density molded foam; focused pattern. Lighter fabric, mesh panels and minimal construction on short.

**RBX CHAMOIS** highest level of padding for pressure-free performance

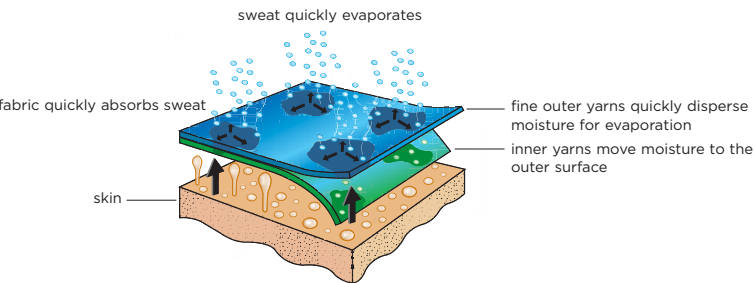

**Experience:** You're either heading out for a long, endurance ride or you want a completely cushioned feel on the bike.

**Benefit:** Customized cushioning in all the right spots, little to no friction/pressure, ultimate endurance.

**Construction/Material:** Triple density; high density foam in sit bone area, mid density foam in perineals, lower density throughout. Heavier construction and denser fabric on short for longevity.

## FIELDSENSOR™ MOISTURE TRANSFER

How many fabrics in your closet can claim one-way capillary action? Probably not many. That's what makes our technical FieldSensor material so ideal for cycling; when you sweat, the fabric pulls moisture through the garment and to the outside where it's dispersed for quick and easy evaporation, keeping you dry and comfortable on every ride. Test it out yourself with selections from our apparel line including BG Pro RXB and SL shorts and Avilan, Mira and Offset jerseys.

# APPAREL

## MEN'S SHORTS

**GOING THE DISTANCE** If you're looking to grind out that epic century this weekend, grab a pair of our new Pro RBX shorts or bibs for triple density support from the first to the last leg of your journey.

### BG PRO RBX SHORT

Constructed for long distance comfort, the BG Pro RBX Short features a uniquely designed, triple density pad and materials that will inspire confidence for the most epic cycling days.

- New for 2008
- Unique BG Pro RBX chamois uses specifically placed high density foam to relieve pressure during cycling
- BG Pro RBX chamois provides maximum comfort with upper thigh protection and perforated padding for breathability
- BG Pro RBX pad is seamless and stretchable for the ultimate fit and comfortable feel on the bike
- Patterned Fieldsensor™ fabric transports moisture away from the skin and disperses it for fast evaporation with long term durability
- Unique panel construction and stitching minimizes seam contact for comfort
- Custom Specialized logo silicone gripper holds the short in position

### BG PRO RBX BIB SHORT

With the addition of a bib upper, the BG Pro RBX Bib Short offers the all the performance expected from the absolute best in cycling shorts.

- New for 2008
- All the same great features of the Pro Short with the addition of a stretch mesh upper has a minimal design for maximum ventilation and just the right amount of support

### BG PRO SL SHORT

With our unique design, lightweight materials and all new, thin and sleek SL Pro pad, this revolutionary short packs high-end performance in a less bulky, minimalist design for those who prefer a closer-to-the-saddle feel.

- New for 2008
- Unique BG Pro SL chamois combines dual density construction with high density foam in key areas to relieve pressure during cycling
- BG Pro SL chamois has a more pliable construction with lighter materials for added flexibility
- BG Pro SL pad is seamless and stretchable for the best possible fit and feel on the bike
- New generation of lightweight Fieldsensor™ fabric provides unsurpassed moisture transfer function-moving moisture away from the skin and dispersing it for fast evaporation
- External gripper and mesh panels further reduce weight and feel on the body
- Custom Specialized logo silicone gripper holds the short in position

### BG PRO SL BIB SHORT

With our unique design, lightweight materials and the new, thin and sleek SL Pro pad, this revolutionary bib short offers high-end performance in a less bulky, minimalist design for those who prefer a closer-to-the-saddle feel.

- New for 2008
- All the same great features of the Pro SL Short with the addition of a stretch mesh upper has a minimal design for maximum ventilation and support

### BG PRO KNICKER

The BG Pro Knicker combines the features of our best bib short with the warmth of our Thermal fabric for the ultimate cool-weather cycling companion.

- Unique Specialized Thermal fabric on the front panels for loft and insulation
- Microdenier Fieldsensor™ fabric on the back of the knicker transports moisture away from the skin and disperses it for fast evaporation
- Unique BG Pro chamois uses high-density foam in key areas to relieve pressure during cycling
- Stretch mesh straps have a minimal design for maximum ventilation and support
- Sleek panel construction provides a modern, uncluttered look
- Custom Specialized logo silicone gripper at the calf holds the leg in position

### BG COMP BIB SHORT

Now offered in a bib version, our BG Comp Short provides great performance in a more affordable package.

- Unique BG Comp chamois has differentiated thickness to provide optimal padding
- BG Comp chamois is seamless and stretchable for the best possible fit and feel on the bike
- High-quality nylon / Lycra provides exceptional stretch and recovery
- Unique panel construction with double-needle stitching provides a sleek, uncluttered look
- Custom Specialized logo silicone gripper holds the short in position
- Stretch mesh upper has a minimal design for maximum ventilation and support

### BG COMP KNICKER

New for this season, this style follows our popular BG Comp Short but with extended coverage for protection in cooler weather.

- New for 2008
- Updated BG Comp chamois has differentiated thickness to provide optimal padding
- BG Comp chamois is seamless and stretchable for the best possible fit and feel on the bike
- High quality nylon / Lycra provides exceptional stretch and recovery
- Unique panel construction with double needle stitching provides a sleek, uncluttered look
- Custom Specialized logo silicone gripper holds the knicker in position
- Stretch mesh upper has a minimal design for maximum ventilation and support

### TRANSITION SHORT

This multi-sport short will provide great function for triathlon training and racing with its minimal pad, light weight and other key elements.

- New for 2008
- High quality nylon / Lycra provides exceptional stretch and recovery
- Minimal Fieldsensor™ inner pad layer for comfort during run/bike/swim
- Mesh panel on thigh for light weight and quick dry
- Drawcord at waist holds short in position
- Reduced inseam length for versatile comfort

Blue

### BG COMP SHORT

Using many of the same elements as the BG Pro, the BG Comp Short offers superior performance, fit and comfort at a more affordable price.

- Unique BG Comp chamois has differentiated thickness to provide optimal padding
- BG Comp chamois is seamless and stretchable for the best possible fit and feel on the bike
- High-quality nylon / Lycra provides exceptional stretch and recovery
- Unique panel construction with double-needle stitching provides a sleek, uncluttered look
- Custom Specialized logo silicone gripper holds the short in position

### SPORT SHORT

The Sport Short has similar design elements to the Comp, with our more basic Sport chamois, to provide a great entry-level form fit short.

- High-quality nylon / Lycra provides exceptional stretch and recovery
- Sport chamois is seamless and provides comfortable padding
- Custom Specialized logo silicone gripper holds the short in position

## MEN'S SHORTS

**BENCHMARK BAGGIES** The A-list Enduro Short is full of breathable, comfortable and adjustable features to keep you cool, collected and protected for the trail ahead.

### ENDURO SHORT

The Enduro Short is a full-featured MTB short that will provide all-day comfort with its materials and design features.

- Front panels constructed of a breathable mesh for increased ventilation
- Other shell panels are 100% stretch nylon for comfort and durability
- Nylon / Spandex mesh liner is breathable and cool
- Removable liner is attached only at the hips for freedom of movement
- Unique BG Comp chamois has differentiated thickness to provide optimal padding
- Mesh panel on back for cooling comfort
- Cinches on the waist provide size adjustment
- Zippered cargo pockets sit flush for extra storage with a sleek look

### DEMO SHORT

The Demo Short has the look and function for great Freeride performance, now with a removable cycling liner.

- Nylon / Spandex mesh liner is breathable and cool
- Removable liner is attached only at the hips for freedom of movement
- Nylon outer shell resists damage from abrasion
- Leg opening cuffs rolled to the outside for smooth contact when using pads
- Fully-opening front with zipper
- Longer leg length provides protection and function when used with pads

### TRAIL SHORT

The Trail Short has more traditional styling and materials with the same liner as the Enduro Short.

- 100% nylon shell is lightweight and durable
- Nylon / Spandex mesh liner is breathable and cool
- Removable liner is attached only at the hips for freedom of movement
- Sport chamois provides comfortable padding
- Elastic waistband with drawcord for adjustment

### TEAM REPLICA JERSEY

The official jersey of Team Specialized, this bold style features lightweight technical materials, performance features and a race-inspired fit.

- Official team design
- Channeled yarn construction has great wicking performance
- Innovative collar design and mesh panels for additional venting
- Full length zipper with welted construction does not break front graphic
- Non-elasticized sleeves for a sleek feel and appearance
- Raglan sleeves with three back pockets for traditional performance
- Form fit sizing

Black

### SHORT SLEEVE 1STLAYER

This new style provides the same great feel and performance with a bit more coverage and protection for the shoulders.

- Polyester / Spandex blend in a semi-mesh construction for a stretchable form fit
- Lightweight and hydrophobic polyester keeps you dry and comfortable
- Construction seams moved to the back of the garment for increased comfort
- Low-volume seam construction for improved layering performance
- Form fit for use under your jersey or top

White

White

### SLEEVELESS 1STLAYER

This form fit layering piece can enhance the comfort and performance of any cycling top.

- Polyester / Spandex blend in a semi-mesh construction for a stretchable form fit
- Lightweight and hydrophobic polyester keeps you dry and comfortable
- Construction seams moved to the back of the garment for increased comfort
- Low-volume seam construction for improved layering performance
- Form fit for maximum performance under your jersey

Black

### TEAM REPLICA SHORT

As worn by the members of Team Specialized, this partially sublimated short completes the team kit.

- Official design of Team Specialized
- Unique BG Comp Chamois has differentiated thickness to provide optimal padding
- Sublimated graphics provide deep, long lasting color
- Stretch mesh upper has a minimal design for maximum ventilation and support
- Custom Specialized logo silicone gripper holds the short in position
- Mesh panels on short provide additional airflow

## MEN'S JERSEYS

**VANISHING ACT** Hydrophobic and nearly weightless, our new SL Jersey is pure performance magic, giving the gram-sensitive road racer extra potential for the podium.

Red

### SL JERSEY

This extraordinarily light jersey provides a great new option for those who count every gram and want to maximize their potential at all times. With its stretch mesh panels and lightweight construction, it virtually vanishes on your body.

- New for Spring 2008
- Lightweight, high-gauge polyester material is supple and hydrophobic
- External, full length zipper provides maximum cooling and comfort
- Lightweight stretch mesh panels for cooling and contour fit
- Three back stretch mesh pockets store essentials
- Additional zippered security pocket on the side for valuables
- Form fit sizing

Yellow / Black Lt. Gray / White White / Black

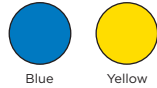

Lt. Gray

### JET JERSEY

Standing alone as our most advanced jersey, the Jet Jersey uses high-end, technical materials and our most innovative constructions to create a new benchmark in technical cycling apparel.

- Cocona™ fabric utilizes carbon technology to provide odor absorption
- Technical function moisture transfer keeps you comfortable during activity
- Microdenier mesh panels gives a form fit with ventilation
- External, full length zipper provides maximum cooling and comfort
- Cuffs constructed to the outside for more comfort
- Specialized silicone logo gripper on bottom prevents slippage
- Three back pockets store essentials
- Additional external, zippered security pocket for valuables
- Form fit sizing

## MEN'S JERSEYS

**BORN TO BE WILD** With odor-absorbing Cocona™ fabric, breathable mesh panels and cutting-edge construction, our Trail Top is the most technical and hard-working option for your trail riding adventures.

### TRAIL TOP

- A technical, full cut and casually styled cycling top for off-road or more laid back use.
- Cocona™ fabric utilizes carbon technology to provide odor absorption
  - Technical function moisture transfer keeps you comfortable during activity
  - Closed mesh panels in key function areas for additional cooling
  - Mid Chest zipper has external construction for improved comfort
  - Chest pocket with hidden zipper holds essentials
  - Single side security pocket stores valuables safely
  - Loose Fit design

Olive

Tan

### APOLLO JERSEY

- A fuller cut, casually styled cycling top ideal for off-road or recreational use.
- New for 2008
  - Fieldsensor™ fabric pulls moisture away from the skin for maximum comfort
  - Closed mesh panels in key function areas for cooling
  - Single side pocket for easy access and storage
  - Loose Fit Sizing for added comfort

Slate/Lt. Gray

### ATLAS T

- This versatile, non-pocketed, technical T offers a more casual look with substantial performance benefits over a traditional T and is quick becoming one of our most popular styles.
- Channeled yarn construction has great wicking performance
  - Lightweight and hydrophobic polyester keeps you dry and comfortable
  - Raglan sleeve design with yoke shoulder allows for freedom of movement
  - Versatile and functional style for cycling and other activities
  - Loose Fit

### DEMO TOP

- Developed for gravity events, the Demo top has a loose fit with elbow coverage and styling that links to our Deviant helmet.
- New for 2007
  - V-neck construction
  - Channeled polyester yarn construction provides wicking performance
  - Loose fit allows for use of pads

### WARM UP JACKET

- In the tradition of the great soccer team jackets, Specialized introduces a fantastic lifestyle piece for pre- or post-ride use. First presented on a limited basis, the Warm Up Jacket is now available as a part of our regular product line.
- High collar and knit cuffs provide additional warmth and comfort
  - Full length zipper
  - Appliqué logos show full Team Specialized identity
  - Hand pockets for warmth

### MEN'S WARMUP PANT

- This comfortable pull on pant completes a full suit for all award ceremonies, post-ride interviews or lunch stops on the way home from your favorite trail ride or century.
- Elastic waist with adjustable draw cord
  - Zippered ankles for easy on and off
  - Open ankle construction
  - Embroidered logo on hip
  - See page 207 for warm up jacket

# APPAREL

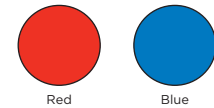

## OUTERWEAR

**PICK POCKET** Deceptively light and easy to stash in your jersey pocket, the water-resistant Deflect™ Jacket is your best defense against the elements, come wind or rain.

### DEFLECT HYBRID JACKET

Our most popular outerwear style, the Deflect Hybrid Jacket has a removable sleeve/yoke combo allowing it to convert into a functional vest when the conditions warrant.

- Lightweight polyester has a stretch woven construction for form fit comfort
- Material is wind and water resistant for protection from the elements
- Zip-off sleeves and shoulder yoke converts jacket into a vest
- Single back zippered pocket securely packs essentials
- Vented back for increased ventilation
- Custom Specialized logo silicone gripper holds the jacket in position
- Reflective trim on the back for visibility

Yellow

### DEFLECT TRAIL JACKET

Our popular Deflect styles get an addition with this full cut, trail friendly jacket that offers the same wind and rain resistant benefits of the others.

- Material is wind and water resistant for protection from the elements
- Zippered hand pockets for warming or storage
- Zippered chest pocket for easy access
- Drawcord waist adjustment in the hand pockets
- Vented back provides additional air flow
- Full cut sizing provides freedom of movement and casual styling

Navy

Clear

Blue/Black

Yellow

### SL RAIN JACKET

The light weight of this jacket may be deceiving, but when the wind and rain pick up, it provides all the necessary protection for such changing conditions.

- Ultra lightweight woven polyester has a durable, water resistant finish
- Mesh panels under the arms provide additional breathability
- Reflective trim on collar and lower back for additional visibility
- Open waist construction allows air flow with less billowing
- Form Fit Sizing

### ARM WARMERS

Specialized Arm Warmers combine our unique Thermal fabric with nylon / Lycra for optimal performance with world-class fit.

- New for Fall 2006
- Unique Specialized Thermal fabric on the leading side for warmth and comfort
- High-grade nylon / Lycra material on the back of the upper arm for comfortable form fit
- Exposed silicone logo gripper at the top holds the warmer in position

### NEOPRENE SHOE COVER

Designed for a wide variety of winter conditions, our neoprene shoe covers are made from midweight materials and offer features that make them easy to use.

- Midweight Neoprene provides insulation and protection for a range of conditions
- Fully-separating zipper located on the arch side of the foot allows for easy on and off
- Locking zipper pull does not rattle
- Hook-and-loop strap at the top helps to seal the ankle
- Inner zipper flap protects the ankle from the zipper
- Sizes: S - XL (corresponding roughly to our sock size range)

### DEFLECT JACKET

The Deflect Jacket is a lightweight, wind- and water-resistant shell that can be easily pulled from a jersey pocket for protection when the conditions become more challenging.

- Lightweight nylon has a stretch woven construction for form fit comfort
- Material is wind- and water-resistant for protection from the elements
- Single back zippered pocket securely packs essentials
- Vented back for increased ventilation
- Custom Specialized logo silicone gripper holds the jacket in position

Black

Yellow

### KNEE WARMERS

Specialized Knee Warmers provide extended coverage for the knee and calf during cool weather cycling with a combination of our Thermal fabric and nylon / Lycra.

- New for Fall 2006
- Unique Specialized Thermal fabric on the leading side for warmth and comfort
- High-grade nylon / Lycra material on the back of the knee to reduce bunching and provide optimal stretch
- Exposed silicone logo gripper at the top holds the warmer in position
- Covered silicone gripper at the bottom for a clean look

### LIGHTWEIGHT SHOE COVER

Designed for use in cool or wet conditions, the Lightweight Shoe Cover gives a pro look, protects your shoes, and provides wind and splash protection.

- Coated nylon / Spandex fabric is windproof
- Fully-separating, locking zipper located on the arch side of the foot allows for easy on and off
- Inner zipper flap protects the ankle from the zipper
- Clarino panels at toe and heel for durability
- Sizes: S - XL

### DEFLECT VEST

The Deflect Vest is a lightweight, easily-packed piece that can be an essential item for any ride when the conditions are changing or unpredictable.

- Lightweight nylon has a stretch woven construction for form fit comfort
- Material is wind- and water-resistant for protection from the elements
- Mesh back panel for additional breathability and light weight
- Custom Specialized logo silicone gripper holds the vest in position

Black

Blue

### LEG WARMERS

Specialized Leg Warmers convert any short into high-performance tights with Thermal fabric on the leading face for warmth and many of the unique features of our regular tights.

- New for Fall 2006
- Unique Specialized Thermal fabric on the leading side for warmth and comfort
- High-grade nylon / Lycra material on the back of the thigh to reduce bunching and provide optimal stretch
- Exposed silicone logo gripper at the top holds the warmer in position
- Covered silicone gripper at the bottom for a clean look
- Angled, reflective zippers provide easy on and off with visibility
- Right / left specific design

### SPECIALIZED TS

Specialized Ts are of the highest quality. Wear one of these high quality Specialized T's to support your favorite team, your obsession with riding or your commitment to bike advocacy.

- 100% preshrunk cotton
- High-grade cotton blanks in mid- to heavyweight constructions
- Different styles and themes for all types of cyclists

## APPAREL ACCESSORIES

**DRYER STEALING YOUR SOCKS AGAIN?** We thought so. Get a couple pair for race day and something for the day after, with plenty of T-shirts and hats that'll make all the other bike geeks jealous.

### SPECIALIZED CAPS

The perfect solution to your post-ride helmet head or pre-ride makeout hair.

- Full range of designs for all types of riders and head types

### BODY GEOMETRY SOCK

With its Right/Left specific design, the BG sock provides differentiated support and padding for increased comfort and performance, especially if used in tandem with Specialized BG Shoes.

- Nylon / polyester / spandex blend is durable and form fitting
- Breathable open mesh upper
- Articulated knit at the instep for a supportive fit
- Quarter height style for cycling comfort

### COMP SOCK

Comfortable on or off the bike, the Comp Sock is lightweight and breathable, with casual styling.

- Polyester / Spandex / nylon blend is lightweight and won't absorb a lot of moisture
- Quarter height for cycling comfort
- Lightweight and versatile for cycling or lifestyle use
- Traditional plain knit construction

### SL SOCK

This new style is our most thin and lightweight sock for those riders who want maximum feel and control in the shoe.

- New for 2008
- Lightweight nylon / spandex blend
- Breathable mesh construction is light and comfortable
- Quarter height provides ankle coverage

### WOOL TRAINER SOCK

The Wool Trainer is the perfect sock for heading out in cooler or wet conditions, but due to the nature of the wool, it can be worn all year long.

- Blended wool sock offers warmth lofted comfort year round
- Polypropylene content keeps the sock dry and comfortable
- Spandex maintains the sock's shape
- Short crew length

### TEAM RACING AND WORDMARK SOCK

The Team Racing Sock provides great performance for all race types and conditions.

- Polyester / nylon / spandex blend for a comfortable fit
- Channeled polyester yarns keep you dry and comfortable
- Quarter height for cycling comfort
- Mesh upper is light and breathable
- Nylon reinforced heel and toe for durability

### LO TEAM RACING SOCK

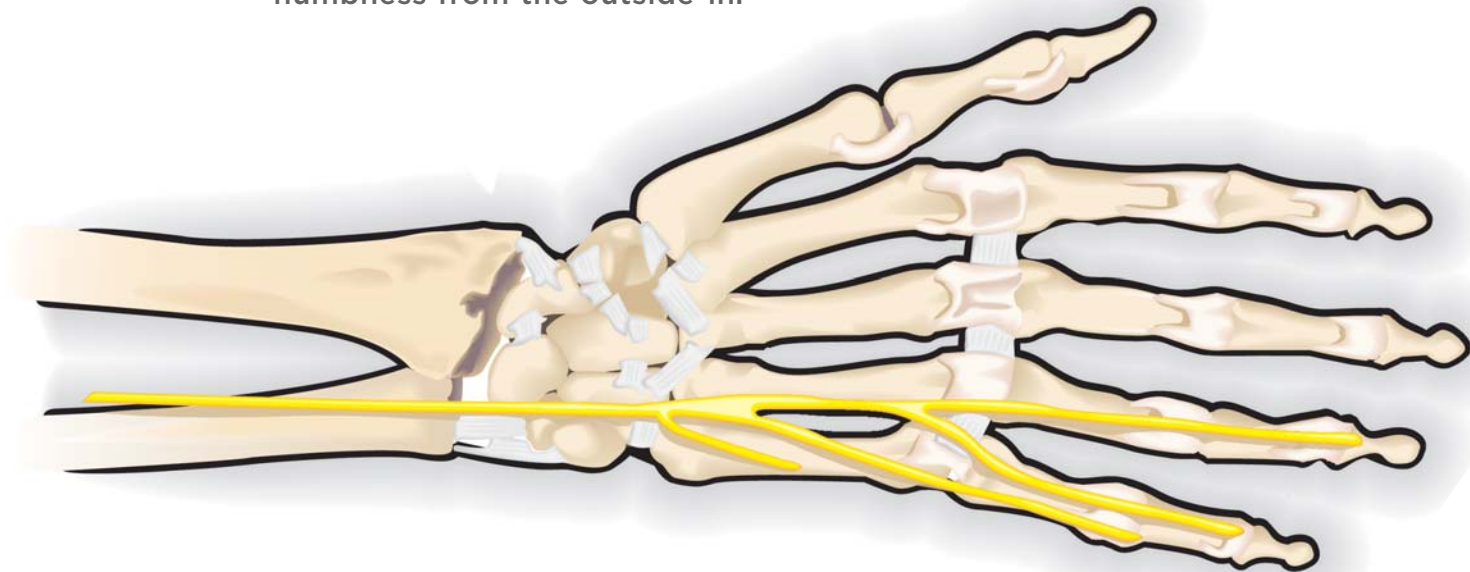

This new style provides all the same performance of the Team Racing Sock but with a low-cut, ankle height for extended tanning and freedom of movement.

- Coolmax® / nylon / spandex blend for a comfortable fit
- Coolmax® yarns keep you dry and comfortable
- Ankle height for minimal coverage
- Mesh upper is light and breathable
- Nylon-reinforced heel and toe for durability
- Available in XS size and with graphics that tie to our women's styles

# GLOVE TECH

**TWO HAND TOUCH** Hold on for longer with Body Geometry gloves. Two handy pieces of high-tech material that not only wrap your digits in snug and secure protection, but fight numbness from the outside-in.

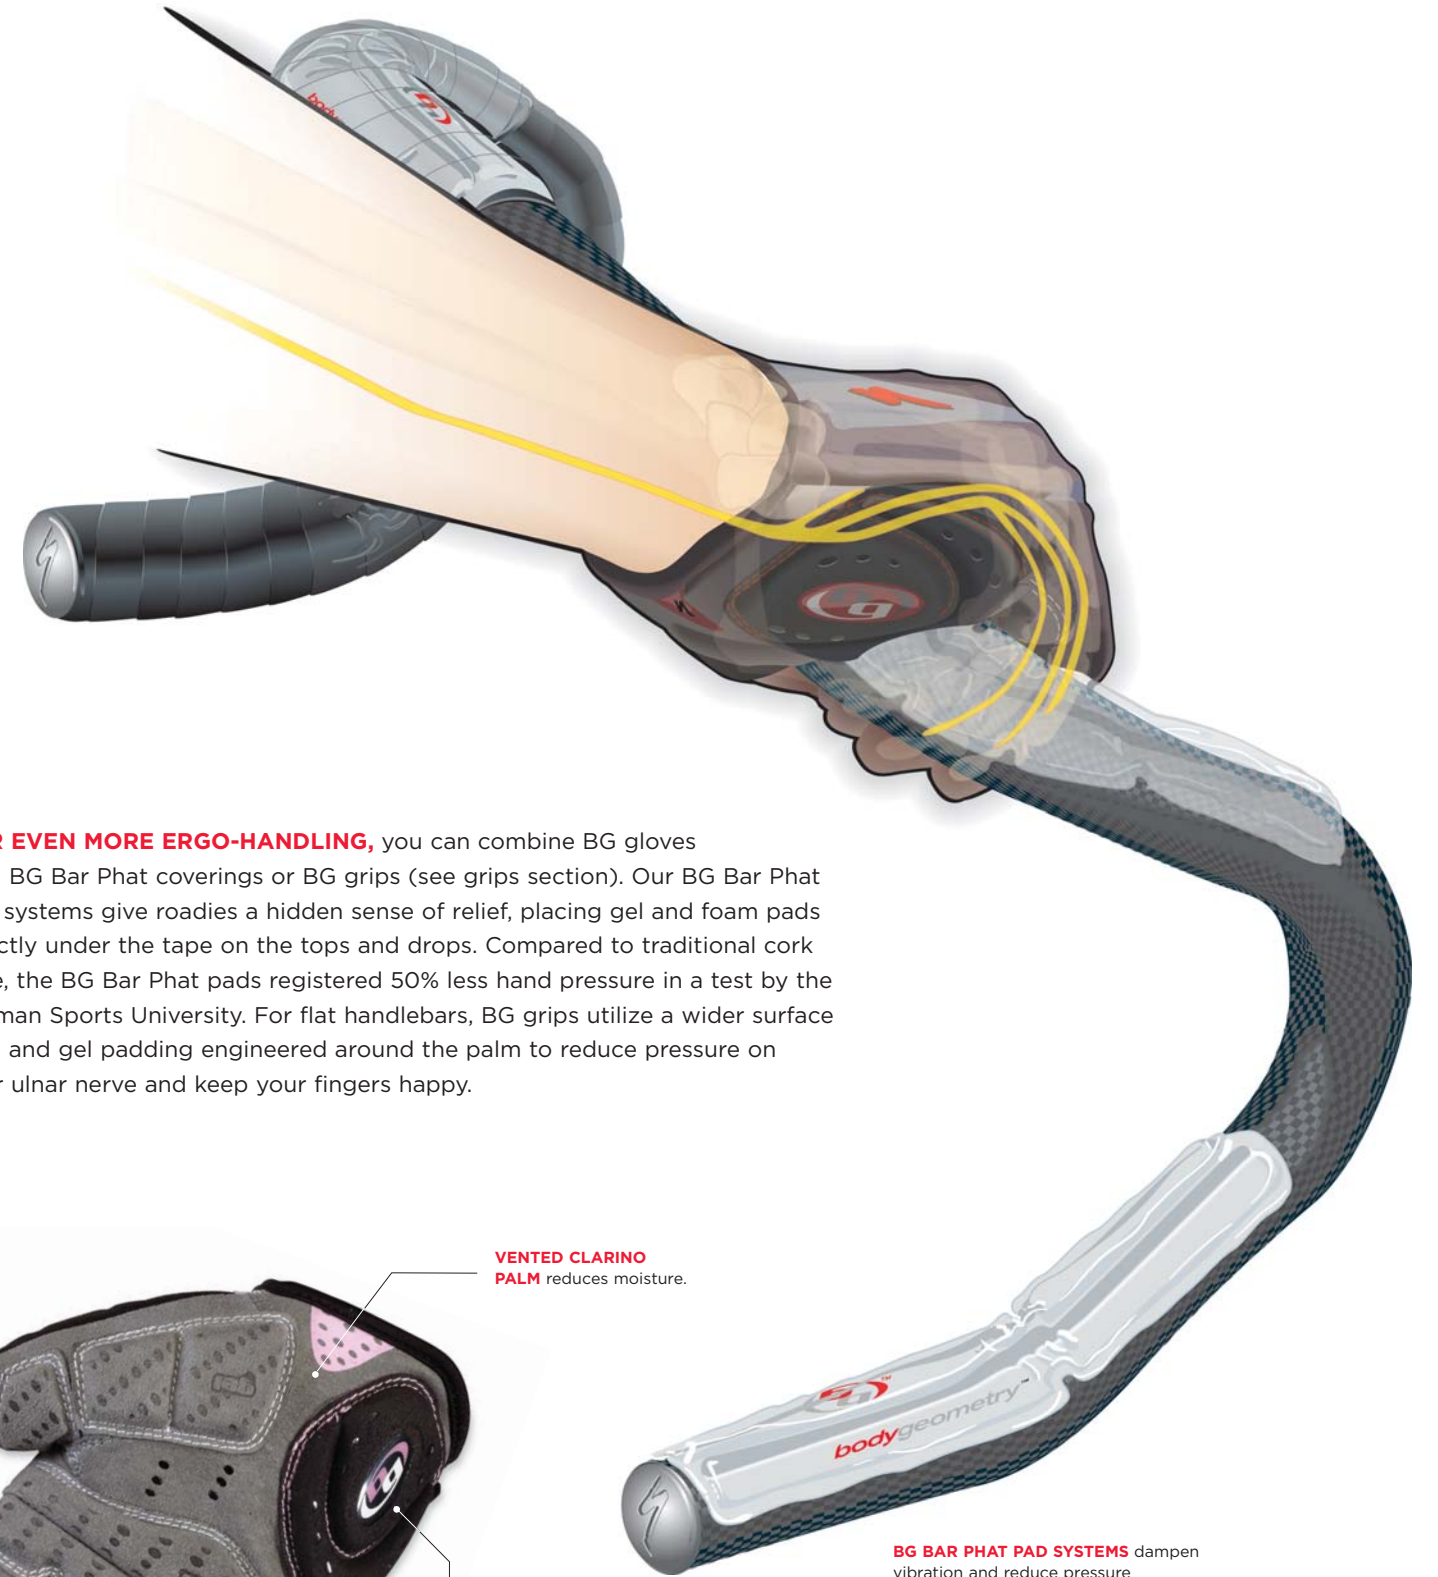

## NEVER MIND THAT YOUR LEGS ARE FEELING GOOD,

if you start experiencing fatigue or numbness in the fingers and hands, it can throw a wrench in the enjoyment and longevity of your ride. A common problem for cyclists, but one with as simple a solution as getting the right gear for the job.

Since the culprit behind your tingly hands is the ulnar nerve (also responsible for that shooting sensation when knocking your funny bone), the trick is putting some cushion between your mitts and the bars.

**BG GLOVES PLACE A SOFT GEL PAD** between the heel of your palm and the bar, spreading compressive force from the bike and reducing pressure on the ulnar nerve. The result? You guessed it. Little to no numb-hand issues; happier rider. Or if you want to go by the numbers, a 19.5% reduction in ulnar nerve pressure.

**FOR EVEN MORE ERGO-HANDLING**, you can combine BG gloves with BG Bar Phat coverings or BG grips (see grips section). Our BG Bar Phat pad systems give roadies a hidden sense of relief, placing gel and foam pads directly under the tape on the tops and drops. Compared to traditional cork tape, the BG Bar Phat pads registered 50% less hand pressure in a test by the German Sports University. For flat handlebars, BG grips utilize a wider surface area and gel padding engineered around the palm to reduce pressure on your ulnar nerve and keep your fingers happy.

**VENTED CLARINO PALM** reduces moisture.

**BG GEL PAD** insulates the ulnar nerve from pressure between hand and grip to reduce numbness.

**BG BAR PHAT PAD SYSTEMS** dampen vibration and reduce pressure on hands.

#### BG GEL

Generous gel padding makes this our most comfortable glove. The BG Gel Glove is ideal for cyclists seeking to eliminate road vibration and hand fatigue.

- BG Gel pad reduces hand numbness by relieving pressure on sensitive ulnar nerves
- Soft BG Gel foam padding across all the palm pressure zones provides maximum hand comfort
- Durable Clarino synthetic leather palm
- Soft microsuede thumb for wiping away sweat
- Micro-width Velcro closure for unrestricted wrist movement

## GLOVES

**A FISTFUL OF COMFORT** Our short and long-fingered BG Gel gloves give your hands a little race support, putting an ergonomic gel pad between your palms and the bar to relieve pressure and numbness.

#### BG PRO

The minimalist design and exceptional ventilation are designed to improve comfort for high intensity racing. The ultralight slip-on design breathes and disperses moisture even on the palm, while providing uninhibited bike control and sensitivity.

- Airmesh and soft Clarino synthetic leather palm is vented to reduce moisture on gripping surfaces
- BG Gel pad reduces hand numbness by relieving pressure on the sensitive ulnar nerve
- Minimal padding for exceptional precision and control
- Slip-on wrist cuff fits perfectly without inhibiting movement
- Soft microsuede thumb for wiping away sweat

#### BG SPORT

The BG Sport glove packs many of our key glove features into a value-priced package, while still providing exceptional performance.

- Clarino synthetic leather palm
- Stitched BG Gel pad reduces hand numbness by relieving pressure on sensitive ulnar nerves
- Moderate foam padding in key contact areas adds further comfort
- Absorbent microfleece thumb surface
- Comfortable contoured Velcro wrist closure

#### XC LITE

A high performance glove for riders who prefer a minimalist upper and single layer palm design for snug fit and bar control.

- Lightweight stretch mesh upper
- Slip-on cuff for a snug fit
- No welds or wrist closure to inhibit dexterity
- Brushed microfiber thumb wipe

#### BG COMP

Great for a wide array of cyclists, in a wide array of conditions. A balance of comfortable padding and enhanced ventilation, the BG Comp Glove provides great all-around performance.

- Body Geometry gel pad reduces hand numbness by relieving pressure on sensitive ulnar nerves
- Moderate foam padding in key contact areas adds further comfort
- Soft Clarino synthetic-leather palm is vented to reduce palm sweat
- Absorbent microsuede thumb surface for wiping sweat
- Brushed microfiber thumb wipe
- Narrow velcro wrist closure won't restrict movement

#### BG TEAM GLOVE

With its light weight and padding, the Team glove is a great choice for our sponsored riders or those who want the same performance.

- BG Gel pad reduces hand numbness by relieving pressure on sensitive ulnar nerves
- Moderate foam padding in key contact areas adds further comfort
- Clarino synthetic leather palm remains soft, yet durable
- Absorbent microfleece wiping surface on the thumb
- Lightweight sublimation print Lycra for race fit and comfort
- Comfortable contoured Velcro wrist closure

#### BG RIDGE

The BG Ridge glove meets the needs of both casual and competitive riding, with generous comfort features and performance styling.

- Clarino synthetic leather palm with silicone ink print for extra grip
- Lightweight mesh back is a nylon / Spandex blend
- Welded Body Geometry gel pad reduces hand numbness by relieving pressure on sensitive ulnar nerves
- Stretch neoprene wrist with Velcro closure for maximum comfort and a customized fit
- Soft and absorbent microfleece wiping surface on thumb

# GLOVES

**DON'T FORGET THE TIPS** When the conditions turn extreme, we have just the high-tech armor to protect your whole hands from the elements and all of nature's obstacles.

### DEFLECT

- Our most popular fall glove for moderately cool conditions from 45°F/7°C. The top of this glove uses a water and wind-resistant layer to protect fingers from wind chill, combined with a supple palm for grip and bar control.
- Upper uses a wind and water-resistant membrane with a warm fleece inner
  - Brushed microfiber thumb wipe
  - High visibility reflective piping
  - Synthetic leather palm with fingertip grip
  - BG Gel pad for ulnar nerve protection

### WATERPROOF

### SUBZERO

- Our highly versatile component system glove is ideal for a range of conditions. Wear our core layer liner by itself, or pull on the outer shell when the weather gets bad. Worn together, the shell and core layer will protect you when it's below 30°F/0°C.
- Fully waterproof outer Hipora shell can be worn separately
  - Fleece core layer liner can be worn separately in warmer weather
  - Extra length gauntlet cuff keeps out wet and cold
  - High grip palm material even in wet weather
  - Brushed microfiber thumb wipe
  - Reflective piping and printing for added visibility

### EQUINOX

- A favorite cool weather glove for road or MTB riding, this stretchy fleece-lined glove is breathable for dry conditions to 50°F/10°C.
- Fleece-lined warmth for the top of the fingers and front of the hand
  - Stretchable upper for a great fit
  - Brushed microfiber thumb wipe
  - BG Gel pad for ulnar nerve protection
  - Slip-on extra length cuff for warm wrists

### S-LOGO NEOPRENE GLOVE

- Form fit wet suit technology for unbeatable dexterity and warmth. This glove is a favorite in the European peloton for pros training in the wet early season.
- 3mm Neoprene upper for warmth
  - Fluid-sealed seams for strength and flexibility
  - Logo print 2.5mm Neoprene for palm grip

### MONKEY WRENCH GLOVE

- Developed for our team mechanics by our team mechanics, these gloves offer protection for your digits when wrenching on your bike.
- High grip silicone fingertips for handling small parts
  - Stretchable mesh upper conforms and protects knuckles
  - Durable Clarino palm and reinforced forchette finger protection

### WATERPROOF

### RADIANT

- When the weather is rotten, but nothing will stop the ride, this insulated and fully waterproof glove is the ticket-designed for wind-chilled weather down to 30°F/0°C.
- Thinsulate insulation for warmth
  - Fully waterproof internal Hipora shell
  - High grip palm material even in wet weather
  - Brushed microfiber thumb wipe
  - Extended gauntlet style cuff
  - Reflective piping and printing for added visibility

### FORTRESS

- The ultimate in protection. Molded armor defend hands from rocks and debris, while the Clarino palm and Body Geometry pad provide lasting palm comfort and grip control.
- Hard molded knuckle, wrist and even thumb guards.
  - Breathable mesh and stretchable spandex upper.
  - Welded rubber finger protection.
  - Reinforced Clarino palm is soft and durable

### KIDS PULSE

- Designed specifically for kids, the Pulse glove offers a fast look and genuine performance for those just getting off of the start line.
- Thermo-formed armor for protection
  - Breathable mesh back for comfort
  - Minimal palm padding for maximum control
  - Soft and absorbent microfleece wiping surface on thumb
  - Children's sizing

# APPAREL TECH

**THE SHORT STORY** Fresh from the drawing board, our expanded lineup of Designs for Women apparel redefines your old chamois and brings a wider palette of colors, silhouettes and styles to the table.

**WITH AN INVESTED TEAM OF PROFESSIONAL WOMEN** (who more importantly, are riders themselves) calling the shots on our apparel line, plus years of research and an inspired dedication to women's cycling, our 2008 women's apparel just keeps getting better.

From head to toe—jerseys, shorts, gloves and other gear—we've enhanced the fit of all our pieces to guarantee a more comfortable and enjoyable ride and to compliment every woman's body, style and riding type. We've modified the sizing of our tops in length and overall fit to better suit a wider range of body types, while still utilizing the most high performance fabrics and construction techniques, including our technical FieldSensor moisture transfer material found in the new shorts and Mira jerseys. And most notably, we've expanded the form and function of our high-end chamois pads to better serve every type of rider and riding experience.

You know just as well as we do that your comfort is the saddle is inextricably linked to your overall enjoyment on the bike. So we now offer two BG pro-level pads of varying thickness and function: one for maximum protection from pressure or for longer, endurance rides; the other for shorter rides or those who prefer a more direct feel on the bike; but both for riders who refuse to sacrifice quality or function.

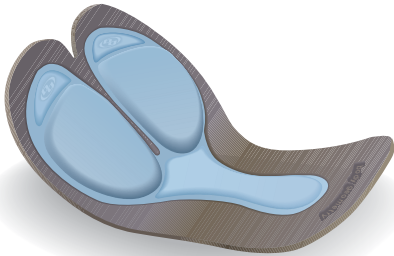

**RBX CHAMOIS** - highest level of padding for pressure-free performance

**Experience:** You're either heading out for a long, endurance ride or you want a completely cushioned feel on the bike.

**Benefit:** Customized cushioning in all the right spots, little to no friction/pressure, ultimate endurance.

**Construction/Material:** Triple Density; high density foam in sit bone area, mid density foam in perineals, lower density throughout. Heavier construction and denser fabric on short for longevity.

**SL CHAMOIS** - lower level of padding for freedom of movement

**Experience:** Ideal for your shorter, more intense rides or when you're looking for a more supple feel on the bike.

**Benefit:** Focused cushioning, lighter weight, flexibility, more freedom of motion in the saddle.

**Construction/Material:** Dual density molded foam; focused pattern. Lighter fabric, mesh panels and minimal construction on short.

# APPAREL WOMEN'S SHORTS

**FIT YOUR FANCY** Enjoy the flexible support of our new BG Pro SL Short with its dual density, women's-specific chamois pad and high-tech Fieldsensor fabric.

**WOMEN'S BG PRO RBX SHORT**

Designed for long distance comfort, the Women's BG Pro RBX shorts feature a uniquely designed, triple density pad and materials that will inspire your confidence for the most epic cycling days.

- New for 2008
- RBX women's-specific chamois uses specifically placed high density foam to relieve pressure during cycling
- Chamois provides maximum comfort with upper thigh protection and perforated padding for breathability
- Pad is seamless and stretchable for the ultimate fit and feel on the bike
- Patterned Fieldsensor™ fabric transports moisture away from the skin and disperses it for fast evaporation with long-term durability
- Custom Specialized logo silicone gripper holds the short in position

**WOMEN'S BG PRO SL SHORT**

With our unique design, lightweight materials and the new, sleek Women's SL Pro pad, this short offers high-end performance with a less bulky look and feel.

- New for 2008
- SL chamois uses a dual density construction with high density foam in key areas to relieve pressure during cycling
- Chamois offers a pliable construction with lighter materials for added flexibility
- Chamois is seamless and stretchable for the best possible fit and feel on the bike
- Fieldsensor fabric transports moisture away from the skin and disperses it for fast evaporation with long-term durability
- Mesh panels further reduce weight and feel on the body
- Custom Specialized logo silicone gripper holds the short in position

**WOMEN'S BG COMP SHORT**

Designed for a women's-specific style line, the Women's BG Comp Short provides great performance, fit and comfort at a more affordable price.

- Updated Women's BG Comp chamois has differentiated thickness to provide optimal padding
- BG Comp chamois is seamless and stretchable for the best possible fit and feel on the bike
- Fine grade nylon/spandex is durable and soft
- Unique women's design in the panel construction provides a sleek, flattering look
- Custom Specialized logo silicone gripper holds the leg in position

**WOMEN'S BG PRO KNICKER**

The Women's BG Pro Knicker combines the features of our best short with the warmth of our Therminal™ fabric for the ultimate cool weather cycling piece.

- Unique Specialized Therminal™ fabric on the front panels for loft and insulation
- Microdenier Fieldsensor™ fabric on the back of the knicker transports moisture away from the skin and disperses it for fast evaporation
- Unique Women's BG Pro chamois uses high density foam in key areas to relieve pressure during cycling
- Sleek panel construction is functional and flattering
- Custom Specialized logo silicone gripper at the calf holds the leg in position
- Women's-specific sizing and fit

**WOMEN'S BG COMP KNICKER**

New for this season, this style follows our popular Women's BG Comp Short but with extended coverage for protection in cooler weather.

- New for 2008
- Updated Women's BG Comp chamois has differentiated thickness to provide optimal padding
- BG Comp chamois is seamless and stretchable for the best possible fit and feel on the bike
- High quality nylon/lycra provides exceptional stretch and recovery
- Unique panel construction with double needle stitching provides a sleek, uncluttered look
- Custom Specialized logo silicone gripper holds the knicker in position
- Women's specific sizing and fit

# APPAREL

## WOMEN'S SHORTS

**BUILT TO BREATHE** Between the mesh paneling, removable liners, quality construction and performance fabrics, all of our women's bottoms are designed for cycling comfort, even when you're sweating like a pig.

WOMEN'S TRANSITION SHORT

- This multi-sport short will provide great function for triathlon training and racing with its minimal pad, light weight and other key elements.
- New for 2008
  - High quality nylon/Lycra® provides exceptional stretch and recovery
  - Minimal Fieldsensor™ inner pad layer for comfort during run/bike/swim
  - Mesh panel on thigh for light weight and quick dry
  - Drawcord at waist holds short in position
  - Reduced inseam length for versatile comfort

WOMEN'S SPORT SHORT

- The Women's Sport Short has similar design elements to the Comp with our new Sport chamois, creating a great entry-level form fit short.
- High quality nylon/Lycra® provides exceptional stretch and recovery
  - Updated Sport chamois provides comfortable padding and a friction-free ride
  - Unique panel construction provides a sleek, uncluttered look
  - Custom Specialized logo silicone gripper holds the short in position
  - Women's-specific sizing, pad and fit

WOMEN'S TRANSITION SINGLET

- With its sculpted styling and functional design, this new style functions great for all aspects of triathlon training and racing.
- New for 2008
  - Nylon/Lycra® fabric is form fit for aerodynamic performance and comfort
  - Stretch mesh back and shoulders for ventilation and comfort
  - Back pocket provides quick access during the bike or run
  - 3/4 length hidden front zipper for temperature control
  - Internal shelf bra provides support during activities
  - Form Fit Sizing

WOMEN'S ENDURO SHORT

- With its great materials and design, the Enduro short offer women all the performance that is expected from our apparel in a style that complements our tops wonderfully.
- Comfortable and durable 100% nylon stretch shell
  - Updated Women's BG Comp chamois has differentiated thickness to provide optimal padding
  - Breathable and cooling nylon/spandex mesh liner
  - Double snap closure and zippered fly on the front
  - Dual cinch adjusts at waist for custom
  - Liner is only attached at the hips for full freedom of movement
  - Single thigh pocket with Velcro closure for storing key items
  - Center back mesh panel with extra security pocket

WOMEN'S TRAIL SHORT

- This popular style has a slightly shorter leg length and gives great performance at a great price point.
- Comfortable and durable 100% nylon stretch shell
  - Updated Sport chamois provides comfortable padding and a friction-free ride
  - Breathable and cooling nylon/spandex mesh liner
  - Liner is only attached at the hips for full freedom of movement
  - Front snap closure with zipper
  - Fun and functional front pockets

WOMEN'S WARM UP PANT

- This great new addition is perfect for pulling on after a long ride or the legs can be rolled and cinched for use as a casual riding pant.
- New for Fall 2007
  - Polyester/ Lycra® blend fabric is soft, comfortable and flattering
  - Comfortable, non binding waist design
  - Legs designed to be rolled and snapped up for use on the bike
  - Relaxed ankle construction for easy on and off

WOMEN'S TEAM REPLICA JERSEY

- The official jersey of our Women's Team, this great style features light-weight technical materials, performance features and a race-inspired fit.
- Official team design
  - Channeled yarn construction has great wicking performance
  - Innovative collar design and mesh panels for additional venting
  - Full length zipper with welted construction does not break front graphic
  - Non elasticized sleeves for a sleek feel and appearance
  - Raglan sleeves with three back pockets for traditional performance
  - Revised Semi Form Fit Sizing for a wider variety of body types

Pink

WOMEN'S TEAM REPLICA SHORT

- As worn by the members of Team Specialized, this partially sublimated short completes the team kit.
- Official design of Team Specialized
  - Unique BG Comp chamois has differentiated thickness to provide optimal padding
  - Sublimated graphics provide deep, long lasting color
  - Custom Specialized logo silicone gripper holds the short in position
  - Mesh panels on short provide additional airflow

## WOMEN'S GLOVES

**CAN WE GET A HIGH FIVE?** You'll thank us the first time you slip on our BG Gel glove, your hands meet the bar and you realize that a little gel padding goes a long way when it comes to steering comfort and endurance.

### BG GEL WOMEN'S

- Our most comfortable glove, sized specifically for women. Generous BG Gel foam padding makes this glove ideal for female cyclists seeking to eliminate road vibration and hand fatigue.
- Sized specifically for the palm width and finger length of women
  - Soft BG Gel foam padding across all the palm pressure zones provide maximum hand comfort
  - BG Gel pad reduces hand numbness by relieving pressure on sensitive ulnar nerves
  - Durable Clarino synthetic leather palm
  - Soft microsuede thumb for wiping away sweat
  - Micro-width Velcro closure for unrestricted wrist movement.

### WOMEN'S BG PRO

- With sizing for women, this is a minimalist and exceptionally ventilated glove, designed to improve comfort for high intensity racing. The ultralight slip-on design breathes and disperses moisture even on the palm, while providing uninhibited bike control and sensitivity.
- Airmesh and soft Clarino synthetic leather palm is vented to reduce moisture on gripping surfaces
  - BG Gel pad reduces hand numbness by relieving pressure on the sensitive ulnar nerve
  - Minimal padding for exceptional precision and control
  - Slip-on wrist cuff fits perfectly without inhibiting movement
  - Soft microsuede thumb for wiping away sweat

### BG COMP WOMEN'S

- Sized perfectly for all women cyclists and great in all conditions. A balance of comfortable padding and cooling ventilation, the Women's BG Comp glove provides great all-around performance.
- Sized specifically for the palm width and finger length of women
  - BG Gel pad reduces hand numbness by relieving pressure on sensitive ulnar nerves
  - Moderate foam padding in key contact areas adds further comfort
  - Soft Clarino synthetic leather palm is vented to reduce palm sweat
  - Brushed microfiber thumb wipe
  - Narrow Velcro wrist closure won't restrict movement

### BG SPORT WOMEN'S

- The Women's BG Sport glove packs many of our key glove features into a value-priced package sized specifically for women, while still providing exceptional performance.
- Sized specifically for women's hands
  - Clarino synthetic leather palm
  - Stitched BG Gel pad reduces hand numbness by relieving pressure on sensitive ulnar nerves
  - Moderate foam padding in key contact areas adds further comfort
  - Absorbent microfleece thumb surface
  - Comfortable contoured Velcro wrist closure

### ENDURO WOMEN'S

- Designed around a women's fit, this glove is ideal for technical trail riding. Protective upper with strategically placed protection is matched with a supple, unpadded palm design.
- Non-padded Clarino leather palm for bar control
  - Welded rubber finger protection and logos
  - Finger split flex zones
  - Stretchable, durable mesh top
  - Micro cuff straps for wrist mobility
  - Brushed microfiber thumb wipe

### DEFLECT WOMEN'S

- Our most popular fall glove for moderately cool conditions from 45°F/7°C, with a women's-specific fit. The top of this glove uses a water and wind-resistant layer to protect fingers from wind chill, combined with a supple palm for grip and bar control.
- Upper uses a wind and water-resistant membrane with a warm fleece inner
  - Brushed microfiber thumb wipe
  - High visibility reflective piping
  - Synthetic leather palm with fingertip grip
  - BG Gel pad for ulnar nerve protection

### BG RIDGE™ WOMEN'S

- The highly breathable women's BG Ridge glove meets the needs of both casual and competitive riding, with a women's specific fit, generous comfort features and performance styling.
- Sized specifically for women
  - Clarino synthetic leather palm
  - Lightweight mesh back is a nylon/spandex blend
  - BG Gel pad reduces hand numbness by relieving pressure on sensitive ulnar nerves
  - Narrow Velcro wrist closure for maximum comfort and a customized fit
  - Soft and absorbent microsuede wiping surface on thumb

### BG RADIATOR™ WOMEN'S

- Contoured for a women's fit, this glove combines BG padding with full finger protection. Strategically placed welding ensures this is the ideal glove for technical trail riding, when protection is essential.
- BG Gel pad reduces hand numbness by relieving pressure on sensitive ulnar nerves
  - Welded rubber finger protection and logos
  - Finger split flex zones
  - Stretchable, durable mesh top
  - Micro cuff straps for wrist mobility

### WOMEN'S EQUINOX™

- A favorite cool weather glove for road or MTB riding, this stretchy fleece-lined glove is breathable for dry conditions to 50°F/10°C and is designed to fit the shape of a woman's hand.
- Fleece-lined warmth for the top of the fingers and front of the hand
  - Stretchable upper for a great fit
  - Brushed microfiber thumb wipe
  - BG Gel pad for ulnar nerve protection
  - Slip-on extra length cuff

# BAR COVERINGS

**BARE BARS JUST WON'T CUT IT** So wrap yourself in a little comfort and control with Body Geometry grips, vibration-damping tape and plush padding systems for all types of riders.

### BG BAR PHAT

A unique and lightweight Body Geometry road bar damping system that dramatically improves road bike comfort. Independent testing at the German Sports University in Cologne shows Bar Phat reduces hand pressure by up to 50%.

- 50% reduction of pressure for 4.5mm, and 40% for 2.5mm thickness
- Clear, shock absorbing gel pads fit road bar top and drops
- New gel pad design can be trimmed and reused for different bars
- Adds minimal thickness to the tops of the bar only, not the entire diameter
- Includes suede texture Roubaix tape (w/o gel backing) and bar plugs
- Available in 2.5 or 4.5mm thickness

### ROUBAIX TAPE

Now available as an aftermarket item, the Roubaix tape has a suede feel and an elastomer gel backing for vibration damping performance.

- suede finish provides non-slip comfort on the handlebar
- More than double the elastomer thickness of competitor gel tapes
- Color matched end plugs

### SUPER PHAT BAR GEL

This molded bar padding system combines different materials for maximum vibration damping and comfort which will lead to improved performance, especially on longer rides.

- Lightweight molded foam padding contours to the bar for maximum comfort
- Gel inserts in key contact areas for additional damping performance
- This unique pad system results in substantially reduced pressure on the bars
- Gel padding system includes cork tape, end caps and finishing tape

### S-WRAP

A low-profile solution for reducing vibration and improving comfort on road bike handlebars.

- Premium quality cork tape stretches easily without tearing
- More than double the elastomer thickness of competitor gel tapes
- Silver bar plugs

### ENDURO GRIP

The Enduro Grip has a larger profile and softer density for cycling where vibration and shock absorption are key.

- Softer, thicker padding for comfort
- Textured pattern provides non slip performance
- Dual density compound for improved comfort and bar adherence
- Softer density on the outside for superior vibration damping
- Firmer density inner core grips the bar

### MYKA™ GRIP

This low profile women's grip is spec'd on many of our women's mountain bikes and ties into the style and design seen throughout all of our Designs for Women bikes and gear.

- Lower profile allows for smaller hands
- Design elements tie to our Designs for Women
- Dual density compound for improved comfort and bar adherence
- Softer density on the outside for superior bar control
- Firmer density inner core grips the bar

### BG COMFORT LOCKING GRIPS: MEN'S, WOMEN'S, SHORT

The new version of the Body Geometry® Comfort Grip has been completely redesigned to more effectively reduce hand numbness and has an updated locking mechanism for secure attachment to the bars.

- Medically designed by ergonomic specialist Roger Minkow, M.D. to prevent cycling-related numbness and weakness of the hands
- Softest density in key contact area to cushion the ulnar nerve
- Medium density body for secure grip
- Firmest density inner core for secure attachment to the bar
- Ergonomically shaped platform provides maximum comfort
- Improved locking clamp for secure attachment
- Women's-specific colorway and graphic have a reduced diameter and length for smaller hands
- Short version designed for use with twist shift systems

### BG MTN. GRIP

Fully redesigned, the low profile of the BG MTB Grip provides maximum control, while the multi density construction ensures a higher level of comfort.

- Medically designed by ergonomic specialist Roger Minkow, M.D. to prevent cycling related numbness and weakness of the hands
- Softest Density in key contact area to cushion the Ulnar nerve
- Medium density body for secure grip
- Firmest density inner core for secure attachment to the bar
- Low profile design provides maximum control

### XC LOCKING GRIP

This lower profile grip allows for more control on the bar with the added performance of our new locking clamp.

- New for model year 2008
- Low profile provides a more direct feel and control on the handlebar
- Dual density compound for improved comfort and bar adherence
- Softer density on the outside for superior bar control
- Firmer density inner core grips the bar
- Improved locking clamp for secure attachment

### COMMUTER GRIP

This lightweight foam grip is shaped for maximum hand comfort, with an inner core that provides excellent hold on the bars.

- New for 2008
- Dual Density design is simple and functional
- Foam outer layer provides light weight and vibration absorption
- Inner layer provides strong attachment to the bars
- Shaped to provide a comfortable platform for the hands

### SIDEWINDER GRIP

With its directional non slip design and the lowest profile of all our grips, the Sidewinder offers the highest level of control for serious riders.

- Functional, "scaled" pattern provides maximum control
- Right / left specific design
- Dual density compound for improved comfort and bar adherence
- Softer density on the outside for superior bar control
- Firmer density inner core grips the bar

### ROCCA™ LOCKING GRIP

With its softer density and larger profile, the Rocca locking grip provides additional comfort during aggressive riding.

- New for model year 2008
- Softer, thicker padding for comfort
- Textured pattern provides non-slip performance
- Dual density compound for improved comfort and bar adherence
- Softer density on the outside for superior vibration damping
- Firmer density inner core grips the bar
- Improved locking clamp for secure attachment

### LOCKING END CAP

This closed-end version of our locking clamp can be retrofitted onto our new locking grips for covered protection in case of drops.

- Compatible with Locking Rocca or XC locking grips only
- Closed end for additional protection for the ends of the bars

# COMPUTERS

**DIAL MY RIDE** Forget personal trainers. Get an accurate gauge on all your rider stats—like miles traveled, speed and cadence—with our smart line of Speed Zone computers.

## SPEEDZONE COMP

Easy to use and easy to install wireless computer that delivers unsurpassed reliability, performance timing functions and a unique user definable interface.

- Performance training tools and convenience of a wireless design
- All the same features as the SpeedZone Elite, plus:
  - Wireless speed sensor
  - Wired cadence optional
  - Average cadence
  - Maximum cadence
  - Interval timer
  - Stopwatch
  - Beeper alert

## SPEEDZONE SPORT

Easy to use and easy to install basic computer that delivers unsurpassed reliability. With simple, intuitive navigation, the rider is never more than one key press from any piece of information.

- All the essentials with easy, one-touch reach and beyond simple calibration makes installation a breeze
- Triple line readout provides clear feedback on crucial ride stats
- Multiple mounting options for the utmost in versatility
  - Speed
  - Maximum speed
  - Average speed
  - Odometer
  - Trip meter
  - Speed comparator
  - Auto timer

# PUMPS

**FLAT-OUT NECESSARY** Don't play the odds. When it comes to a curb or trail-side emergency, you'll need one of our strong and sure-fire Airtool™ pumps to get back in the saddle again.

### A. AIRTOOL PRO

A high performance pump that makes no compromises in its design, materials or function.

- Updated for 2008 for greater durability
- Tough alloy SwitchHitter Head Technology automatically switches between Shraeder and Presta valves
- Pressure release valve in the handle allows for exact inflation
- Kraton™ handle for a secure grip and increased durability
- Cast aluminum base provides a stable platform
- Aluminum barrel with a steel plunger shaft
- Oversized gauge is easy to read with excellent accuracy
- 42" (110cm) hose length makes the pump easy to use

### C. AIRTOOL SPORT

The value-priced Airtool Sport is packed with features, including our SwitchHitter head and a composite shaft.

- SwitchHitter Head Technology automatically switches between Shraeder and Presta valves
- Composite base construction
- Composite barrel with steel plunger shaft
- Oversized gauge is easy to read with excellent accuracy
- 42" (110cm) hose length makes the pump easy to use

### B. AIRTOOL COMP

With many of the features of the Pro, the Airtool Comp provides strong performance with a greater value.

- Composite SwitchHitter Head Technology automatically switches between Shraeder and Presta valves
- Heavy duty steel base for stability
- Aluminum barrel with a steel plunger shaft
- Oversized gauge is easy to read with excellent accuracy
- 42" (110cm) hose length makes the pump easy to use

### CPRO<sup>2</sup>

Lightweight and compact quick fill CO<sup>2</sup> inflation device.

- New for 2008
- Utilizes threaded 16g cartridge
- Neoprene carrying case that doubles as a canister wrap
- Triggered action allows for controlled distribution and safe storage of unused CO<sup>2</sup>

A.

### COMBO<sup>2</sup>

Uniquely designed inflation device that combines the quick use of CO<sup>2</sup> with the reliability of a traditional pump.

- New for 2008
- Utilizes threaded 16g cartridge
- Cartridge stores inside the pump body
- Pump works with cartridge stored inside the barrel, even if the cartridge is charged
- Triggered action allows for controlled distribution and safe storage of unused CO<sup>2</sup>

### AIRTOOL CARBON MINI

With specially designed carbon construction and a locking head, the Airtool Carbon Mini's size doesn't compromise its performance, even if it is the lightest and most minimalist pump we offer.

- Carbon designed handle and barrel combined with an aluminum shaft for durable performance
- Mini length body is easy to store on the bike or in a jersey pocket
- Locking head converts to Shraeder or Presta for easy use by all cyclists
- Plunger locks to main body chamber with a simple twist
- End cap unscrews to reveal storage chamber in the handle for patches, etc.
- Glueless patches included in handle
- Water bottle boss mounted bracket included

### WINDPIPE<sup>®</sup>

The Windpipe has the performance, durability and portability needed for the most epic rides.

- SwitchHitter Head technology automatically switches between Shraeder and Presta valves
- Aluminum barrel for long lasting durability
- Larger diameter barrel fills large volume tires fast
- Ergonomic T-handle also works as a tire lever, and holds an emergency glueless patch kit
- Includes mounting bracket

### AIRTOOL ROAD

This classic road pump provides high performance and durability in a minimalist design that suits road bikes and riders of all types.

- Aluminum shaft, handle and chamber for durable performance
- Medium length body is easy to store, yet provides solid air volume
- Aluminum Presta-only head is minimal, functional and strong
- Plunger locks to main body chamber with a simple twist
- End cap unscrews to reveal storage chamber in the handle for patches, etc.
- Glueless patches included in handle
- Water bottle boss mounted bracket included

### AIRTOOL DUAL

With its larger volume and dual head design, the Airtool Dual is suitable for all mountain bikes and trails.

- Aluminum shaft, handle and chamber for durable performance
- Larger volume body for pushing more air
- Dual Shraeder / Presta head with locking lever is easy to use on all bikes
- Plunger locks to main body chamber with a simple twist
- End cap unscrews to reveal storage chamber in the handle for patches, etc.
- Glueless patches included in handle
- Water bottle boss mounted bracket included

### WINDPIPE SHOCK<sup>®</sup>

The dual-duty Windpipe Shock fills big tires fast and also serves as a high-pressure precision shock pump.

- Thread-on Schraeder head, with included Presta adapter
- One twist changes from fast inflation mode to high-pressure mode (up to 220psi)
- Swivel hose for easy access to tires or shocks
- Durable aluminum barrel
- Ergonomic T-handle also works as a tire lever and holds an emergency glueless patch kit
- Includes mounting bracket

### AIRTOOL MTB

The Airtool MTB is dependable and durable enough for use in all off-road conditions.

- Aluminum shaft, handle and chamber for durable performance
- Larger volume body for pushing more air
- Locking head converts to Shraeder or Presta for easy use by all cyclists
- Plunger locks to main body chamber with a simple twist
- End cap unscrews to reveal storage chamber in the handle for patches, etc.
- Glueless patches included in handle
- Water bottle boss mounted bracket included

### AIRTOOL MINI

With a locking head, aluminum construction and minimalist design, the Airtool Mini's size doesn't come close to compromising its performance.

- Aluminum shaft, handle and chamber for durable performance
- Mini length body is easy to store on the bike or in a jersey pocket
- Locking head converts to Shraeder or Presta for easy use by all cyclists
- Plunger locks to main body chamber with a simple twist
- End cap unscrews to reveal storage chamber in the handle for patches, etc.
- Glueless patches included in handle
- Water bottle boss mounted bracket included

### FUTURESHOCK

The Future Shock pump is designed to compliment our new line of suspension systems and offer unique features which have never been seen on a shock pump before.

- Uniquely designed gauge with protective over-molding comes with two indicators that can be preset to your favorite fork and rear suspension pressure settings
- Compact design allows for easy on-trail storage in hydration packs
- Fits Schraeder air valve on most front and rear shocks
- Includes Presta valve converter
- Rated to 220 PSI

# BOTTLES CAGES

**OPEN THE FLOODGATES** You might mistake it for a torrential downpour, but when it comes to getting hydrated on the bike, there's nothing bigger or better than our super wide, tight-sealing, 24-ounce Mega Mouth water bottle.

### VIRTUE AERO BOTTLE AND CAGE

The world's fastest bike...made faster by the world's fastest water bottle.

- New for 2008
- Designed to mate seamlessly with our 2008 Carbon Transition bike for the most aerodynamic ride possible
- Works with a variety of TT and standard frames
- Lightweight design works as a fairing between BB, down tube and seat tube

### MEGA MOUTH

Newly designed water bottle makes handling a breeze and drinking second nature.

- New for 2008
- Internal threads and gasket offer the best sealing bottle on the market
- Rubber over-molded cap provides better grip for opening, closing and on-bike use
- 24 oz.
- Quick measure reference molded into the body

### LITTLE MEGA MOUTH

Newly designed water bottle makes handling a breeze and drinking second nature.

- New for 2008
- Internal threads and gasket offer the best sealing bottle on the market
- Rubber over-molded cap provides better grip for opening, closing and on-bike use
- 21 oz.
- Quick measure reference molded into the body

### BIG MOUTH

Our best selling bottle with its customary great shape, 24-ounce capacity and absolutely leak-proof design.

- Wide mouth screw top is big enough for ice cubes and seals tight
- Large, soft poppet is easy on teeth, delivers excellent flow and seals tight
- Easy-to-handle, non-slip shape
- FDA-approved LDPE (low density polyethylene) construction for more flexibility and durability
- New cap with 200% more flow

### LITTLE BIG MOUTH

All the features of our Big Mouth bottle in a smaller 21-ounce size.

- Wide mouth screw top is big enough for ice cubes and seals tight
- Large, soft poppet is easy on teeth, delivers excellent flow and seals tight
- Smaller 21 oz. capacity fits perfectly on full suspension frames or in a jersey or fanny pack
- FDA-approved LDPE (low density polyethylene) construction for more flexibility and durability
- New cap with 200% more flow

### S-WORKS RIB CAGE CARBON

100% carbon fiber makes this our lightest weight cage—at only 23 grams.

- FACT carbon construction for a perfect fusion of strength and light weight
- Secure bottle retention, yet easy in-and-out
- Max versatility: compatible with all derailleur mounts / clamps
- Minimalist, sleek design with razor-sharp graphics
- Available in Women's blue color

### RIB CAGE

Lightweight, race-ready cage for road or dirt.

- Ideal for road or mountain bikes
- Super strong composite material that won't corrode or scratch bottles

### CASCADE CAGE

Composite cage technology at an affordable price.

- Holds short or tall bottles
- Convenient and easy in and out

### RIB CAGE MTB/RIB CAGE PRO

Redesigned to compliment our bike aesthetic, while still offering light weight and better bottle security.

- New for 2008
- Made of new material to improve durability without adding weight
- Secure bottle retention, yet easy in-and-out
- Max versatility: compatible with all derailleur mounts / clamps
- Only 37g (Rib Cage Pro and MTB)
- MTB and Pro cage available in Women's pink color

### E-CAGE 6.2/5.0

The ultimate in aluminum bottle cage design.

- 5.0 or 6.2 mm diameters suitable for road or mountain respectively
- Lighter than a standard alloy cage
- Flat front section holds the bottle securely
- Embossed Specialized logo "S" cutout

### ALLOY CAGE 6.2/5.0

A tough, durable and affordable bottle cage.

- Road and mountain versions
- Proven design over 15 years

# BAGS MULTI-TOOLS

**YOU PACKED THAT BAG FOR A REASON** Specialized bags keep your stuff right where you need it, ready when you need it.

## MESSENGER BAG

Our take on the traditional messenger bag.

- 1680D x 1260D nylon fabric-coated for water resistance
- Adjustable padded shoulder strap and waist strap
- External zipper pocket on flap and internal pockets with a key holder
- Side and compression straps
- Removable cell phone pouch on shoulder strap
- Reflective taping on flap cover
- Print and aluminum logos
- Dimensions: 19" x 11" x 7" / Volume: 2240 in<sup>3</sup>.

## TEAM BAG PRO

Fill it up! The Team Pro Bag can hold all your gear and more.

- Durable nylon fabrics-coated for water resistance
- Stiffened bottom with sliding wheel rails
- Inline skate-type wheels are smooth and durable
- Telescoping handle allows bag to be pulled at arms length and stored quickly
- 3 internal compartments and 4 external pockets
- Detachable padded shoulder strap
- Dirty clothes and dirty shoes stuff bag.
- Dimensions: 14" x 14" x 34" / Volume: 8925 in<sup>3</sup>.

## BRIEFCASE

Designed for easy organization amidst the daily office grind, this convenient briefcase holds and protects everything needed to keep business moving in a compact over-the-shoulder package.

- 840D nylon-coated for water resistance
- Padded shoulder strap is adjustable
- Internal laptop sleeve with Velcro closure
- Two "under the flap" zippered compartments for storage
- Briefcase has zippered expansion panel to provide increased volume
- Removable cell phone case on the shoulder strap

## TEAM BAG COMP

Full sized equipment bag for weekend trips with features to fit all your cycling gear.

- Durable nylon fabrics-coated for water resistance
- Metal hardware
- 3 compartments including a convertible main compartment for greater stowage flexibility
- Detachable padded shoulder strap
- Dirty clothes stuff bag
- Dimensions: 12" x 14" x 28" / Volume: 4988 in<sup>3</sup>.

## TEAM BAG SPORT

A great carry-on sized equipment bag for overnight or day use.

- Durable nylon fabrics-coated for water resistance
- Metal hardware
- Internal and external mesh pockets
- Detachable padded shoulder strap
- Dimensions: 9" x 14" x 22" (carry-on dimension requirements) / Volume: 2772 in<sup>3</sup>.

## DIRT BAG

The Dirt Bag has two separate compartments to keep your essentials organized. The expansion panel lets you carry all you need for a full day of riding.

- 840D nylon-coated for water resistance
- Smaller top compartment holds tube and tools to prevent rattling
- Lower compartment to store extra items for easy access
- Lower compartment also expands for even more storage
- Water-resistant zipper repels water and grit
- Internal Neoprene sleeve to hold tools and protect tubes
- Narrow profile to reduce risk of chafing
- Embroidered logo
- Volume: 128 cu. in., 181 cu. in.

## EMT RACE MULTI TOOL

All the race tools you'll need, and all at race weight, saves 20 grams. Chain tool fits 10 speed.

- Ti bolts/Magnesium side plates
- 3/4/5/6/8 Allen
- T25 Torx/#1 Phillips
- Chain breaker
- Protective pouch included

## EMT COMP MULTI TOOL

Everything you need, nothing you don't: if you need it on the trail, it's in this pouch.

- Exclusive Disc pad separator and shims
- 2/2.5 (angled)/3/4/5/6/8 Allen and 6/8/9/10 Box wrenches
- T25 Torx / #1 Phillips / 4.5mm flat blade / Teflon<sup>®</sup> coated tire lever
- Easy-to-use chain breaker/bottle opener
- Protective pouch included
- Only 8.5cm long; only 210 grams

## WEDGIE

Our most popular seat bag has been redesigned for a narrower profile and an expansion feature to carry the essentials.

- 840D nylon-coated for water resistance
- Lower zipper expands the bag for extra storage
- Water-resistant zipper repels water and grit
- Internal Neoprene sleeve to hold tools and protect tubes
- Narrow profile to reduce risk of chafing
- Embroidered logo
- Volume: 98 cu. in., 119 cu. in.

## EMT MINI MULTI TOOL

All the tools you'll be glad you brought, including a chain breaker. Chain tool works on 10 speed.

- 3/4/5/6/8 Allen
- T25 Torx / #1 Phillips
- Chain breaker
- Protective pouch included
- Only 6cm long
- Under 150 grams

## EMT SPORT MULTI TOOL

All the basic tools in a convenient size.

- 2/3/4/5/6/8 Allen
- 4.5mm flat blade and #1 Phillips screwdrivers
- Slimmed-down protective pouch included
- Under 125 grams
- 8.5cm long

## MINI-WEDGIE

The Mini Wedgie has changed shape slightly to add a bit more volume without increasing its profile significantly. Its minimal design can accommodate two tubes and other essentials.

- 840D nylon-coated for water resistance
- Water-resistant zipper repels water and grit
- Internal Neoprene sleeve to hold tools and protect tubes
- Narrow profile to reduce risk of chafing
- Embroidered logo
- Volume: 48.5 cu. in.

## EMT MICRO MULTI TOOL

Lightest-weight and smallest tool on the market, with all the basics.

- 2.5/3/4/5/6 Allen
- #1 Phillips
- Protective pouch included
- 4.5cm long
- Under 75 grams

## EMT SURVIVAL KIT

The EMT Survival kit is essential for every bike you own.

- Black Mini Wedgie bag
- SK EMT Tool (only offered in this kit): 3,4,5,6, tire lever, and Phillips head screwdriver
- FlatBoy glueless patch kit (6 patches per kit)

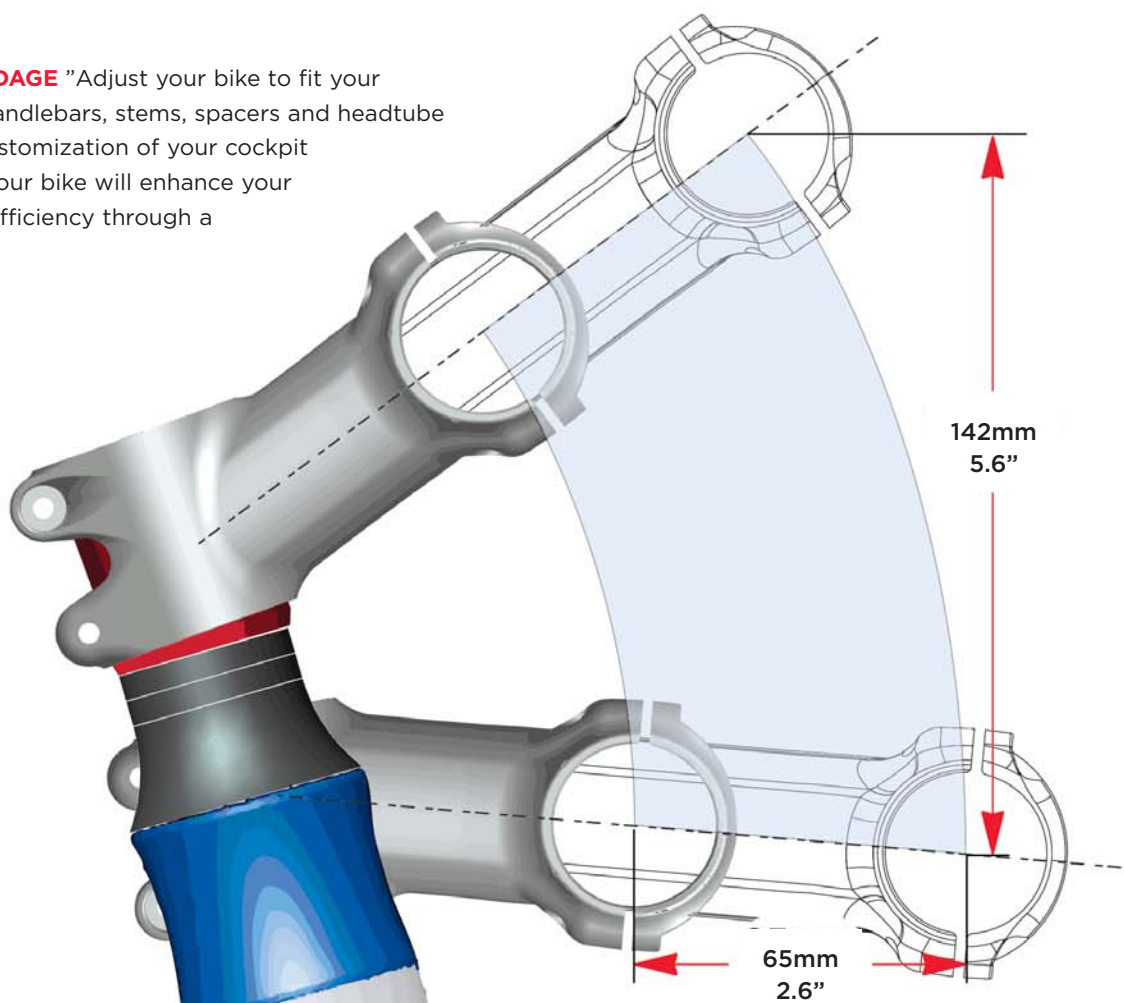

# COCKPIT

## FIT COMPONENTS

**DIALED AND PROFILED** Specialized makes all the components for a custom front-end fit.

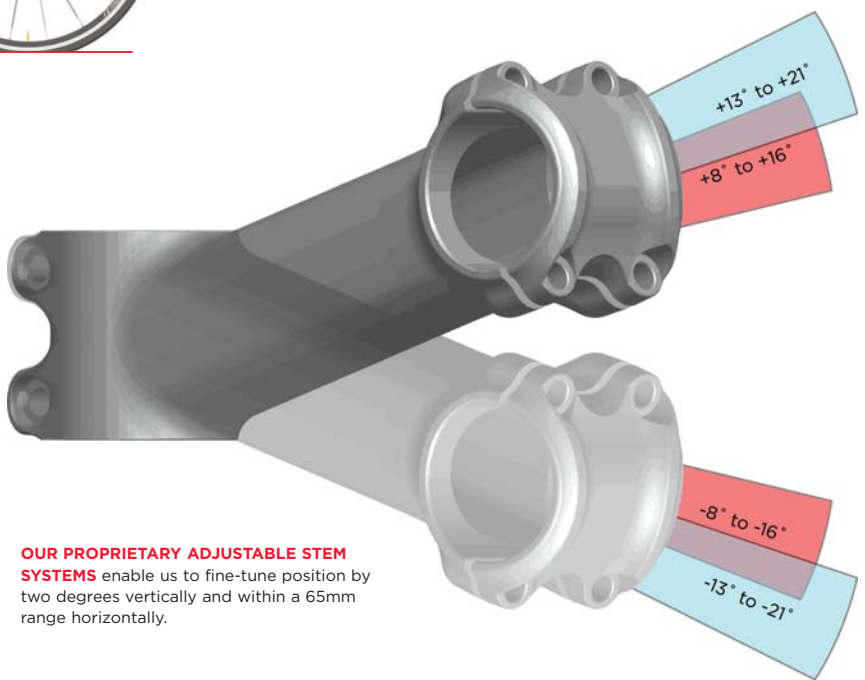

**INSPIRED BY THE BG FIT ADAGE** "Adjust your bike to fit your body," we have developed handlebars, stems, spacers and headtube extenders that allow total customization of your cockpit reach, height and width so your bike will enhance your riding comfort, control and efficiency through a custom tailored position.

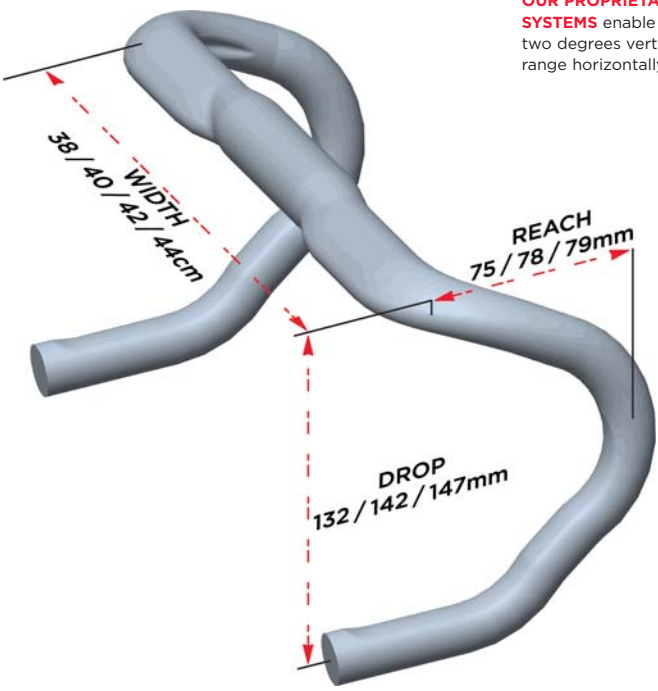

**WHETHER YOU REQUIRE A VERY UPRIGHT POSITION**, or an extremely low one, rest assured that we've got you covered. Between our proprietary headtube extender, headset spacers and lightweight, adjustable stems we can fine-tune any rider's bar height within a whopping 142mm vertical range.

**NO MATTER WHAT POSITION IS BEST FOR YOU**, our stems, bars and spacer systems enable a custom-tuned front-end fit.

**OUR PROPRIETARY ADJUSTABLE STEM SYSTEMS** enable us to fine-tune position by two degrees vertically and within a 65mm range horizontally.

**BY DEVELOPING OUR BARS IN FOUR WIDTHS**, three reaches and three drops (including special configurations specifically for women) we can provide any rider a position that is custom tuned to match their physiology and riding style.

# HANDLEBARS

## ROAD

**THE BODY WILL NOT ADAPT** Your body will not adapt to a poor fitting bike (it will simply scream in pain), but with the world’s leading selection of handlebars and stems, we can make your bike adapt to your body.

SPECIFICATIONS			
	Drop	Reach	Description
A (deep)	147mm	79mm	Ultimate performance with aerodynamic deep drop and adjustable position
A (shallow)	132mm	78mm	Ultimate performance with ergonomic shallow drop and adjustable position
B (mid)	142mm	75mm	Ultimate women's performance road bar with aerodynamic mid drop
C (deep)	147mm	79mm	Excellent performance with aerodynamic deep drop
C (shallow)	132mm	78mm	Excellent performance with ergonomic shallow deep drop
D	147mm	79mm	High performance with aerodynamic deep drop
E (deep)	147mm	79mm	Good performance with aerodynamic deep drop
E (shallow)	132mm	78mm	Good performance with ergonomic shallow drop
F (mid)	142mm	75mm	Ultimate women's road bar with women's-specific ergonomics
G (mid)	142mm	75mm	Excellent women's road bar with women's specific ergonomics
H (shallow)	132mm	75mm	High-performance women's-specific bar with Zertz vibration damping
I (deep)	147mm	79mm	Excellent road bar with ergonomic deep drop and Zertz vibration damping
I (shallow)	132mm	78mm	Excellent road bar with ergonomic shallow drop and Zertz vibration damping

### A. S-WORKS BARMAC™ WEDGE

- 100% composite construction adjustable 1-piece bar/stem system
- 3k SL high modulus FACT advanced composite weave combines high strength and stiffness with excellent comfort
- Adjustable angle alloy internal mechanism offers 8° range (-1°, +1°, +3°, +5°, +7°. Stem is 3° with 0° shim)
- Two-cable groove for Shimano or Campagnolo
- Ergonomic top section perch offers improved fit and comfort
- Superior wrist clearance in drops
- Graduation lines on drops makes balanced lever installation a breeze
- Natural gloss/matte carbon finish
- Weight: 380g (42cm x 110mm)
- Dimensions:
  - Stem: 90/100/110/120/130mm
  - Bar: 40/42/44cm center-to-center

### B. S-WORKS RUBY MAC WEDGE

- 100% composite construction adjustable 1-piece bar/stem system
- 3k SL high modulus FACT advanced composite weave combines high strength and stiffness with excellent comfort
- Adjustable angle alloy internal mechanism offers 8° range (-1°, +1°, +3°, +5°, +7°. Stem is 3° with 0° shim)
- Two-cable groove for Shimano or Campagnolo
- Ergonomic top section perch offers improved fit and comfort
- Top section perch custom tuned for hand size
- Short lever reach drops specifically designed for smaller hands
- Superior wrist clearance in drops
- Graduation lines on drops makes balanced lever installation a breeze
- Natural gloss/matte carbon finish
- Weight: 372g (40cm x 100mm)
- Dimensions:
  - Stem: 75/90/100/110mm
  - Bar: 38/40/42cm center-to-center

### C. S-WORKS SL ADVANCED COMPOSITE HANDLEBAR

- 3k SL high modulus FACT advanced composite weave combines high strength and stiffness with excellent comfort
- Two-cable groove for Shimano or Campagnolo
- Ergonomic top section perch offers improved fit and comfort
- Oversized 31.8mm clamp diameter
- Superior wrist clearance in drops
- Graduation lines on drops makes balanced lever installation a breeze
- Natural gloss/matte carbon finish
- Weight: 230g (42cm)
- Available in widths: 40/42/44cm center-to-center

### F. RUBY SL ADVANCED COMPOSITE ROAD HANDLEBAR

- 3k SL high modulus FACT advanced composite weave combines high strength and stiffness with excellent comfort
- Two-cable groove for Shimano or Campagnolo
- Ergonomic top section perch offers improved fit and comfort
- Top section perch custom tuned for hand size
- Oversized 31.8mm clamp diameter
- Short lever reach drops specifically designed for smaller hands
- Superior wrist clearance in drops
- Graduation lines on drops makes balanced lever installation a breeze
- Natural gloss/matte carbon finish
- Weight: 220g (42cm)
- Available in widths: 38/40/42cm center-to-center

### D. S-WORKS ADVANCED COMPOSITE HANDLEBAR

- Full FACT 3K weave advanced composite design
- Ergonomic shape for superior comfort
- Excellent stiffness and strength
- Oversized 31.8mm clamp diameter
- Graduation lines on drops makes balanced lever installation a breeze
- Natural matte carbon finish
- Weight: 250g (42cm)
- Available in widths: 42/44cm center-to-center

### G. WOMEN'S ROAD HANDLEBAR

- 6066 alloy
- Short lever reach drops specifically designed for smaller hands
- 26.0mm clamp diameter
- Shot-peened matte black finish
- Weight: 260g (40cm)
- Available in widths: 38/40/42cm center-to-center

### I. ROUBAIX ERGO ALLOY HANDLEBAR WITH ZERTZ

- 2014 alloy butted, lightweight, high strength design
- Ergo shaping provides larger, more comfortable surface area on perches
- Zertz viscoelastic vibration-damping oversized 31.8mm clamp section
- Weight: 320g (40cm)
- Available in widths: 40/42/44cm center-to-center

### E. PRO ROAD ERGO HANDLEBAR

- 7050 alloy butted, lightweight, high strength design
- Ergo shaping provides larger, more comfortable surface area on perches
- Oversized 31.8mm clamp diameter
- Weight: 246g (40cm)
- Available in widths: 40/42/44cm center-to-center

### H. DOLCE ERGO ALLOY HANDLEBAR WITH ZERTZ

- 2014 alloy butted, lightweight, high strength design
- Ergo shaping provides larger, more comfortable surface area on perches
- Short lever reach drops specifically designed for smaller hands
- Zertz viscoelastic vibration-damping oversized 31.8mm clamp section
- Weight: 320g (40cm)
- Available in widths: 38/40/42cm center-to-center

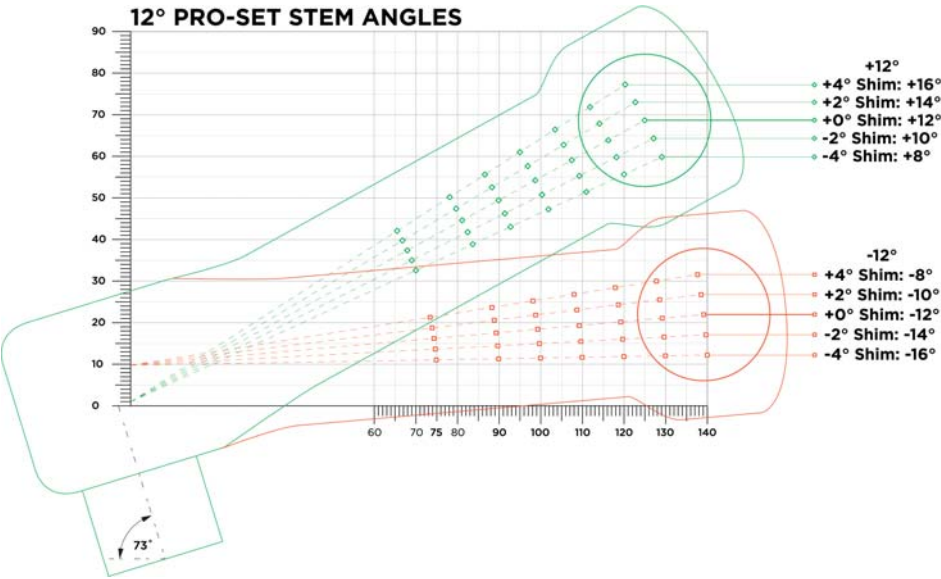

### TRANSITION AERO HANDLEBAR WITH ZERTZ

- 6061 aluminum alloy with Zertz viscoelastic vibration damping clamp section
- 31.8mm oversized clamp diameter
- Flattened perch section with 4° downtip offers room for hands under armrest pads
- Groove under perch allows for clean cable routing and bar tape wrapping
- Shot-peened matte black finish
- Weight: 340g (42cm)
- Available in widths: 40/42/44cm center-to-center

# COMPONENTS ROAD

**FIT FACILITATORS** Our wide range of stems, posts and other hardware will help you fine-tune the fit of your rig for all day comfort.

### SPECIALIZED PRO-SET STEM

- 3D-forged and CNC-machined 7050 alloy stem
- Road / MTB compatible design
- 4-bolt oversized 31.8mm handlebar interface with relieved faceplate
- Equipped with alloy top cap and 4°, 2°, 0° CNC alloy shims
- Available in 12° and 17° angles
- 12°: 10 position angle range, +/- 8° to 16°, in 2° increments
- 17°: 10 position angle range, +/- 13° to 21°, in 2° increments
- Compatible with composite handlebars
- 1 1/8" steerer tube diameter
- Shot-peened matte black finish with silver face plate
- Available in 7 sizes
- Weight: 160g (110mm)

### SPECIALIZED COMP-SET STEM

- 3D-forged and CNC-machined 6061 alloy
- Road / MTB compatible design
- 4-bolt oversized 31.8mm handlebar interface with relieved faceplate
- Equipped with alloy top cap and 4°, 2°, 0° CNC alloy shims
- Available in 12° and 24° angles
- 12°: 10 position angle range, +/- 8° to 16°, in 2° increments
- 24°: 5 position angle range, + 20° to 28°, in 2° increments
- Compatible with composite handlebars
- Available in 12 sizes
- Weight: 172g (110mm)

### S-WORKS PRO-SET STEM

- 3D-forged and CNC-machined 7050 alloy stem
- Road / MTB compatible design
- Carbon/alloy faceplate, 4-bolt oversized 31.8mm
- Titanium stem bolts
- Equipped with carbon top cap and 4°, 2°, 0° CNC alloy shims
- Available in 12° and 17° angles
- 12°: 10 position angle range, +/- 8° to 16°, in 2° increments
- 17°: 10 position angle range, +/- 13° to 21°, in 2° increments
- Compatible with composite handlebars
- 1 1/8" steerer tube diameter
- Shot-peened matte charcoal finish
- Available in 7 sizes
- Weight: 150g (110mm)

### SPECIALIZED TEAM FLIP FLOP STEM

- 2014 aluminum alloy
- Integrated, relieved steerer tube sleeve offers 4 positions (-8°, -16°, +8°, +16°)
- 26.0mm handlebar clamp diameter
- 1 1/8" steerer tube diameter
- Shot peened matte black finish with gloss black face plate
- Gloss black asymmetric top cap
- Weight: 175g (110mm)

### SPECIALIZED TOP MOUNT BRAKE LEVERS

- Relieved lever design with sculpted surfaces for comfortable two-finger braking from the bar tops
- Offers multi-position braking options
- Quick installation clamp system
- No interference with hand positions
- Matte black finish
- Weight: 80g / pair
- Available sizes:
  - 23.8mm (standard road bar)
  - 31.8mm (oversized road bar)

### HEADSET EXTENDER

- Extends head tube to raise stem 40mm
- Available for:
  - Specialized Mindset press-in headsets (46mm)
  - Specialized Mindset (Campagnolo Standard) headsets (48mm)

### TRANSITION ADVANCED COMPOSITE SEAT POST

- 3k SL high modulus FACT advanced composite weave combines high strength and stiffness with excellent comfort
- Aluminum micro adjust dual bolt head assembly
- Integrated vibration-damping Zertz Viscoelastic polymer insert
- 27.2mm aero diameter (specific to Specialized Transition aero seat tube frames)
- 350mm length
- Natural matte carbon finish
- Weight: 210g

### SPECIALIZED SLIM SHIMS

- Specifically designed for Shimano STI brake levers
- 2005-9001: Fits Ultegra (ST-6500/6501/6510) 9-speed levers. 20mm reach adjustment
- Fits 105 (ST-5500/5501/5510) 9-speed levers. 20mm reach adjustment
- 2126-0100: Fits Ultegra (ST-6600/6603) 10-speed levers. 15mm reach adjustment.
- Fits 105 (ST-5600) 10-speed levers. 15mm reach adjustment
- 2126-0110: Fits Dura-Ace (ST-7800) 10-speed levers only. 15mm reach adjustment
- 2126-0115: Fits Dura-Ace (ST-7801/7803) 10-speed levers only. 15mm reach adjustment

### S-WORKS PAVÉ SL ADVANCED COMPOSITE SEAT POST

- 3k SL high modulus FACT advanced composite weave combines high strength and stiffness with excellent comfort
- Aluminum micro-adjust single bolt cylinder head assembly
- Integrated vibration-damping Zertz viscoelastic polymer insert
- Available in 0 and 21mm offsets
- 21mm offset: 250/350mm length options
- 0mm offset: 350mm length option
- 27.2mm diameter
- Natural gloss/matte carbon finish
- Weight: 250mm - 180g, 350mm - 200g

### CARBON HEADSET CONE

- Cleans up the appearance of the shim stack between the stem and the headset
- Available sizes for Specialized Mindset press-in headsets (46mm):
  - 20mm / 30mm / 40mm
- Available sizes for Specialized Mindset (Campagnolo Standard) headsets (48mm):
  - 8mm / 20mm / 30mm / 40mm

### PAVÉ PRO ADVANCED COMPOSITE SEAT POST

- 3k FACT advanced composite weave combines high strength and stiffness with excellent comfort
- Aluminum micro adjust single bolt cylinder head assembly
- Integrated vibration-damping Zertz Viscoelastic polymer insert
- 27.2mm diameter
- 350mm length options
- Natural gloss carbon finish
- Weight: 220g

### SPECIALIZED FUTURE SHOCK SUSPENSION SEAT POST

- Adjustable elastomer suspension design with 40mm travel
- Aluminum construction
- Dual bolt adjustable head
- 27.2mm diameter
- Black anodized finish
- Weight: 385g

# COMPONENTS ROAD

**PROPRIETARY PIECES** Our focus on integrating all critical systems of our bikes has resulted in the FACT carbon crank and bottom bracket. At 623 grams, it's the lightest and stiffest integrated crank system on the market.

**S-WORKS CRANKSET**

- Best strength-to-weight crank on the market
- Second generation hollow carbon crank arms offer superior stiffness
- Oversized alloy spindle with Hirth coupling interface
- Self adjusting oversized 42mm cartridge bearings
- Fits Specialized frames with oversized bottom bracket shell
- Fast and smooth shifting S-Works chainrings, available in standard 130mm or compact 110mm
- Standard and compact compatible spiders and rings available separately
- Available in 5 lengths: 167.5 / 170 / 172.5 / 175 / 177.5mm
- Natural gloss carbon finish
- Weight with compact rings - 623g (172.5mm crank including all hardware)
- Weight with standard rings - 635g (172.5mm crank including all hardware)

**S-WORKS CHAINRING SET**

- 7075 T6 aluminum alloy rings
- O8 S-Works rings feature 3-19 Ni-Boron coating:
  - Reduces wear
  - Slick surface improves shifting performance
- O8 S-Works rings feature increased stiffness
- CNC-machined profile and pick-up ramps
- Riveted stainless steel shift pins
- Aluminum chainring bolts
- Available sizes:
  - Standard: 130mm x 53t/39t
  - Compact: 110mm x 50t/34t
  - Compact: 110mm x 48t/34t
- O8 rings: Weight 142g (compact 110 set with bolts)
- O8 rings: Weight 149g (standard 130 set with bolts)
- O7 rings: Weight 135g (compact 110 set with bolts)
- O7 rings: Weight 130g (standard 130 set with bolts)

**S-WORKS CRANK SPIDER**

- Available in standard 130mm and compact 110mm

**TRICROSS RACK SET**

- Alloy front and rear rack system
- Fits Specialized TriCross frames and other frames with cantilever front brakes and rack eyelets
- 1 x alloy standard-fit rear rack for panniers
- 1 x front fork rack holds a six-pack of your beverage of choice
- Integrated bottle opener
- Black anodized, textured rack with laser-etched logo

**SPECIALIZED SEAT COLLAR**

- Alloy collars feature angled slots
- Available sizes:
  - S-Works 32.6mm extended collar (27mm tall at front) fits:**
    - 2008 S-Works Tarmac SL2 / Tarmac Pro
    - 2007 S-Works Tarmac SL
    - 2007 Tarmac Pro
    - 2007/2008 S-Works Roubaix
    - 2007/2008 Roubaix Pro
    - 2007/2008 Roubaix Expert
  - S-Works 30.7mm extended collar (27mm tall at front) fits:**
    - 2006 S-Works Tarmac SL
  - S-Works 32.6mm standard collar (14mm tall) fits:**
    - 2006-2008 Roubaix (all models)
    - 2006-2008 Ruby (all models)
- Specialized 31.8mm standard collar (14mm tall)**

**TRANSITION SEAT COLLAR**

- Designed specifically to fit Specialized Aero seat tube frame models
- Available for Specialized Aero posts or 27.2mm round posts

**S-WORKS CARBON CRANK TOOL KIT**

- Works on all Specialized frames using an oversized bottom bracket
- Works on Specialized S-Works carbon cranks
- Tool kit includes:
  - Bearing puller tool set
  - Spider lockring tool
  - Extended 6mm socket tool
  - Headset press tool available to press BB bearings (9895-3045)

# COMPONENTS OFF-ROAD

**CONTROL CENTER** Developed from the ground up by our designers, engineers and suspension gurus, the Futureshock E150 fork and other control center components will boost your skills.

**ridersclub** [www.specializedriders.com](http://www.specializedriders.com)

**Name:** Flagstaff Women Active Community  
**Profile:** Started by Andrea Devrome and Danielle Lapre after moving to Flagstaff about a year ago, the Women Active Community has about 100 female riders that take part in regular road, mountain, cyclo-cross and running outings. Their goal is to form a full-fledged female club in the Flagstaff area. Go to the riders club site and drop them a note if you're in their neighborhood.

### S-WORKS E150 DUAL CROWN FORK

- E150 integrated fork system offers a greater stiffness-to-weight ratio through:
  - Forged and CNC-machined aluminum dual-crown system with integrated crown/stem
  - CNC-machined magnesium sliders with 25mm thru-axle
- Axle system offers a positive rotor/caliper alignment and a self-centering non-drive side fork leg to reduce stanchion/bushing friction without compromising fork stiffness
- Hard anodized and super polished 7050 aluminum stanchion tubes increase stiffness and reduce friction
- High quality hard anodized, laser etched aluminum knobs
- Adjustable travel from 110-150mm with lightweight air cartridge
- Low speed compression adjustment adapts to trail and terrain conditions to increase traction and bump performance
- Rebound bleed system blends with shim-controlled rebound circuit to tune for different spring rates
- Rebound circuit features a return speed sensitive system which senses return speed/travel to optimize tire contact and ride performance
- Externally tunable damper cartridge features an internal floating piston that separates air and oil to increase performance consistency
- Spike Valve damper optimizes bump performance
- Sliders feature steel threaded inserts for long thread life and easy replacement
- Internally threaded aluminum steerer tube with custom cap/bolt eliminates star nut
- Available in medium and large lengths with 100mm stems
- Additional stems available in 60/80/100mm lengths
- Weight: 2600g (5.72 lbs), includes crown/stem, top cap, axle and bumpers

### S-WORKS E-150 AND E-150 CROWN/STEM

- High strength-to-weight ratio, stiffer and lighter than traditional stems
- Forged and CNC-machined 7075 aluminum
- Additional machining reduces weight 40g
- 4-bolt relieved faceplate, oversized 31.8mm handlebar clamp
- Stems available in 60/80/100mm lengths
- S-Works E150 stem weight: 290g (80mm)
- E150 stem weight: 330g (80mm)

### E150 25MM ENDURO HUB

- Oversized 25mm axle system is stronger and stiffer
- 32-hole
- Sealed precision cartridge bearings
- Available in black or red
- Weight: 200g

### S-WORKS CARBON FIBER XC FLAT BAR

- XC-oriented flat position is ideal for XC bikes
- Superior strength of FACT 3K advanced composite weave
- Oversized 31.8mm stem clamp interface
- 600mm width
- 5° sweep
- Natural carbon finish
- Weight: 150g
- Lightweight machined expander plugs for bar ends included (22g / pair)

### S-WORKS CARBON FIBER XC RISE BAR

- Low-rise (1") position ideal for short-travel XC and Enduro bikes
- Superior strength of FACT 3K advanced composite weave
- Oversized 31.8mm stem clamp interface
- 640mm width
- 6° upsweep
- 8° backsweep
- Natural carbon finish
- Weight: 175g

### XC ALLOY FLAT BAR

- XC-oriented flat position ideal for hardtail and short-travel XC bikes
- 2014 butted aluminum alloy
- Oversized 31.8mm stem clamp interface
- 600mm width
- 6° backsweep
- Matte black anodized finish
- Weight: 149g

### XC ALLOY LOW-RISE BAR

- XC-oriented mid rise (1.0") position ideal for short-travel XC and Enduro bikes
- 2014 butted aluminum alloy
- Oversized 31.8mm stem clamp interface
- 640mm width
- 6° upsweep
- 8° backsweep
- Matte black anodized finish
- Weight: 208g

### ENDURO ALLOY MID-RISE BAR

- Enduro-oriented mid-rise (1.5") position ideal for Enduro and long-travel all-mountain bikes
- 2014 butted aluminum alloy
- Oversized 31.8mm stem clamp interface
- 660mm width
- 6° upsweep
- 9° backsweep
- Matte black anodized finish
- Weight: 230g

### DEMO ALLOY MID-RISE BAR

- Downhill-oriented mid-rise (1.5") position ideal for long-travel all-mountain and downhill bikes
- 6066 butted aluminum alloy
- Oversized 31.8mm stem clamp interface
- 680mm width
- 6° upsweep
- 9° backsweep
- Matte black anodized finish
- Weight: 311g

C1 CARBON OVERENDZ BAR ENDS

- 3k FACT advanced composite extensions
- 6061 aluminum alloy clamp interface
- Perpendicular clamp design maximizes clamping force and minimizes pressure points on handlebars
- Weight: 115g
- NOTE: Specialized CNC Alloy Bar End Plugs (2115-1030) are required with carbon bars.

P1 OVERENDZ BAR ENDS

- Injection molded nylon composite construction with soft rubber grip surface
- 6061 aluminum alloy clamp interface
- Perpendicular clamp design maximizes clamping force and minimizes pressure points on the handlebars
- Weight: 135g
- NOTE: Specialized CNC Alloy Bar End Plugs (2115-1030) are required with carbon bars

PRO-SET 31.8MM MTN STEM

- 3D-forged and CNC-machined 6061 alloy
- 4-bolt oversized 31.8mm handlebar interface with relieved faceplate
- 12° stem, equipped with alloy top cap & 4°, 2°, 0° CNC alloy shims
- 10 position angle range, +/- 8° to 16°, in 2° increments
- Available in 5 lengths: 60/75/90/105/120mm
- Compatible with composite handlebars
- Gloss black / pewter finish
- Weight 170g (90mm)

DIRT RODZ BAR ENDS

- Light and strong forged A1 aluminum construction
- Flush clamp design
- Black or silver finish

S-WORKS CARBON MTN SEATPOST

- 3k SL high modulus FACT advanced composite weave
- Aluminum micro adjust single bolt cylinder head assembly
- 30.9mm diameter
- 350/400mm length options
- Natural matte carbon finish
- Weight: 207g (350mm), 227g (400mm)

PRO ALLOY MTN SEATPOST

- 2014 alloy
- Aluminum micro adjust single bolt cylinder head assembly
- 30.9mm diameter
- 350mm length
- Gloss black / pewter finish
- Weight: 275g

COMPONENTS OFF-ROAD

DIRTY DETAILS Your bike's not done until you've got the small details dialed.

SPECIALIZED QR SEAT COLLAR

- 34.9mm inner diameter fits all aluminum Specialized frame designs with 30.9mm posts and 34.9mm O.D. seat tubes
- Low-profile curved lever follows the contours of the seat collar
- Alloy contact surfaces offer a more positive and consistent closure
- Gloss black finish

SPECIALIZED CUSTOM CHAINSTAY PROTECTOR SLEEVE

- Quiets derailleur and chain contact
- Compression-molded 5mm / 2.5mm Neoprene on XC-oriented designs
- 5mm Neoprene on DH and Freeride-oriented designs, 3.5mm on '05 Enduro
- Abrasion-resistant outer covering with stitched edges for durability
- Rubber printing on the inside surface keeps the sleeve in place
- Derailleur housing stop cutouts for a precise fit
- Custom fit gives a more integrated look while protecting your frame
- Black
- Fit specifically to the following models:
  - 9894-2325: 2001-2004 FSRxc
  - 9894-2320: 1999-2006 S-Works HT 1999-2006 Stumpjumper HT
  - 9893-2000: 2002-2005 Enduro FSR (4.5"/5.2") 2003-2004 Enduro SX 2004-2006 Stumpjumper FSR 2005-2008 FSRxc
  - 9893-2100: 2003-2005 S-Works FSR / 2003-2005 Epic FSR

DERAILLEUR GUARD

- Protects the dropout from side impact bending
- Strengthens interface between derailleur and frame
- Fits all bike models using the following derailleur hanger models:
  - 9894-4205
  - 9895-4020

SPECIALIZED UNIVERSAL CHAINSTAY PROTECTOR SLEEVE

- Compression-molded 3mm Neoprene
- Abrasion-resistant outer covering with stitched edges for durability
- Rubber printing on the inside surface keeps the sleeve in place
- Black
- Available in the following sizes:
  - Small: Cro-mo chainstays
  - Medium: Standard aluminum chainstays
  - Large: Oversized aluminum chainstays

MUDFLAP SHOCK PROTECTOR

- Custom fit for frame clearance and precise seatstay bridge fit (disc-only models)
- Shape optimized to keep mud off shock seal
- Stumpjumper and Enduro: Lower tab extends below seatstay bridge to keep lower shock eye clean
- Strong, flexible, and durable design
- Enduro (6") fender fits 2005-2006 Enduro (6") / 2006-2008 SX / SX Trail
- Enduro protector fits 2002-2005 Enduro FSR (4.5" / 5.2") / 2003-2004 Enduro SX models
- Stumpjumper protector fits 2004-2008 Stumpjumper FSR / 2005-2008 FSRxc models

# COMPONENTS BMX

A BROKEN ANKLE SHOULD END YOUR SESSION, NOT  
A BROKEN PEDAL Less time wrenching means more  
time riding.

**LO' PRO MAG 2 PLATFORM PEDALS**

- Low-profile ultralight magnesium pedal body
- New oversized, heat-treated Cro-Mo spindle features improved wrench flats and an 8mm Allen key axle slot
- Concave body for superior grip
- 4-bearing design includes 2 cartridge, 1 needle and 1 bushing
- Adjustable spin resistance with removable O-ring seals
- Replaceable Allen head bolt-style traction pins
- Super durable powder-coat finish
- Weight: 17.5 oz / pair

**FUSE SL JUMPING SADDLE**

- Kevlar rear, sides and nose
- Super light foam
- No-slip mid-section traction panels
- Hollow 9mm Cro-Mo rails for superior strength
- X-Brace bar for increased resistance to lateral bending
- PVC bumpers / handles front and rear to protect the saddle
- Embroidered logos
- Black
- Weight: 12.0 oz

**FUSE GRIP AND BAR END SET**

- GRIP
- Soft 25A durometer Kraton rubber
  - Micro-flange design is perfect for tricks and provides space for shifters
  - 140mm length
- BAR END
- CNC machined
  - Etched "Innovate or Die" logo
  - Fits most Cro-Mo handlebars
  - Recessed flange fits over the end of the handlebar
  - Protects grips and bar from damage

**FUSE 14MM PEG SYSTEM**

- Heat-treated steel pegs
- Three-position anti-roll feature
- Includes CPSC fork adapter
- Fits 14mm axles
- Shiny black finish
- Weight: 14.0 oz
