

BODY GEOMETRY TECHNOLOGY
Equipment scientifically developed and tested to benefit performance and ergonomics.

POWERZONE LACING *Unique adjustable lacing system provides unprecedented fit and comfort.*

BOA ROTARY CLOSURE
Light, secure, and on-the-fly adjustable.

LONGITUDINAL ARCH SUPPORT
Built into outsole for superior power transfer and all-day ride comfort.

OUTSOLE
Built in 1.5mm varus angulation improves pedaling alignment for greater power and endurance.

BG HIGH-PERFORMANCE FOOTBEDS
Customize your fit with three distinct levels of arch and metatarsal support.

BG VARUS / VALGUS SHIMS
Fine tune forefoot angle to optimize biomechanical foot, knee, hip alignment.

FACT CARBON OUTSOLE
Stiff and light. So light, in fact, that it helps make the S-Works shoe the lightest available with a mechanical closure.

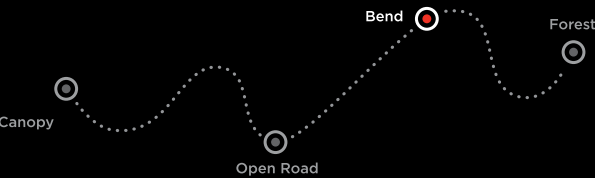

EQUIPMENT

SPECIALIZED ADAPTALITE® AND NXT® TECHNOLOGIES

Specialized Adaptalite photochromic optics let you focus on your ride, not changing lenses. Responding to varying light conditions in mere seconds, our Adaptalite lenses darken with the sun and lighten with the shade, giving you maximum visual clarity without distortion. And since our optics are cycling-specific, your lenses come color optimized for specific terrains.

All of our optics are built out of NXT®, a special polymer formula originally developed to bullet-proof the windshields of Apache helicopters. With that kind of strength, plus optical superiority, light weight and scratch/static resistance, NXT is the closest a lens will come to optical immortality. Polycarbonate simply doesn't measure up.

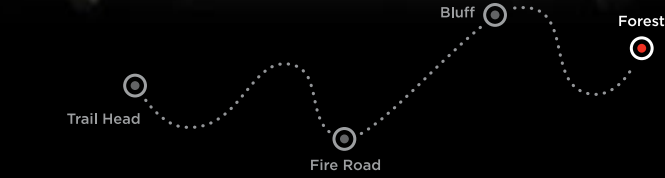

ROAD

Brake lights and stop lights work best when you can see them. Our road (red tint) lenses optimize red-spectrum color contrast, so you'll see potential hazards quicker and more clearly for improved safety and awareness.

12% 39%

MOUNTAIN

Our MTB (amber tint) lenses selectively filter wavelengths to enhance contrast and sharpness of vision in mixed light conditions. So it's easier to see unexpected changes in the terrain and trail.

22% 78%

ARCTERRA & ARCTERRA (SMALL)

This off-road specific, hingeless and ultra minimalist racing lens gives Specialized athletes like Liam Killeen all the coverage and performance they need for their next world cup.

- Lightweight design uses a stainless steel, non-folding frame with a shield-style lens
- Exclusive Specialized Adaptalite lens (mountain formula) adjusts to existing light conditions
- Updated MTB formula lens starts lighter and shifts faster
- NXT lens material is more shatterproof and lightweight than polycarbonate
- Frontal bridge provides rigidity and sweat management
- Adaptalite version provides 78%-22% light transmission range

Photochromic

DIVIDE™

The Divide is aggressively styled for riders who rip when others brake—packed with serious off-road performance, high coverage against debris and a truly customizable fit.

- Exclusive Specialized Adaptalite lens (mountain formula) adjusts to existing light conditions
- NXT lens material is superior in its light weight and shatterproof qualities
- Lens and frame are designed to allow venting for fog reduction
- Molded Grilimid frame is light and durable
- Adjustable, dual density ear pieces allow for customized fit and comfort
- Adaptalite version provides 78%-22% light transmission range
- Non-Adaptalite NXT version is fixed at 22% light transmission (dark state)

Photochromic

Non-Photochromic

BERM™

Its low profile, comfort and casual styling make the Berm your favorite all-around shade. Full performance potential on the bike, head-turning good looks off the bike, and arguably as attractive on a male as a female.

- NXT lens material is superior in its light weight and shatterproof qualities
- Lens and frame are designed to allow venting for fog reduction
- Molded Grilimid frame is light and durable
- Molded Megol nosepiece and ear tabs hold comfortably
- Fixed at 22% light transmission (dark state)

Non-Photochromic

HALF TIME™

The Half Time combines an open frame design with our Adaptalite lens to create a great fitting, performance XC model with light weight and full ventilation.

- Exclusive Specialized Adaptalite lens (mountain formula) adjusts to existing light conditions
- NXT lens material is superior in its light weight and shatterproof qualities
- Frame design is open on the bottom for even more weight savings
- Molded Grilimid frame is light and durable
- Molded Megol nosepiece and ear tabs hold comfortably
- Adaptalite version provides 78%-22% light transmission range
- Non-Adaptalite NXT version is fixed at 22% light transmission (dark state)

Photochromic

Non-Photochromic

OPTICS HARD CASE

The optics hard case protects and safely stores any of our folding eyewear styles.

- Hard case included with all Adaptalite models or as separate item
- Internal foam piece holds the glasses in position
- Zippered closure provides a secure environment for optics storage

ARC™ II & ARC™ II SMALL

A hingeless, weightless and ultra minimalist road racing design with micro air channeling, sweat cushion and super sharp styling.

- Lightweight design uses a stainless steel, non-folding frame
- Exclusive Specialized Adaptalite lens (road formula) adjusts to existing light conditions.
- NXT lens material is more shatterproof and lightweight than polycarbonate
- Front lens vents help to eliminate fogging
- Frontal bridge provides rigidity and sweat management
- Adaptalite version provides 39%-12% light transmission range

Lampro's Damiano Cunego uses our Miura optics to focus on the finish line.

MIURA™

Mixing technical prowess with undeniable "wow" factor, this as-good-as-it-gets road racing shield offers a supremely customizable fit and massive temple venting in a powerful "flying lens" design.

- Exclusive Specialized Adaptalite lens (road formula) adjusts to existing light conditions
- Unique filters in the road formula enhance reds for improved safety
- NXT lens material is superior in its light weight and shatterproof qualities
- Molded Grilimid frames are strong and durable
- Adjustable, dual density ear pieces allow for customized fit and comfort
- Adaptalite version provides 39%-12% light transmission range

URACCO™

Equally at home on the Pro Tour as the Tuesday night training crit, the Uracco speaks to euro-influenced road racers who want a lens with versatility and larger coverage for ultimate performance.

- Exclusive Specialized Adaptalite lens (road formula) adjusts to existing light conditions
- Unique filters in the road formula enhance reds for improved safety
- NXT lens material is superior in its light weight and shatterproof qualities
- Molded Grilimid frames are strong and durable
- Adjustable, dual density ear pieces allow for customized fit and comfort
- Adaptalite version provides 39%-12% light transmission range
- Non-Adaptalite NXT version is fixed at 12% light transmission (dark state)

HELIX

Destined for greatness, the Helix provides the incredible performance of our unique photochromic lenses in a silhouette that cyclists of all types can appreciate.

- Exclusive Specialized Adaptalite lens (road formula) adjusts to existing light conditions
- Unique filters in the road formula enhance reds for improved safety
- NXT lens material is superior in its light weight and shatterproof qualities
- Molded Grilimid frames
- Molded Megol nosepiece and ear tabs hold comfortably
- Adaptalite version provides 39%-12% light transmission range
- Non-Adaptalite NXT version is fixed at 12% light transmission (dark state)

HELIX OPTHALMIC INSERT

When modified with prescription inserts, this piece can be easily installed into our Helix styles to provide all the benefits of Adaptalite technology for those who need optical correction.

- Ophthalmic clip to hold prescription lenses into Helix styles
- Comes with pattern piece lenses for use by optician in creating custom lenses
- Replaces the existing nose piece

STRAFE

This modern, aviator lens borrows its style from the streets, but delivers all the performance and function you'd expect from cycling-specific optics.

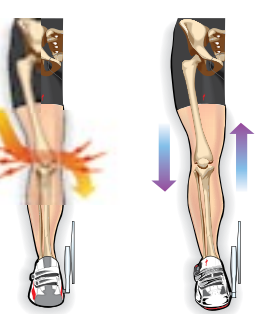

- New for 2009 model year
- Modern aviator styling is classic and enduring
- NXT lens material is superior in its light weight and shatterproof qualities
- Molded Grilimid frames are strong and durable
- Fixed at 12% light transmission (dark state)

GET THE MAXIMUM POTENTIAL OUT OF YOUR POWER TRANSFER. Specialized Body Geometry® shoes and footbeds are built to make the marriage between body and bike more productive, more comfortable and less painful.

We wouldn't have spent countless hours developing our Body Geometry technology with Dr. Andy Pruitt from the Boulder Center for Sports Medicine if we didn't realize the benefits behind a perfect fitting shoe. After all, your feet are your power transfer. Every watt you put into those pedals should move you forward, not waste your energy.

All our BG shoes work to improve pedaling efficiency and prevent injury in three ways.

VARUS WEDGE

The Problem: Since the foot is naturally canted for walking and running (with the big toe higher than the little), that same angulation on a bike can cause rotational movement of the knee/shin/foot and cause the foot to collapse, which not only degrades efficiency, but creates knee pressure and strain.

The Solution: We engineer a Varus Wedge into the outsole of our BG shoes, giving the foot a 1.5mm angle to compensate for its natural tilt. This creates better alignment of the knee over the foot, boosting efficiency and comfort.

Then, there's what you put in the shoes that makes a difference. BG High Performance Footbeds are available in three different levels to help riders fine tune the function of their cycling shoes and achieve a semi-custom fit: + = minimal, ++ = moderate, +++ = significant. Our footbeds are also accompanied by BG shims, which provide further fine-tuning of the rider's forefoot (Varus/ Valgus) angle.

LONGITUDINAL ARCH

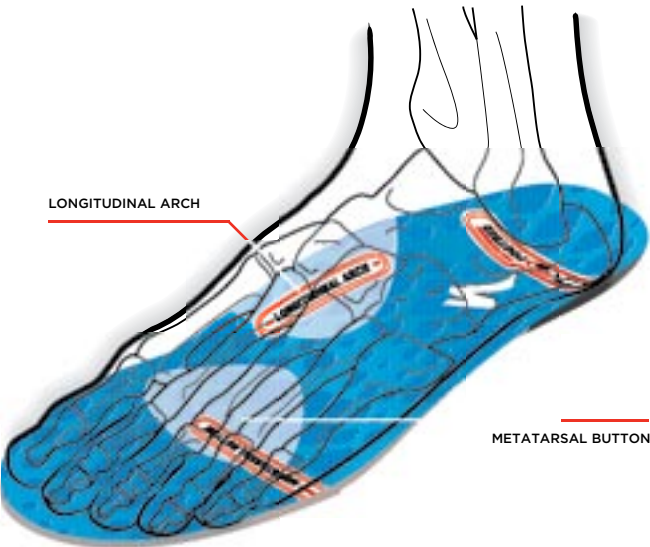

The Problem: Similar to its angulation, the foot's arch is great for absorbing shock when walking or running, thanks to its natural flex. But unless the arch is supported while on a bike, it can hinder pedaling efficiency and rob power on the downstroke.

The Solution: The footbeds and outsoles of our BG shoes are constructed with Longitudinal Arch support, truly making every pedal stroke count in your favor.

METATARSAL BUTTON

The Problem: Cyclists often experience "hot spots" or numbness in the forefoot while riding, due to the fact that a snug shoe can lead to the compression of nerves and arteries in between the metatarsals (long bones of the forefoot).

The Solution: The Metatarsal Button in our BG shoes works against this problem by lifting and separating the metatarsals to eliminate related compression and discomfort.

S-WORKS ROAD

The first choice of our European Pro racers for its high performance and Roubaix-enduring comfort, our feature-packed S-Works Road also takes the podium for being the lightest road shoe with a mechanical closure.

- Lightest production road shoe with a mechanical closure—approximately 250g per pair
- Full BG features in the High Performance BG+ footbed to reduce hotspots and swelling and improve knee/foot alignment
- Lightweight Boa rotary closure for on the fly tune-ability and dynamic fit
- Powerzone lacing option lets rider adjust tightening forces for the top and mid zones of the shoe to provide unprecedented fit and comfort
- Stiff and light full FACT carbon sole—10.0 stiffness index
- Light, tough, water-resistant Micromatrix upper for supple comfort
- 3-bolt cleat pattern fits Shimano SPD-SL, Look, Time and Speedplay

TRIVENT TRIATHLON

When 3x Ironman World Champion Peter Reid described his vision of the ultimate tri shoe, we came back with the full function, temperature-controlled Trivent.

- Patented BG outsole and footbed design is scientifically proven to measurably increase performance in elite riders
- FACT carbon/glass fiber reinforced outsole is directionally rigid for outstanding power transfer—8.5 stiffness index
- The chromed fibers of our FACT carbon outsole act as a heat shield, reflecting road heat for cooler feet, even in the hottest riding conditions
- Ergonomic BG footbed is fully perforated for ventilation and drainage
- 3-bolt cleat patterns fit Shimano SPD-SL, Look, Time and Speedplay

PRO ROAD

The choice of top Pro riders and anyone who wants a featherweight shoe that fits like a glove. Now with a redesigned full carbon sole and supple fitting upper.

- Patented x-link™ closure system is redesigned for secure ankle control and unmatched adjustability
- New low profile and lighter weight M-lock SL buckle for secure closure
- Lightweight FACT full carbon sole uses TorsionBox technology—11.0 stiffness index
- Replaceable heel tread
- Engineered Micromatrix upper is light, durable and supple fitting
- 3-bolt cleat pattern fits Shimano SPD-SL, Look, Time and Speedplay
- Approximate weight 255g per shoe

EXPERT ROAD

This enthusiast road shoe uses Body Geometry contact points and a FACT carbon sole for equal parts performance and comfort.

- Patented BG technology increases comfort and efficiency with Varus Wedge, Metatarsal Button, medial arch support
- Lightweight and stiff FACT carbon/glass fiber sole—8.5 stiffness index
- Double density, performance-tuned Body Geometry insole
- Engineered Micromatrix synthetic leather is extremely supple, durable and lightweight
- 3-bolt cleat pattern fits Shimano SPD-SL, Look and Speedplay pedals

FACT CARBON SOLES, like those on our Pro Road shoe, are as light and stiff as they come, for the ultimate pedaling efficiency. Now with replaceable heel tread.

Davide Millar competes on our S-Works Road shoes at the Giro d'Italia.

COMP ROAD

Similar features to our Pro shoes, at a more affordable price.

- Lightweight and stiff FACT carbon/glass fiber sole—8.5 stiffness index
- New low profile and lighter weight M-lock SL buckle for secure closure
- Performance-enhancing BG features in the outsole and footbed
- Real leather and mesh upper
- 3-bolt cleat pattern fits Shimano SPD-SL, Look, Time and Speedplay

ELITE ROAD

All the performance and fit features of a high-end shoe in a more affordable design.

- Performance-enhancing BG features in the outsole and footbed
- Stiff injection molded and glass reinforced sole with generous vent ports at the front and rear—5.0 stiffness index
- Micro-adjusting M-lock buckle for secure closure
- Supple synthetic upper
- Fits both SPD and 3-bolt cleat systems

SPORT ROAD

The essential performance and fit features of our high-end road shoes in a casual design that's ideal for beginning racers or road enthusiasts.

- BG features in the outsole and footbed
- Glass reinforced nylon sole—5.0 stiffness index
- Real leather and mesh upper
- Fits both SPD and 3-bolt cleat systems

DEFROSTER™ ROAD

When training rides are wet and cold, this waterproof and lightly insulated shoe will keep you warm and dry every time.

- Waterproof and seam-sealed upper with 2-strap Velcro closure locks out moisture
- Toe area uses a light insulating layer for added warmth
- Thermal fleece-lined BG footbed uses a reflective metallic barrier to trap heat around the foot
- Snug fitting collar forms a gusset to lock out moisture
- Compatible with 3-bolt cleat systems

SONOMA

A great fitting multi-purpose comfort shoe with SPD compatibility and a smooth walkable sole.

- Secure 3-strap Velcro closure
- TrailTraction midsole plate is stiff for efficient cycling, but flexible enough for walking
- Real suede leather and vented mesh upper
- Comfort-tuned BG footbed
- SPD-compatible sole with smooth, walkable, rubber tread

S-WORKS MTB

An ultralight and sleek carbon shoe that still packs enough protection for the trail. Performance features include our enhanced Boa rotary closure and Powerzone lacing systems.

- Full BG features in the outsole and footbed reduce hotspots and improve knee/foot alignment
- Lightweight Boa rotary closure for on the fly tune-ability and dynamic fit
- Powerzone lacing option lets the rider adjust tightening forces for the top and mid zones of the shoe to provide unprecedented fit and comfort
- Engineered Micromatrix upper is light, durable and supple fitting, with welded reinforcement in the toe and high wear panels
- Light and stiff FACT carbon midsole runs the full length of the shoe
- Approximate weight 335g per shoe

COMP MTB

The Comp's pro-inspired fit, Body Geometry ergonomics and affordability make it the best performing shoe in its category.

- New low profile and lighter weight M-lock SL buckle for secure closure
- Lightweight nylon sole with sturdy co-molded lugs for off-the-bike traction
- Hard molded toe kick protector
- Engineered Micromatrix upper is light, durable and supple fitting, with welded reinforcement in high wear panels
- 2-bolt SPD-style cleat pattern, compatible with all major MTB pedals

PRO MTB

Completely redesigned and better than ever. Our best fitting high performance XC shoe is race proven by Marathon World Champion Christoph Sauser and the entire Specialized MTB race squad.

- Performance-enhancing BG contours in the outsole and High Performance BG+ Footbed
- Patented x-link™ closure system is redesigned for secure ankle control and unmatched adjustability
- New low profile and lighter weight M-lock SL buckle for secure closure
- Durable thermoplastic rubber outsole for confident traction
- Light and stiff, full-length FACT carbon midsole
- Engineered Micromatrix upper is light, durable and supple fitting, with welded reinforcement in high wear panels

EXPERT MTB

Owens up to the World Cup level performance of our Pro shoes in an ultra-light, three-strap closure.

- Full length FACT carbon midsole is ultra-light and rigid, with a small amount of flex engineered in the toes to reduce heel-lift during hike-a-bike sections
- Durable thermoplastic sole for confident traction
- Engineered Micromatrix upper is light, durable and supple fitting, with welded reinforcement in high wear panels
- Performance-enhancing BG contours in the outsole and BG+ High Performance Footbed
- 2-bolt SPD-style cleat pattern, compatible with all major MTB pedals

TRAIL 110

XC weight and DH durability in a model that's more affordable than the Trail 120.

- Full BG features in the outsole and footbed
- 3/4 cuff ankle for enhanced protection without inhibiting mobility
- Lightweight nylon sole with sturdy co-molded lugs for off-the-bike traction
- Hard molded toe kick protector
- 2-bolt SPD-style cleat pattern, compatible with all major MTB pedals

TAHO MTB

Whether it's a hike or bike day, the Tahoe MTB is comfortable, durable and ready for the trail.

- Rubber sole inspired by an MTB tire tread pattern
- TrailTraction cycling plate is stiff for cycling, but flexible in front for comfort when hiking
- Padded BG insole for ergonomic comfort
- Suede leather upper with breathable mesh panels
- 2-bolt SPD-style cleat pattern, compatible with all major MTB pedals

DEFROSTER MTB

When training rides are wet and cold, this waterproof and lightly insulated shoe will keep you warm and dry every time.

- Waterproof and seam-sealed upper with 2-strap Velcro closure locks out moisture
- Toe area uses a light insulating layer for added warmth
- Thermal fleece-lined BG footbed uses a reflective metallic barrier to trap heat around the foot
- Snug fitting collar forms a gusset to lock out moisture
- Compatible with all major MTB pedals

SPORT MTB

Our classic high performance, yet affordable MTB shoe always ranks high with industry editors for its light weight, durability and ergo enhancements.

- Full BG features in the outsole and footbed reduce hotspots and improve knee/foot alignment
- Secure fitting 3-strap Velcro closure
- Real leather and mesh upper
- 2-bolt SPD-style cleat pattern, compatible with all major MTB pedals

STUMPY TRAINER

Perfect for the victory walk from bike to podium, the Stumpy Trainer is a full-leather, retro-sport shoe with all the added comfort of our BG footbeds.

- Supple full suede and leather upper
- Contoured BG+ footbed, straight out of our race shoes
- Cushioned EVA sole with a gum rubber tread

BG HIGH PERFORMANCE FOOTBED

Medically tested BG footbeds were co-developed with Andy Pruitt, Director of the Boulder Center for Sports Medicine, to enable a semi-custom fit that improves efficiency, increases comfort and reduces potential injury.

- By standing on the Specialized Arch-o-Meter, a rider can determine the optimum level of foot contour:
 - + = minimal (the standard BG footbed contour available in all our shoes)
 - ++ = moderate
 - +++ = significant
- Correct footbed and appropriate amount of BG shims will alter forefoot angle to optimize biomechanical foot/knee/hip alignment (+/- 1.5mm Varus/Valgus wedges included)

World Cup-winning regalia. Christoph Sauser and his Pro Carbon shoes on the podium at the 2008 Andorra Cross Country World Cup.

TAKE A CLOSER LOOK at these standout hub designs to see how our Roval wheels help you move mountains.

Contrôle™ SL - XC Mountain Wheel

A new lightweight addition to the Roval mountain family, the Contrôle SL defies gravity with a super-light front hub and carbon fiber center tube. An oversized axle provides incomparable stiffness for superior handling and confidence on the trails.

The details:

- DT Swiss, Star ratchet freehub mechanism
- Front hub design save weight and increases stiffness
- DoubleDrive front spoking pattern for increased braking stiffness and balanced spoke tension—allows radial

spokes on the non-disc side for more responsive steering

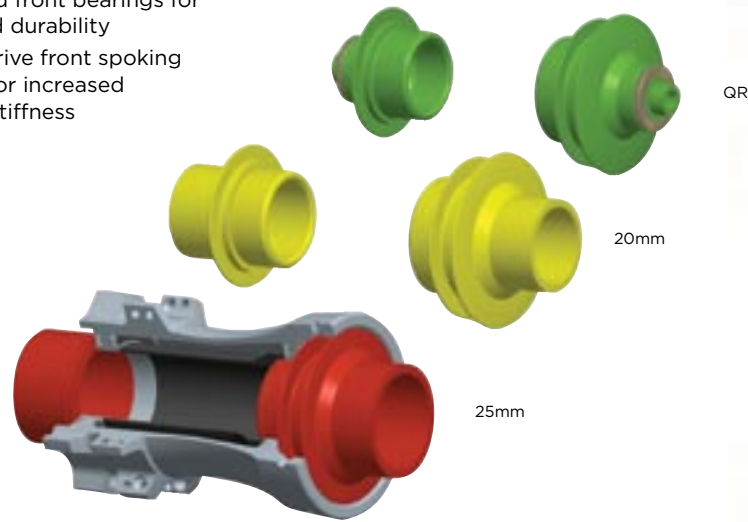

- Straight-pull spoking keeps weight low and stiffness high

Traversée - All Mountain Wheel

Get the most bang for your buck with an All Mountain wheel you can not only ride hard, but use on every bike you own. Traversée wheels come with easily interchangeable 25mm, 20mm and quick-release end caps, so you can ride them with any fork.

The details:

- DT Swiss, Star ratchet freehub mechanism
- Maximum versatility
- Oversized front bearings for increased durability
- DoubleDrive front spoking pattern for increased braking stiffness

ROVAL CONTRÔLE™ SL

Gravity's nemesis on the mountain, the new XC-inclined Roval Contrôle SL is even lighter than our original weight-comes-first Contrôle, but an oversized axle makes it stiff enough for the rough stuff.

- E5 alloy, lightweight disc rim with eyelets; tubeless compatible
- Front hub: carbon fiber center tube, oversized axle
- Rear hub: CNC-machined alloy body, high quality Swiss-made internals, ratchet and cassette
- 24 spoke DoubleDrive front pattern, 28 spoke 3x rear
- DT Aerolite 2.0/0.9x2.3/2.0mm bladed spokes
- Roval titanium quick releases
- Available in black/white
- Wheelset: 1385g

ROVAL CONTRÔLE™

This weight-comes-first, cross-country racing wheel helps you climb to the top of the peak faster, with enough strength to handle rocky, muddy and serpentine terrain year after year.

- E5 alloy, lightweight disc rim with eyelets; tubeless compatible
- Rear hub: CNC-machined alloy body, high quality Swiss-made internals, ratchet and cassette
- 24 spoke DoubleDrive front pattern
- DT revolution 2.0/1.5/2.0mm round spokes
- Roval titanium quick releases
- Available in silver/black or black/black
- Wheelset: 1425g

ROVAL TRAVERSÉE™

For aggressive trail riders that aren't afraid to take risks and go big, this wheel gives you the durability to traverse the whole mountain, while still compensating for light weight.

- E5 alloy, high strength disc rim with eyelets; tubeless compatible
- Front hub: includes quick-change 25mm/20mm/QR axle caps
- Rear hub: CNC-machined alloy body, high quality Swiss-made internals, ratchet and cassette
- 24 spoke DoubleDrive front pattern
- DT super comp 2.0/1.7/1.8mm round spokes
- Available in black/silver
- Wheelset: 1579g

RIDE LIKE QUICKSTEP with your own Team Edition
Roval ALT road racing wheels

The result of an ambitious collaboration with Campagnolo, we've created the ultimate race wheels for the Pro peloton. Combining our proven Roval™ SL hubset with Campagnolo's top end rims, our Roval Team Edition wheels balance best-in-class aerodynamics, light weight and durability. At the start of the 2008 season, Team QuickStep began racing Specialized/Campagnolo wheels exclusively, and now, a limited number of the Roval Team ALT wheel—our best, all-around performance clincher—will be available to consumers like you.

COMPETITIVE ROAD RACING

ROVAL TEAM ALT
Race-proven in the Pro Tour by Team QuickStep, the Team ALT is our best, all-around performance clincher.

- Tubless-capable bead profile
- E5, mid-profile rim (20mm W x 28mm R 24mm F H)
- Front hub: carbon center tube with alloy flanges
- Rear hub: CNC-machined alloy body, high quality Swiss-made internals, ratchet and cassette body
- Bladed, butted spokes; 2.0mm round/2.3mm x 0.9mm, 2.0mm round/2.5mm x 1.2mm on non-drive
- Roval titanium quick releases
- Wheelset: 1500 g

ROVAL FUSÉE STAR™

This wheel provides all the aero advantages and drive efficiency of the Star hub, but with a more traditional, lightweight aluminum rim.

- Aerodynamically superior design yields 50% less frontal area, minimizing wind drag
- E5 alloy, low-profile seamless machined aero rim (21mm W x 24mm H); precision machined braking surface
- Super stiff and strong cold-forged 7075 A1 5-point Star hubs
- Custom DT Aerolite butted spokes; 2.0mm round/2.3 x 0.9mm bladed
- Roval custom self-aligning hidden nipples with nylon threadlock
- Roval titanium quick releases
- Available in black/white
- Wheelset: 1750g

ROVAL ROUBAIX 322X

A Classics-styled, endurance-ready wheel, the Roubaix uses a unique spoke pattern to create incomparable compliance—enough to carry you through eight hours of cobbles and the velodrome sprint—while maintaining exceptionally high drive efficiency.

- E5 alloy, super low-profile seamless machined rim (19mm W x 21mm H)
- Front hub: carbon center tube with alloy flanges
- Rear hub: CNC-machined alloy body, high quality Swiss-made internals, ratchet and cassette body
- 24/30 322X spoke pattern, DoubleDrive rear pattern
- DT Aerolite butted spokes; 2.0mm round/2.3mm x 0.9mm bladed
- Roval custom self-aligning lightweight alloy hidden nipples
- Roval titanium quick releases
- Available in silver/red or black/silver
- Wheelset: 1550g

ROVAL PAVÉ™ SL

Competition-caliber, freeroad wheel designed for the cyclo-cross enthusiast, the Pavé SL is equally at home under the adventure rider or urban commuter.

- E5 alloy, mid-profile seamless aero rim (21mm W x 28mm H); precision machined braking surface
- DT New Aero butted spokes; 2.0mm round/3.0mm x 1.25mm bladed
- Wheelset: 1625g

COMPETITIVE TT / TRIATHLON

ROVAL RAPIDE STAR™ CARBON TUBULAR
Great for solo breakaways, this all-out rocket ship racing wheel is designed to be the lightest and most aero of its kind, with wind-cutting advantages that even the road racer will appreciate.

- Aerodynamically superior Star hub design reduces frontal area by 50%, minimizing wind drag
- 100% FACT composite, DP-48 high-profile tubular rims (21mm W x 48mm H)
- Super stiff and strong cold-forged 7075 A1 5-point Star hubs
- Custom DT Aerolite butted spokes; 2.0mm round/2.3 x 0.9mm bladed
- Roval custom self-aligning hidden nipples with nylon threadlock
- Roval titanium quick releases
- Available in black/red
- Wheelset: 1587g

ROVAL ALPINISTE™ SL CARBON

Built to considerable light weight and drive efficiency, these wheels are ideal for rapid climbing, when gram vs. grade really counts.

- 100% FACT composite LP-24 low-profile tubular rims (21mm W x 24mm H)
- Front hub: carbon center tube with alloy flanges
- Rear hub: CNC-machined alloy body, high quality Swiss-made with light internal ratchet and cassette body
- DT Aerolite butted spokes, 2.0mm round/2.3mm x 0.9mm bladed
- 20/24 spoke pattern, DoubleDrive rear pattern
- Roval custom self-aligning lightweight alloy hidden nipples
- Roval titanium quick releases
- Available in black/white
- Wheelset: 1060g

ROVAL FUSÉE™ SL

The Fusée SL melds our lightest alloy rim with aero features and a unique low-flange hub to create a time-sparing lightweight package with enough durability and efficiency for everyday rides.

- E5 alloy, low-profile seamless machined aero rim (21mm W x 24mm H)
- Front hub: carbon center tube with alloy flanges
- Rear hub: CNC-machined alloy body, high quality Swiss-made internals, ratchet and cassette body
- DT Aerolite butted spokes; 2.0mm round/2.3mm x 0.9mm bladed
- Roval titanium quick releases
- Available in black/red or black/silver
- Wheelset: 1450g

CADEL EVANS (Silence-Lotto) took a crash at 60 km/hour and a yellow jersey the next day! Now if that's not a helmet endorsement, we don't know what is.

TECHNOLOGIES

DUAL DENSITY®

Strong enough to withstand even the highest speed crashes, this patented technology optimizes the density of the expanded polystyrene (EPS) in relation to impact zones, so the helmet (not your head) absorbs the brunt of the force.

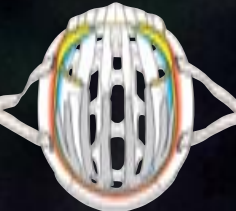

KEVLAR® INNERMATRIX

The skeleton of our helmets is the uni-directional Kevlar fiber internal reinforcement, which holds everything together. This InnerMatrix (with carbon bridges) effectively supports our dual density foam construction, allows wide-open airflow to vents, and since it's bulletproof Kevlar, decreases overall weight without compromising strength.

PRO FIT™ 360 FIT SYSTEM

Our improved Pro Fit™ 360 fit system surrounds the rider's head by 360 degrees, with attachment points that secure directly to the foam. This lightweight and minimalist design allows improved stability and security without the bulk of standard fit systems. Coupled with our patented Mega Mouthport, it provides unsurpassed cooling by keeping the vent free and clear for wind to come pouring through (S-Works Team/S-Works helmets).

MEGA MOUTHPORT™

This wind tunnel tested arrangement is as airy as they come. A massive front vent cools your jets by forcing even the most ruthless headwinds through the front canal, down the in-line vents and out the rear exhaust ports (S-Works/Decibel/Propero helmets).

MTB

S-WORKS TEAM

Gerolsteiner Lampre

Lotto

Milram

USA

World Champ

S-WORKS TEAM / S-WORKS

The lightest CPSC-certified helmet in the world (Size M = 225g), worn by Pro teams like Gerolsteiner, Lampre, Milram and Silence-Lotto. It's all about race weight, maximum ventilation and complete comfort.

- Complies with one or more of the following safety standards for bicycle helmets: CPSC, SNELL B90A, CE and AS/NZS
- Patented Dual Density EPS to maximize weight savings and impact performance
- Patented Kevlar-reinforced InnerMatrix saves weight and allows larger, deeper channeled vents
- Slimmed down Pro Fit 360 retention system is secure and easy to adjust on the fly
- 4th Dimension Cooling System w/Mega Mouthport
- Instrap system minimizes strap length and reduces strap contact for more comfort
- Thin, soft and lightweight 4X DryLite webbing won't stretch with sweat or water
- Patented clip-on matching color visor included

DECIBEL™

This lightweight, competitive road design uses carbon-reinforced linear channels to deliver copious amounts of ventilation for the most intense efforts.

- Complies with one or more of the following safety standards for bicycle helmets: CPSC, SNELL B90A, CE and AS/NZS
- Carbon-reinforced InnerMatrix enables larger, deeper channeled vents
- Pro Fit 2 rear vertical adjust retention system is secure and easy to adjust on the fly
- 4th Dimension Cooling System w/Mega Mouthport
- Instrap system minimizes strap length and reduces strap contact, improving comfort
- Wind tunnel tested for maximum cooling
- Patented clip-on matching color visor included

Swirly

DEVIANT™ CARBON

Our flagship aggro helmet is full-face, full carbon and the lightest in its class (Size M = 868g).

- Complies with one or more of the following safety standards for bicycle helmets: CPSC, SNELL B95, CE and ASTM 1952 (standard for downhill mountain bike racing helmets)
- EPS foam with carbon shell
- Pro Fit 2 rear vertical adjust retention system is secure and easy to adjust on the fly
- Inner mesh net to keep out bugs and debris
- Removable washable liner and cheek pads
- New increased travel adjustable visor

Berrecloth

Skull

DEVIANT™

Twenty-one vents, full face protection and a tough fiberglass shell manage your toughest assaults with ease.

- Complies with one or more of the following safety standards for bicycle helmets: CPSC, SNELL B95, CE and ASTM 1952 (standard for downhill mountain bike racing helmets)
- EPS foam with fiberglass shell
- Pro Fit 2 rear vertical adjust retention system is secure and easy to adjust on the fly
- Removable washable liner and cheek pads
- New increased travel adjustable visor

Satin Charcoal

INSTINCT™

A durable design with more coverage and massive vents makes your next off-road session a no-brainer.

- Complies with one or more of the following safety standards for bicycle helmets: CPSC, SNELL B90A, CE and AS/NZS
- Pro Fit 2 rear vertical adjust retention system is secure and easy to adjust on the fly
- Wind tunnel tested for maximum cooling
- Dual in-molded shell and foam maximizes strength and minimizes weight

Matte Silver

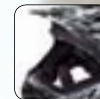

TACTIC

A true MTB original with increased coverage and moto-inspired features like integrated visor and Pro Fit 2 fit retention system.

- Complies with one or more of the following safety standards for bicycle helmets: CPSC, SNELL B90A, CE and AS/NZS
- Extended rear coverage
- Moto-inspired, full size visor with new aFIX visor attachment that securely fixes visor to helmet
- Pro Fit 2 rear vertical adjust retention system is secure and easy to adjust on the fly
- 4th Dimension Cooling System

AIR FORCE® 3 / AIR FORCE® 3 YOUTH

A sensible, all-in-one helmet for parents and kids alike—built with style, adjustable fit, exceptional value and certified protection.

- Complies with one or more of the following safety standards for bicycle helmets: CPSC, SNELL B90A, CE and AS/NZS
- FormFit retention system adjusts to fit most riders
- Wind-channeling vents
- In-molded shell and foam improve strength and reduce weight
- Patented clip-on visor included
- Reflective webbing for extra safety

Green Spiders

SMALL FRY™

Enough fit, fun, comfort and protection for growth spurts, picky kids and demanding parents everywhere.

- Complies with one or more of the following safety standards for bicycle helmets: CPSC, SNELL B90C (toddler) and B90 A (child), CE and AS/NZS
- FormFit system adjusts to fit most young riders comfortably and securely, with two sizes: Toddler (approx. up to age 3) and Child (approx. ages 3-7)
- In-molded shell and foam improve strength and reduce weight
- Kid friendly graphics match our bike graphics and colors
- Reflective webbing for extra safety

SKILLET

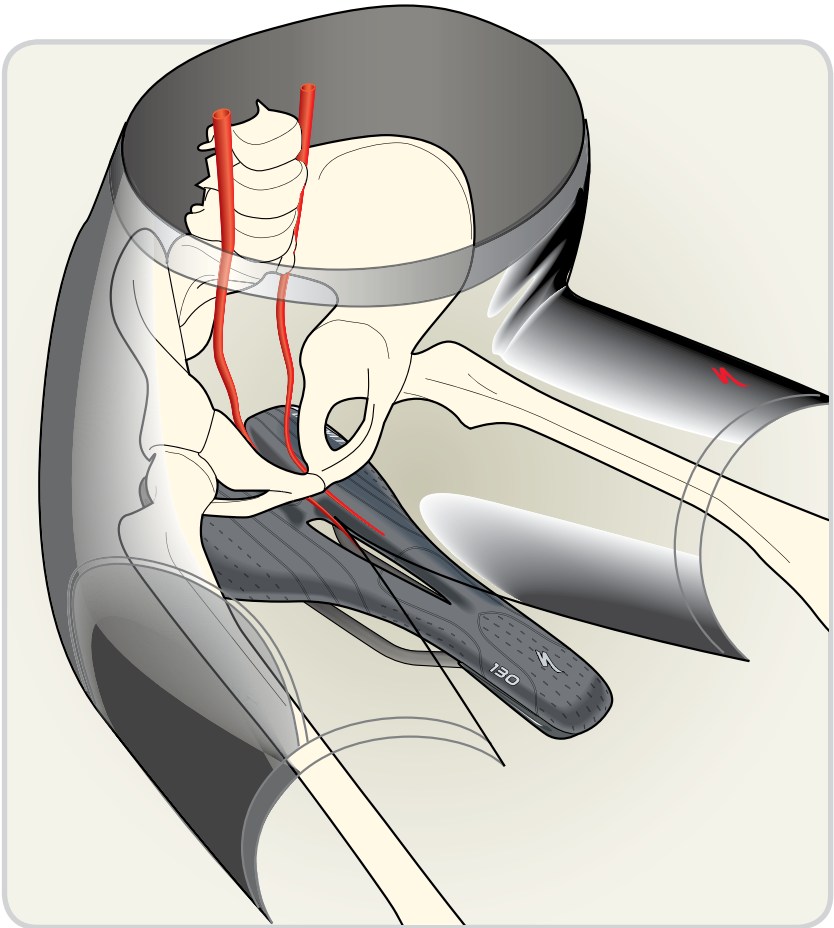

Bomb-proof, skate-style helmet that's built to take abuse (and yes, it's CPSC-certified). Worn by Darren Berrecloth and other Specialized aggro riders.

- Complies with one or more of the following safety standards for bicycle helmets: CPSC, SNELL B90A, CE and AS/NZS
- FormFit system adjusts to fit most riders
- EPS foam with high-impact, thermoplastic injection molded shell
- 3 sizes: S, M, L

MEDICALLY TESTED, SCIENTIFICALLY PROVEN
 BG® saddle designs take the pressure off your important parts, so the terms “saddle” and “sore” can remain exclusive.

We follow the doctor’s orders when it comes to saddle design because hours on a bike will quickly prove that an ill fitting or poorly designed saddle is, well, pure hell. Ergonomic designer and medical doctor Roger Minkow was the first person to present solutions for saddle pressure/dysfunction, and he helped us develop the specific shapes, contours and cutouts you’ll find in all of our Body Geometry saddles.

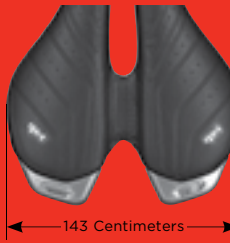

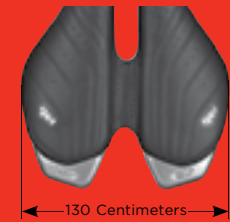

Though years in the saddle may have given you an opinion or two about what feels best, we always suggest getting fit to your bike. Your local Specialized dealer can either guide you through a comprehensive BG FIT session, or if saddles are your only concern, they can measure your actual sit bone width to find the perfect fitting saddle (all models are available in multiple sizes) for your body.

MEN'S SADDLE DESIGN You’ve heard the rumors, and sadly they’re a reality. Studies prove that the pressure conventional saddles put on the pudendal nerves and arteries reduces penile blood flow within just a few minutes. But Body Geometry designs reduce this pressure by cutting away a precise center section of the saddle, thereby producing results comparable to sitting in a padded chair.

**BODY GEOMETRY
 MULTI-WIDTH SADDLES**

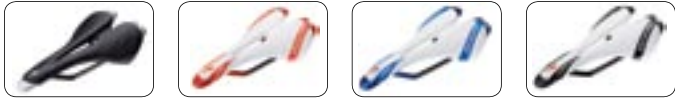

MEN'S TOUPÉ GEL

**DIFFERENT WIDTHS FOR
 DIFFERENT RIDERS**

No two pairs of sit bones are the same. Skinnier saddles don’t necessarily work best for smaller riders, wider saddles for larger riders, and so on. Even the difference in sit bone width when riding in an upright or aero position is significant. There’s simply no cardinal rule for finding the best sized saddle for your body—meaning the one that will keep you riding longer and more comfortably—without measuring the distance between your sit bones (ischial tuberosities) and its relation to your positioning. If you want an accurate saddle fit, your local Specialized dealer can help.

TOUPÉ™ TEAM 130/143

Don't let the sleek, minimalist design fool you—this high performance race saddle consistently out-ranks the competition in compliance and lightweight.

- Patented BG design is lab tested to assure blood flow to sensitive arteries
- Carbon reinforced shell is tuned for the perfect combination of flex and stiffness
- Ultralight foam padding
- Lightweight hollow titanium rails
- Tough, lightweight and water-resistant Micromatrix cover
- Approximate weight: 130mm = 170g, 143mm = 175g (+/- 5%)

TOUPÉ™ 130/143/155

This minimalist road saddle features scientifically proven Body Geometry® technology and aptly tuned shell flexibility for a compliant ride. Same features as the Team model, with subtler graphics.

- Patented BG design is lab tested to assure blood flow to sensitive arteries
- Carbon reinforced shell is tuned for the perfect combination of flex and stiffness
- Hollow titanium rail
- Ultralight foam padding
- Tough, light and water resistant Micromatrix cover
- Approximate weight: 130mm = 170g, 143mm = 175g, 155mm = 195g (+/- 5%)

TOUPÉ™ GEL 130/143/155

Our sleek race-profile saddle with the enhanced comfort of Body Geometry Gel padding.

- Gel padding for enhanced comfort
- Patented and lab tested BG design for pressure relief
- Carbon reinforced shell is tuned for the perfect combination of flex and stiffness
- Lightweight hollow titanium rails
- Tough, lightweight and water-resistant Micromatrix cover

TRITIP™ SL GEL 40/50

Our lightweight tri-position saddle features a thickly padded nose and Body Geometry cutout for pressure relief even when riding in a forward TT position.

- Ultralight tuned density foam nose is available in either 40 or 50mm widths for optimum leg clearance
- Patented BG design is lab tested to ensure adequate blood flow to sensitive arteries
- Gel padding in the nose and rear seating area for comfort
- Lightweight hollow titanium rails
- Rear stabilizer for hanging the bike in transitions

TRITIP™ GEL 40/50

Similar features to our triathlon focused TriTip SL, in a more affordable package.

- Tuned density foam nose is available in either 40 or 50mm widths for optimum leg clearance
- Patented BG design is lab tested to ensure adequate blood flow to sensitive arteries
- Gel padding in the nose and rear seating area for comfort
- Hollow chromoly rails
- Rear stabilizer for hanging the bike in transitions

ALIAS™ 130/143/155

Blurring the line between ergonomic comfort and high performance, this popular pro-level model is known for its flat seating position and smooth contours.

- Patented BG design is lab tested to assure blood flow to sensitive arteries
- Lighter weight tuned density foam padding
- Seamless Micromatrix cover
- Lightweight hollow titanium rails
- Available in 3 sizes for a range of riders and seating positions

AVATAR™ GEL 130/143/155

This trusted saddle shape is redesigned with seamless styling for enhanced comfort and modern appeal. A great choice for long days in the saddle, when you want the extra comfort of Body Geometry Gel padding.

- Gel padding and softer tuned density foam for enhanced comfort
- Patented and lab tested BG design for pressure relief
- Tough, lightweight and water-resistant Micromatrix cover
- Hollow chromoly rails

PHENOM™ SL 130/143

Minimalist road or MTB. A favorite of Marathon World Champion Christoph Sauser, this saddle is stiffer than the Toupé, with recessed scuff guards for snag-free racing and a slightly downturned perch for seated climbing.

- Patented BG design is lab tested to assure blood flow to sensitive arteries
- Carbon reinforced shell is tuned for sitbone flex
- Flush mounted scuff guards
- Lightweight hollow titanium rails
- Approximate weight: 130mm = 190g, 143mm = 195g (+/- 5%)

PHENOM™ TI GEL 130/143

The same great ride as our race-profile Phenom, in an off-road specific profile for improved control. A padded front end for stability on steep climbs and low profile back end to resist catching baggy shorts.

- Patented BG design is lab tested to assure blood flow to sensitive arteries
- Carbon reinforced shell is tuned for sitbone flex
- Lightweight hollow titanium rails
- Gel and tuned density foam padding
- Tough, light and water-resistant Micromatrix cover

PHENOM™ 130/143

Same sleek, low profile design as our Phenom SL race saddle, but tuned for more comfort and affordability. Hollow chromoly rails provide an extra measure of off-road durability.

- Patented BG design is lab tested to assure blood flow to sensitive arteries
- Carbon reinforced shell is tuned for sitbone flex
- Flush mounted scuff guards
- Hollow chromoly rails
- Tuned density foam padding

PHENOM™ GEL 130/143

A comfortable and affordable off-road option with durable hollow chromoly rails. The Phenom Gel has a generously padded front end to increase stability on steep climbs and a low profile back end to avoid catching baggy shorts.

- Patented BG design is lab tested to assure blood flow to sensitive arteries
- Carbon reinforced shell is tuned for sitbone flex
- Hollow chromoly rails for off-road durability
- Gel and tuned density foam padding

FORMAT™ SL 130/143

A high performance MTB saddle that combines our Body Geometry pressure-relieving cutout with mountain-specific contours for easy movement in and out of the saddle, even in steep sections.

- Rounded back shape won't snag shorts
- BG V-groove is lab tested to ensure adequate blood flow to sensitive arteries
- Hollow titanium rails for strength and lightweight
- Ultralight SL tuned density foam padding
- Ballistic nylon corner panels

RIVAL™ SL 130/143

Performance MTB saddle with a measured balance of strength, lightweight and all-day trail ride comfort.

- Patented BG design is lab tested to ensure adequate blood flow to sensitive arteries
- BG V-groove cutout for pressure relief in a more upright position
- Hollow titanium rails for strength and light weight
- Ultralight tuned density foam padding extends 1cm beyond the shell at the back for comfort even on steep drops
- Abrasion-resistant shoulder panels

FORMAT™ 130/143

As high performance and full featured as our Format SL, with chromoly rails for extra durability.

- Rounded back shape won't snag shorts
- BG V-groove is lab tested to ensure adequate blood flow to sensitive arteries
- Hollow chromoly rails for added durability
- Tuned density foam padding provides additional trail comfort
- Ballistic nylon corner panels

RIVAL™ 130/143

Our economical version of the Rival SL offers higher rebound foam for all-day trail ride comfort and the enhanced durability of chromoly rails.

- Patented BG design is lab tested to ensure adequate blood flow to sensitive arteries
- BG V-groove cutout for pressure relief in a more upright position
- Synthetic upper with abrasion-resistant shoulder panels
- Hollow chromoly rails for off-road durability
- Tuned density foam padding extends 1cm beyond the shell at the back for comfort even on steep drops

INDIE™ SPORT 143/155

This enthusiast saddle blends performance contours, Body Geometry technology and our ultralight tuned density foam padding for lightweight comfort on the road or mountain.

- Patented BG design is lab tested to ensure adequate blood flow to sensitive arteries
- BG V-groove cutout for pressure relief in a more upright position
- Ultralight tuned density foam padding
- Strong hollow chromoly rails

INDIE™ 143/155

This affordable saddle blends performance contours with Body Geometry comfort technology and a plush seating area for road or MTB riders.

- Patented BG design is lab tested to ensure adequate blood flow to sensitive arteries
- BG V-groove cutout for pressure relief in a more upright position
- Elastic Shell Technology (E.S.T.) for enhanced sit bone comfort
- Tuned density foam padding
- Strong hollow chromoly rails

SONOMA™ 155/175

An affordable version of our recreational Sonoma Gel, this saddle still packs plush comfort with a Body Geometry cutout, Zertz vibration dampers and Elastic Shell Technology.

- BG V-groove design to improve comfort and reduce perineal pressure
- Generous soft durometer foam padding to ensure comfort
- Zertz rail attachments for vibration damping
- E.S.T. for flexible shell comfort

BG2 SPORT

The advanced pressure-relief of Body Geometry technology in an extremely comfortable, sit bone sensitive, sport-level saddle.

- Proven BG technology provides pressure relief
- Elastic Shell Technology (E.S.T.) for sit bone cushioning
- Synthetic cover
- Hollow chromoly rails
- 150mm wide x 265mm long

SONOMA™ GEL 155/175

Combining our best saddle technologies in one—BG Gel padding, Zertz and Elastic Shell Technology—we've created the ultimate comfort saddle and the perfect upgrade to any recreational or trekking bike.

- Patented and lab-tested BG cutout to improve comfort and reduce perineal pressure
- Gel inserts are combined with soft durometer foam padding to ensure comfort
- Zertz rail attachments for vibration damping
- E.S.T. for flexible shell comfort under the sit bones
- Hollow chromoly rails

SONOMA™ SPORT 155/175

Over-the-top comfort at a reasonable weight make this saddle the perfect upgrade to any recreational or trekking bike.

- Patented and lab-tested BG cutout to improve comfort and reduce perineal pressure
- Generous soft durometer foam padding to ensure comfort
- Zertz rail attachments for vibration damping
- E.S.T. for flexible shell comfort
- Hollow chromoly rails

BG COMFORT PLUS / BG COMFORT

This classic saddle shape, with Body Geometry comfort technology, makes you feel like a kid again.

- Proven Body Geometry V-groove design
- Gel and foam at the sit bones
- Synthetic cover
- Steel rails
- Available in standard width or our "plus" version for a wider platform

EXPEDITION® PLUS / EXPEDITION®

Perfect for your urban, cruiser and commute bikes, the Expedition's generous padding and spring saddle construction make for a fun, relaxing ride every time.

- Ergonomic design
- Web spring base and spring rails for instant, plush comfort
- Grid texture-patterned synthetic leather
- Available in standard width or our "plus" version for a wider platform

OUR SONOMA SADDLES are built with Zertz inserts at the rails to dampen road vibration and increase comfort.

MILANO™ GEL 175

A long time favorite, this recreational "luxury" saddle is gel padded to increase comfort.

- Patented BG design is lab tested to ensure adequate blood flow to sensitive arteries
- Gel padding for increased comfort and pressure dispersion
- Synthetic upper
- Hollow chromoly rails

MILANO™ 175

This value-oriented, recreational saddle is just as comfortable as our gel-padded Milano.

- Patented Body Geometry design is lab tested to ensure adequate blood flow to sensitive arteries
- Tuned density foam padding for comfort
- Synthetic upper
- Steel rails

MIKE SINYARD FOUNDED SPECIALIZED ON THE TIRE and decades later, the category is still going strong. We’ve got treads for every season, every terrain and every mood. But when it comes to durability and ride quality, it’s what’s on the inside that counts...the tire’s casing, that is. Specialized has a casing for every type of performance you’re looking for; the key is knowing which one to choose.

ROAD AND URBAN / COMMUTE

S-WORKS

How’s it feel at the top of the mountain? S-Works tires are best you can buy. Depending on your ride of choice that day, a casing of 290, 127 or 120tpi and a healthy dose of dual compound construction will support you all the way.

PRO

A perfect mix of light weight, superior ride quality, road gripping dual compounds and Flak jacket puncture resistance make these tires ideal for any hard charging race or training session.

SPORT

Our entry-level casings are the best balance of great construction and value. Same treads as the Pros, but you can still bring home the bacon.

ARMADILLO ELITE

If you could have it all, wouldn’t you? Armadillo Elite boasts superior puncture resistance, without the associated weight penalty. Available in road, city and even MTB models, you can rest assured you’ll have absolute protection in every situation.

ARMADILLO

Armadillo is our original puncture-resistant casing, and it’s endured years of new technologies and trends because it works that well. Its bead-to-bead protection virtually eliminates the risk of punctures from rocks, thorns, glass, nails, knives, chainsaws, Freddy, etc. Well, maybe not the last three, but you get the idea.

MTB

S-WORKS

Same killer race technology as the road tires, but built for the mountain with our 2Bliss Ready bead and single compound construction. The best you can buy. Just ask Christoph Sauser.

CONTROL

Our 420/D1 casing increases puncture and cut resistance by 15% over our S-Works series, with only 35g of additional weight. Mix in a combination of aramid beads and dual compound treads, and you have the ultimate in trail performance at a great price.

ARMADILLO ELITE

Superior puncture resistance, without the associated weight penalty, lets you rest assured you’ll have absolute protection in every situation. Now available with our 2Bliss Ready bead.

SPORT

Cost-friendly, yet durable. If you need a tire to throw on your week-end warrior rig, then this is the option for you.

SX

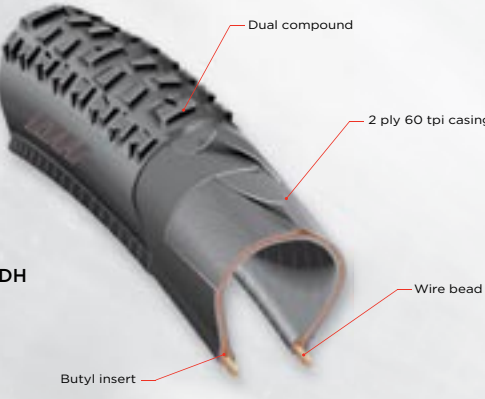

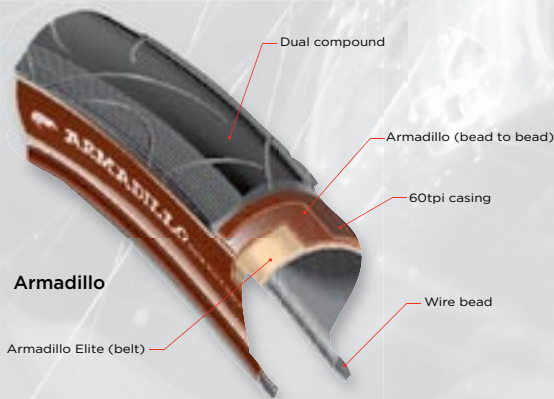

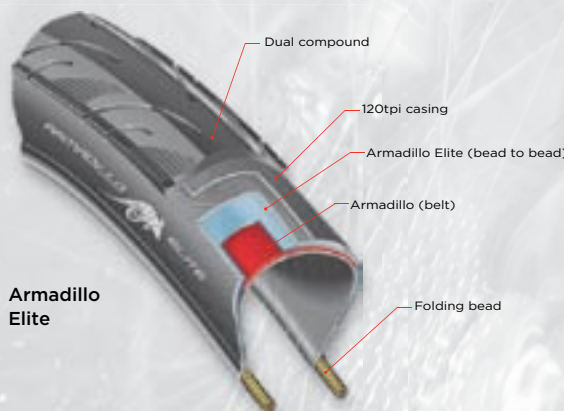

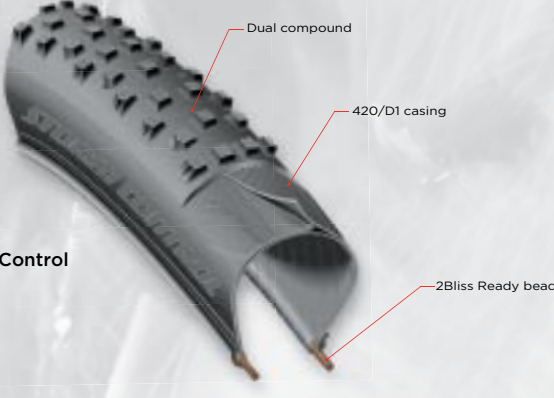

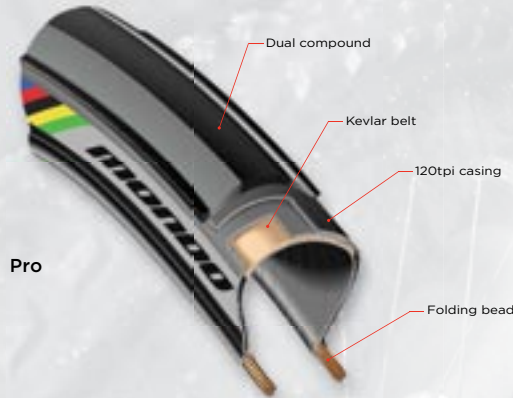

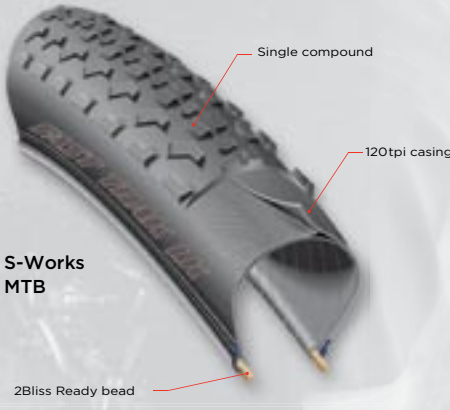

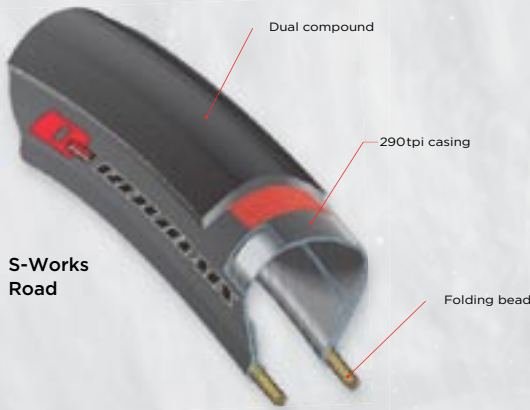

This all new lightweight freeride casing with folding Kevlar bead spares roughly 250 grams per tire compared to our DH casing. Its dual compound is grippier than ever, giving you more confidence to go hard and go big.

DH

The same great S-Works DH casing—dual compound with 2-ply casing and Butyl insert for pinch flat protection—comes with a simple new name, DH. Ready for any World Cup or local rip fest.

2BLISS READY

Every tire with S-Works, Armadillo Elite and Control MTB casings comes 2Bliss ready. What does that mean? Well, for one, you can take your standard tube type set up and convert it to a race-ready, puncture resistant system simply by adding some liquid sealant. 2Bliss tires have a special TT casing and UST bead combination that allow you to run lower pressures without the weight penalty of a UST tire. If you want to run a tube, go ahead. If not, grab some sealant, follow the instructions and be on your way.

S-WORKS® MONDO™ TUBULAR

ROAD / RACE PERFORMANCE

The Mondo road tire was carefully engineered to be the fastest, best handling race tire in the world. Combines extremely low rolling resistance, puncture resistance and light weight, plus increased contact surface and traction while cornering via our proprietary Dual Radius Tread design.

- New dual radius profile for low rolling resistance and consistent cornering

S-WORKS® HOUFFALIZE™ CX

CYCLO-CROSS PERFORMANCE—
INTERMEDIATE CONDITIONS

Inspired by the harsh racing environments of Belgium that are often rain-soaked and muddy, the Houffalize CX is designed for cyclo-cross racers who need a tire to traverse the toughest conditions. Its unique fast-rolling tread pattern cleans well and provides great traction in off-camber situations.

	Size	Casing (Bead)	Compound*	Protection
S-Works Houffalize CX	700x32	127TPI Aramid	C70a S60a	Flak Jacket

S-WORKS® FAST TRAK™ SLK 2BLISS™

XC RACE PERFORMANCE—
HARDPACK TO INTERMEDIATE CONDITIONS

How do you make the best mountain bike race tire in the world? By listening to our Pro teams' suggestions. We answered the call with clipped center knobs for lower rolling resistance and shorter side knobs for a more secure bite under heavy cornering loads—all in a package that's light and sealant friendly.

- Butyl wrapped bead to prevent low pressure burping
- 1.8mm knob heights for the center tread

	Size	Casing (Bead)	Compound*	Protection
S-Works Fast Trak SLK 2BLISS	26x1.9	127TPI Aramid	65a	—

*center/shoulder

S-WORKS® FAST TRAK™ LK 2BLISS™

XC PERFORMANCE—
HARDPACK TO INTERMEDIATE CONDITIONS

Even the best mountain bikers in the world need a larger volume tire that rolls fast. With a 30% reduction in knob height from the original model, this tire still has all the speed a rider like Christoph Sauser needs, without sacrificing any traction.

- Butyl wrapped bead to prevent low pressure burping
- Reinforced side knobs

S-WORKS® STORM™ 2BLISS™

XC PERFORMANCE—MUDDY CONDITIONS

Storm is the tire for wet, challenging conditions and the riders who won't shy away from an environmental challenge. With soft rubber compounds that stick to wet roots and rocks and large, well-spaced knobs to allow the tire to clean well, this tire offers traction for sections that most riders wouldn't consider hiking over. Comes in 2Bliss configuration, so the tire can be used with a tube or sealant.

*center/shoulder

S-WORKS® SAUSERWIND™ 2BLISS™

XC PERFORMANCE—
INTERMEDIATE TO WET CONDITIONS

Developed by Christoph Sauser to meet the demands of the World Cup XC circuit and designed for those days when the race course shows no mercy...the SauserWind rolls fast, cleans well and bites in the soft corners, making it a true all-arounder for any serious racer. Comes in 2Bliss configuration, so the tire can be used with a tube or sealant.

CHUNDER™ DH

DH RACE PERFORMANCE—
INTERMEDIATE/LOOSE CONDITIONS

The Chunder was designed to be our most versatile DH tire ever, with reinforced dual-ply casing to stiffen the sidewall, preventing pinch flats and improving cornering ability.

- Dual ply casing + Butyl stiffened sidewalls

	Size	Casing (Bead)	Compound*	Protection
Chunder DH	26x2.3	60TPI	C42a S40a**	Dual ply casing
	26x2.5	60TPI	C42a S40a**	Dual ply casing

*center/shoulder **with Butyl stiffened sidewalls

CHUNDER™ SX

ALL MOUNTAIN PERFORMANCE—
INTERMEDIATE/LOOSE CONDITIONS

Perfect for the Gravity riders looking for a lighter option than our DH model.

- New Freeride SX casing drops roughly 250 grams per tire compared to Chunder DH

	Size	Casing (Bead)	Compound*	Protection
Chunder SX	26x2.3	60TPI cap ply Aramid	C50a S45a	—
	26x2.5	60TPI cap ply Aramid	C50a S45a	—

*center/shoulder

CHUNDER™ CONTROL (1-PLY) 2BLISS™

ALL MOUNTAIN PERFORMANCE—
INTERMEDIATE/LOOSE CONDITIONS

The Chunder Control (1ply) is designed for extreme, but varying trail conditions, for those who want a tire with predictable drift, reasonable weight, large volume, pedal-ability and sure-footed traction.

- Single ply casing w/ durable dual compound, lighter and better rolling than DH version

	Size	Casing (Bead)	Compound*	Protection
Chunder Control (1ply) 2BLISS	26x2.2	420/D1 Aramid	C65a S55a	—
	26x2.3	420/D1 Aramid	C65a S55a	—

*center/shoulder

CLUTCH DH

DH RACE PERFORMANCE—
INTERMEDIATE/LOAMY CONDITIONS

The Clutch DH is designed for railing high speed turns—the low knob pattern and pinch-resistant dual-ply casing provide the best mix of speed, traction and control for harder pack conditions.

- Dual ply casing + Butyl stiffened sidewalls

	Size	Casing (Bead)	Compound*	Protection
Clutch DH	26x2.3	60TPI	C42a S40a**	Dual ply casing
	26x2.5	60TPI	C42a S40a**	Dual ply casing

*center/shoulder **with Butyl stiffened sidewalls

RHYTHM™ LITE CONTROL

PERFORMANCE—DIRT/STREET

Your terrain can vary from skate parks to city streets and often ends with a session at the trails. That requires a tire like the Rhythm with a fast-rolling center section, but larger and deeper shoulder knobs for better traction in the dirt.

- New for 2009

	Size	Casing (Bead)	Compound*	Protection
Rhythm Lite Control	26x2.3	420/D1 Aramid	C60a S50a	—

*center/shoulder

RESOLUTION™

ENTRY-LEVEL TRAIL

Versatile trail tire with a fast-rolling center section and wider center knob. Excellent traction provides stability and predictability for all skill levels.

	Size	Casing (Bead)	Compound*	Protection

TURBO ULTRALIGHT ROAD WITH TALC

The Turbo Ultralight road tube, with new patent-pending valve and valve base, is proven in rolling resistance testing to reduce drag by as much as 13% per wheel.

- Talc in the pack for a better ride and fewer flats
- Large base prevents wear and tear on the rim-to-valve interface
- Threading only at bottom half of valve stem allows secure fit to rim

TURBO ULTRALIGHT MOUNTAIN WITH TALC

The cheapest way to ditch 40 grams of rotating weight.

- Talc in the pack for a better ride and fewer flats

FLATBOY™

Set of six self-adhesive patches, plus sandpaper and instructions in a snap shut kit. Fifty to a case.

AIRLOCK® PRO TIRE SEALANT

Together, AirLock Pro tubes and sealant are the nemesis of pesky nails, glass and other tire assailants. Start with the best performing self-sealing tubes available, then add AirLock Pro as a fail-safe puncture sealant that prevents flats while you ride.

- Designed specifically for use with Specialized 2Bliss tires and Roval MTB wheels
- Non-toxic, non-separating formula
- Coats the tube for permanent protection
- Works with road or mountain tubes
- Completely homogenous, doesn't "puddle"

BG PRO RBX SHORT / BIB SHORT

Designed for long distance comfort, the BG Pro RBX Short and Bib Short feature a uniquely designed, triple density pad and durable materials to inspire confidence for the most epic cycling days.

- Unique BG Pro RBX chamois uses strategically placed high density foam to relieve pressure during cycling
- RBX chamois provides maximum comfort with upper thigh protection and perforated padding for breathability
- RBX pad is seamless and stretchable for the ultimate fit and cushioned feel on the saddle
- Patterned FIELDSENSOR™ fabric transports moisture away from the skin and disperses it for fast evaporation with long term durability
- Unique panel construction and stitching minimizes seam contact for comfort
- Bib uses stretch mesh upper in a minimalist design for maximum ventilation and support

BG PRO RBX KNICKER

An absolute essential for cool weather cycling, this integrated knicker and bib upper offers a powerful combination of performance fabrics and features, like our cushioning BG Pro RBX pad, with the added insulation of Specialized Thermal material.

- Unique Specialized Thermal fabric on the front panels for loft and insulation
- FIELDSENSOR™ fabric on back transports moisture away from the skin and disperses it for fast evaporation
- Unique BG Pro RBX chamois provides maximum comfort
- Stretch mesh straps in a minimalist design for improved ventilation and support atlas

BG PRO SL SHORT / BIB SHORT

Using lightweight materials and a thin and sleek SL Pro pad, this revolutionary short and bib short pack high-end performance in a minimalist design, for those who prefer a closer-to-the-saddle feel.

- Unique BG Pro SL chamois uses a dual density construction with high density foam in key areas to relieve pressure during cycling
- SL chamois uses lighter materials in a pliable, seamless constructions for added flexibility
- New generation of lightweight FIELDSENSOR™ fabric provides unsurpassed moisture-transfer-ability—moving moisture away from the skin and dispe rsing it for fast evaporation
- External gripper and mesh panels further reduce weight and feel on the body
- Bib uses stretch mesh upper in a minimalist design for maximum ventilation and support

SHINDIG SHORT

Just like its riders, this no-compromise, aggressive short is big on technical prowess. With construction details built for full function, comfort and durability, the Shindig Short will cover the whole mountain, with performance left to spare.

- New for 2009
- Outer shell is a durable nylon/polyester blend
- Comfortable inner polyester mesh lining
- Stretchable, front mesh panels provide enhanced airflow and freedom of movement
- Waist adjustments allow for custom fit
- Lighter material at the back of knee for pedaling comfort

PARA SHORT

A looker both on-and-off the bike, the Para Short packs all the right performance features for the biggest days on the mountain, with enough style for dinner and a movie afterward.

- New for 2009
- Outer shell is a durable nylon/polyester blend
- Comfortable inner polyester mesh lining
- Waist adjustments allow for custom fit
- Single back pocket on right hip with angled front hand pockets; mid-size cargo pockets on the thighs

ENDURO SHORT

From its removable mesh liner to its durable, yet stretchable materials, the Enduro Short is aggressively styled and loaded with MTB-specific features – basically everything you could ask for in an off-road short.

- Front and back panels constructed of a breathable mesh for increased ventilation; other shell panels are 100% stretch nylon
- Nylon/spandex mesh liner is breathable and cool
- Removable liner is attached only at the hips for freedom of movement
- Updated BG Comp chamois with differentiated thickness to provide optimal padding
- Cinches on the waist provide size adjustment

BG COMP SHORT / BIB SHORT / KNICKER

A fundamental piece for any cyclist, our comp-level shorts and knickers use comfortable fabrics, a breathable and supportive bib upper and seamless, single-density chamois to provide the best performance and fit available in one economical package.

- Updated BG Comp chamois with differentiated thickness to provide optimal padding
- Comp pad is seamless and stretchable for the best possible fit and feel on the bike
- High quality Tactel® nylon/Lycra® provides exceptional stretch and recovery
- Unique panel construction with double needle stitching for a sleek, uncluttered look
- Bib uses stretch mesh upper in a minimalist design for maximum ventilation and support

TRANSITION SHORT

Beat the clock with the Transition Short—specially designed for multi-sport endurance, versatility and longstanding comfort, whether on the run, bike or swim.

- High quality nylon/ Lycra® provides exceptional stretch and recovery
- Minimal FIELDSENSOR™ inner pad for comfort during run/ bike/swim
- Mesh panel on thigh dries quickly and saves weight
- Draw cord at waist holds short in position
- Reduced inseam length for versatile comfort

SPORT SHORT

A no-nonsense introductory piece for all cyclists, this entry-level form fit short balances high-quality fabrics with friction-free performance for comfort no matter how long the ride.

- High quality Tactel® nylon/Lycra® provides exceptional stretch and recovery
- Updated Sport chamois is seamless with comfortable padding for a friction-free ride
- Unique panel construction with traditional stitching for a sleek, uncluttered look
- Longer leg length and additional coverage lends protection and function when used with pads

DEMO SHORT

For your all-day assault on the mountain, our Demo Short adds extra protection and durability to a piece that's already decked out with superior style, versatility and function.

- Nylon/spandex mesh liner is breathable and cool
- Removable liner is attached only at the hips for freedom of movement
- Sport chamois provides comfortable padding for a friction-free ride
- Nylon outer shell resists damage from abrasion
- Longer leg length and additional coverage lends protection and function when used with pads

TRAIL SHORT

Our traditionally styled Trail Short is equipped with all the essentials you need for comfort and performance on the trail, without any extra fluff.

- Length is 2" shorter for 2009
- 100% nylon shell is lightweight and durable
- Nylon/spandex mesh liner is breathable and cool
- Removable liner is attached only at the hips for freedom of movement
- Sport chamois provides comfortable padding for a friction-free ride
- Elastic waistband with draw cord

ATLAS™ SHORT

A low-profile starter short with recreationally-minded quality and comfort, when all you're looking for is a cruise around town or on the bike path.

- New for 2009
- Elastic waistband with drawcord
- Removable liner is attached only at the hips for freedom of movement
- Sport pad is seamless for a friction-free ride
- 11" inseam comes to the top of the knee
- Gusseted crotch reduces chafe during cycling

SOLAR JET JERSEY

Your dermatologist will thank you. The new Solar Jet Jersey provides warm weather comfort, while soaking up the sun's harmful rays with its UPF 50 factor fabric.

- 100% polyester microdenier material
- Unique knit and construction provides UPF 50+ protection
- Hydrophobic wicking function provides dry comfort
- External, full length zipper for maximum cooling and comfort
- 3 back pockets with additional security pocket store essentials
- Convenient wire ports for using personal electronics

SL JERSEY

For riders who count every gram, the SL's stretch mesh panels and lightweight construction make this jersey virtually vanish on your body.

- Lightweight, high-gauge polyester material is supple and hydrophobic
- External, full length zipper provides maximum cooling and comfort
- Lightweight, stretch mesh panels for cooling and contour fit
- 3 back stretch mesh pockets store essentials

AVILAN™ JERSEY / AVILAN SLEEVELESS

Breathable, even when it feels like a pressure-cooker outside, the warm-weather Avilan Jersey's FIELDSENSOR™ fabric and front-to-back, cooling mesh panels keep you dry and comfortable the whole ride through.

- New colors for 2009
- FIELDSENSOR™ body panels pull moisture away from the skin
- Lightweight closed mesh panels for breathability
- External, full-length zipper provides maximum cooling and comfort
- 3 back pockets store essentials

GRAPHIC JERSEYS

Look better and stay cooler than the other guy in one of these new graphic jerseys. From the beaches of Hawaii to the world of demon hot rods, you'll find a print for everyone this year.

- All new designs for 2009
- Channeled yarn construction lends efficient wicking performance
- Full-length zipper with welted construction doesn't break graphic on front
- Elastic waist and sleeves
- Raglan sleeves with 3 back pockets for traditional performance

PRO JERSEY

Rep the company you love with the best-looking Pro Jersey on the circuit. This new eye-catching design has enough technical function and performance features to make even the most discerning racer smile.

- New graphics for 2009
- Channeled yarn construction lends efficient wicking performance
- Full-length zipper with welted construction doesn't break graphic on front
- Elastic waist and sleeves
- Raglan sleeves with 3 back pockets for traditional performance

OFFSET™ JERSEY

Made with FIELDSENSOR™ moisture-transfer material in a universally flattering, semi-form fit cut, the Offset Jersey is a versatile and practical option for every type of rider, any day of the week.

- New colors for 2009
- FIELDSENSOR™ body panels pull moisture from the skin
- Full-length, external zipper construction as found in our high-end jerseys
- 3 back pockets store essentials
- Elastic at waist and sleeve
- Seamless side construction is sleek and comfortable

MTB TEAM REPLICA JERSEY

The official jersey of the Specialized Factory Team, this race-inspired style has all the performance features and lightweight, technical materials you'd expect from a jersey worn by Ned Overend.

- Official team design for 2009 season
- Channeled yarn construction lends efficient wicking performance
- Innovative collar design and mesh panels for additional venting
- Full-length zipper with welted construction doesn't break graphic on front
- Non-elasticized sleeves for a sleek feel and appearance
- Raglan sleeves with 3 back pockets for traditional performance
- Now available in slate color

MTB TEAM REPLICA SHORT

Rounding out the Specialized Factory Team kit, this bold and breathable bib short has a one track mind that's focused on the finish line.

- Unique BG Comp chamois with differentiated thickness to provide optimal padding
- Sublimated graphics provide deep, long-lasting color
- Stretch mesh upper in a minimalist design for maximum ventilation and support
- Mesh panels on the short provide additional airflow
- Now available in slate color

DEMO TOP

When gravity is your addiction, the Demo lends the right styling, elbow protection and freedom to get the job done.

- New graphics for 2009
- Channeled polyester yarn construction lends efficient wicking performance
- Fully sublimated graphics
- V-neck construction is comfortable and non-binding
- Loose fit allows use with pads

APOLLO TOP

This full-cut, casual pullover is as simple and reliable as they come. It's the perfect, everyday option for off-road and recreational use.

- New design for 2009
- FIELDSENSOR™ fabric pulls moisture away from the skin for maximum comfort
- Closed mesh panels in key function areas for cooling
- Single side pocket for easy access and storage

ATLAS T

Soft to the touch, but loads more technical than your standard cotton T, this versatile, non-pocketed jersey keeps you dry and comfortable, either on or off the bike.

- Channeled yarn construction has efficient wicking performance
- Lightweight and hydrophobic polyester keeps you dry and comfortable
- Raglan sleeve design with yoke shoulder allows freedom of movement
- Versatile and functional style for cycling and other activities
- Loose fit

LONG SLEEVE OFFSET™ JERSEY

Our most popular jersey, now available in a long sleeve version. A lightweight, versatile silhouette with the moisture-transfer benefits of FIELDSENSOR™ fabric make the Offset a perfect year-round performance jersey.

- Lightweight FIELDSENSOR™ jersey fabric is comfortable year-round
- Full-length external zipper construction is smooth against the body
- 3 back pockets store essentials
- Elastic at waist and sleeve
- Semi form fit for a wider range of body types

ARGALI WOOL

Think tradition with a technical twist. This classically-styled wool jersey blends natural and hydrophobic fibers to create a performance-ready piece with modern function, easy care and an unmistakably retro attitude.

- Sportwool blend combines traditional function with modern yarns for top performance
- Polyester yarns are hydrophobic and easy to care for
- Full-length external zipper construction is smooth against the body
- Traditional 3 back pockets to store essentials
- Form fit

EUREKA JERSEY

El Nino's rolling through town, but so are you. The Eureka Jersey was made with heavy-duty, moisture-transfer FIELDSENSOR™ fabric to keep you warm and dry through those notoriously windy and cold winter months. Add a lightweight shell to the mix and you're set to weather any storm.

- Winterweight FIELDSENSOR™ fabric provides more warmth for colder conditions with its moisture-transfer function
- Full-length external zipper construction is smooth against the body
- Pockets made with waterproof material to protect contents from splash
- Unique shoulder construction provides comfort in the cycling position
- Form fit

EUREKA ELEMENT JERSEY

Our cold-loving Eureka Element Jersey uses FIELDSENSOR™ fabric and soft shell panels on the front and arms to keep the wind outside, your warmth inside and extra style right where it belongs.

- Winterweight FIELDSENSOR™ fabric provides more warmth for colder conditions with its moisture-transfer function
- Soft shell protective panels have a water resistant nylon/spandex outer layer
- Thermanal stretch fabric on side panels for form fit
- Full-length external zipper construction is smooth against the body
- Zippered, reflective cuffs provide easy on-and-off
- Unique shoulder construction provides comfort in the cycling position
- External zippered security pocket on the back
- Form fit

ACTIVATE JERSEY

The transitional Activate Jersey is perfect for fall weather riding when you need to layer on a little extra warmth to fend off those crisp mornings and cool breezes.

- Lightweight polyester jersey fabric is brushed for more loft and insulation
- Denier gradient fabric offers superior moisture transfer
- Full-length external zipper construction is smooth against the body
- Additional external zippered security pocket to stow valuables
- Form fit

“ONE LESS CAR” LONG SLEEVE JERSEY

Show your green pride with this lightweight, long-sleeve performance jersey, made with moisture-transport FIELDSENSOR™ fabric and a universally resounding graphic message, “One Less Car.” Also available in short-sleeve version.

- Lightweight jersey fabric is brushed for additional loft and insulation
- FIELDSENSOR™ multi-denier fabric provides superior moisture transfer
- Full-length welted zipper doesn't break the design on front
- Additional external zippered security pocket to stow valuables
- Form fit

ATLAS™ LONG SLEEVE T

Made of lightweight hydrophobic polyester, this popular technical T is versatile enough to be worn on-or-off the bike, by itself or in tandem with other layers when the temperature drops—a must-have for fall weather riding.

- Channeled yarn construction lends efficient wicking performance
- Lightweight and hydrophobic polyester keeps you dry and comfortable
- Raglan sleeve design with yoke shoulder allows freedom of movement
- Loose fit

Not all colors pictured. Go to www.specialized.com for full offering.

DEFLECT™ HYBRID JACKET

Transform your ride with our removable-sleeve hybrid jacket. Lean, versatile and fully water and wind resistant, it's the most convenience and protection you can get out of one jacket.

- Lightweight polyester in a stretch woven construction for form fit comfort
- Wind & water resistant material for protection from the elements
- Zip-off sleeves and shoulder yoke converts jacket into a vest
- Zippered chest pocket and single back pocket for easy access to energy rations or electronics
- Reflective trim on the back for visibility

DEFLECT™ TRAIL JACKET

This casually styled, off-road-ready jacket offers the same smart wind and rain protection as our other Deflect styles in a design specifically tailored to the mountain rider.

- Lightweight polyester in a stretch woven construction for form fit comfort
- Material is wind & water resistant for protection from the elements
- Zippered hand pockets for warming or storage; zippered chest pocket
- Waist drawcord with adjustment straps in hand pockets
- Vented back for increased air flow
- Full cut for freedom of movement and casual styling

DEFLECT™ JACKET

Easy to roll, bunch, pack and pull out of a jersey pocket when the weather calls for showers, this lightweight, wind and water-resistant shell keeps you insanely warm despite its thin materials—an absolute essential in unpredictable conditions.

- Lightweight polyester has a stretch woven construction for form fit comfort
- Material is wind & water resistant for protection from the elements
- Single back zippered pocket securely packs essentials
- Vented back for increased air flow

WARM-UP PANT

This comfortable pull-on pant completes a full suit for all award ceremonies, post-ride interviews or lunch stops on the way home from your favorite trail ride or century.

- Elastic waist with adjustable drawcord
- Zippered ankles for easy on-and-off; open ankle construction

ROTATION TIGHT

For extra coverage when the seasons start to shift, this lightweight tight delivers plenty of comfort-enhancing features that make it the go-to transitional style for cycling and other aerobic activities.

- High-grade Tactel® nylon/Lycra® material for a durable form fit
- Ergonomically angled ankle zips with reflective trim for visibility
- Plush elastic logo waistband with a draw cord for adjustability
- Contoured seam construction avoids potential chafe points
- Gusseted crotch to reduce seam contact on the saddle

THERMAL™ TIGHT

Resilient, warm and extremely versatile, this mid-weight tight uses high-tech Thermal fabric to create the perfect amount of insulation for fluctuating conditions.

- Unique Specialized Thermal fabric is brushed for loft and insulation
- Ergonomically angled ankle zips with reflective trim for visibility
- Plush elastic waistband with a drawcord for adjustability
- Medium weight provides comfort in a wide range of temperature conditions

DEFLECT™ VEST

Easily stowed until you need that extra bit of wind and water resistance, this lightweight vest packs core-warming protection into a thin, sleek package that's ideal for all types of riding.

- Lightweight polyester has a stretch woven construction for form fit comfort
- Material is wind & water resistant for protection from the elements
- Mesh back panel for additional breathability and light weight

SL RAIN JACKET

Extremely lightweight and packable, this “emergency” jacket could be the difference between going long and going home if the weather turns for the worse.

- Ultra lightweight woven polyester has a durable, water-resistant finish
- Mesh panels under the arms provide additional breathability
- Reflective trim on collar and lower back for additional visibility
- Open waist construction allows air flow with less billowing
- Form fit

WARM-UP JACKET

Taking a cue from the great soccer team jackets, this comfortable zip-up with Specialized appliqué logos is a one-style-fits-all kind of piece known for turning as many heads as Beckham himself.

- High collar and knit cuffs for additional warmth and comfort
- Full-length zipper
- Hand pockets for warmth

THERMAL™ BIB TIGHT

Fall weather riding deserves the core-warming performance of our mid-weight Thermal Bib Tight, a cycling-specific piece with supportive bib construction and pressure-relieving BG Comp pad.

- Unique Specialized Thermal fabric is brushed for loft and insulation
- Thermal fabric extends to core for additional warmth
- Specialized BG Comp chamois has differentiated thickness to provide optimal padding
- Ergonomically angled ankle zips with reflective trim for visibility
- Stretch mesh on the bib for less bulk and comfortable support
- Medium weight provides comfort in a wide range of temperature conditions
- This is our only winter tight with a cycling chamois in it

THERMAL™ EX DEFLECT™ TIGHT / BIB TIGHT

Combat the coldest conditions with this winter-ready tight and bib tight—equipped with extra insulation and protection through strategically placed wind-proof panels and robust Thermal EX fabric.

- New Thermal EX fabric adds weight and brushing for improved insulation over standard Thermal
- Wind-proof laminate panels provide protection in key wind chill areas
- Ergonomically angled ankle zips with reflective trim for visibility
- Wind & water protection on leading surfaces extends temperature range
- Bib has front zipper for convenience and ease of fitand recovery
- Unique panel construction with double-needle stitching provides a sleek, uncluttered look
- Custom Specialized logo silicone gripper holds the short in position
- Stretch mesh upper has a minimal design for maximum ventilation and support

Not all colors pictured. Go to www.specialized.com for full offering.

DEFLECT™ HEAD WARMER

- A colder weather version of our popular under-the-helmet piece for those who won't compromise their cycling habits even in the worst conditions.
- Deflect wind & weather protective panels in key exposure areas
 - Heavier weight Thermanal EX fabric for added insulation
 - Form fit to go underneath the helmet in cold weather
 - One size fits all

HEAD WARMER

- Keep your noggin' warm and your ears covered under that helmet with our answer for insulation during cold weather riding—our high performance Specialized head warmer.
- Unique Specialized Thermanal fabric on the sides and ears for warmth and comfort
 - Stretch FIELDSENSOR™ on the center panel for moisture-transfer performance
 - Form fit to go underneath the helmet in cold weather
 - One size fits all

ARM WARMERS

- Our top-end arm warmers combine the warmth of our unique, insulating Thermanal fabric with a high-grade blend of materials for optimal performance with world-class fit.
- Unique Specialized Thermanal fabric on the leading side for warmth and comfort
 - High-grade Tactel® nylon/Lycra® material on the back of the upper arm for comfortable form fit
 - Exposed silicone logo gripper at the top holds the warmer in position

KNEE WARMERS

- Get extended coverage for the knee and calf during cool weather cycling with a combination of our Thermanal fabric and Tactel™ nylon/spandex.
- Unique Specialized Thermanal fabric on the leading side for warmth and comfort
 - High-grade Tactel® nylon/Lycra® material on the back of the knee to reduce bunching and provide optimal stretch
 - Exposed silicone logo gripper at the top has less bulk; silicone gripper at the bottom holds the warmer in position

LEG WARMERS

- Convert any short into high performance tights with Specialized leg warmers, made from our insulating Thermanal fabric and high-grade Tactel™ nylon/Lycra®.
- Unique Specialized Thermanal fabric on the leading side for warmth and comfort
 - High-grade Tactel® nylon/Lycra® material on the back of the thigh to reduce bunching and provide optimal stretch
 - Exposed silicone logo gripper at the top holds the warmer in position; covered silicone gripper at the bottom for a clean look
 - Angled, reflective zippers provide easy on-and-off with visibility

TECH LAYERS

- Now made with moisture-transfer FIELDSENSOR™ fabric, our low-bulk sleeveless and short sleeve base layers enhance the performance of any cycling jersey.
- FIELDSENSOR™ fabric construction provides superior moisture transfer
 - 100% lightweight and hydrophobic polyester keeps you dry and comfortable
 - Construction seams at back of garment for increased comfort
 - Low volume seam construction for improved layering performance
 - Woven label with embroidery on front neckline
 - Combine with any top for improved technical function

1ST LAYERS

- Available in long-sleeve, short-sleeve and sleeveless versions, our barely-there, form fit 1st layers use a smart blend of stretchable, hydrophobic yarns to enhance the performance and comfort of any cycling top—with an option for every season.
- Polyester/spandex blend in a semi-mesh construction for a stretchable form fit
 - Lightweight and hydrophobic polyester keeps you dry and comfortable
 - Low-volume construction seams moved to the back of the garment for increased comfort
 - Form fit

White

Black

BODY GEOMETRY SOCK

- Nylon/polyester/spandex blend is durable and form fitting
- Breathable open mesh upper
- Articulated knit at the instep for a supportive fit
- Quarter height; right/left specific

White

Black

SL SOCK

- Lightweight nylon/spandex blend
- Breathable mesh construction is light and comfortable
- Quarter height

White

Black

TEAM RACING SOCK

- Coolmax® /nylon/spandex blend for a dry, comfortable fit
- Nylon reinforced heel and toe for durability
- Breathable mesh upper aids ventilation
- Quarter height

White

Black

LO TEAM RACING SOCK

- Coolmax®/nylon/spandex blend for a comfortable fit
- Coolmax® yarns keep you dry
- Ankle height
- Mesh upper is light and breathable

Black

White

COMP SOCK

- A casual style sock that's lightweight and breathable for comfort both on-and-off the bike.
- Polyester/spandex/nylon blend is lightweight and won't absorb a lot of moisture
 - Traditional plain knit construction
 - Quarter height

Black

WOOL TRAINER SOCK

- A traditional performance sock for cool or wet conditions, our Wool Trainer uses blended wool for warmth and lofted comfort year round.
- Wool/polypropylene/spandex blend for cool weather comfort
 - Wool provides insulation and loft
 - Polypropylene content keeps sock dry and comfortable; Spandex maintains sock's shape
 - Crew length

Not all colors pictured. Go to www.specialized.com for full offering.

BG GEL

This glove is built for maximum comfort and minimum fatigue, with plush BG Gel padding on the palm.

- BG Gel technology reduces hand numbness by relieving pressure on the sensitive ulnar nerve
- Soft BG Gel foam padding across all the palm pressure zones provides maximum hand comfort
- Soft Microwipe™ thumb for wiping away sweat

BG PRO

Perfect for high intensity racing, this ultra light slip-on glove breathes easy and disperses moisture even on the palm for enhanced precision and control.

- Airmesh and soft Clarino synthetic leather palm is vented to reduce moisture on gripping surfaces
- BG Gel pad reduces hand numbness by relieving pressure on the sensitive ulnar nerve
- Slip-on wrist cuff fits perfectly without inhibiting movement
- Soft Microwipe™ thumb for wiping away sweat

BG COMP

With comfortable padding and lightweight mesh, the BG Comp glove provides great all-around performance for every type of cyclist.

- BG Gel pad reduces hand numbness by relieving pressure on the sensitive ulnar nerve
- Soft Clarino synthetic leather palm
- Narrow Velcro wrist closure won't restrict movement

BG SPORT

A great entry-level glove, the BG Sport is comfortable, economical and never short on performance.

- Stitched BG Gel pad reduces hand numbness by relieving pressure on the sensitive ulnar nerve
- Moderate foam padding in key contact areas for extra comfort
- Absorbent thumb surface for wiping sweat

BG TEAM GLOVE

The BG Team glove is designed for riders wanting Pro Tour performance and a true race fit, without compromising comfort.

- BG Gel pad reduces hand numbness by relieving pressure on the sensitive ulnar nerve
- Clarino synthetic leather palm remains soft, yet durable
- Absorbent Microwipe™ thumb for brushing away sweat
- Lightweight sublimation-print Lycra for race fit and comfort

XC LITE

An ultra-light, high performance glove for riders who prefer a single layer palm for snug fit and bar control.

- Ultra lightweight stretch mesh upper
- Slip-on cuff for a snug fit
- No welds or wrist closure to inhibit dexterity
- Absorbent Microwipe™ thumb for brushing away sweat
- Supple unpadded Clarino leather palm for bar control

BG RIDGE™

Equally inclined toward the mountain and road, this popular long-fingered glove draws attention for its superior fit and light weight.

- Thin BG mountain padding is tuned for optimal bar control, while relieving pressure on the sensitive ulnar nerve
- Narrow Velcro closure won't inhibit wrist movement
- Absorbent Microwipe™ thumb for brushing away sweat

ENDURO®

Aggressive trail riders who want uncompromised bar control will appreciate the supple, unpadded palm and protective upper of the Enduro glove.

- O-Foam™ knuckle padding is perforated to dissipate heat
- Non-padded Clarino leather palm for bar control
- Micro cuff Velcro straps for wrist mobility
- Absorbent Microwipe™ thumb for brushing away sweat

FORTRESS™

Ultimate trail protection with molded armor to guard hands from rocks and debris and a reinforced Clarino palm for greater grip control.

- Hard molded knuckle, wrist and thumb guards
- Breathable mesh and stretchable spandex upper
- Welded rubber finger protection

RADIANT™

Insulated and fully waterproof, the Radiant will keep your digits warm in wind-chilled weather down to 30°F/0°C.

- Thinsulate™ insulation for warmth
- Fully waterproof internal Hipora™ shell
- Brushed Microwipe™ thumb wipe
- Reflective piping and printing for added visibility

SUB ZERO™

Master of mixed conditions, the Sub Zero comes equipped with a core layer for essential warmth and outer shell when the temperature plummets. Ideal protection at or below 30°F/0°C.

- Fully waterproof outer Hipora™ shell
- Fleece core layer liner can be worn separately in warmer weather
- Brushed microfiber thumb wipe
- Reflective piping and printing for added visibility

BG RADIATOR™

The BG Radiator delivers extra protection for technical trail riding, with MTB-contoured padding and strategically placed welding.

- BG Gel pad with MTB-specific thickness and contour reduces hand numbness by relieving pressure on the sensitive ulnar nerve
- O-Foam™ knuckle padding is perforated to dissipate heat
- Absorbent Microwipe™ thumb for brushing away sweat
- Micro cuff Velcro straps for wrist mobility

MONKEY WRENCH™ GLOVE

Developed for our team mechanics by our team mechanics, these gloves offer protection for your digits when wrenching on your bike.

- High grip silicone fingertips for handling small parts
- Stretchable mesh upper conforms and protects knuckles
- Durable Clarino palm and reinforced forchette finger protection

DEFLECT™

That extra layer of protection when the conditions are a moderately cool 50°F/0°C. The cool weather Deflect mates a wind & rain resistant upper with a standard Clarino palm for moderate breathability.

- Upper uses a wind & water resistant membrane with a warm fleece inner
- Brushed microfiber thumb wipe
- High visibility reflective piping
- BG pad for ulnar nerve protection

ENDURO® KID'S

Modeled after the aggressively-styled Enduro, this mini model offers full finger protection for the fledgling mountain biker.

- Knuckle padding is perforated to dissipate heat
- Thin palm for bar control
- Stretchable, durable mesh top

KIDS PULSE™

Designed specifically for kids, the Pulse glove not only looks fast, but offers genuine performance for those just getting off the start line.

- Thick print finger graphic for durability
- Soft and absorbent wiping surface on thumb
- Children's sizing

EQUINOX™

The fleece-lined Equinox is like a hot pocket for your hands. Windproof, yet breathable for dry conditions down to 50°F/10°C.

- Windproof finger protection for top of fingers and front of hand
- Brushed Microwipe™ thumb wipe
- BG pad for ulnar nerve protection
- Slip-on cuff has extra length for coverage
- Reflective printing for visibility

NEOPRENE S-LOGO GLOVE

A favorite of our sponsored pro riders training in the early season, this low-profile, form fit glove uses wetsuit technology to provide dexterity and warmth.

- 3mm neoprene upper for warmth
- Fluid-sealed seams for strength and flexibility
- Logo print graphic on palm for enhanced grip

BG® COMFORT LOCKING GRIP / BG® COMFORT GRIP SHORT

- Medically designed by ergonomic specialist Dr. Roger Minkow to prevent cycling related numbness and weakness of the hands
- Triple density for the utmost security and comfort
- Available in regular length and short, twist shift version

FUSE LOCKING GRIP

- Double density compound for improved comfort and bar adherence, BMX-inspired locking grip
- Low profile provides better control on the bars
- Inner flange prevents hands from slipping onto clamp
- Secure locking clamp holds the grip in position
- Open ended design for use with bar ends or metal end plugs

FUSE GRIP

- Single density, BMX-inspired grip
- Low profile provides better control on the bars
- Fuse grip has grooves for wire-on securing
- Inner flange prevents hands from slipping
- Closed end design

BG MTN GRIP

- Medically designed by ergonomic specialist Dr. Roger Minkow to prevent cycling related numbness and weakness of the hands
- Triple density for the utmost security and comfort
- Low profile design provides maximum control for mountain riding

SIDEWINDER™ GRIP

- Super low profile, MTB style
- Functional, scaled pattern provides maximum control
- Right/left specific design
- Double density compound for improved comfort and bar adherence

ROCCA™ LOCKING GRIP

- Shock-absorbing, MTB style with soft, thick padding for comfort
- Textured pattern provides non-slip performance
- Double density compound for improved comfort and bar adherence

XC LOCKING GRIP

- Low profile provides a more direct feel and control on the handlebar
- Double density compound for improved comfort and bar adherence

ENDURO® GRIP

- Shock-absorbing, MTB style with soft, thick padding for comfort
- Textured pattern provides non-slip performance
- Double density compound for improved comfort and bar adherence

COMMUTER GRIP

- Double density design is simple and functional
- Foam outer layer is lightweight and absorbs vibration
- Shaped to provide maximum comfort and stability for the hands

LOCKING END CAP

- Compatible with Rocca or XC locking grips only
- Closed end for additional bar-end protection
- Includes Allen key for adjustment

ROUBAIX TAPE

Our Roubaix tape provides non-slip comfort, with an elastomer gel backing for vibration-damping performance.

- Sueded finish provides non-slip comfort on the handlebar
- More than double the elastomer thickness of competitors gel tapes
- Color matched end plugs

SPEED ZONE® COMP

- Wireless
- Black, white and red colors
- All the same features as the Speed Zone Elite, plus:
 - a wireless speed sensor
 - interval timer
 - wired cadence optional
 - stopwatch
 - max. cadence
 - beeper alert
 - avg. cadence

BG BAR PHAT™

A unique and lightweight Body Geometry bar damping system that dramatically improves road bike comfort. Tests show a reduction in hand pressure up to 50%.

- Clear, shock-absorbing gel pads fit road bar top and drops without adding to diameter
- New gel pad design can be trimmed and reused for different bars
- Available in 2.5 or 4.5mm thickness

S-WRAP™ TAPE

A low-profile solution for reducing vibration and improving comfort on road bike handlebars.

- Premium quality cork tape stretches easily without tearing
- More than double the elastomer thickness of competitors gel tapes
- Silver bar plugs

SPEED ZONE® ELITE

- Wired
- Black, white and red colors
- All the same features as the Speed Zone Sport, plus:
 - temperature
 - 2nd wheel compatibility
 - cadence
 - max. cadence
 - avg. cadence

SUPER PHAT™ BAR GEL

Ideal for endurance riding, this molded bar padding system provides maximum comfort and vibration damping performance.

- Lightweight molded foam padding contours to the bar for maximum comfort
- Gel inserts in key contact areas for additional damping performance

SPEED ZONE SPORT

- Wireless/Wired
- Black, white and red colors
- Features:
 - speed
 - max. speed
 - avg. speed
 - odometer
 - trip meter
 - speed comparator
 - auto timer

AIRTOOL™ ROAD

- Aluminum shaft, handle and chamber with Presta-only head
- End cap unscrews to reveal storage chamber in the handle for patches, etc.
- Water bottle boss mounted bracket included

AIRTOOL™ MINI

- Aluminum shaft, handle and chamber with convertible Shrader/Presta head
- Mini length body is easy to store on the bike or in a jersey pocket
- End cap unscrews to reveal storage chamber in the handle for patches, etc.
- Water bottle boss mounted bracket included

AIRTOOL™ CARBON MINI

- Carbon designed handle and barrel combined with convertible Shrader/Presta head
- Mini length body is easy to store on the bike or in a jersey pocket
- End cap unscrews to reveal storage chamber in the handle for patches, etc.
- Water bottle boss mounted bracket included

AIRTOOL™ SPORT

- SwitchHitter Head Technology automatically switches between Shrader and Presta valves
- Composite barrel with steel plunger shaft
- Oversized gauge for easy reading
- 42" (110cm) hose length makes the pump easy to use

VIRTUE™ AERO BOTTLE AND CAGE

- The world's most aerodynamic water bottle
- Same great flow and leak-free nozzle as other Specialized bottles
- Designed to mate seamlessly with our Transition bike for the most aerodynamic ride possible
- Dual position mounting allows use on a variety of TT and standard frames

BIG MOUTH™/LITTLE BIG MOUTH™

- 24 and 21 oz. versions
- Tight-sealing Big Mouth screw top is big enough for ice cubes and powder drink mix
- Large, soft poppet top is easy to activate, delivers excellent flow and seals tight
- BPA-free plastic—made of 100% FDA food-grade material and printed with non-solvent base (UV cured) CPSC-approved ink

CPR02

- Quick-fill CO² inflation device, reworked for 2009
- Utilizes threaded 16g cartridge
- Compression release allows for controlled distribution and safe storage of unused CO²

COMBO2

- Combines quick use of CO² with the reliability of a traditional pump, revised for 2009
- Utilizes threaded 16g cartridge
- Cartridge stores inside the pump body
- Compression release allows for controlled distribution and safe storage of unused CO²
- Reduced weight - 80g from '08

AIRTOOL™ MTB

- Aluminum shaft, handle and chamber with convertible Shrader/Presta head
- Larger volume body for pushing more air
- End cap unscrews to reveal storage chamber in the handle for patches, etc.
- Water bottle boss mounted bracket included

AIRTOOL™ DUAL

- Aluminum shaft, handle and chamber with dual Shrader/Presta valve
- Unique moto-influenced valve to eliminate unwanted air loss during installation
- Larger volume body for pushing more air
- End cap unscrews to reveal storage chamber in the handle for patches, etc.
- Water bottle boss mounted bracket included

WINDPIPE™

- Aluminum barrel with Switch-Hitter Head Technology automatically switches between Shrader and Presta valves
- Larger diameter barrel fills large volume tires fast
- Ergonomic T-handle also works as a tire lever and holds an emergency glueless patch kit
- Includes mounting bracket

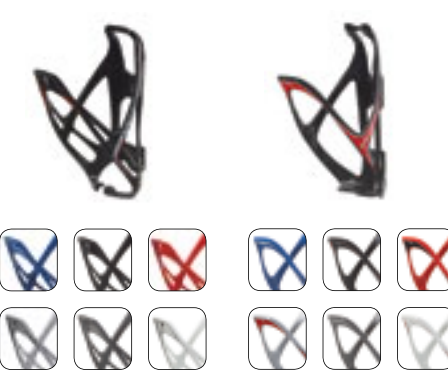

WINDPIPE™ SHOCK

- Aluminum barrel with thread-on Schrader head and Presta adapter
- From fast inflation mode to high-pressure mode (up to 220 PSI) in one twist
- Swivel hose for easy access to tires or shocks
- Ergonomic T-handle also works as a tire lever and holds an emergency glueless patch kit
- Includes mounting bracket

COLORS/GRAPHICS BOTTLES

- 24 oz. solid color bottles, 21 oz. graphics bottles
- Tight-sealing wide mouth screw top is big enough for ice cubes and powder drink mix
- Large, soft poppet top is easy to activate, delivers excellent flow and seals tight
- BPA-free plastic—made of 100% FDA food-grade material and printed with non-solvent base (UV cured) CPSC-approved ink

Mountain

Road

RIB CAGE®

- Interchangeable for road or mountain bikes
- Super strong composite material won't corrode or scratch bottles

S-WORKS RIB CAGE® CARBON

- 100% carbon fiber—our lightest weight cage, at only 23g
- Secure bottle retention, yet easy in-and-out
- Maximum versatility: compatible with all derailleur mounts/clamps
- Available in blue, black/red and black/silver colors

CASCADE™ CAGE

- Holds short or tall bottles
- Convenient and easy in-and-out

E-CAGE™ 6.2/5.0

- Lighter than a standard alloy cage
- 5.0 or 6.2mm diameters suitable for road or mountain
- Flat front section holds the bottle securely

ALLOY CAGE 6.2/5.0

- 5.0 or 6.2mm diameters suitable for road or mountain
- Proven design over 15 years

FUTURE SHOCK® PUMP

- Uniquely designed gauge with protective over-molding comes with two indicators that can be preset to favored fork and rear suspension pressure settings
- Compact design allows for easy on-trail storage in hydration packs
- Fits Schrader valve on most front and rear shocks; includes Presta valve converter
- Rated to 220 PSI

AIRTOOL™ PRO

- Aluminum barrel with steel plunger shaft
- Tough alloy Switch-Hitter Head Technology automatically switches between Shrader and Presta valves
- Pressure release valve in the handle allows for exact inflation
- Oversized gauge for easy reading
- 42" (110cm) hose length makes the pump easy to use

AIRTOOL™ COMP

- Aluminum barrel with steel plunger shaft
- Composite SwitchHitter Head Technology automatically switches between Shrader and Presta valves
- Oversized gauge for easy reading
- 42" (110cm) hose length makes the pump easy to use
- Available in camo, yellow, red, silver and white colors

BRIEFCASE

- 840D nylon—coated for water resistance
- Padded shoulder strap is adjustable
- Internal laptop sleeve with Velcro closure
- Zippered expansion panel for increased volume

MESSENGER BAG

- 1680D x 1260D nylon—coated for water resistance
- Adjustable padded shoulder strap and waist strap
- Side and compression straps
- Dimensions: 19" x 11" x 7" / Volume: 2240 cu. in.

BACKPACK

- Durable ripstop outer shell with ballistic bottom for durability
- Side mesh pockets with elastic cinches
- Detachable, padded computer holder with additional organizer for supplies
- Mesh helmet hammock

MINI WEDGIE

- Narrow profile; room for two tubes and other essentials
- 840D nylon—coated for water resistance
- Internal Neoprene sleeve to hold tools
- Volume: 48.5 cu. in.

WEDGIE

- Extra expansion panel to hold all essentials
- 840D nylon—coated for water resistance
- Internal Neoprene sleeve to hold tools
- Volume: 98–119 cu. in.

DIRT BAG

- High capacity for all-day riding
- 840D nylon—coated for water resistance
- Internal Neoprene sleeve to hold tools
- Volume: 128–181 cu. in.

TEAM BAG PRO

- Durable nylon fabrics—coated for water resistance
- 3 compartments, 4 external pockets
- Wheels, telescoping handle and stiffened bottom
- Detachable padded shoulder strap
- Dirty clothes and dirty shoes stuff bag
- Dimensions: 14" x 14" x 34" / Volume: 8925 cu. in.

TEAM BAG COMP

- Durable nylon fabrics—coated for water resistance
- 3 compartments including a convertible main compartment
- Detachable padded shoulder strap
- Dirty clothes stuff bag
- Dimensions: 12" x 14" x 28" / Volume: 4988 cu. in.

TEAM BAG SPORT

- Durable nylon fabrics—coated for water resistance
- Carry-on size
- Detachable padded shoulder strap
- Dimensions: 9" x 14" x 22" / Volume: 2772 cu. in.

EMT SURVIVAL KIT

- Black Mini Wedgie bag
- SK EMT Tool (only offered in this kit): 3,4,5,6, tire lever and Phillips head screwdriver
- FlatBoy glueless patch kit (6 patches per kit)

EMT RACE MULTI TOOL

- Race-caliber weight
- Ti bolts / Magnesium side plates
- 3/4/5/6/8 Allen
- T25 Torx / #1 Phillips
- Under 130g
- Chain breaker—8/9/10 speed compatible

EMT MINI MULTI TOOL

- 3/4/5/6/8 Allen
- T25 Torx / #1 Phillips
- Chain breaker
- 6 cm long
- Under 150g

EMT MICRO MULTI TOOL

- Lightest weight 6-function tool on market
- 2.5/3/4/5/6 Allen
- #1 Phillips
- 4.5 cm long
- Under 75g

EMT COMP MULTI TOOL

- Exclusive disc pad separator and shims
- 2/2.5 (angled); 3/4/5/6/8 Allen; and 6/8/9/10 Box wrenches
- T25 Torx / #1 Phillips / 4.5mm flat blade / Teflon-coated tire lever
- Easy-to-use chain breaker / bottle opener
- 8.5 cm long
- Only 210g

EMT SPORT MULTI TOOL

- Easy-stow size
- 2/3/4/5/6/8 Allen
- #1 Phillips / 4.5mm flat blade
- 8.5 cm long
- Under 125g

S-WORKS BARMAC™ WEDGE

- Adjustable 1-piece bar/stem system in 3k SL high modulus FACT 100% composite weave
- Adjustable angle alloy internal mechanism offers 8° range (-1°, +1°, +3°, +5°, +7°)
- Weight: 380g (42cm x 110mm)
- Dimensions:
 - Stem: 90/100/110/120/130mm
 - Bar: 40/42/44cm
 - Shallow drop: 132mm drop x 78mm reach
 - Deep drop: 147mm drop x 79mm reach

S-WORKS SL ADVANCED COMPOSITE HANDLEBAR

- 3k SL high modulus FACT advanced composite weave combines high strength and stiffness with excellent comfort
- Weight: 230g (42cm)
- Dimensions:
 - Bar: 40/42/44cm center-to-center
 - Shallow drop: 132mm drop x 78mm reach
 - Deep drop: 147mm drop x 79mm reach

S-WORKS ADVANCED COMPOSITE HANDLEBAR

- Full FACT 3k weave advanced composite design
- Weight: 250g (42cm)
- Dimensions:
 - Bar: 42/44cm center-to-center
 - Deep drop: 147mm drop x 79mm reach

PRO ROAD ERGO HANDLEBAR

- 6066 A1™ butted, lightweight, high strength design
- Ergo shaping provides larger, more comfortable surface area on perches
- Weight: 246g (40cm)
- Dimensions:
 - Bar: 40/42/44/46cm center-to-center
 - Shallow drop: 132mm drop x 78mm reach
 - Deep drop: 147mm drop x 79mm reach

ROUBAIX ERGO ALLOY HANDLEBAR WITH ZERTZ

- 2014 A1 butted, lightweight, high strength design with Zertz viscoelastic vibration-damping clamp section
- Ergo shaping provides larger, more comfortable surface area on perches
- Weight: 320g (40cm)
- Dimensions:
 - Bar: 40/42/44cm center-to-center
 - Shallow drop: 132mm drop x 78mm reach

TRANSITION AERO HANDLEBAR WITH ZERTZ

- 6061 aluminum alloy with Zertz viscoelastic vibration-damping clamp section
- Flattened perch section with 4" downtip offers room for hands under the armrest pads
- Weight: 340g (42cm)
- Dimensions:
 - Bar: 40/42/44cm center-to-center

SPECIALIZED TOP MOUNT BRAKE LEVERS

- Relieved lever design with sculpted surfaces for comfortable two-finger braking from the bar tops
- Offers multi-position braking options
- Weight: 80g/pair
- Available sizes:
 - 23.8mm (standard road bar size)
 - 31.8mm (oversized bar clamp size)

THANKS TO ITS INTEGRATION with our oversized BB on bikes like the new Roubaix, the S-Works FACT road crank is the stiffest on the market and still a whole 100 grams lighter than the Shimano Dura-Ace.

S-WORKS ROAD CRANKSET

- Best strength-to-weight crank on the market
- Second-generation hollow carbon crank arms offer superior stiffness
- Oversized alloy spindle with Hirth coupling interface
- Self-adjusting oversized 42mm cartridge bearings
- S-Works chainrings and spiders available separately in standard and compact sizes
- Fits Specialized frames with oversized BB; BB30 compatible

S-WORKS CRANK SPIDER

- Available in standard 130mm and compact 110mm
- Weight:
 - Compact: 60g
 - Standard: 75g

S-WORKS CHAINRING SET

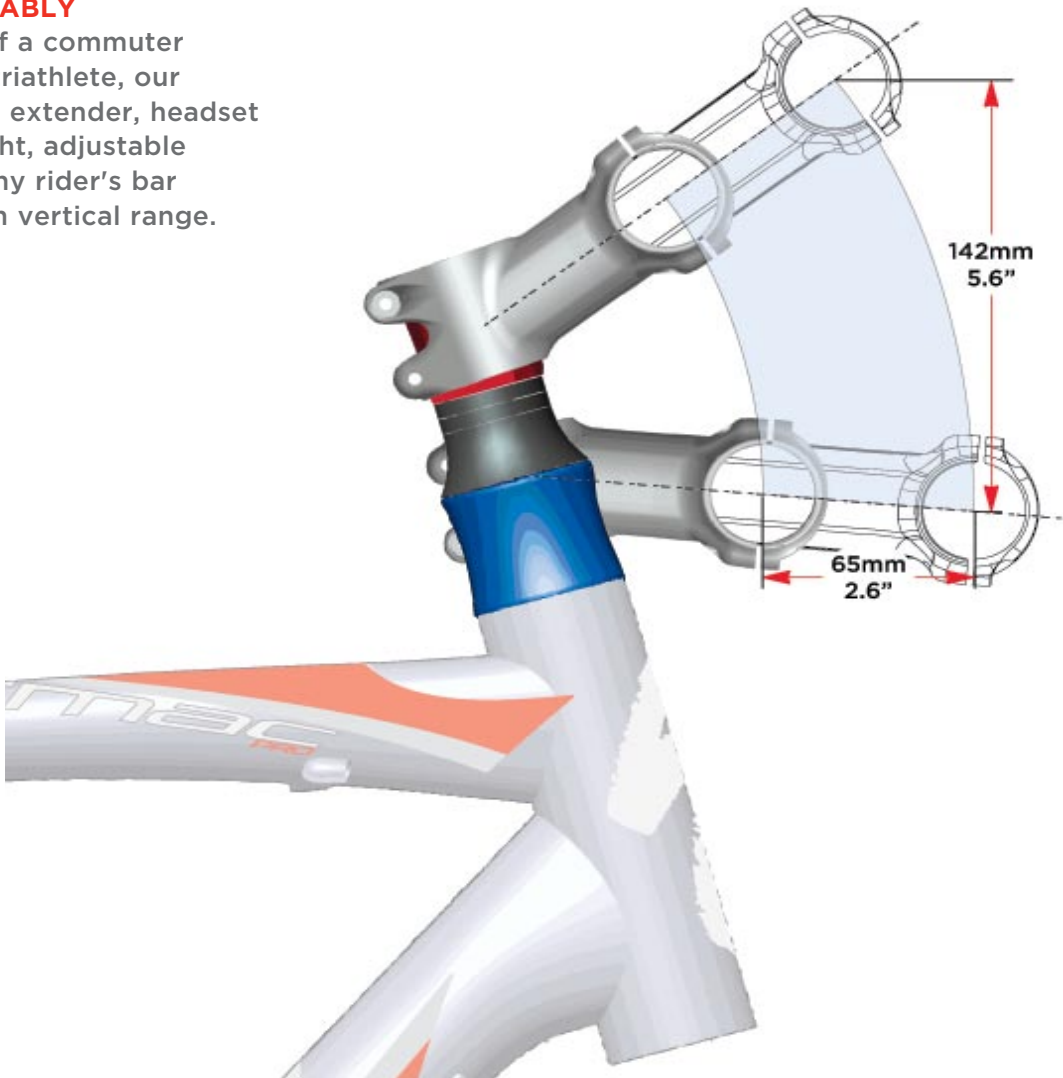

- 7075 T6 aluminum alloy rings
- Ni-Boron slick surface coating improves shifting performance and reduces wear
- Stiff ring design with CNC-machined profile and pick-up ramps provides excellent power transfer and shifting quality
- Riveted stainless steel shift pins
- Aluminum chainring bolts
- Weight:
 - Compact: 149g (per set w/ bolts)
 - Standard: 157g (per set w/ bolts)
- Available sizes: 130 x 53/39, 110 x 50/34, 110 x 48/34

PRO CHAINRING SET

- 7075 T6 aluminum alloy rings
- Stiff ring design with CNC-machined profile and pick-up ramps provides excellent power transfer and shifting quality
- Riveted stainless steel shift pins
- Aluminum chainring bolts
- Weight:
 - Compact: 142g (per set w/ bolts)
 - Standard: 150g (per set w/ bolts)
- Available sizes: 130 x 53/39, 110 x 50/34, 110 x 48/34

FROM THE COMFORTABLY UPRIGHT POSITION of a commuter to the aero tuck of a triathlete, our proprietary head tube extender, headset spacers and lightweight, adjustable stems can fine-tune any rider's bar height within a 142mm vertical range.

CARBON HEADSET CONE

- Cleans up the appearance of the shim stack between the stem and the headset
- Available sizes for Specialized Mindset press-in headsets (46mm): 20mm/30mm/40mm
- Available sizes for Specialized Mindset (Campagnolo Standard) headsets (48mm): 8mm/20mm/30mm/40mm

HEADSET EXTENDER

- Extends head tube to raise stem 40mm
- Available for:
 - Specialized Mindset press-in headsets (46mm)
 - Specialized Mindset (Campagnolo Standard) headsets (48mm)

SPECIALIZED EXPANDER PLUG

- 100% alloy expander plug
- Expander plug comes with:
 - 22.3mm red sleeve for mountain bike carbon steerer tubes
 - 23.4mm black sleeve for road bike carbon steerer tubes
- Weight: 26g

S-WORKS PAVÉ™ SL ADVANCED COMPOSITE SEATPOST

- 3k SL high modulus FACT advanced composite weave combines high strength and stiffness with excellent comfort
- 250/350mm length options
- Weight: 180g (250mm); 200g (350mm)

S-WORKS PAVÉ™ SL ZERO OFFSET ADVANCED COMPOSITE SEATPOST

- 3k SL high modulus FACT advanced composite weave combines high strength and stiffness with excellent comfort
- Zero offset head assembly
- 350mm length
- Weight: 200g

PAVÉ™ PRO ADVANCED COMPOSITE SEATPOST

- 3k FACT advanced composite weave combines high strength and stiffness with excellent comfort
- 350mm length
- Weight: 220g

S-WORKS PRO-SET STEM

- Road/MTB compatible, 3D-forged 7050 aluminum alloy stem with carbon/alloy faceplate
- Carbon top cap and 4°, 2°, 0° CNC alloy shims
- Available in 12° and 17° angles
 - 12°: 10 position angle range: +/- 8° to +/- 16°, in 2° increments
 - 17°: 10 position angle range: +/- 13° to +/- 21°, in 2° increments
- 7 sizes
- Weight: 150g (110mm)

SPECIALIZED PRO-SET STEM

- Road/MTB compatible, 3D-forged 7050 aluminum alloy stem
- Top cap and 4°, 2°, 0° CNC shims
- Available in 12° and 17° angles
 - 12°: 10 position angle range: +/- 8° to +/- 16°, in 2° increments
 - 17°: 10 position angle range: +/- 13° to +/- 21°, in 2° increments
- 7 sizes
- Weight: 160g (110mm)

SPECIALIZED COMP-SET STEM

- Road/MTB compatible, 3D-forged 6061 alloy
- Top cap and 4°, 2°, 0° shims
- Available in 12° and 24° angles
 - 12°: 10 position angle range: +/- 8° to +/- 16°, in 2° increments
 - 24°: 5 position angle range: +20° to +28°, in 2° increments
- 12 sizes
- Weight: 172g (110mm)

S-WORKS TRANSITION CARBON SEATPOST

- High modulus FACT advanced composite weave
- Aluminum micro-adjust single bolt cylinder head assembly
- Reversible head assembly allows for ultra-high adjustability
- Design specific to the Specialized Carbon Transition frames
- 3 setback options available:
 - Zero setback: 100 and 150mm positions
 - Standard setback: 160 and 210mm positions
 - Team setback: 200 and 225mm options
- 450mm length

SPECIALIZED ROAD SEAT COLLAR

- Alloy collars feature angled slots
- Available sizes:
 - S-Works 32.6mm extended collar (27mm tall at front) fits:
 - 2008 S-Works Tarmac SL2/Tarmac Pro
 - 2007 S-Works Tarmac SL
 - 2007 Tarmac Pro
 - 2007/2008 S-Works Roubaix
 - 2007/2008 Roubaix Pro
 - 2007/2008 Roubaix Expert
 - S-Works 30.7mm extended collar (27mm tall at front) fits:
 - 2006 S-Works Tarmac SL
 - S-Works 32.6mm standard collar (14mm tall) fits:
 - 2006-2008 Roubaix (all models)
 - 2006-2008 Ruby (all models)
 - Specialized 31.8mm standard collar (14mm tall)

TRICROSS® RACK SET

- Alloy front and rear rack system
- Fits Specialized Tricross frames and other frames with cantilever front brakes and rack eyelets
- 1 x alloy standard fit rear rack for panniers; 1 x front fork rack holds a six-pack
- Integrated bottle opener

COMBINING OUR S-WORKS FACT MOUNTAIN CRANK with an oversized BB creates one of the stiffest, yet lightest, off-road cranks available—a full 110 grams lighter than a Shimano XTR.

S-WORKS MOUNTAIN CRANKSET

- Best strength-to-weight crank on the market
- Second-generation hollow carbon crank arms offer superior stiffness
- Oversized alloy spindle with Hirth coupling interface
- Self adjusting oversized 42mm cartridge bearings
- Fits Specialized frames with oversized bottom bracket shell
- Fast and smooth shifting S-Works chainrings
- S-Works chainrings and spiders available separately in triple and double configurations
- Available in 2 lengths: 170 / 175mm
- Weight (172.5mm crank including all hardware):
 - Double rings: 667g
 - Triple rings: 684g

S-WORKS MOUNTAIN CHAINRING SETS AND SPIDERS

- 7075 T6 aluminum alloy rings
- Ni-Boron slick surface coating improves shifting performance and reduces wear
- Stiff design rings with CNC-machined profile and pick-up ramps provide excellent power transfer and shifting quality
- Riveted stainless steel shift pins
- Aluminum chainring bolts
- Available sizes:
 - Double: 42/26t, 42/28t
 - Triple: 44/32/22t
- Weight:
 - Double: 184g (per set with bolts)
 - Triple: 201g (per set with bolts)

S-WORKS E150 DUAL CROWN FORK

- E-150 integrated fork system offers a greater stiffness-to-weight ratio through:
 - Forged aluminum dual-crown system with integrated crown/stem
 - CNC-machined magnesium sliders with 25mm thru-axle
- Axle system offers a positive rotor/caliper alignment and a self-centering non-drive side fork leg to reduce stanchion/bushing friction without compromising fork stiffness
- 7000 series hard anodized and super polished aluminum stanchion tubes increase stiffness and reduce friction
- High quality hard anodized, laser etched aluminum knobs
- Adjustable travel from 110–150mm with lightweight air cartridge
- Low speed compression adjustment adapts to trail and terrain conditions to increase traction and bump performance
- Rebound bleed system blends with shim-controlled rebound circuit to tune for different spring rates
- Rebound circuit features a return-speed-sensitive system which senses return speed/travel to optimize tire contact and ride performance
- Externally tunable damper cartridge features an internal floating piston that separates air and oil to increase performance consistency
- Spike Valve damper optimizes bump performance
- Sliders feature steel threaded inserts for long thread life and easy replacement
- Internally threaded aluminum steerer tube with custom cap/bolt eliminates star nut
- Stems available in 60/80/100mm lengths
- Available in medium and large lengths
- Weight: 2600g (5.72 lbs)

E150 CROWN STEM

- High strength-to-weight ratio, stiffer and lighter than traditional stems
- Forged and CNC-machined 7075 aluminum
- 4-bolt relieved faceplate, oversized 31.8mm handlebar clamp
- Stems available in 60/80/100mm lengths
- Weight: 330g (80mm)

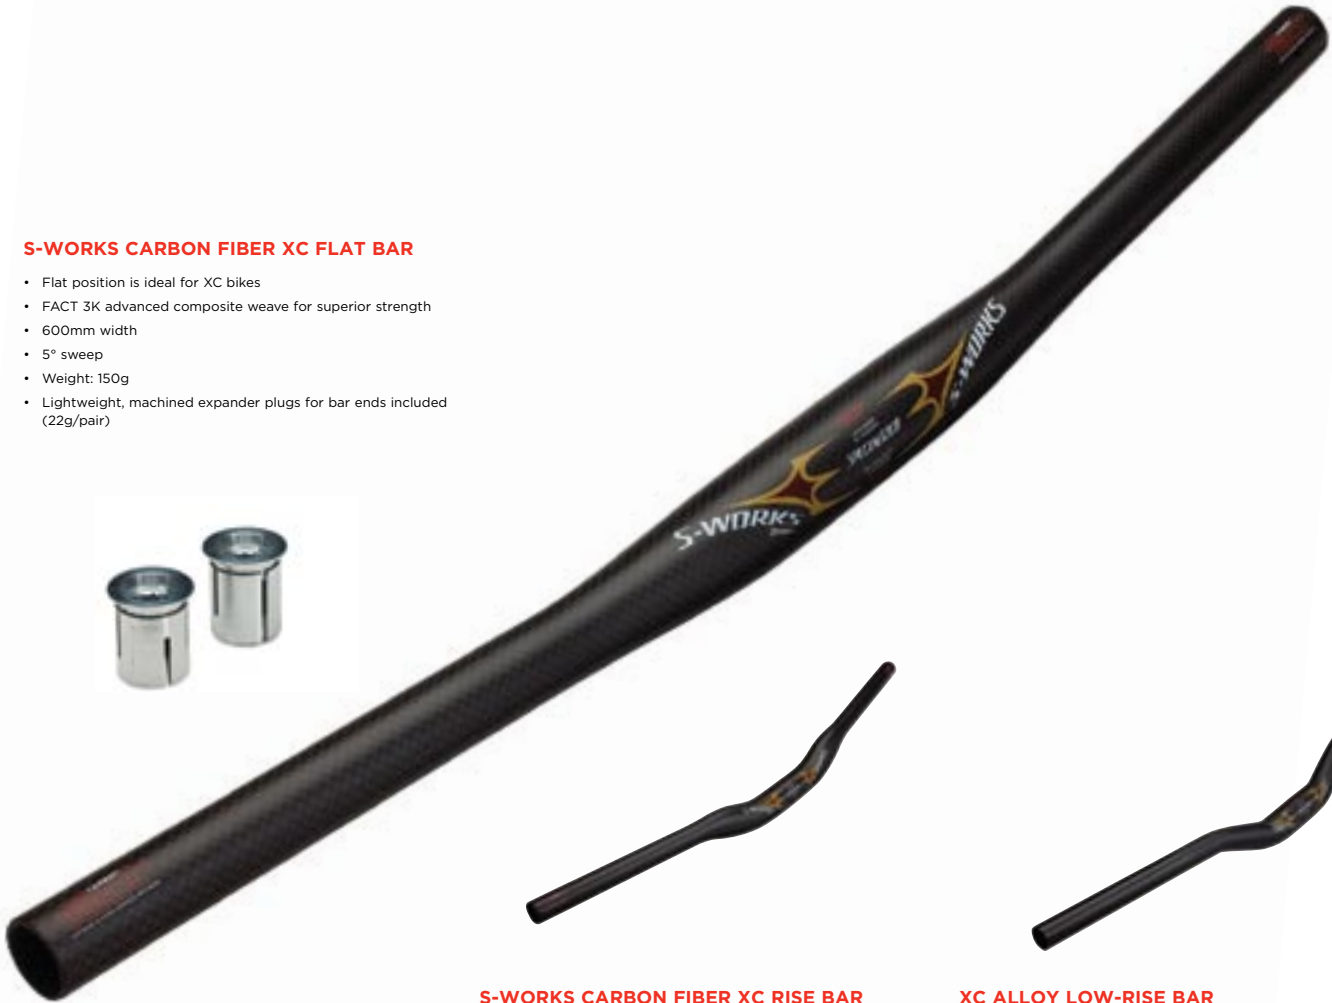

E150 25MM ENDURO HUB

- Oversized 25mm axle system is stronger and stiffer
- 32-hole
- Sealed precision cartridge bearings

S-WORKS CARBON FIBER XC FLAT BAR

- Flat position is ideal for XC bikes
- FACT 3K advanced composite weave for superior strength
- 600mm width
- 5° sweep
- Weight: 150g
- Lightweight, machined expander plugs for bar ends included (22g/pair)

S-WORKS CARBON FIBER XC RISE BAR

- Low rise (1") position ideal for short travel XC and Enduro bikes
- FACT 3K advanced composite weave for superior strength
- 640mm width
- 6° upsweep; 8° backsweep
- Weight: 175g

XC ALLOY LOW-RISE BAR

- XC-oriented mid rise (1.0") position ideal for short-travel, XC and Enduro bikes
- 2014 butted aluminum alloy
- 640mm width
- 6° upsweep; 8° backsweep
- Weight: 208g

XC ALLOY FLAT BAR

- XC-oriented flat position ideal for hardtail and short-travel XC bikes
- 2014 butted aluminum alloy
- 600mm width
- 6° backsweep
- Weight: 149g

ENDURO ALLOY MID-RISE BAR

- Enduro-oriented mid rise (1.5") position ideal for long-travel, All Mountain and Enduro bikes
- 2014 butted aluminum alloy
- 660mm width
- 6° upsweep; 9° backsweep
- Weight: 230g

DEMO ALLOY MID-RISE BAR

- Downhill-oriented mid rise (1.5") position ideal for long-travel, All Mountain and DH bikes
- 6066 butted aluminum alloy
- 680mm width
- 6° upsweep; 9° backsweep
- Weight: 311g

C1 CARBON OVERENDZ BAR ENDS

- 3k FACT advanced composite extensions
- 6061 aluminum alloy clamp interface
- Perpendicular clamp design maximizes clamping force and minimizes pressure points on handlebars
- Weight: 115g
- NOTE: Specialized CNC Alloy Bar End Plugs are required with carbon bars

P1 OVERENDZ BAR ENDS

- Injection molded nylon composite construction with soft rubber grip surface
- 6061 aluminum alloy clamp interface
- Perpendicular clamp design maximizes clamping force and minimizes pressure points on the handlebars
- NOTE: Specialized CNC Alloy Bar End Plugs are required with carbon bars

CNC ALLOY BAR END PLUGS

- 100% CNC-machined alloy 4-piece design
- Dual-side loaded cylinder design ensures even pressure across full width of plug and bar end clamp
- Aluminum bar end plug lip protects carbon bars from impact
- Expansion range: 18.5mm-20.0mm
- Weight: 22g/pair
- NOTE: Specialized bar end plugs are required for bar end use with Specialized carbon bars

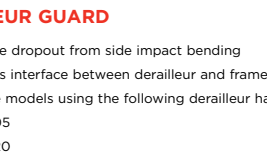

DIRT RODZ BAR ENDS

- Light and strong forged A1 Premium Aluminum construction
- Flush clamp design

DERAILLEUR GUARD

- Protects the dropout from side impact bending
- Strengthens interface between derailleur and frame
- Fits all bike models using the following derailleur hanger models:
 - 9894-4205
 - 9895-4020

SPECIALIZED CUSTOM CHAINSTAY PROTECTOR SLEEVE

- Quiets derailleur and chain contact
- Compression-molded 5mm/2.5mm Neoprene on XC-oriented designs; 5mm Neoprene on DH and freeride; 3.5mm on O5 Enduro
- Abrasion-resistant outer covering with stitched edges for durability
- Fit specifically to the following models:
 - FSRxc = 2001-2004 FSRxc
 - Hardtail = 1999-2006 S-Works Carbon HT/1999-2006 Stumpjumper HT
 - Enduro = 2002-2005 Enduro FSR (4.5"/5.2")/2003-2004 Enduro SX/2004-2006 Stumpjumper FSR/2005
 - 2008 FSRxc
 - Epic = 2003-2005 S-Works Epic FSR/2003-2005 Epic FSR

SPECIALIZED UNIVERSAL CHAINSTAY PROTECTOR SLEEVE

- Compression-molded 3mm Neoprene
- Abrasion-resistant outer covering with stitched edges for durability
- Available in the following sizes:
 - Small for chromoly chainstays
 - Medium for standard aluminum chainstays
 - Large for oversized aluminum chainstays

MUDFLAP SHOCK PROTECTOR

- Custom fit for frame clearance and precise seatstay bridge fit (disc-only models)
- Shape optimized to keep mud off shock seal
- Stumpjumper and Enduro: Lower tab extends below seatstay bridge to keep lower shock eye clean
- Enduro (6") fender fits 2005-2006 Enduro (6")/2006-2008 SX/SX Trail
- Enduro protector fits 2002-2005 Enduro FSR (4.5" / 5.2")/2003-2004 Enduro SX models
- Stumpjumper protector fits 2004-2008 Stumpjumper FSR/2005-2008 FSRxc models

1.5" HEAD TUBE ADAPTER

- Designed specifically for Specialized mountain bike frames with a 1.5" lower headset cup to reduce to 1-1/8"

COMMAND POST MTN SEATPOST

- Exclusive mechanical 3-position locking height adjustment
- 100mm height adjustment range
- On-the-fly adjustable ride via a handlebar mounted lever
- Keyed, locking system eliminates saddle movement
- 30.9mm diameter
- 450mm length
- Weight: 440g (post only)

PRO-SET 31.8MM MTN STEM

- 3D-forged and CNC-machined 6061 alloy
- 4-bolt oversized 31.8mm handlebar interface with relieved faceplate
- 12° stem, equipped with alloy top cap & 4°, 2°, 0° CNC alloy shims
- 10 position angle range, +/- 8° to 16°, in 2° increments
- Available in 5 lengths: 60/75/90/105/120mm
- Weight: 170g (90mm)

S-WORKS CARBON MTN SEATPOST

- 3k SL high modulus FACT advanced composite weave
- Aluminum micro-adjust single bolt cylinder head assembly
- 30.9mm diameter
- Available lengths: 350/400mm
- Weight: 215g (400mm)

PRO ALLOY MTN SEATPOST

- 2014 aluminum alloy
- Aluminum micro-adjust single bolt cylinder head assembly
- 30.9mm diameter
- 350mm length
- Weight: 275g

SPECIALIZED Q/R SEAT COLLAR

- 34.9mm inner diameter fits all alloy Specialized mtn frame designs with 30.9mm posts and 34.9mm O.D. seat tubes
- 36.9mm inner diameter fits all carbon Specialized mtn frame designs with 30.9mm posts and 36.9mm O.D. seat tubes
- Brass lever contact surface offers a more positive and consistent closure

SPECIALIZED SEAT COLLAR

- 34.9mm inner diameter fits all alloy Specialized mtn frame designs with 30.9mm posts and 34.9mm O.D. seat tubes
- 36.9mm inner diameter fits all carbon Specialized mtn frame designs with 30.9mm posts and 36.9mm O.D. seat tubes

LO' PRO MAG 2 PLATFORM PEDALS

- Low profile, ultra-light magnesium pedal body
- New oversized heat treated Cr-Mo spindle features improved wrench flats and an 8mm Allen key axle slot
- Concave body for superior grip
- 4-bearing design includes two cartridges, one needle and one bushing
- Adjustable spin resistance with removable O-ring seals
- Replaceable Allen head bolt style traction pins
- Super durable powder coat finish
- Weight: 17.5 oz/pair

FUSE GRIP AND BAR END SET

GRIP

- Soft 25A Durometer Kraton rubber
- Micro flange design is perfect for tricks and provides space for shifters
- 140mm length

BAR END

- CNC Machined
- Fits most Cr-Mo handlebars
- Recessed flange fits over the end of the handlebar
- Protects grips and bar from damage

FUSE SL JUMPING SADDLE

- Kevlar rear, sides and nose
- Superlight foam
- No-slip mid section traction panels
- Hollow 9mm Cr-Mo rails for superior strength
- X-brace bar for increased resistance to lateral bending
- PVC front and rear bumpers/handles to protect the saddle
- Weight: 12.0 oz

FUSE 14MM PEG SYSTEM

- Heat-treated steel pegs
- 3-position anti-roll feature
- Includes CPSC fork adapter
- Fits 14mm axles
- Weight: 14.0 oz
