# SPORTSGLASSES

## CAN YOUR STANDARD SUNGLASSES HANDLE SUDDEN CHANGES?

NO PROBLEM WITH A PAIR OF BBB SPORTSGLASSES!

With BBB sportsglasses, your eyes are protected under any weather condition. That's because most BBB sportsglasses come with 3 interchangeable and shatter-proof polycarbonate (PC) lenses. Changing weather? Simply take off your lenses and snap on an appropriate one. According to the CE-standard BBB lenses can be divided in 5 categories. Each categorie has it's own percentage of light transmission which makes the lenses appropriate for certain circumstances. The light transmission of a lens depends on the color of the lens and the lens coating. All BBB lenses give a 100% protection from harmful UV rays, up to 400nm! Additionally all BBB lenses are de-centered. This makes sure that you will always have a clear view without any deformation.
