About HYGIA

A member of CFTC group. CFTC was founded on 1992 with expertise on fineblanking metallic components for massive electronic storage devices and motorized vehicles, headquartered in mid. Taiwan with branch factories in China and Malaysia, ISO-9002, TS-16949 certified.

As a developer of disc brake technology, HYGIA makes her own brake designs with promise of safety ride to her customers, and treasures customer needs as the driving force to perfection and excellence.

ELITE (ELT series) Hydraulic Disc Brake

To ELITE, all wild challenges from various terrains only turn to be frozen pictures in one grip

Application | Downhill · Freeride

Features | A heavy-power full hydraulic disc brake set, equipped with artistic aluminum monobody caliper, superior in rigidity and sealing effect, capable of delivering large braking power thru twin active pistons in open system design, the brake pads are self-adjustable; dexterous aluminum lever set contains a hidden reservoir, flip-flop design allows left-and-right interchangeability, ergonomic 2-finger lever is reach-adjustable, proportional braking power to your grip force gives lag-free response; delicate stainless braided hose assures longer life cycle with toughness and heat-resistance.

Package Includes |

A complete brake set full of fluid, together with a rotor (front or rear) and mounting parts.

Color : Celadon caliper with silver caliper screw, and Celadon bracket with black lever

Compatible Rotor Dia. : 160 · 180 · 203mm

Compatible Fork :
Adaptors available for Rockshox(Int'l Standard) and Manitou(Post Mount).

Ref. Wt. :
Front brake set with rotor starts from 445g.
Rear brake set with rotor starts from 466g.
(Actual wt. may vary due to spec. variation)

ASPIRE (ASP series) Hydraulic Disc Brake

The charm of dexterously instantaneous braking power comes from its touch-stop braking magic as smoothly running cross country.

Application | Tour · X-Country

Features | A luxurious upgrade from GEMINI, full hydraulic disc brake set, equipped with less-weight aluminum monobody caliper, superior in rigidity and sealing effect, capable of delivering reliable braking power thru twin active pistons in open system design, the brake pads are self-adjustable; dexterous aluminum lever set contains a face-up reservoir for easy refill, ergonomic 3-finger lever is reach-adjustable, proportional braking power to your grip force gives lag-free response; delicate stainless braided hose assures longer life cycle with toughness and heat-resistance.

Package Includes |

A complete brake set full of fluid, together with a rotor (front or rear) and mounting parts.

Color : Silver caliper with black caliper screw, and silver bracket with black lever

Compatible Rotor Dia. : 160 · 180 · 203mm

Compatible Fork :
Adaptors available for Rockshox(Int'l Standard) and Manitou(Post Mount).

Ref. Wt. :
Front brake set with rotor starts from 441g.
Rear brake set with rotor starts from 462g.
(Actual wt. may vary due to spec. variation)

GEMINI (GEM series) Hydraulic Disc Brake

The charm of dexterously instantaneous braking power comes from its touch-stop braking magic as smoothly running cross country.

Application | Tour 、X-Country

Features | Economic and robust full hydraulic disc brake set, equipped with exquisite aluminum two-piece assembled caliper capable of delivering reliable braking power thru twin active pistons in open system design, the brake pads are self-adjustable; dexterous aluminum lever set contains a face-up reservoir for easy refill, ergonomic 3-finger lever is reach-adjustable, proportional braking power to your grip force gives lag-free response; delicate stainless braided hose assures longer life cycle with toughness and heat-resistance.

Package Includes

A complete brake set full of fluid, together with a rotor (front or rear) and mounting parts.

Color : Black caliper and all black lever set

Compatible Rotor Dia. : 160 、180 、203mm

Compatible Fork :
Specially designed for Rockshox(Int'l Standard).
For Manitou(Post Mount) adaptor provided with 203mm rotor.

Ref. Wt. :
Front brake set with rotor starts from 458g.
Rear brake set with rotor starts from 460g.
(Actual wt. may vary due to spec. variation)

MULTI (MUT series) Hydraulic Disc Brake

Application | Tri-cycle or light-weight man-powered vehicles other than Bicycle

Features | Full hydraulic disc brake set, components derived from the same robust design as GEMINI. One lever controls (at least) two symmetrical (rear) calipers thru a special manifold. Recommended application is for in-moving braking of single-seat man-powered tri-cycle, wheeled board, etc with load similar to normal bike.

Package Includes

A complete brake set full of fluid, together with rear rotors and mounting parts.

Color : Black caliper and all black lever set

Compatible Rotor Dia. : 160mm or more

* Hose length may vary due to different vehicle sizes
