

1985

cannondale[®]

To our friends;

Our 15th anniversary issue! As I reflect on those 15 years, what stands out in my mind is the importance of *people*—all of you and all of us. Together we have made it happen. Together we have tried very hard to convert our talents and knowledge (your input here has been vitally important) into the finest products in our industry.

So the bottom line is people. Working with them and communicating with them in an ever-increasingly productive way is the real challenge. To that end we have developed a philosophy—a Cannondale Credo if you will—which I would like to share with you:

- 1) We must listen to our customers and to each other and translate those thoughts and ideas into innovative, quality products which sell at reasonable prices.
- 2) We must back every Cannondale product with excellent customer service.
- 3) We must stay lean—managing our business efficiently so we remain competitive and produce a reasonable profit for our efforts.
- 4) We must reinvest those profits (a) in our people through compensation commensurate with their respective productivity, (b) in new product research and development and (c) in modern facilities and equipment. In this way, we will grow, stay competitive, and produce more profits to reinvest.
- 5) We must create an environment where we can maximize our individual and collective talents.
- 6) We must focus on the fact that "Made in USA" can, should and must be synonymous with "the best." Only by committing ourselves to excellence will we keep our jobs secure and America strong.
- 7) We must make our facilities and the operations within them safe for our people.
- 8) We must continuously *deliberate, debate and discuss*. A dynamic communications network is essential to future growth. Good people communicating with each other—wherever that takes us is where we want to go.
- 9) Finally, we must govern our every deed by what is "just and right."

We are proud of these principles. They are the foundation of what we do and the way that we do it. They have enabled us to work with you and serve you in the past, and we are confident they will do so in the future.

Sincerely,

Joseph S. Montgomery
President

MADE IN AMERICA

We work hard to assure that the Cannondale Railroad Station logo stands for quality, function, and value. All Cannondale products are built at our plant in Bedford, Pennsylvania, where skilled people construct and assemble each item with care and pride. We expect that as you browse our 1985 catalog you will see why we believe that American technology and craftsmanship can still create a superior product.

Cannondale accessories are sold exclusively through our network of authorized dealers from coast to coast. These are people who share our philosophy of business. Like us, their goal is customer satisfaction.

Your purchase of a Cannondale bicycling or camping accessory is just the start of a long lasting relationship that will give you years of enjoyable outdoor adventure.

THE CANNONDALE GUARANTEE

Every Cannondale product is built to provide you with 100% satisfaction—we guarantee it. That means, if for any reason you are not 100% satisfied with your Cannondale product, we will repair it or replace it free of charge.

**CALL OUR TOLL-FREE HOTLINE:
1 800 BIKE USA**

We have established this toll-free number to help us better serve you and the cycling community. Give us a call if you would like the name of your local authorized Cannondale dealer, or have a question or comment about our products. (In CT or outside the continental USA, call 1 (203) 838-4488.)

THE COMPLETE LINE

Each time your latest catalog comes out I find new bicycle products that I need. Now I can get almost all my bicycling equipment from one company that I know and trust. Thanks for all the great products. I can't wait to see your next catalog.

—D.R.S., Winston-Salem, NC

THE TRADITION OF CANNONDALE. THE FUTURE OF CYCLING.

CANNONDALE BICYCLE CLOTHING

The sophistication of today's cyclist is reflected in Cannondale's extensive line of bicycle apparel. We offer jerseys, shorts, tights, jackets, and skinsuits in a wide range of styles and materials to meet your cycling needs. Each piece of Cannondale clothing is sewn with functional patterns, attractive styles and of course the fine workmanship for which Cannondale is known. This is your assurance of many miles of comfortable bicycle riding.

The Materials

Lycra. This sleek, stretchy fabric clings tightly to the cyclist's body to reduce wind resistance. It provides total freedom of movement, is lightweight, and extremely comfortable. Lycra is machine washable and dryable.

Polypropylene. A remarkable and very versatile material. Polypropylene's unique and highly functional properties make it an ideal fabric for cycling. It insulates to keep you warmer on cool days. It wicks away perspiration to keep your skin dry. It is lightweight and non-allergenic. It dries quickly. Polypropylene is a very thin fiber and should not be exposed to the direct heat of a dryer or iron.

Celanese. We line the seat of Cannondale shorts and skin suits with 100% Celanese. This material gives soft, chamois-like comfort and is completely machine washable. It also dries very quickly.

H100

C827

Polypropylene for your feet! CYCLIN' SOCKS (C827)

Great all-weather footwear. Polypropylene wicks perspiration away, cushions, and insulates for comfy feet.

Sizes: S, L
Price: \$3.95

CYCLE CLOTHING AND MATERIALS

No flimsy "give-away".

CANNONDALE CYCLE HAT (H100)

An attractive, colorful cycle hat made of quality materials and featuring a stiffened bill and elastic back band. One size fits all.

Colors: Blue, Red, White

Price: \$6.95

Determine your size by measuring in inches your right hand around the knuckles.

BG85

More efficient pedaling.

CYCLE TOURING SHOE (S)

You'll enjoy all-day pedaling efficiency, walk-about comfort and good looks with Cannondale Cycle Touring Shoes. They're styled like a classic running shoe, but close inspection reveals the added details that make them exceptional for cycling. The soles are specially designed to provide stiffness for pedaling and flex for walking. Suede reinforcements protect the nylon uppers at critical wear points. Angled ridges in the sole grip the pedal and align your foot properly. To assure you of a good fit, Cannondale touring shoes are available in standard American men's and women's sizes.

Colors: Blue, Silver

Sizes:

Men (MS)—half sizes 7 to 12, 13

Women (FS)—half sizes 5 to 10

Price: \$34.95

BG70

Lightweight, padded...

LYCRA CYCLE GLOVES (BG85)

Soft, supple leather and full padding make our new lycra cycle gloves a pleasure to wear. The backs are colorful lycra material that conforms perfectly to your hand giving you an unrestricted, comfortable grip of the handlebars.

Sizes: S, M, L

Price: \$16.95

The world's finest!

LEATHER CYCLE GLOVES (BG70)

Made of top-quality glove leather. The airy knit backs are hand-crocheted of 100% cotton in the mountains of Pennsylvania to assure long-lasting comfort and fit. Padding protects your palms and even extends to your thumb. Hook-and-loop tabs provide easy closure.

Sizes: P, S, M, L, X, J

Price: \$29.95

Great for cold weather.
POLYPROPYLENE OUTDOOR SHIRT
(C834)

This one color polypropylene shirt is great for all types of outdoor wear from cycling to skiing. Its basic design makes it ideal as an under garment too.

Color: Ebony
Sizes (unisex):

CYCLE SHORTS AND TIGHTS

For cold weather cycling.

POLYPROPYLENE CYCLE TIGHTS (C835)

The lightweight, cold weather insulation you need for year 'round cycling. Our tights are a blend of lycra and polypropylene to keep them clinging to your legs with plenty of stretch for unrestricted pedaling. The knees and crotch are reinforced for added durability and warmth. To be worn with cycle shorts beneath.

Color: Ebony

Sizes (unisex): P, S, M, L, X

Price: \$49.95

All-purpose cycle wear.

POLYPROPYLENE CYCLE SHORTS (C833)

Enjoy more comfort in the saddle for touring, training or racing in our polypropylene cycle shorts. They're a blend of polypropylene and lycra, giving them two-way stretch and outstanding perspiration wicking ability. The crotch is lined with fleecy, 100% Celanese.

Color: Ebony

Sizes (unisex): P, S, M, L, X

Price: \$29.95

Sheer comfort.

LYCRA CYCLE TIGHTS

Light, sleek wind protection for cyclists. Our lycra tights hug your skin and allow total freedom of movement. The crotch is reinforced for durability. Designed to be worn with a pair of cycle shorts beneath.

Striped (C418)

Questions? Give us a call on our toll-free hotline, 1 800 BIKE USA, for more information and the name of your local authorized Cannondale dealer. (In CT or outside the continental USA, please call 1 (203) 838-4488.)

Cut transition times..
TRI SUIT (C414)

Swim, bike and run in this one piece triathlon suit for men and women. Sleeveless design and lycra blend fabric provide total freedom of movement. The 100% Celanese crotch lining is soft and comfortable, while being quick to dry, and easy to care for. Don't waste precious transition time changing from swim to cycle wear--our Tri Suit does it all.

Colors: Ebony, Vibrant Blue
Sizes (unisex): P, S, M, L, X
Price: \$44.95

For the multi-sport woman.
LADIES TRI SUIT (C419)

At last, a multi-sport lycra suit designed exclusively for women. We've combined cycle shorts with a woman's swimsuit top for a supportive and comfortable fit for swimming, biking and running.

Color: Vibrant Blue
Sizes: P, S, M, L, X
Price: \$39.95

C918

C919

Ride dry even in the rain!
RAIN JACKET (C918)

Our nylon rain jacket is designed specifically for cyclists, yet remains versatile enough for virtually any outdoor activity. The back features an extra long flap to adequately protect the cyclist, but tucks up out of the way when off the bike. Air circulates through a double zippered vent beneath each arm and a specially cut, mesh covered vent across the back. The roomy hood accommodates a helmet, but is adjustable for use without one. Other features include adjustable cuffs, full length YKK nylon coil zipper, and zippered pockets.

Color: Bright Yellow
Sizes (unisex): P, S, M, L, X
Price: \$54.95

For full wet weather protection.
RAIN PANTS (C919)

Like our rain jacket, these rain pants provide super protection in wet weather for cycling and other outdoor activities. They're tailored with an elastic waistband and zippered access to your clothing pockets. Each leg ends with hook-and-loop closure that keeps the pants tight around your ankle when you're riding, but when opened allows freedom of movement for walking and makes it easy to put the pants on over shoes.

Color: Bright Yellow
Sizes (unisex): P, S, M, L, X
Price: \$29.95

C836

Breathable and warm!
TRAINING JACKET (C836)

Stay warmer during those cold weather rides in this specially designed cycling jacket. It features a full 100% polypropylene lining, with an outer shell of nylon over the front and sleeves to block the wind. The back layer of polypropylene remains uncovered to allow perspiration to pass through to keep you drier. Two zippered back pockets provide stow space. Rib knit cuffs, collar and waistband; full front zipper.

Colors: Red, Silver
Sizes (unisex): P, S, M, L, X
Price: \$54.95

See size chart page 6.

C828

C829

Blocks the wind.

WIND SHELL (C828)

Lightweight protection for cold weather cycling thanks to our two-fabric design. The tightly woven nylon front and sleeves block the wind, while your perspiration evaporates through the breathable 100% polypropylene back panel. This panel also stretches so the shell won't ride up while you're bent low over the handlebars. Rib knit cuffs, collar and waistband; partial front zipper.

Colors: Blue, Silver

Sizes (unisex): P, S, M, L, X

Price: \$34.95

4 oz. of wind protection.

WIND PANTS (C829)

Reduce wind chill with these tightly woven nylon wind pants. They feature a zippered gusset at each ankle for sliding easily on over cycle shoes. The perfect complement to our Wind Shell or Training jacket and they weigh less than 4 ounces.

Colors: Blue, Silver

Sizes (unisex): P, S, M, L, X

Price: \$24.95

CANNONDALE BICYCLE BAGS

Over half a billion miles. That's how far Cannondale bicycle packs have traveled, hauling cyclists' gear all over the world. We know what it takes to make a dependable bicycle bag. The finest materials. American craftsmanship. Innovative and functional designs. Value. And the best guarantee in the industry. These are your assurances of a quality product that will give you mile after mile of reliable use.

Durable Materials. Pick up any Cannondale handlebar bag, for instance. Note how light it is, and yet how tough it feels. That's because all our bags are made either from nylon Cordura® or Caprolan® fabrics. Both materials are durable and treated with a urethane coating for waterproofing.

Cordura® provides the extra abrasion resistance you need on long excursions where your bags may be exposed to continuous rough treatment. Caprolan® is lighter and more economical than Cordura® and has proven extremely reliable for most cycling applications.

We use only YKK nylon coil zippers on our bicycle bags because we have found that they are unsurpassed in long-lasting, dependable use.

Made in America. Look closely at the bag. Note the accuracy of our stitching. Like every Cannondale product, all our bicycle bags are crafted at our factory in Pennsylvania.

We've sewn every seam with eight stitches per inch because fewer stitches leaves the seam weak, and more weakens the fabric. Eight stitches per inch gives the seam its maximum strength, which we supplement by reinforcing all stress areas with bartacking and double stitching.

Cannondale Extras. Many Cannondale bicycle bags feature our famous polyfoam liner. The liner increases product life by pre-

venting wear from the inside out and distributes the load evenly inside the pack. In addition, it cushions the contents of the pack, while providing internal support for the bag's shape. Most Cannondale panniers are built around our patented internal support frame (see Pannier section for further details), which has been copied but never equaled in creating a durable, easy to use bicycle pannier.

Cannondale's patented pannier support frame is just one example of the advanced technology and functional innovation that make Cannondale bicycle accessories superior.

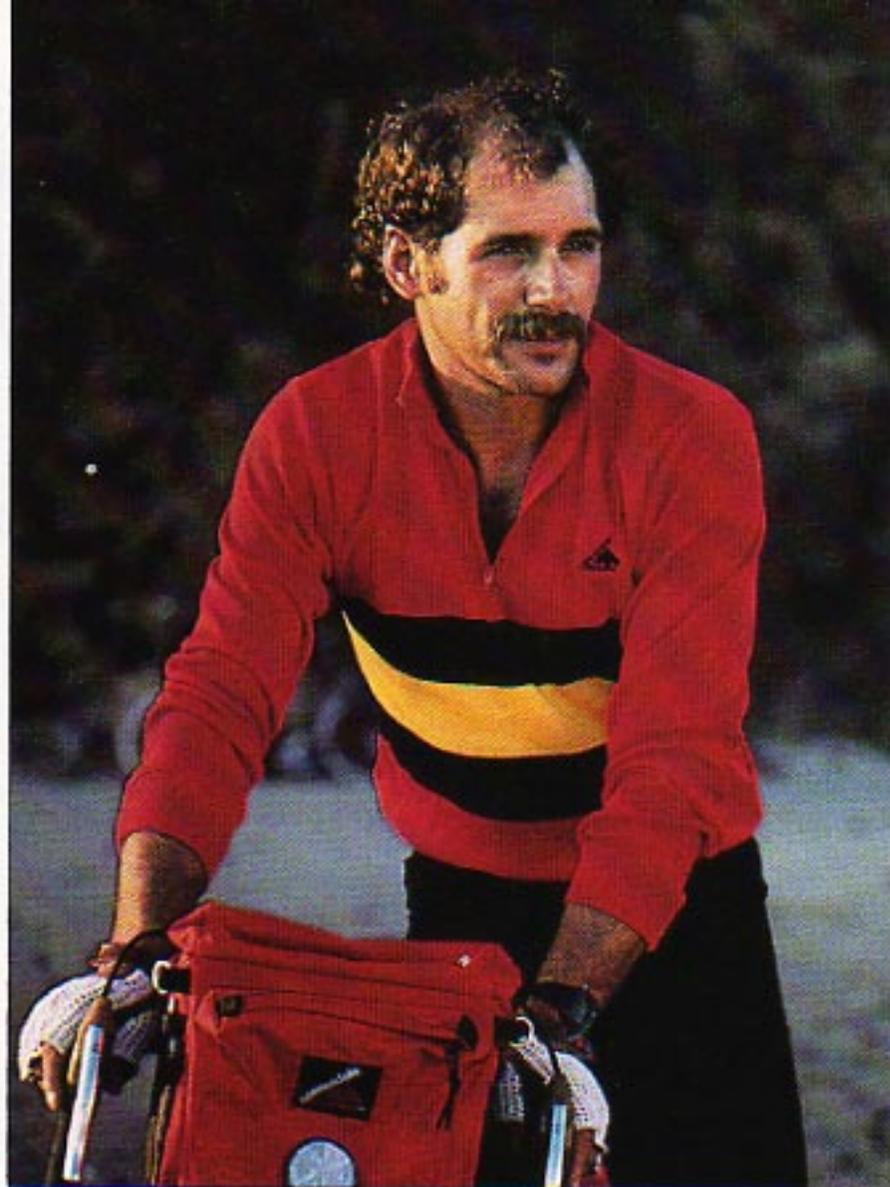

Photo by Galen Rowell

Other Cannondale extras include pull cords on zipper tabs, reflectors on almost every model, generous rain flaps over zippers, and of course Cannondale's 100% guarantee of satisfaction.

CARE INSTRUCTIONS

Cannondale bicycle bags are built to be extremely tough and durable, and by providing a minimal amount of care you can help ensure thousands of miles of use.

Do not leave opened food in your bags overnight. Raccoons and other critters get the munchies after dark and may chew through the pack fabric to get to the goodies within. It's best to suspend food off the ground, well out of reach of these bandits. (In bear country check with local rangers for food storage procedures.)

The best method for cleaning mild stains is to use a brush and soapy water on the bag. If the bag is filthy, remove all hardware and machine wash, then drip dry. Be sure to tighten all screws when reassembling.

If you have any questions about proper care for your Cannondale equipment, call our toll-free hotline: 1 800 BIKE USA. (In CT or outside the continental USA, please call 1 (203) 838-4488.)

BICYCLE BAGS AND MATERIALS

Cannondale's new Ultimate low riding front racks and Ultimate Switcher panniers with Tour-Lock™ mechanism.

Cannondale's exclusive four-point mounting system works in conjunction with our Ultimate racks to hold your panniers firmly and securely to the bike.

ATTENTION TOURING CYCLISTS

For years Cannondale panniers have been essential gear for the serious and even the not-so-serious touring cyclist. In fact, our designs have been so successful that they have inspired a whole family of low-quality copies from other companies. Well, competition, it's time to get back to the drawing board because Cannondale is about to leave you in the dust again.

Announcing the Ultimate Touring System

We have taken a step beyond our previous pannier designs with the development of a pannier/rack system so advanced that it will soon be recognized as the state-of-the-art.

Our Tour-Lock™ mounting system, four point attachment and Ultimate racks provide the most stable and secure

pannier suspension on the market. And the beauty is in its simplicity.

A flick of a lever provides positive locking of the pannier to the rack. And try as hard as you like, you can't shake that bag off. Even turn the bike upside down. The pannier remains firmly in place...until you want to remove it. Then just flick the lever back and the pannier comes off easily.

All Cannondale products are the result of American engineering and technology, made with pride at our factory in Bedford, Pennsylvania.

Four Point Attachment

The Tour-Lock™ mechanism works in conjunction with our exclusive four-point attachment. With four hooks instead of two holding the pannier to the rack the bottom of the pannier is held tightly against the rack to prevent it from swinging outward, even on the bumpiest of roads. In

addition, the weight load is spread more evenly over the pannier frame, reducing stress to the frame.

Ultimate Touring Stability

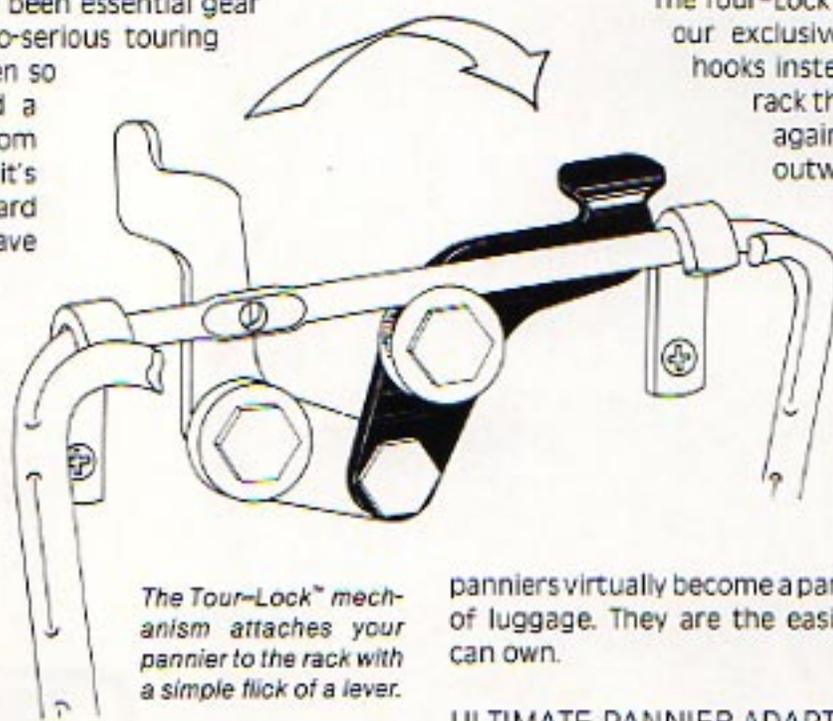

With the Tour-Lock™ mechanism, four-point attachment, and our new Ultimate racks, Cannondale

panniers virtually become a part of your bicycle, not just another piece of luggage. They are the easiest to use, most stable panniers you can own.

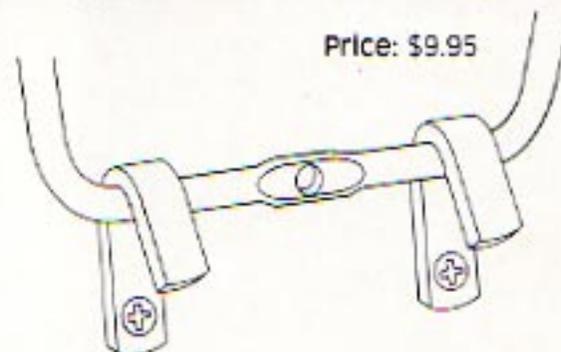

ULTIMATE PANNIER ADAPTOR KIT (A085)

The Tour-Lock™ mounting system with four point attachment is available as an option for all 1985 model Cannondale panniers and must be used with Cannondale's new Ultimate racks. The kit comes complete with the Tour-Lock™ locking mechanism and the nylon covered hooks you need to give you the total stability of the ultimate pannier system.

Price: \$9.95

The Tour-Lock™ mechanism attaches your pannier to the rack with a simple flick of a lever.

The lower two hooks stabilize the bottom of the pannier preventing wobble or sway so your pannier is held firmly in place.

B412

B410

One bolt adjustment!
ULTIMATE REAR RACK (BR83)

A super lightweight and strong rear rack made with aluminum tubing (not solid rods). It attaches to the bike at four points and features our new one-bolt adjustment. Special stabilizing struts prevent your pannier from wobbling. The rack will accept most panniers on the market.

Color: Ebony
Weight: 14.9 oz.
Price: \$34.95

Ultimate Rear Panniers!
OVERLANDS WITH TOUR-LOCK™ SYSTEM

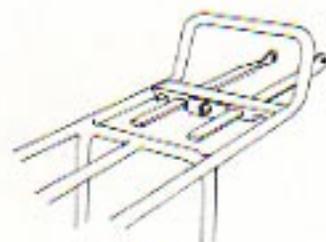

We've combined the Tour-Lock™ mechanism and four-point attachment with our largest capacity panniers to create the "Ultimate" touring pannier. The spacious main compartment holds a lot of gear, and with our new mounting system you can be sure that the load is firmly attached to your bike no matter what the road condition. Eight outer pockets per set give you plenty of extra room for all those touring essentials. Ultimate Overlands are made of nylon Cordura® and must be used in conjunction with Cannondale's Ultimate rear rack (BR83).

Capacity per set: 2,500 cu. in.
Weight per set: 3 lbs./6 oz.
Colors: Blue, Ebony, Red, Silver
Price per set: \$109.90

Ultimate Front Panniers!
SWITCHERS WITH TOUR-LOCK™ SYSTEM

Our popular front/rear panniers with the Tour-Lock™ system and four-point mounting. All the famous features of Cannondale panniers. Our patented support frame. Tough nylon Cordura® construction. Roomy interior. And two outside flat pockets per set. Must be used in conjunction with Cannondale's low riding front rack (BR82) or rear rack (BR83).

Capacity per set: 1,420 cu. in.
Weight per set: 2 lbs./14 oz.
Colors: Blue, Ebony, Red, Silver
Price per set: \$79.90

Cannondale's Ultimate Rear Rack features one bolt adjustment.

BR83

THE ULTIMATE SYSTEM

The new standard...

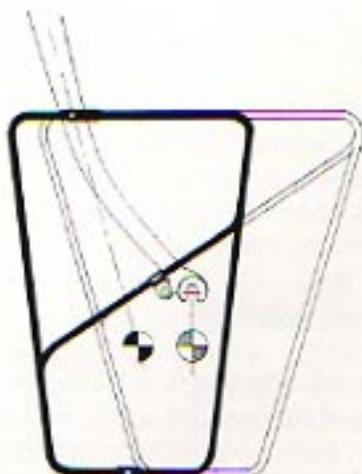

ULTIMATE LOW RIDING RACK (BR82)

We have improved upon existing designs with our new low riding front bicycle rack that centers the front pannier's weight on the center line of the head angle, instead of around the hub. This provides easier steering, because it takes less effort to turn the handlebar. The pannier's weight is suspended from both sides of the fork blade, which reduces stress on the rack itself. Cannondale's Ultimate low riding front rack comes with all the necessary hardware to mount it on forks with or without braze-ons, with no annoying hoop crossing over the wheel. Most pannier models will fit this rack.

Color: Ebony

Weight: 15.2 oz.

Price: \$29.95

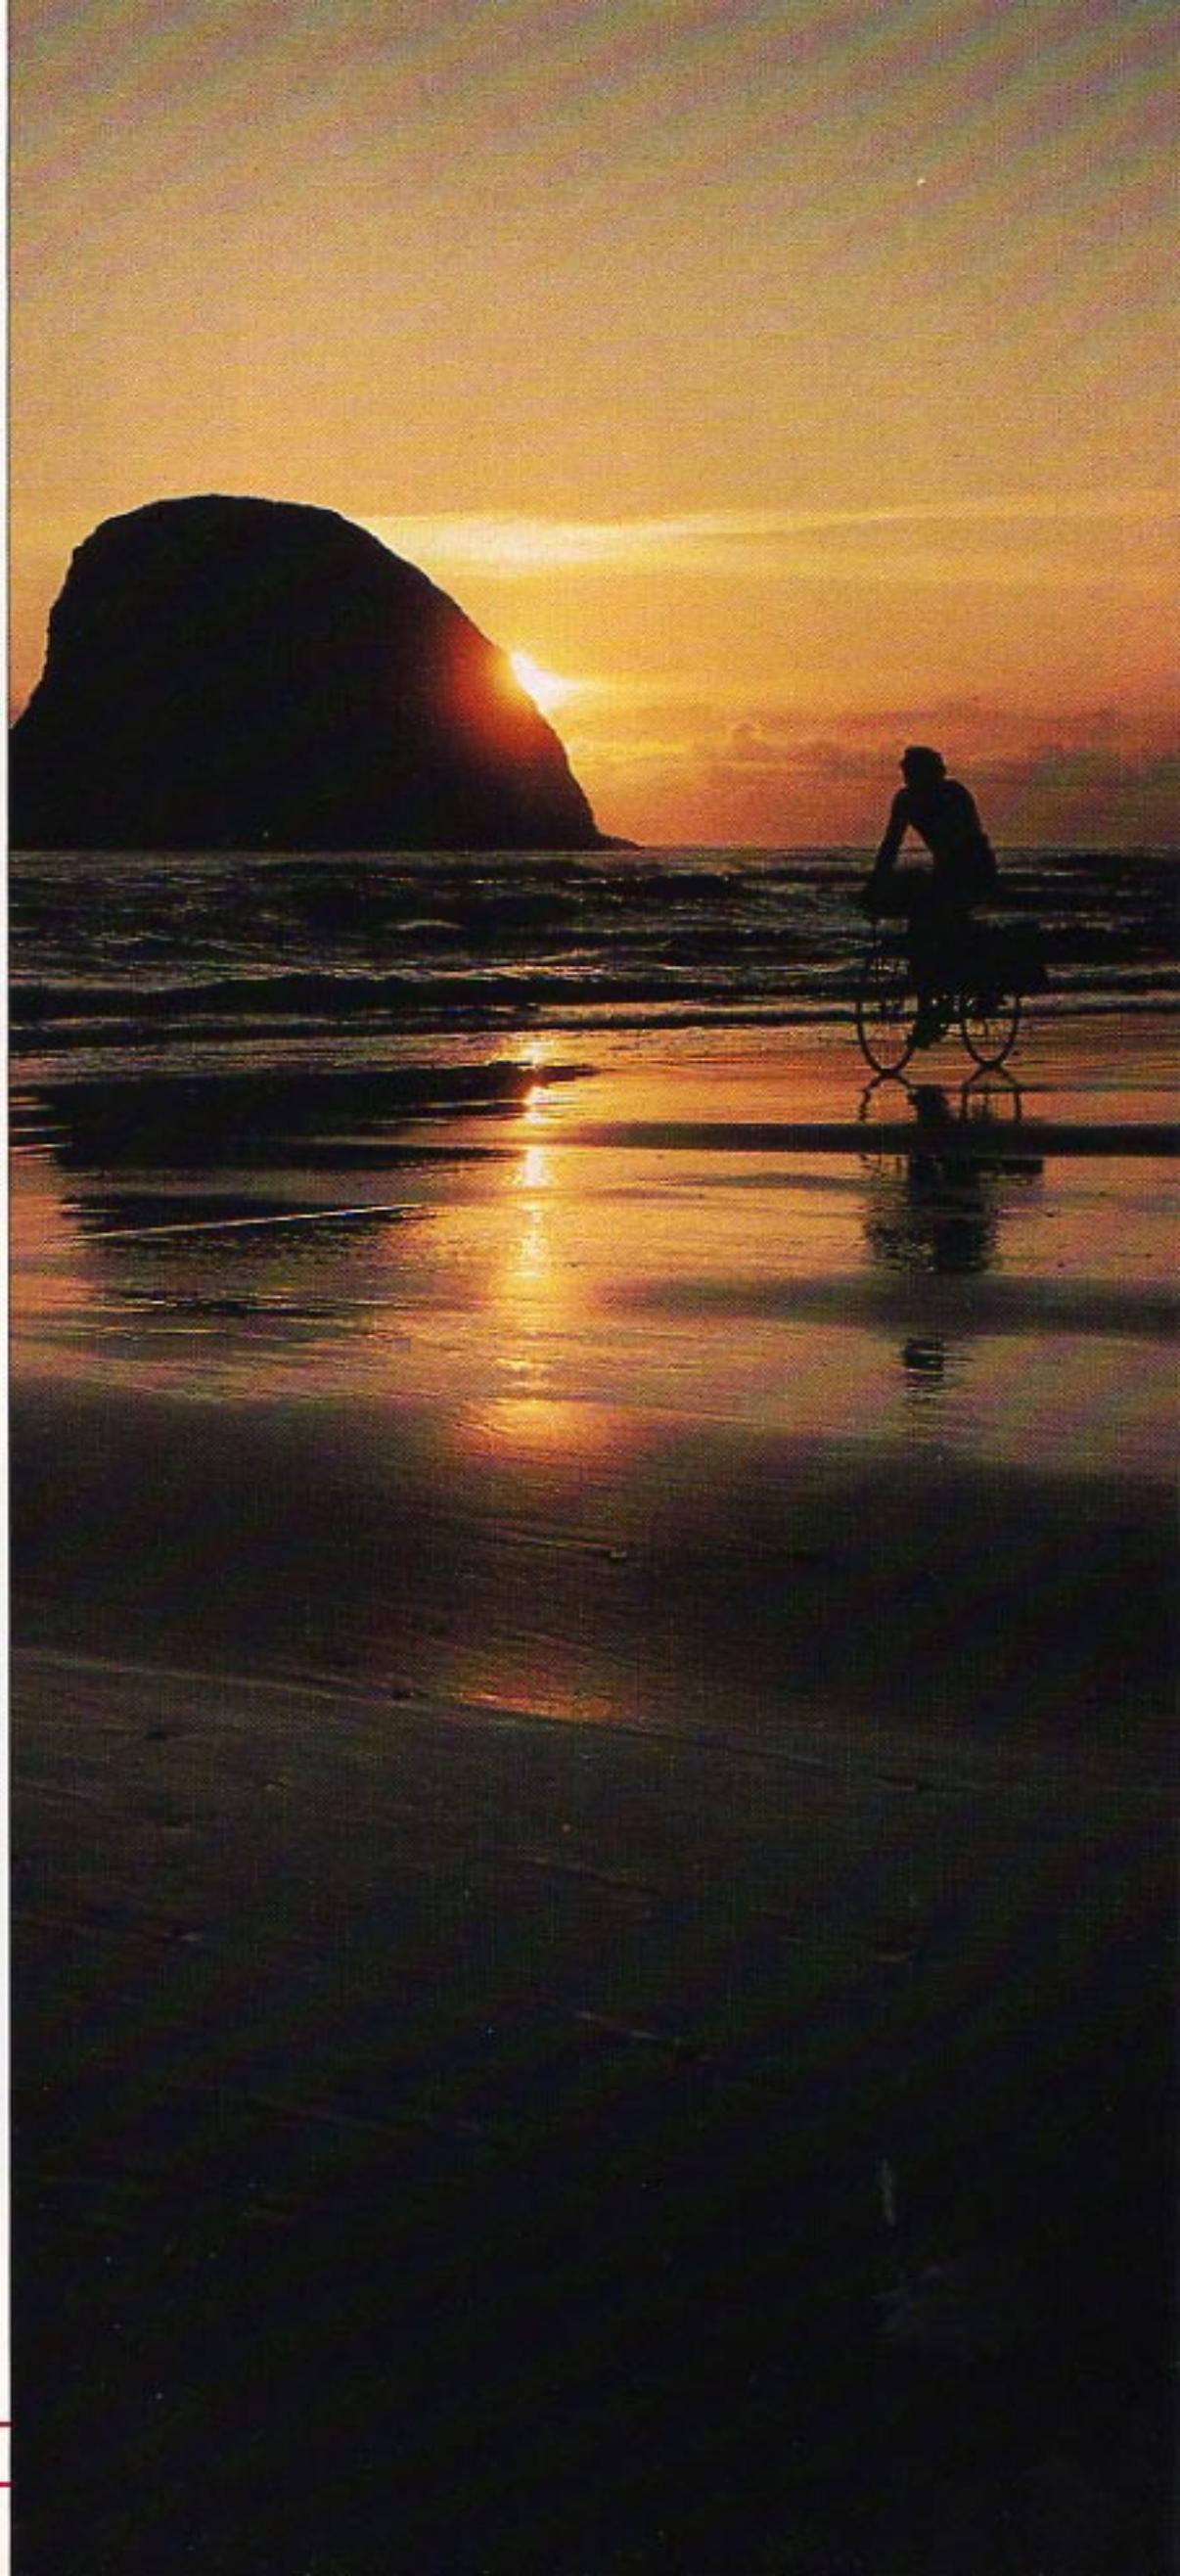

Our low riding rack places the pannier's center of gravity along the center line of the head angle for easier steering.

BR82

B407

Multi-duty panniers
PORTERS (B407)

Moderately sized rear panniers at an economical price. Made with water-repellent Caprolan® nylon. Easy attachment: bags drape over the rack and hook with springs to the drop outs. Great for weekend tours, or carrying books, etc....

Capacity per set: 1,020 cu. in.
Weight per set: 31 oz.
Colors: Blue, Ebony, Red, Silver
Price: \$29.95

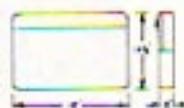

B410

For the cycling executive.
COMMUTERS (B410)

Slim, compact, easy to carry rear panniers made of attractive, water-repellent nylon Cordura®. The perfect size for notebooks, files, calculator, floppy disks, and other office and school supplies.

Capacity per set: 710 cu. in.
Weight per set: 35 oz.
Colors: Blue, Ebony, Red, Yellow
Price: \$39.95

CANNONDALE PANNIERS

The rigors of bicycle touring demand a lot from a pannier. That's why Cannondale panniers are designed to take the punishment of the open road, providing many miles of convenient, reliable use.

PATENTED DESIGN

Our patented (U.S. #4,271,996) support frame stabilizes the load, distributing its weight evenly and reduces potentially damaging stress from fabric, seams and zippers. It also allows easy side access to the main compartment—a great help when you've got a sleeping bag and tent loaded on top of your rack.

EASY ATTACHMENT

Mounting and unmounting are easy on virtually any rack made. All necessary hardware is included. Just loop the steel spring over the hook at the dropout and slip the J-hooks over the rail of your rack. Or mount the panniers with our optional Tour-Lock® mechanism and four-point attachment. When the cycling day's done the panniers attach together to form a single piece of luggage, easily carried by web handles or optional shoulder strap.

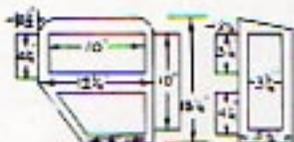

Photo by Joseph Kugielnsky

PANNIERS

Sized for extended travel.
OVERLANDS (B041)

Your cross-country companion. Extremely roomy. Extremely tough. Large main compartments and eight exterior pockets per set hold all your gear and keeps it handy. Made with water-repellent nylon Cordura®. The choice of touring cyclists the world over.

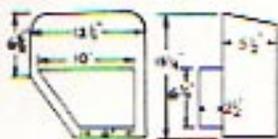

Capacity per set: 2,500 cu. in.
Weight per set: 64 oz.
Colors: Blue, Ebony, Red, Silver
Price: \$99.95

For weekend touring.
WHISTLES (B405)

An intermediate sized rear pannier now made of nylon Cordura®. The large main compartment and two exterior pockets per set provide plenty of cargo space.

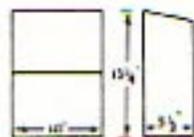

Capacity per set: 2,000 cu. in.
Weight per set: 53 oz.
Colors: Blue, Ebony, Red, Silver
Price: \$79.95

Go cross country or to school.
SWITCHERS (B043)

All-purpose panniers that work with equal excellence on front or rear racks. Two flat pockets per set. Our Switchers (B043) are made of tough, water-repellent nylon Cordura®. Great for touring and commuting.

For picnics and more.

CABOOSE (B047)

Our rigid foam insert keeps foods chilled for picnics. It also protects fragile gear like binoculars and cameras. The Caboose holds a lot of gear in its spacious interior and four outside pockets. Its web handles and attachable shoulder strap make it a great gym bag or photography case. Mounts quickly to your bicycle rack with hook-and-loop straps. Made from water-repellent nylon Cordura®.

Capacity: 800 cu. in.
Weight: 32 oz.
Colors: Blue, Ebony, Red, Silver
Price: \$49.95

B047

Super strong!

MODULAR REAR RACK (BR81)

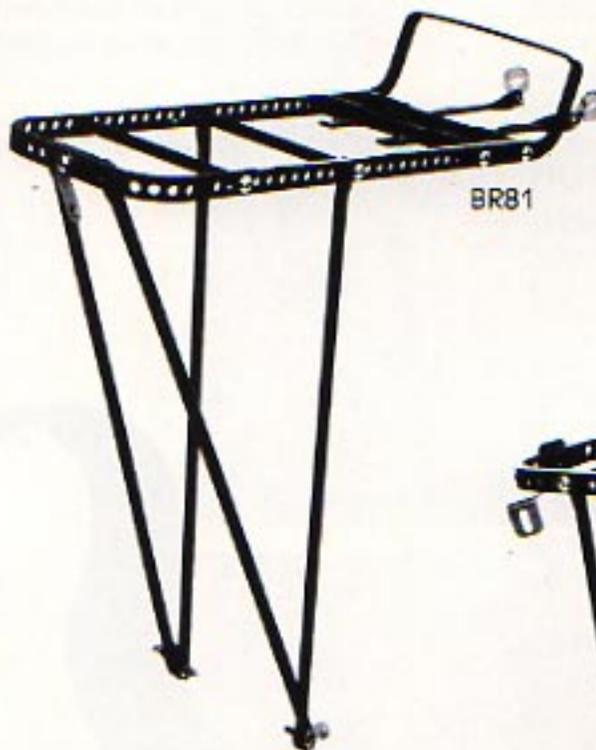

Since its introduction, our patented (U.S. #4429818) rear carrier rack has earned a reputation for its great strength and complete adjustability. This is the one and only fully adjustable, totally modular rack with four-point connection, so it will properly fit nearly any bicycle. Silver or black anodized.

Weight: 17 oz.
Price: \$29.95

MODULAR FRONT RACK (BR80)

Attaches to the brake bolt with a unique bracket that won't interfere with the movement of your brake. Adjustable, strong, dependable front carrier rack. Silver or black anodized aluminum.

Weight: 13 oz.
Price: \$24.95

BR81

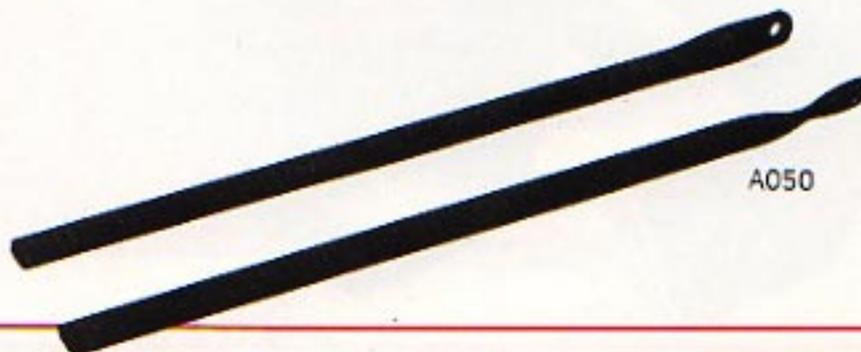

BR80

For mountain bike racks.

ATB RACK ADAPTOR KIT (A050)

Now you can put the super strong Cannondale rack to work on your off-road bike. This inexpensive adaptor kit allows you to properly mount your Cannondale Modular Rear Rack (BR81) to virtually any ATB.

Colors: Ebony, Silver
Price: \$1.95

A050

B037

Packs a lot of extras.
TRESTLE (B037)

A durable, high volume handlebar bag. Five exterior pockets. Handy internal stash pocket. Snap-on map case. Shoulder strap. Water-repellent nylon Cordura® construction.

Price: \$49.95

B404

Padded for camera gear!
HANDLEBAR BAG INSERT (A035)

Turns your handlebar bag into a camera case. Comes with two padded lens sleeves (which may also be purchased separately).

Price: \$12.95
Lens Sleeve Price (A036): \$2.95

CANNONDALE HANDLEBAR BAGS

Carry your gear wherever you go with one of our rugged handlebar bags. You can choose from five models, each with a different carrying capacity and special features to meet your exact needs.

Our polyfoam liners are standard on Cannondale handlebar bags. They protect the bag against excess wear from the inside, cushion the bag's contents, and evenly distribute weight.

Attachment is quick and easy. Just put the coated cantilever support frame under the stem and over the handlebar, slip the bag's leather frame channels onto the frame, and hook the adjustable shock cords to your dropouts. This mounting system holds the bag and its contents firmly in place and allows fast, complete removal when the journey's over.

You haul it...
THE BUGGER III (B003)

Thousands of Cannondale customers have extended the usefulness of their bikes with our Buggy III bicycle trailers. They rely on the Buggy to carry children, camping equipment, groceries and other cargo on anything from cross-country tours to short errands down to the hardware store.

CARRY 80 POUNDS EASILY

The Buggy III reflects our 15 years of experience building bicycle trailers. It enables you to pull up to 80 pounds without significant extra effort. Your ride will be extremely stable and smooth thanks to the basic design of the unibody chassis, the unique torsional hitch, sturdy 20" wheels and low center of gravity. Sealed bearing hubs and a steel axle deliver many miles of reliable use, and its aerodynamic shape makes those miles easy.

A GREAT CHILD CARRIER

Children love being taken along for the ride in a Buggy III. The chassis is anatomically designed to comfortably seat one or two children up to 40" tall. They sit facing rearward, protected from road debris the bike or passing cars may kick up. The high back supports their heads while built-in guards protect them from turning wheels. The waist and shoulder harness features child-resistant buckles and keeps children from climbing about while you're underway.

The Buggy III attaches quickly, easily and securely without tools to nearly any bicycle with a 20" or larger frame. Its polypropylene hitch clamps to your seatpost with just a flick of the steel toggle latch. There are no permanent attachments on your bike; when the Buggy III is off your bike, it is completely off.

Weight: 25 lbs
Cargo Limit: 80 lbs
Price: \$249.95

Extra comfort.
BUGGER CUSHION (A033)

Give your passengers an easier ride, cushioned with this closed cell foam pad. It installs easily and securely with self-adhesive hook-and-loop tabs.

Color: Brilliant Yellow
Price: \$16.95

Keeps 'em dry...
BUGGER CANOPY (A084)

Protects Buggy III passengers and cargo from elements. Water-repellent nylon. See-thru plastic windows and door. Lightweight fiberglass poles. Double-zipper door. Aerodynamic shape. Fits all existing Buggy III models.

Color: Yellow
Price: \$59.95

BH20B

Always in reach.
THE CANNONDALE WATERBOTTLE

Our patented waterbottle (U.S. #4,345,704) lets you remove and replace the bottle quickly and easily. The bottle is held firmly to the mount with hook-and-loop material, eliminating the awkward alignment required to put a waterbottle into a cage or a dovetail. What's more, the bottle itself has an exceptionally wide mouth for easy cleaning and mixing of powdered drinks. And with a capacity of 24 fluid ounces our waterbottle holds a lot of refreshment. The Cannondale bicycle waterbottle is made of FDA approved polyethylene and is available with either a wrap-around or braze-on mount.

Bottle with wrap-around mount (BH20)
Price: \$9.95

Bottle with braze-on mount (BH20B)
Price: \$10.95

BH30

CONVENTIONAL WATERBOTTLE (BH30)

Due to popular demand we've produced a standard bicycle waterbottle with the same wide mouth and lid as our hook-and-loop mounting waterbottle. It has a large capacity of 20 fluid ounces and fits any normal sized cage. Made of tough, FDA-approved polyethylene.

Price: \$1.95

BH20

CANNONDALE SLEEPING BAGS

Rest well in a modified mummy sleeping bag from Cannondale. There are three models to choose from to keep you warm at different temperature ranges, each in regular size and extra long. We combine quality materials, innovative designs and our careful craftsmanship to wrap you in cozy comfort even down to 20 below.

THE FINEST MATERIALS

It starts with the insulation we use—pure Dacron® Hollofil® II, which provides more insulation with less weight than solid polyester fibers. And because it's a synthetic, Dacron® Hollofil® II maintains its loft even when wet; a condition that would render an expensive down bag useless.

The outer shell of a Cannondale sleeping bag is made from 1.9 oz. ripstop nylon for lightness and tear-resistance. The inner shell is soft, cottony Antron® nylon. Full-length, two-way YKK nylon coil zippers are protected with an insulated nylon tube to eliminate chilly drafts.

CAREFULLY CRAFTED DESIGN

We use three key design features to make Cannondale sleeping bags superior to other bags. **Differential Cut:** The inner shell is smaller in diameter than the outer shell, which allows the bag to maintain its full loft. **Offset Quilting:** The quilting is staggered to eliminate heat loss through the seams.

Triple Layer Construction: Three separate layers of Dacron® Hollofil® II are used. One is sewn to the outer shell, one is sewn to the inner shell, and a third layer is sandwiched between. This construction assures that you will always have plenty of insulation between you and the cold outer air.

Weight: 4 lbs./14 oz.

S807—above 6 feet
Weight: 5 lbs./4 oz.

CANNONDALE TENTS

A tent is your home in the wilderness. It must shelter you from wind, rain, snow, and cold. And it must be roomy and set up quickly and easily.

Cannondale integral fly tents (C891/C893) are unsurpassed in their ability to provide these vital functions. The fly on Cannondale tents is actually an integral part of the tent, not a flapping extra that goes on after the tent is set up. This design delivers several advantages over other tents.

Easy Set Up. Cannondale tents go up quickly and easily. Just assemble the two shock-cord loaded aluminum poles, slide them into their respective sleeves, and put a stake in at each end. And the tent is up. Completely. It's that simple. That fast.

Warmer. Cannondale tents are a sleek, functional unit that provide you with unmatched weather protection. The pole sleeves are sewn into the outer wall, what we call our integral fly. The inner wall of the tent is suspended from the integral fly, creating a 6" layer of dead air insulation that keeps the living area warmer.

Weatherproof. The integral fly is made with urethane-coated 1.9 oz. ripstop nylon to efficiently shed rain, wind and snow. The inner wall of the tent is breathable 1.5 oz. ripstop nylon, which allows moisture given off by occupants to escape, keeping the sleeping area dry in a second way. Tent floors are made of urethane-coated 1.9 oz. nylon and feature a tub design with elevated corners that keeps runoff out of your sleeping bag.

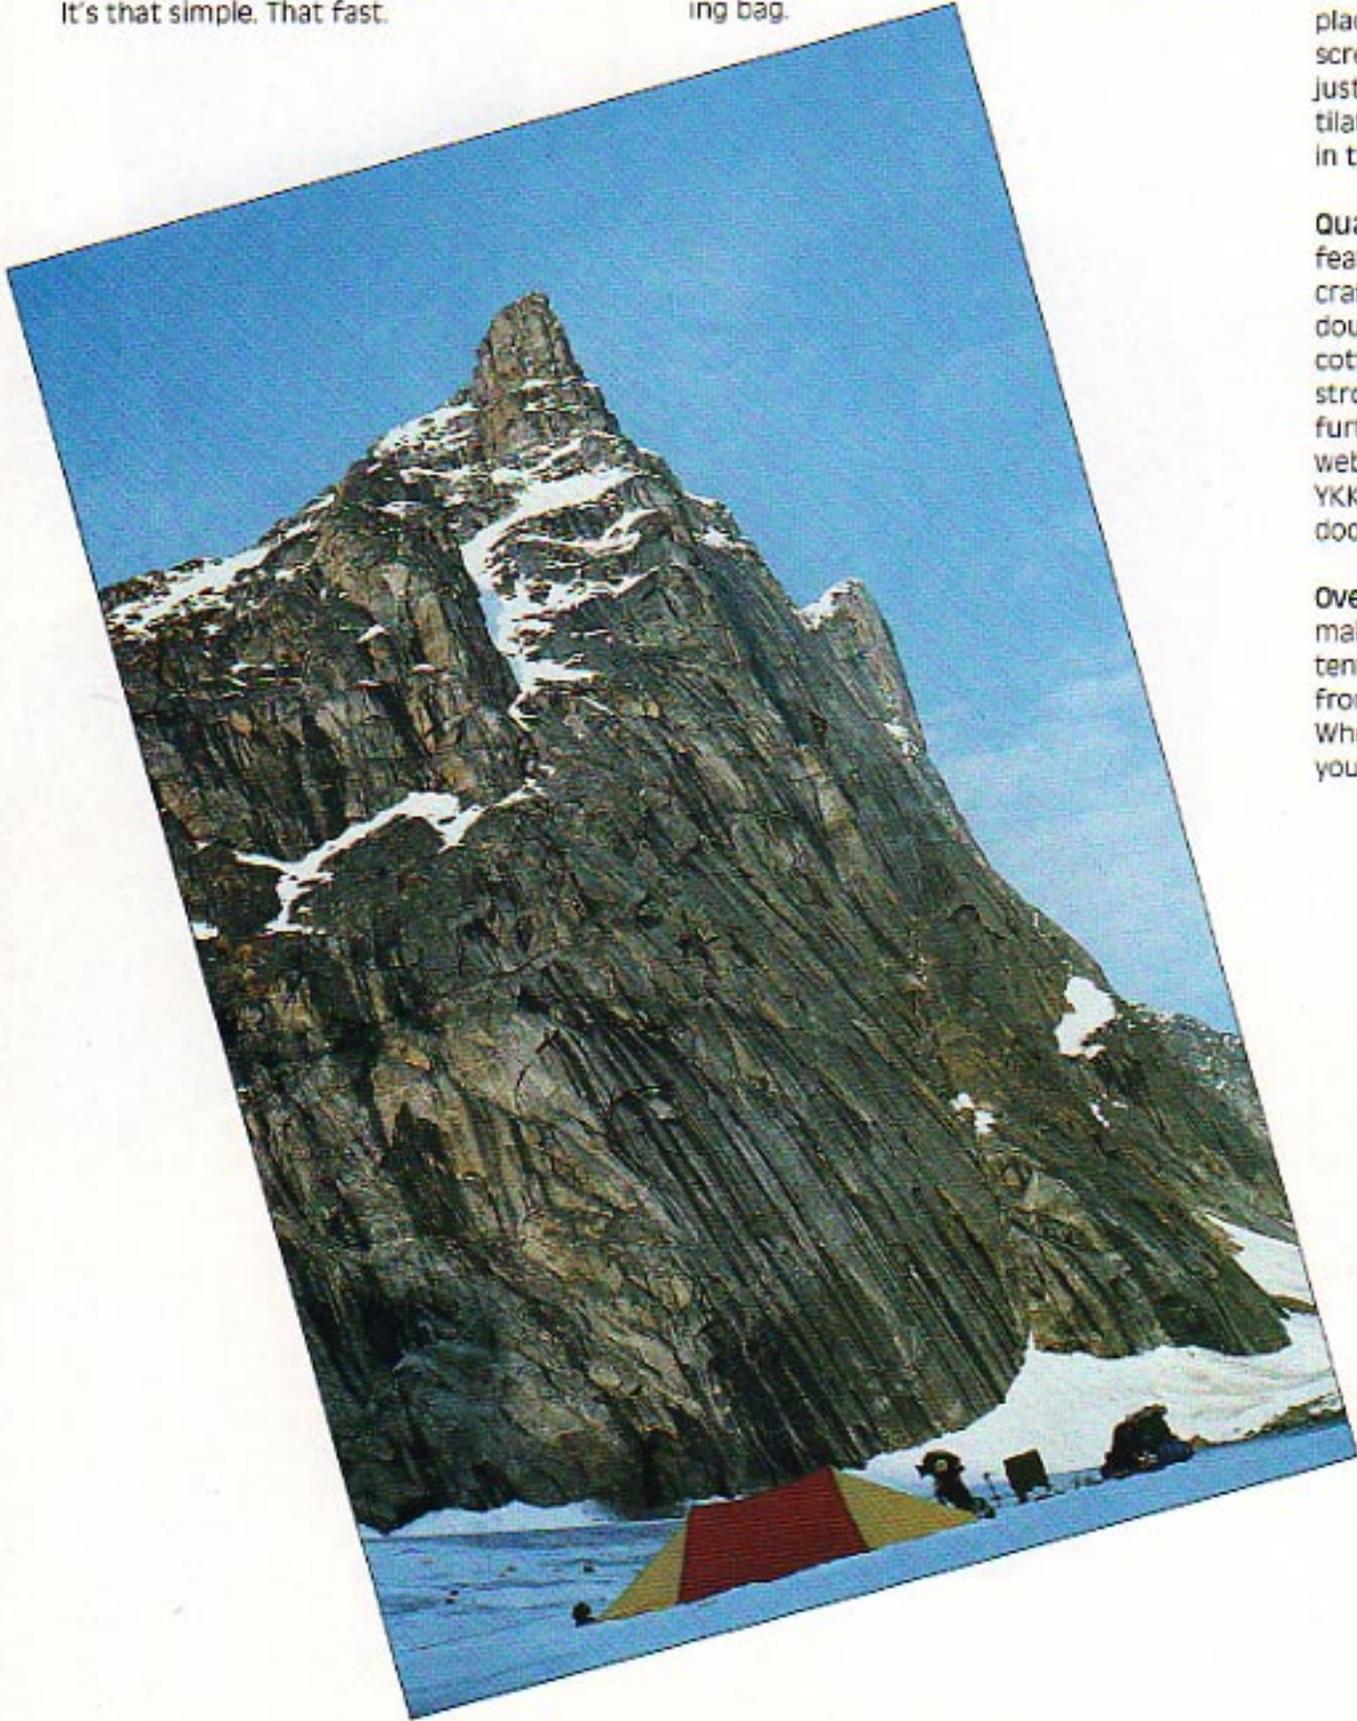

The aerodynamic shape, integral fly, and sturdy construction make Cannondale tents extremely resistant to high winds that would buckle an ordinary tent. Cannondale integral fly tents keep your sleeping area cozy and safe.

Spacious. Every Cannondale tent features a roomy vestibule over each entrance. A vestibule is a transitional shelter that protects you from a driving rain while you remove your muddy boots and clothes. It also provides plenty of storage space for packs, keeping the living area free for uncramped sleeping.

In addition to a vestibule, each entrance is protected by a storm door and fine mesh screen. The door is on the inside where it can be raised or lowered with the screen still in place. One set of zippers drops both the screen and the door, while a second drops just the door. This allows you to control ventilation from within the tent without letting in the local mosquitoes.

Quality Construction. Cannondale tents feature the finest materials and quality craftsmanship. Seams are lap-felled and double-sewn at eight stitches per inch with cotton-wrapped polyester thread, which is strong and swells when wet to seal seams further. All stress areas are reinforced with webbing or bartack stitching. We use only YKK nylon coil zippers, the most reliable outdoor zippers around.

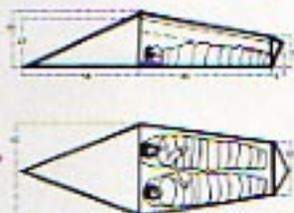

Over a Decade of Performance. We've been making tents for over ten years. Our unique tent design has proven itself time after time, from the Arctic Circle to the Peruvian Andes. When you want a reliable wilderness shelter, your best choice is a Cannondale tent.

Extra light, compact.
TOURING TENT (C890)

This ultra-light tent is a great personal shelter, and will even sleep two in a pinch. We use urethane-coated 1.9 oz. ripstop nylon throughout, and a wide strip of No-See-Em-proof netting that runs the length of the main canopy to permit air circulation and a star-gazer's view. When rain threatens, pull the waterproof fly across from the front pole arch and snap it to the rear. Set-up is quick with two stakes and shock-cord loaded fiberglass poles. A vestibule protects the entrance. In its stuff sack the Touring Tent fits compactly on a rear carrier rack.

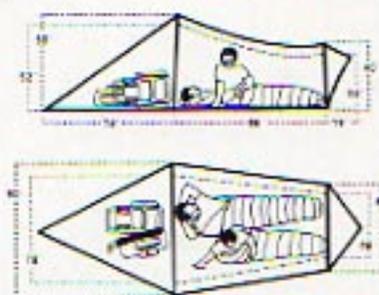

Stuff Size: 16" X 5"
Weight: 3 lbs./4 oz.
Price: \$149.95

Spacious comfort.
WABASH (C891)

This roomy wilderness shelter keeps two people and their gear snug and securely out of harsh weather. A large vestibule covers the entrance, while the rear window is protected by an overhanging canopy. Our most popular model.

Stuff Size: 24" X 10"
Weight: 8 lbs./12 oz.
Price: \$349.95

Double vestibules.
AROOSTOOK (C893)

A great base camp and kayaking tent, the Aroostook comfortably sleeps three to four people. It features two entrances and two giant vestibules.

Stuff Size: 24" X 7 1/2"
Weight: 11 lbs./4 oz.
Price: \$399.95

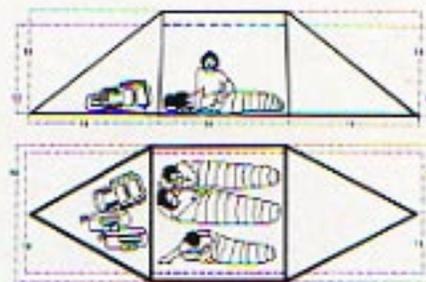

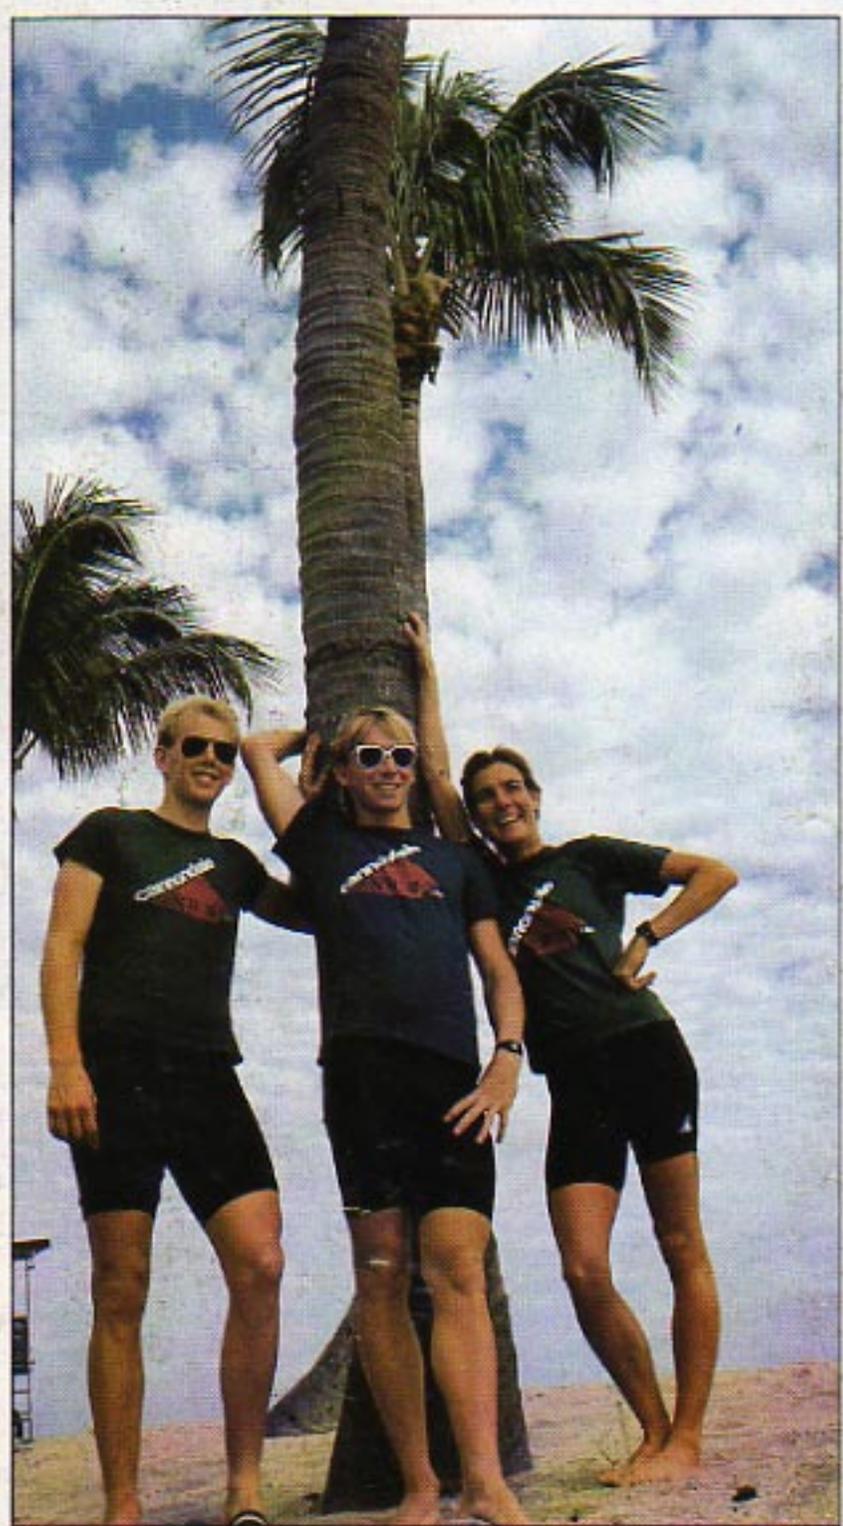

Photo by Joseph Kugielsky

I've been using Cannondale tents for ten years now and am still as impressed as ever. In the past I've raved about your tents because of their ease of set-up, weather-proofing, sensible design, and awesome strength. But I've never had the opportunity to put a tent to such a sustained test as the 1982 Hood River expedition provided. We encountered two major polar gales—one which thrashed us with winds to 55 mph for 48 hours straight. A week later we experienced winds of 40 to 45 mph coupled with heavy rains. Lesser tents would have simply come apart at the seams, or at best, suffered bent poles from the pounding. We didn't experience a single problem.

I urge anyone who is really serious about challenging the still remaining wild places that are left to look hard at Cannondale tents. I consider them the best tents in the world at any price.

—Cliff Jacobson, author of *Canoeing Wild Rivers*
