CICLOSPORT®
SPORTS INFORMATION SYSTEMS

Over 25 years CicloSport, over 25 years of innovation in sports

Dear partner,
Since 1978 Ciclosport has been forwarding innovations in sports electronics in the marketplace – for more information and more fun. CicloSport stands for products of highest quality, thus providing usability and useful information.
Today CicloSport offers a broad range of products starting with the CicloMaster bicycle computer line, via the multifunctional CicloControl series all the way to the interference free CicloPlus heart rate monitors with CicloBlueEye technology. Other innovations are for example the Cardio Training Security System (CTS) or the RDS – the first universal (for all kind of sports) speed and distance measuring device – complete the range.
These are products that not only convince the competent Bicycle dealer but are also used and trusted by the worlds best cycling teams. CicloSport stands for more than just impressive product technology, it also stands for loyalty to its partners and for close working relationships with customers and manufacturers both here and abroad.

After more than 25 years CicloSport wishes to express our thanks to all who have accompanied us on this long journey – Thank you very much.

CicloSport looks forward to our continued co-operative success.

Yours sincerely,

K.W. Hochschorner and the CicloSport Team

1980 **First electronic Ciclo bike computer**
1985 **First Ciclo bike computer with altimeter**
1990 **First Ciclo Heart Rate Monitor**
1997 **First Ciclo HAC**
(Heart rate, altimeter, bike computer included)
2000 **First Ciclo Navigation System for bikes**
2001 **Digital wireless Transmission System up to 868 MHZ**
2002 **Digital wireless Cardio Training Security System for up to 20 participants**
RDS – Radar Distance System – Speedometer for many kinds of Sports
2004 **First Ciclo bike computer with digital transmission, wireless cadence and automatic Two In One system / bike motion switch**

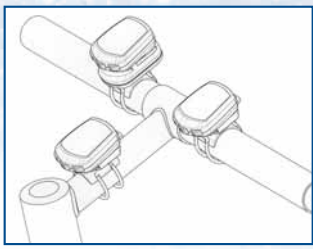
CICLOMASTER – THE RIDE PROFESSIONALS

With the 2005 CICLO*Master* Series, CicloSport introduces yet again a reliable program of innovative cycle computers for multiple purposes. In addition CicloSport has added further exiting products to the range.

New – the CM 215 A, CM 619 and CM 628
New model for greater target group orientation. New digital, interference free transmission for CM 619 and CM 628.

Timeless design
CicloMaster can be integrated even more harmonically into the 'concept bike'. The various product families are characterised by different colours – for straight forward selling success.

MultiLock – handle bar fixing
CicloMaster can be attached to your handlebars or stem in multiple positions without the use of any tools. Obviously this accessory is available for all CICLO*Master*.



CICLO*Master* – the continuous test winner
No cycle computer has collected more awards. The frequently awarded and proven technology returns in the new design.

HAC – THE MULTI TALENTED

The synonym for the all inclusive solution: cycle computer, heart rate monitor, altimeter and sport watch all in one device. The multi function device enters a new round in 2004. Intelligent detail solutions, adding extra value to the product group.

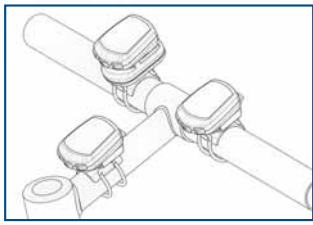
HAC5 – the digital function wonder in the starting blocks
The new HAC5 offers all the known functions from the HAC4 plus useful improvements and extras that will satisfy even the most demanding athlete. More functions and simpler handling. Satisfaction guaranteed!

HAC 4 – the first choice of the US Postal Pro Cycling Team
Besides countless touring and hobby cyclists also the professionals of the US Postal Pro Cycling Team trust the functions and reliability of the market leader – with outstanding success (i.e. Tour de France 2003 and 2004).

UNITED STATES POSTAL SERVICE Pro Cycling Team

Presented by: BERRY FLOOR

MultiLock – handle bar fixing
CICLO*Control* HAC4-devices can be fitted to the handlebars or stem without the use of any tools – later changes or position adjustment is obviously possible.



Optimised button spring tension
Prevents unwanted function changes without system locks – in particular in situations where quick information supply is needed.

3 Evaluation programmes available
The CicloControl HAC 4 devices offer the possibility of evaluation via your PC. The target group specific evaluation satisfies even the most demanding customer.

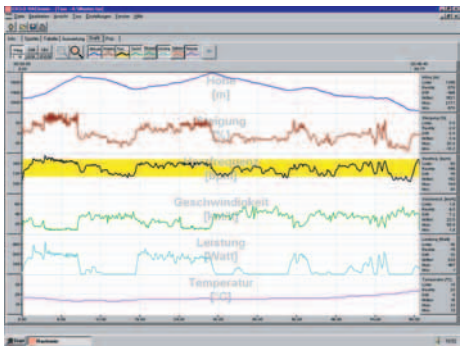
HAC tronic® PC Interface with Software

System requirements:
- 80486 CPU or Pentium / 16 MB Ram
- Free hard disk capacity, at least 10 MB
- Windows 98, 2000, ME, NT, XP
- VGA-Graphic card
- USB port

Diagram of all recordings referring to the following functions:
- Heart rate
- Altitude
- Bike speed
- Ski speed
- Performance (Watt)
- Temperature
- Rise / descent
- Option for Cadence Kit

Contents:
- 3 different programms on CD-ROM (HAC*tronic*, Ciclo*tour*, Ciclo*trainer)*
- Interface with USB plug
- Short manual

Included CICLO TOUR and CICLO TRAINER



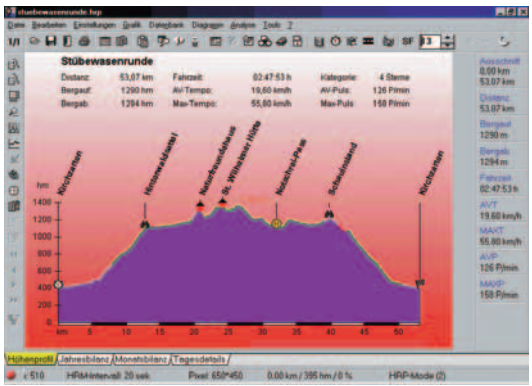
- Diagrammatic representation of all functions dependent on time or on distance (bike). The real altimeter profile is representable.
- Overall view of the functions according to minimum-, maximum-, average-, difference-, starting- and target value.
- Zoom in a choose able area in the graphic diagram

10300212

CICLO TOUR

- Pretentious tour/trip creation
- Database function with year planner
- Statistics
- Usable for biking and walking/hiking trips
- Compatible with HAC4, HAC 4 Plus and CM 436 M

System requirements: see HAC*tronic*



10300213

CICLO TRAINER

- sophisticated training plans control
- complete training plan creation- documentation and evaluation
- training diary with planned/actual comparison
- compatible with all HAC4 computers
- independent of any practicing sport
- manual input of training data

Free Demo Version under: www.ciclosport.de

System requirements: see HAC*tronic*

ALPIN / XC-1 THE OUTDOOR PROFESSIONAL

The CicloControl-ALPIN Series as well as the XC-1 altimeter and multi-function devices stand for precise and fast information in the extreme situations of the mountains as well as everyday usability.

The new XC-1
The new CicloSport XC-1 rounds up the already broad CicloSport range of outdoor watches with this new compass model. The new XC-1 appeals to all users and outdoor friends who are looking for a reliable and accurate altimeter combined with an electronic compass that also features a broad range of sports watch functions – and all this for an outstanding price. "It measures extremely accurately, is very usefully specked and it is easy to use." Test winner and test verdict "outstanding" (outdoor 08/2004).

Alpine Function package
The ALPIN-Family impresses with exclusive functions which are tailored to the dedicated outdoor enthusiast. Also available models equipped with heart rate monitor and PC-evaluation.

Extra weather station
With the integrated weather trend – for better and more reliable outdoor activity planning.

Precise altimeter
The most precise altimeter on the market. Additionally with extended compensation of weather dependent air pressure changes.

ALPIN 3 Plus/ALPIN 5 Plus:
Combinable with wireless step counter.
Easily accessible and reliable data transfer so that the important information is always visible.

THE VERSATILE TRAINING PARTNER

Yet again the 2005 CicloSport heart rate monitors symbolise innovative and controllable technology. Regardless if beginner or professional the CICLO*Puls*-Series always offers a suitable product.

Digital function wonder CP 41
The 'reference'-digital heart rate monitor, combined with speed and distance option (RDS / Digital Wheel Sensor). Obviously with illumination and extra running functions.

Radar Distance System
The first, discipline independent distance and speed measurements, in a compact format with special running functions. More reliable than GPS, no transmission problems due to high voltage lines.

CICLOBlueEye® digital transmission
Finally, interference-free data transfer even over long distances is possible. Reliably coded, in real time and CTS-compatible (Cardio Training Security - group heart rate and training monitoring).

Do it yourself battery change.
Heart rate measurement devices without the troublesome and expensive sending in of the product for battery change – CICLO*Puls*-devices give the user the choice.
