

Riders known as:

It almost seems silly to write about bikes that speak so well for themselves, but if you're new to freeriding, we'll be happy to bring you up to speed. Diamondback has been setting the standard for this category since its beginning, and this past year was no exception. We were working on developing the ultimate freeride bike while Shimano was developing the ultimate freeride component group; so when the Saint group came marching in, we had just the bike for it in our all new XTS Super Moto. With the Saint parts group and a Marzocchi Super T fork, the XTS Super Moto lives up to its name to say the least, but all 3 XTS bikes are loaded with all of the features and components you'll need for the ride of your life including 5.7" and 6.4" rear travel options. So if you think Northshore is just a place in Hawaii and Whistler is a cheerful guy at work, you might consider another ride, but if you live for speed, riding the skinnies and chalking up more big hits than the Billboard charts, an XTS is just what you're looking for.

We don't really care what it is that drives you to race. But if your desire is not only to race, but to win; we have just the XC bike for you in our SL Super. The SL Super in a nutshell is an extremely responsive frame built with Vectra/Easton Ultralite tubing adorned with a full XT component group including hydraulic disc brakes and Dual Control integrated brake/shift levers. The SL Super's 80mm Manitou Skarab Elite fork paired up with a Manitou QRL rear air shock w/ lockout make up the most efficient XC full suspension system available. If you're content with viewing the podium ceremony from the ground level, any bike should do... but if you have other plans, we recommend teaming up with the SL Super.

Hmmm... So you want to be able to climb, tear through technical single-track, and descend like a mudslide, but you're concerned that you'll need three different bikes? Ponder no more; our all-mountain XSL's are made for all types of mountain riding. Four and four and a half inch travel options allow each XSL to perform remarkably well on a wide variety of terrain. Don't have the room or the cash for 3 bikes? No worries; one XSL is all the bike you'll need.

#### Rock Shox Judy TT 100.

•Completely redesigned to provide more torsional rigidity with 100mm of silky-smooth coil/elastomer spring travel.

#### Vectra Trail 7005 Aluminum Full Suspension Frame w/ Sealed Bearing Pivots and 4" & 4.5" Travel Options.

•7005 aluminum makes up a lightweight and strong frame; sealed bearing pivots are smooth, durable and last a long time and the travel options are perfect for all-mountain riding.

#### Tektro IO Mechanical Disc Brakes.

•Provides consistent all-weather/ all-condition stopping power.

Thought you couldn't afford a good full-suspension mountain bike with your mac n' cheese budget? Think again. We've got just the ride you're after in our family of Coil mountain bikes. Each one is priced right and is dependably rugged and built to last with reliable Shimano components and heat-treated aluminum frames. Spend more if you'd like, but the affordable Coil, Coil X and Coil EX is exactly what you need for everything from tooling around in the park to mountain trail riding.

#### **Promax Mechanical Disc Brakes.**

- Neither rain, sleet, snow nor even a bent wheel can keep these brakes from stopping you.

#### **SR Suntour XC75 100mm Suspension Fork.**

- Additional travel means more confidence and control when the going gets rough.

#### **Shimano 8-Speed Drive Train w/ Deore Rear Derailleur and EZ-Fire Shifters.**

- Wider range of gears, Deore quality and EZ-Fire shifters allow you to ride a wider range of terrain with confidence and ease.

#### **DB ATB 7005 Aluminum Full Suspension Frame w/ 0-Stack Headtube.**

- Full aluminum frame makes for a very lightweight and responsive full suspension bike

#### **Alex Double Wall Disc Rims.**

- Double wall rims double the strength of your wheels.

•Aluminum front end makes it light, steel rear makes it affordable and the O-stack makes it adjustable to fit you better.

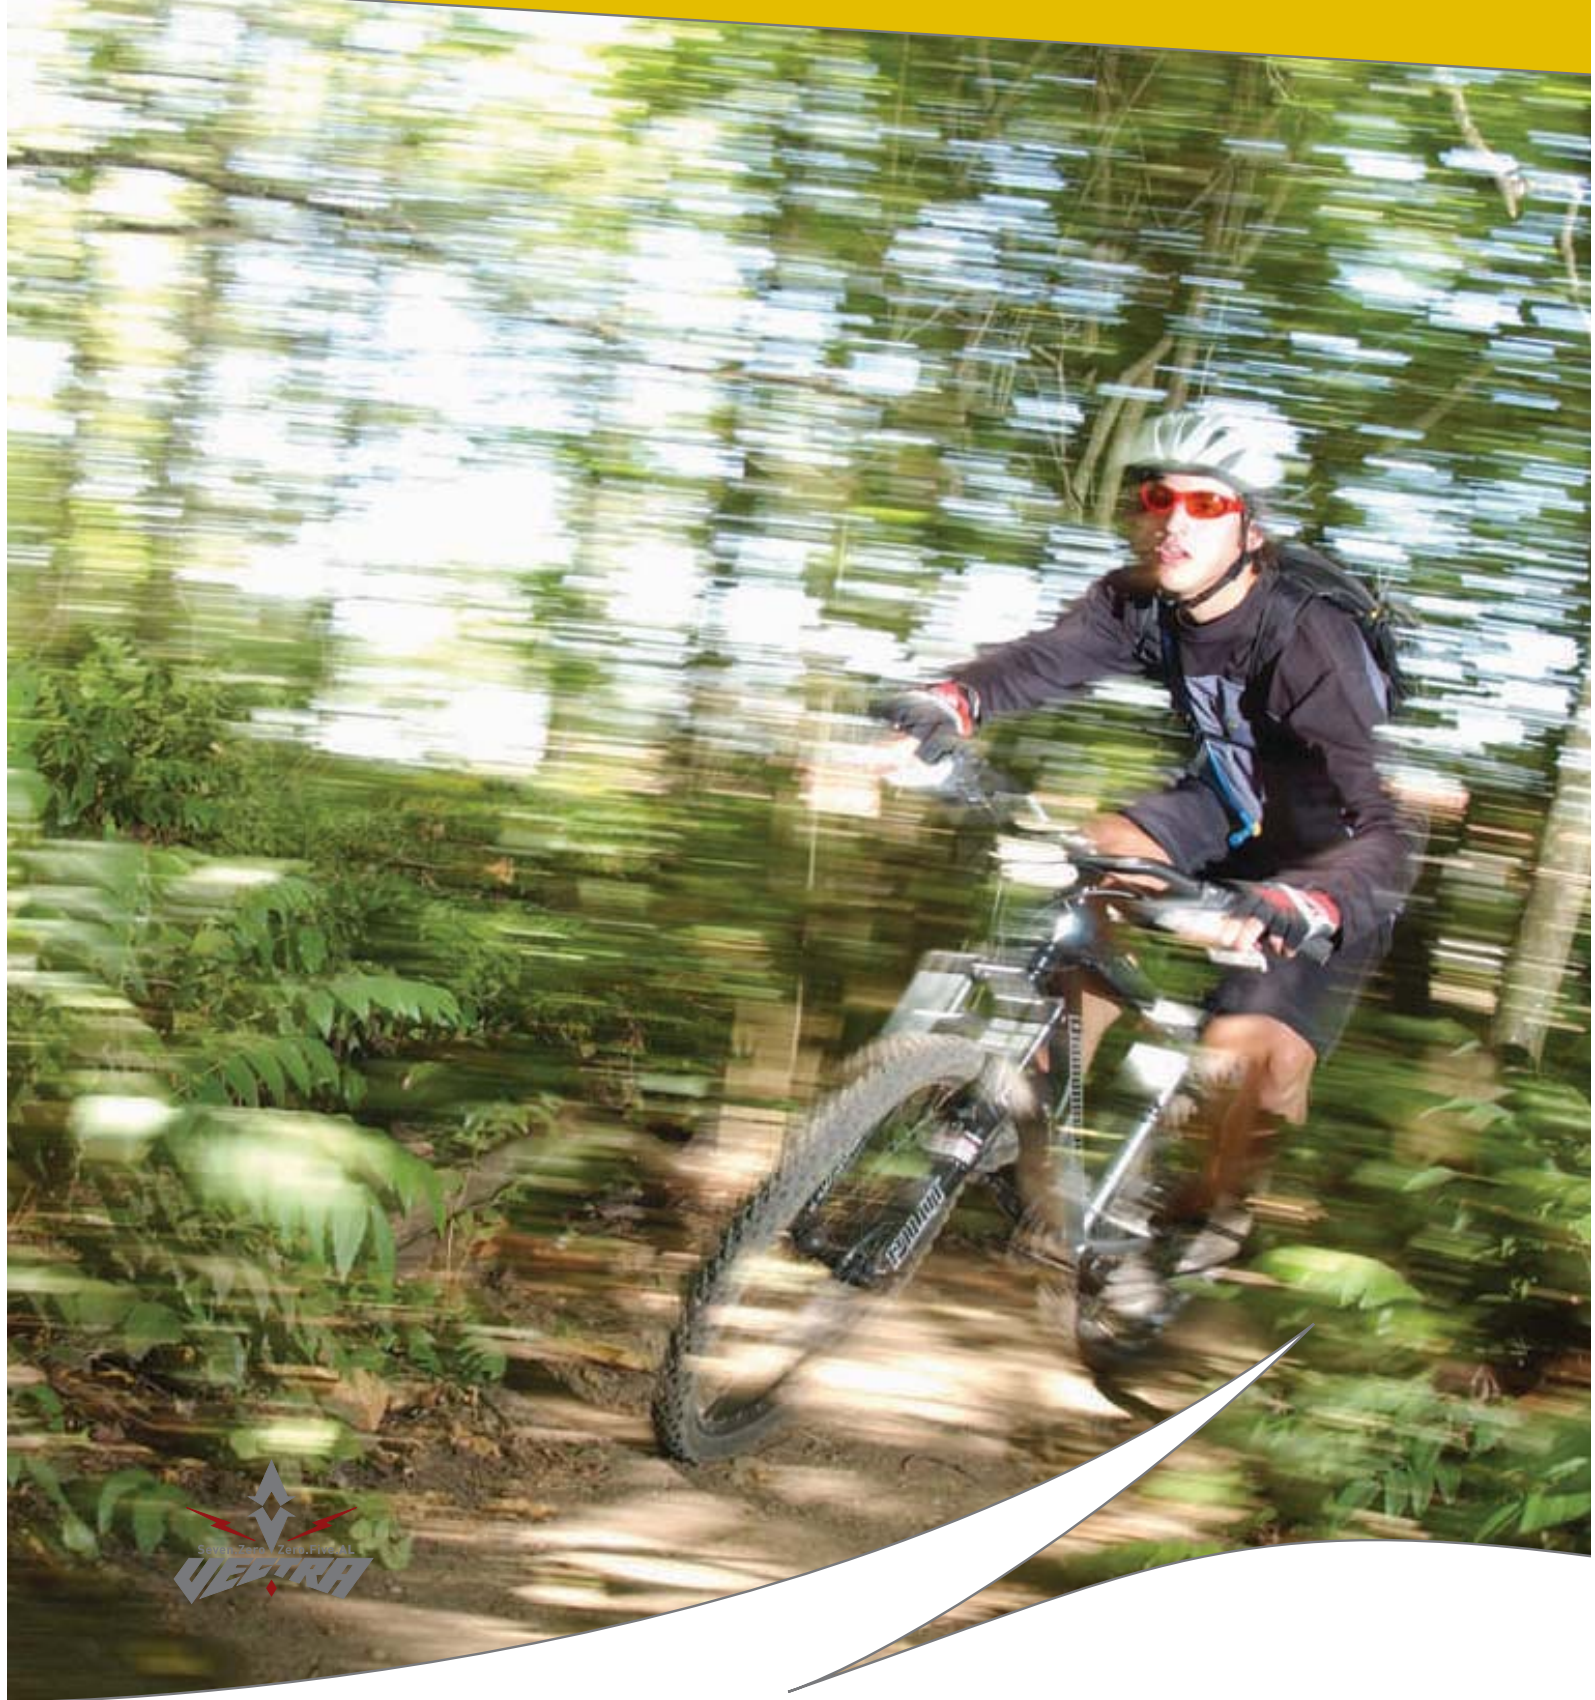

**Coil over Rear Shock w/ Preload Adjust.**

•Adjustable shock allows you to dial it in to suit your weight and riding style.

**Shimano 7-Speed Drive Train.**

•Shimano reliability made affordable.

If you consider a basic hard tail mountain bike to be 'bread and butter', these next 3 bikes are your cinnamon toast - the trustworthy and efficient design of a hard tail, nicely equipped with smooth, solid and reliable Rockshox suspension forks and Shimano components. If you really want to treat yourself, order up an Apex with its super light double-buttet Vectra KSL frame seasoned with Shimano, Hayes and WTB components and topped off with a light and fluffy Rockshox Pilot SL Suspension fork. The more practical Topanga EX and Topanga Comp are no appetizers either - both are also nicely equipped and capable of satisfying the most discriminating of mountain bike connoisseurs.

		Extras:	<b>Clear Coat, Owner's Manual, CatEye Reflector Set, H2O Bottle Mounts</b>

#### **Vectra 7005 Aluminum Frame with Double Butted Down Tube.**

•Vectra 7005 aluminum tubing allows for a lighter frame without sacrificing strength.

#### **Shimano 9-Speed Drive Train with Rapid Fire Shifters.**

•Shimano reliability, a broader gear selection and Rapid Fire shifters make for crisp shifting and a worry free ride so your focus can be on having fun.

#### **Rock Shox Judy TT with 4" Travel and Preload Adjuster.**

•Rock Shox quality and increased travel allow you to take on rough terrain with confidence.

#### **WTB Speed V Saddle**

The Speed V saddle provides maximum comfort on long rides.

You're an intelligent individual; do you really need to listen to Cyndi Lauper to know that girls just want to have fun? It's a fact that we've been aware of for many years but never to the extent that became evident to us last year after we introduced the first ever women's specific Diamondback mountain bike. The Diamondback Carolina is a real mountain bike made specifically for women and built for real mountain riding, not just another dumbed-down version of a men's bike. The Carolina is sized and made for women. From the dimensions of the frame to the seat and spring weight in the Rockshox suspension fork; the Carolina is loaded with features and components made to allow women to have all the fun that they want to have.

		Extras:	<b>Clear Coat, Owner's Manual, CatEye Reflector Set, H2O Bottle Mounts (small standard bottle fits 13" frame only)</b>

### **Vectra 7005 Aluminum Frame Designed Specifically for Women.**

•Light and strong enough for a man, but made for a woman.

### **Women's Specific Rock Shox Judy TT with 4" Travel & Preload Adjuster.**

•Real mountain bike fork with specific damping for women.

Tames any trail to enable women to keep up with (or ride away from) the boys

### **Shimano 9-Speed Drive Train with Rapid Fire Shifters.**

•Shimano reliability, a broader gear selection and Rapid Fire shifters make for crisp shifting and a worry free ride so your focus can be on having fun.

### **Women's Specific Grips, Bars, Stem, Saddle and Levers.**

•Every contact point on the Carolina was ergonomically designed and made for a woman's body. Comfort and a better fit make for a much better ride and more fun.

# Response Sport

You know what you're after. You're simple, practical and resourceful, and so are the things that you buy. You like nice things but you want to be sure that your purchases meet your needs and are just what you want; no more and definitely no less. If you can identify with these things, then we recommend you identify the all new Diamondback Response Sport as your next mountain bike. Shimano components, reliable suspension fork, disc brakes, this bike has everything you need for the things you want to do.

#### Shimano 8-Speed Drive train with EZ Fire Shifters.

•Shimano reliability, a broad gear selection and EZ Fire shifters make for clean hassle free shifting so you can focus on having fun.

# Outlook

The best things in life may be free, but the next best things don't cost much either. Our Response and Outlook have set the standard for reliable entry level mountain bikes for years.

But don't let the prices concern you; these bikes have many of the features that you'll find on bikes much further up the line like a heat-treated aluminum frame w/replaceable derailleur hanger, a suspension fork, alloy wheels with stainless steel spokes and reliable Shimano components.

## DB ATB 6061-T6 OS Aluminum Frame.

•Lightweight aluminum frame is nimble, responsive and durable.

## Front & Rear Specific Off-road Tires.

•Tread patterns are designed specifically for each wheel for optimum traction and performance.

## SR Suntour Suspension Fork.

•Makes any path smoother.

If there was a comfortable, enjoyable and easy way to get exercise, have fun and see things you've never seen before, don't you think you would have heard about it by now? We're sorry if you haven't but there is a way to simultaneously accomplish all of these things. Simply pick yourself up an all new Diamondback Wildwood Citi or a legendary Wildwood or Wildwood Deluxe comfort bike and use it to go places around town that you need to get to. But more importantly; use it to go places you don't need to get to. There's no better way to take in the scenery and enjoy a leisurely jaunt than aboard a Diamondback comfort bike.

We still call them cruisers, but only because 'hotrod' was already taken. If you want old school style with new school technology, we've got a Diamondback Della Cruz that has everything you're after. Aluminum or steel, 7 speed or 1, the Della Cruz' are the perfect ride for stoplight drag racing, rolling to the barber or the drive-in for a malt.

Considering purchasing your child's bike at a place that sells dish soap? Don't get a one-shot deal, get real! Pick them up a real Diamondback youth bike. All of our youth bikes are made with the same quality materials and attention to detail that all of our other bikes are made with. Real maintainable and replaceable bearings and alloy rims are featured on every youth model among many other quality features that allow these bikes to be passed down, used and re-used. For getting your child away from the TV and off to a fun and healthy start on life, there's no better way to do it than with a real Diamondback bicycle.

We still call them cruisers, but only because 'hotrod' was already taken. If you want old school style with new school technology, we've got a Diamondback Della Cruz that has everything you're after. Aluminum or steel, 7 speed or 1, the Della Cruz' are the perfect ride for stoplight drag racing, rolling to the barber or the drive-in for a malt.
