FELT RIDES

THE URBAN SERIES

Sometimes style is as important as function. Your bike is a personal statement, an expression of how you enjoy the sport. Our urban bikes blend simple design, reliable function and, of course, great looks for riders who want bikes as stylish as they are.

No ride should ever seem mundane. Any time you throw your leg over the saddle, it's a chance to have a good time. Whether you are heading off for a ride with your friends, commuting to work or just zipping down to the corner store for an errand, our urban bikes are designed for action.

The Curbside, Dispatch and X:City all begin with custom-buffed and shaped Superlite aluminum tubing. We CNC-machine the headtube and BB to relieve weight and help tune the ride. The result is a lightweight, responsive frame that can stand up to the rigors of daily use.

The only way to meet the demands of the city is with a bike built around simplicity. We used simple, minimalist drivetrains with most either opting for single speed (running fixie is an option) or a planetary internal hub. Of course, there is a derailleur model if you'd like one. And, while we haven't come up with a miracle cure for flat tires, you can rest assured your bike will be as reliable as the sunrise.

CURBSIDE

Featuring hydroformed, butted and shaped aluminum Superlite tubing, the Curbside frame is a special-purpose single-speed road frame. Thanks to a flip-flop rear hub and stainless steel dropout inserts, you have the choice to run single-speed or fixed depending on your mood. Dual pivot brakes offer incredible stopping power and the oversized straight bar is perfect for negotiating the urban landscape. The matching top tube pad and saddle makes a stylish statement any time you ride.

COLOR: Sky Blue, Irie White SIZES: 51, 54, 56, 58, 61cm FRAME: Felt URBAN Custom Butted Super-light 7005 Aluminum, Forged Dropouts w/ Stainless Steel Inserts, rack & fender mounts FORK: Felt carbon fiber w/ alloy steer tube & fender clearance COMPONENTS: FSA Vero 39T chainring w/ guard x 16t 3/32" cog w/ lockring & cr-mo freewheel; Felt Meat Stick 31.8mm Bar; BEER-NUTS Axle Nut & Bottle opener tool WHEELSET:: High Flange track hubs/Stainless Steel Spokes/30mm deep aero rims, 28H front, 28H rear Weight: 18.75 pounds/8.52kg

ADDITIONAL COLORS AVAILABLE

DISPATCH

The Dispatch takes our advanced hydroformed, butted and shaped Superlite aluminum tubeset and builds it into the ultimate single-speed road frame. Everything about this bike is simple and user-friendly, from the flip-flop rear hub for your choice of single-speed or fixed, stainless steel rear dropout inserts for added durability, front and rear dual-pivot brakes for complete control and a butted aluminum drop bar to help you pass the miles comfortably. The stylish package is packed with eye-catching good looks no matter where you ride.

COLOR: Overcast, Race Red SIZES: 51, 54, 56, 58, 61cm FRAME: Felt URBAN Custom Butted Super-light 7005 Aluminum, Forged Dropouts w/ Stainless Steel Inserts, rack & fender mounts FORK: Felt carbon fiber w/ alloy steer tube & fender clearance COMPONENTS: FSA Vero 39T chainring w/ guard x 16t 3/32" cog w/ lockring & cr-mo freewheel; Felt Meat Stick 31.8mm Bar; Beernuts Axle Nut & Bottle opener tool WHEELSET:: High Flange track hubs/Stainless Steel Spokes/ Alex R500 custom rims, 32H front, 32H rear WEIGHT: 18.71 pounds/8.50kg

ADDITIONAL COLORS AVAILABLE

X:CITY 1

A hydroformed top tube combined with double-buttressed aluminum tubing give a practical bike a lightweight edge. Premium touches including eccentric BB for perfect chain adjustment, Basta (integrated) lock compatibility, carbon fiber fork and hydraulic disc brakes, plus the internal gearing of the Shimano Alfine hub make this city bike like no other. You might find yourself riding the X:City 1 even when there are no errands to run.

FRAME/FORK: Felt X:City design, double-buttressed 6061 aluminum, hydroform TT, eccentric bottom bracket, disc-brake specific, Basta lock compatible; Felt alloy fork. DRIVETRAIN: Full Shimano Alfine group COMPONENTS: Felt ALBERT handlebar with comfort grips; Shimano Alfine Disk Brakes; Selle Royal Viper city saddle; Inc. pedals WHEELSET: Mavic A317 rims with Shimano Alfine rear hub, Continental Contact tires COLORS: Pitch Black SIZES: 48, 52, 55, 58cm WEIGHT: 11.7kg/25.7lbs

X:CITY 2

With its double-buttressed aluminum tubing, hydroformed top tube, eccentric BB for perfect chain adjustment and Basta (integrated) lock compatibility, the X:City 2 blends lightweight technology with proven reliability. For simple and clean operation we spec a Shimano Nexus internally geared rear hub with Revo shifter. Tektro V-brakes provide excellent stopping power, all of which adds up to a lightweight, simple and versatile bike for trips around town.

FRAME/FORK: Felt X:City design, double-buttressed 6061 aluminum, hydroform TT, eccentric bottom bracket, disc-brake compatible, Basta lock compatible; Felt alloy fork. DRIVETRAIN: SHIMANO Revo shifter; Truvativ IsoFlow 42T crankset COMPONENTS: Felt Albert handlebar with comfort grips; Tektro V-brakes/levers; Selle Royal Viper city saddle; Inc. pedals WHEELSET: WTB Dual Duty XC rims with Shimano Nexus rear hub; Continental Contact tires COLORS: Matte Olive SIZES: 48, 52, 55, 58cm WEIGHT: 11.4kg/25.1lbs

X:CITY D

Urban conditions are demanding and riding should always be enjoyable which is why we created this value-packed version of our X:City D. We began with the same double-butted aluminum tube set complete with hydroformed top tube and Basta (integrated) lock compatibility, but in this version we add vertical dropouts for an externally geared version. Shimano shifters and derailleur provide dependable performance while Avid linear-pull brakes make every stop confident.

FRAME/FORK: Felt X:City Design, double-butted 6061 aluminum, hydroform TT, disc-brake compatible, Basta lock compatible; Felt alloy fork DRIVETRAIN: Shimano Alivio shifter; Deore RD; SRAM IsoFlow 42T crankset; Shimano 8-speed cassette COMPONENTS: Felt Albert handlebar with comfort grips; Avid FR-5 V-brakes/levers; Selle Royal Viper city saddle WHEELSET: WTB DX-23 rims with Shimano rear hub; Continental Contact tires. COLORS: Matte Silver SIZES: 48, 52, 55, 58cm WEIGHT: 10.9kg/24lbs

THE SPEED SERIES

We introduced our SpeedBike™ line as a way to merge the best in road bike performance with comfortable upright positioning. Now you can have the light weight, exhilarating feeling of riding a performance-oriented road bike in a position and posture that suits you. Whether you want to get fit, are looking for a reliable commuter or simply want a sporty around-town bike, the SpeedBike™ is just the ticket.

The start point for the SpeedBikes™ is our proprietary F-Lite 7000-series aluminum tubing. We use it to build a frame that can stand up to the rigors of hard commuting, long-distance touring and energetic riding. Our design team took great care to create a frame that would put riders in a comfortable and more upright position, while still offering the crisp handling of a road bike. Some models even include a carbon fiber fork and seatpost for added vibration damping to lessen fatigue and improve handling.

While the road tires and snappy feel of the SpeedBikes™ reflect traditional road performance, we make sure comfort is a top priority. The SpeedBike™ saddle uses a dual-density foam base to offer great support while maintaining a cushy feel. We include a wide, flat bar mounted on an adjustable stem to give riders ideal positioning. Stopping the bike are a pair of linear-pull brakes for maximum control and the drivetrain uses wide-range gearing to make going uphill as easy as it is going down.

With the SpeedBike™ you get exceptional comfort combined with the handling and enjoyment of a high performance rig in a package that feels perfect for you.

SPEED 30

We combine our custom-butted Superlite aluminum frame with a carbon fiber fork for the same vibration damped ride quality found in our road bikes. Thanks to a flat bar, riders get a confident and upright posture for excellent visibility and control. A 27-speed Shimano drivetrain gives you the perfect gear on every road. A lightweight wheelset makes the Speed 30 easy to accelerate and concur rolling terrain.

FRAME: Felt SpeedBike Custom Butted Super-light 7005 Aluminum, Forged Dropouts & replaceable hanger FORK: Felt SpeedBike carbon fiber COMPONENTS: Shimano 105/R440, 27 speed WHEELSET:: Felt Hubs/Stainless Steel Spokes/Mavic CXP-22 Rims, 32H front/32H rear FINISH: Polar White SIZES: 51, 54, 56, 58, 61cm WEIGHT: 20.72 pounds/9.42kg

SPEED 50

Using our custom-butted Superlite aluminum tubing, the Speed 50 gives riders a comfortable ride aided by the confident control that comes with a flat handlebar. A 24-speed drivetrain gives you gears to take you up or down any road you find while strong linear pull brakes give you confident stopping power.

FRAME: Felt SpeedBike Custom Butted Super-light 7005 Aluminum, Forged Dropouts & replaceable hanger FORK: Felt SpeedBike Chrome-Moly COMPONENTS: SRAM MRX GripShift/Shimano Sora, 24 speed WHEELSET:: Felt Hubs/Stainless Steel Spokes/Aero Rims, 32H front/32H rear FINISH: Deep Metallic Red SIZES: 51, 54, 56, 58, 61cm WEIGHT: 23.69 pounds/10.77kg

THE CAFÉ SERIES

If you have been to a bike shop recently, you have probably noticed that bicycles have been divided into a multitude of specific categories. There are all sorts of bikes on the showroom floor; so where does one start? Hybrid bikes, Fitness bikes, City Bikes, Comfort bikes, Commuter bikes, Flatfoot type bikes. If you have ever asked yourself “When did shopping for a bicycle become so darn complicated?” then the Café series was designed with you in mind.

The fact is, there are plenty of folks out there who are just looking for one good bike that fits their busy lifestyle. You have a wide array of interests in life, so you need a bike that adapts to them. You might look at bikes as a tool towards health and fitness. After all, anytime is the right time to exercise. You might look at a bike as simply a means to get around. There are always plenty of places to go and people to see. You may even think about leaving the car at home on a workday. And by the time the weekend comes, you’re always up for a bit of fresh air, sunshine, and just plain fun. Whatever the situation, the Café meets the demands of your unique lifestyle.

IDEAL BODY POSITION

When we set out to develop the Café series, we did a considerable amount of market research. We started with the consumer focus groups and gave that input to our engineering group with the clear goal of satisfying two priorities... comfort and handling.

First and foremost, we focused on the body position of the rider. We knew our Café customers would not want to be compromised in an aggressive, stretched-out, competitive position. At the other extreme, we recognized that today's flat-foot-type comfort bikes were lacking in terms of climbing, acceleration and maneuverability. Since Café bikes were created for riders with broad styles and intended uses, we spent considerable time working to achieve the ideal balanced seated position. Comfortable yet sporty, relaxed yet retaining superb handling, Café bicycles possess as much ability as the riders they are seeking.

COMFORTABLE TOUCH POINTS:

- Once we arrived at the ideal body position, we turned our focus to the rider's contact areas:
- Premium saddles featuring gel-infused, double-density foam
 - Custom handlebar shape with mild sweep is easy on the wrists
 - Super-soft double-density Kraton rubber handlebar grips help minimize road vibration
 - Aluminum pedals with rubber inserts enhance traction and reduce vibration

LIGHTWEIGHT, EFFICIENT & EASY TO USE

Reduced weight automatically translates to increased efficiency. By using aluminum material wherever possible, the Café models are significantly lighter than most so-called comfort bikes currently on the market.

You will find lightweight and corrosion-resistant aluminum employed on: Frames & forks, Handlebars, Stems & seatposts, Crank & pedals, Wheelsets (rotating mass is most important). Durable, smooth and efficient Shimano Drivetrains are equipped on all models. Twist-type shifters are easy, intuitive, and always let you know what gear you are in.

ACCESSORIZED

Finally, we wanted to make sure the bikes were outfitted to the gills. All Café bikes feature: Puncture-resistant tires, Aluminum kickstand, Lightweight aluminum cup holder, Safety bell. The Café Deluxe models take it a step further with these extras: Ultra-light aluminum rear carrier, Removable clip-on saddle bag, Lightweight fenders to ward off road debris.

While Café bikes are decidedly classic in appearance, we still made sure to utilize all of today's technical advancements, lightest materials, premium components and modern amenities. Whether it's taking you through your neighborhood, to the coffee shop, to a new level of fitness, or just taking you away from it all, the Café was designed to do so while giving you the ride of your life.

CAFÉ 24 DELUXE MENS

THE CRUISER SERIES

At Felt, we believe today's Cruiser customers are not just looking for comfort and simplicity—they are looking for quality, innovation, durability, and above all, differentiation and style. Simply put, we know today's Cruiser customers are looking at design details like never before.

We know that most Cruiser owners want their bike to make a statement—one that reflects their individual personality, their background, their style and their standards for quality and excellence. For years, Felt has offered some of the most unique design themes along with the highest quality frames and components in the bicycle world. And for 2009 Felt has delivered the most exciting cruiser lineup in our history.

FRAMES

FORMING

Felt utilizes one of the most sophisticated tube-forming processes in the industry: Hydroform technology. Hydroforming is a process that utilizes highly pressurized liquid (usually oil) to blow-up or expand a tube from the inside out. A one-piece tube is contained externally by a mold representing the final outer shape. This state-of-the-art forming process allows Felt to design highly complex shapes that are both larger in size and larger in transition (extreme tapers), giving the bicycle both an amazing look and unique identity.

MATERIALS

Within our 2009 lineup, you will find both Steel and Aluminum framesets, providing different design and ride characteristics, while satisfying varied tastes and budgets alike.

Aluminum—The material of choice for riders who desire reduced weight as well as max corrosion resistance, Felt exclusive “Cruiselite” rust-free and lightweight 6061 aluminum frame tubing is found on select bike models.

Steel—Felt utilizes 100% premium hi-tensile steel, offering an affordable alternative to aluminum.

COMPONENTS

When outfitting our cruisers, Felt pushes the envelope with component design. We refuse to cut corners by using generic, off-the-shelf parts. Every component on every bike we sell is either fully-designed in house, or has the “Felt touch” on it. Here are a few examples of the premium Felt-exclusive parts and accessories you'll find within the line:

Rims—Felt uses super-wide 50mm aluminum rims on many models, as well as extra wide 32mm rims used on other models. These custom rims deliver extra strength, added stability, and plenty of style.

Tires—Felt offers two sizes of our famous “Brick” tire designs. Our 24” x 3.0” Thick Brick offers a stouter look, plus a built-in suspension feel, while maintaining an almost identical outside diameter of a traditional 26” tire. For bikes calling for more classic styling, we employ the traditional 26” x 2.125” size Quick Brick. When mounted to our exclusive wider-than-normal rims, both Brick tires end up with an increased width after inflation, so you win with a wider and more stable feel.

Front Hubs—Many Felt cruisers are specified with custom machined aluminum front hubs, adding to the look, feel and quality of our wheelsets. Our own Felt “Double 5-Star” oversized aluminum hub sets the standard for attitude while enhancing wheel strength and stability. And when we need a smaller hub for just the right look, our machined “4-Window” hub meets the need.

Spokes—All Felt cruisers feature rust-resistant stainless steel spokes. Many bike models take it a step further with heavy-duty 12-gauge spokes for added strength, durability and style.

Grips/Shifters—Felt uses custom grips on every one of our bikes, including grips to specifically fit Shimano Nexus twist-type shifters. Ladies models get an extra design touch with embossed vinyl sleeves and color-coordinated stitching.

Other custom features you'll find sprinkled throughout our line include double-crown forks, semi-integrated headsets, CNC-machined aluminum chain wheels, model-specific valve caps, license plates, serialized limited-edition badges, saddle bags and custom saddle cover embossing designs.

Beyond the frames and components themselves, Felt has gone the extra mile on our production line, ensuring higher quality and more attention to detail than you have seen anywhere in the past. With superior craftsmanship and materials, cleaner welds, richer paint, and a higher level of polish and chrome plating, we believe you'll find the Felt Cruiser line delivers it all with peerless style.

LUXE 1-SPD OR 3-SPD

- Cantilever steel tank frame
- Unicrown tapered fork
- Aluminum adjustable quill stem
- Aluminum rims & stainless Steel spokes
- Coaster brake hub (1-spd -or- Shimano 3-spd Nexus option)
- 26" x 2.125" tires front & rear
- Custom Felt cruiser grips
- Custom saddle w/piping
- Colors: Glowing Green, 1-spd; Two-Tone Black/Grey, 1-spd or 3-spd

GNARGYLE

- Hydroform steel tank frame
- Unicrown tapered fork
- Aluminum adjustable quill stem
- Aluminum rims & stainless steel spokes
- 1-speed coaster brake rear hub
- 26" x 2.125" tires front & rear
- Custom Felt cruiser grips
- Custom 2-tone saddle w/piping

SURF CITY USA® “LIFEGUARD”

- Hydroform steel tank frame
- Unicrown tapered fork
- High-rise handlebar
- Aluminum rims & stainless steel spokes
- 1-Speed coaster brake rear hub
- 26" x 2.125" whitewall tires front & rear
- Custom Felt cruiser grips
- Custom 2-tone saddle w/piping

MAGNO

- Hydroform steel tank frame
- Unicrown tapered fork
- Felt Drop-Zero aluminum threadless stem
- Felt super-wide 50mm aluminum rims & 12G SS spokes
- 1-speed coaster brake rear hub
- Felt double 5-star oversized aluminum front hub
- Felt Quick Brick 26" x 2.125" tires front & rear
- Custom fender w/curved tubular struts

CORTEZ

- Hydroform steel tank frame
- Unicrown tapered fork
- Aluminum adjustable quill stem
- Felt super-wide 50mm aluminum rims w/12G stainless spokes
- 1-speed coaster brake rear hub
- Aluminum 4-window front hub
- Felt Quick Brick 26" x 2.125" tires front & rear
- Rat-trap design rear carrier

HURLEY "PR"

Hurley's world-class design team partnered with Felt Bicycles to create a limited-edition cruiser capturing the essence of Hurley surf style and culture. Hurley's most recognized and sought-after "Puerto Rico" plaid, popularized on surf trunks worn by the likes of pro surfer Rob Machado, has inspired the new Hurley "PR" cruiser. To best achieve the signature Puerto Rico plaid look, Felt turned to a unique and labor-intensive decal process which enables the decal to wrap around and adhere to complex curves such as the rims and fenders. To further enhance the bike's uniqueness, each bike will be serialized with a riveted, stamped aluminum "limited edition" badge. The PR features custom alloy machined "H" valve caps, as well as a rear rack to ensure all your gear makes it to the beach.

- Hydroform steel tank frame
- Rat-trap design rear carrier
- Aluminum adjustable quill stem
- Super-wide Felt 50mm aluminum rims
- 1-Speed coaster brake hub
- Felt oversized aluminum Double 5-Star design front hub
- 26" x 2.125" Quick Brick tires front & rear
- Aluminum "H" valve caps
- Limited edition serial number badge

32
FELT 2009

EL GUAPO

- Hydroform steel tank frame
- Double-clamp fork w/bullet ends
- Felt Drop-Ten threadless stem
- Super-Wide Felt 50mm aluminum rims
- 1-Speed coaster brake hub w/custom lockring cog
- Felt oversized aluminum Double 5-Star front hub
- Felt Cogswell aluminum CNC-machined chainwheel
- Decorative seat tube sleeve
- 24" x 3.0" whitewall Thick Brick tires front & rear

33
FELT 2009

1903

- Cruiselite rust-free aluminum hydroform tank frame
- Springer fork & 1-1/8" oversized threaded headset
- Aluminum adjustable quill stem
- Super-wide Felt 50mm aluminum rims
- Heavy-duty 12g stainless spokes
- Shimano 1-Speed coaster-brake hub
- Felt oversized aluminum Double 5-Star front hub
- 26" x 2.125" antique white Quick Brick tires front & rear
- Front & rear shorty fenders

TWIN

- Cruiselite rust-free aluminum hydroform tank frame
- Unicrown Tapered Fork & Semi-Integrated Headset
- Felt Drop-Zero threadless stem
- Super-wide Felt 50mm aluminum rims
- Shimano 1-Speed coaster-brake hub
- Felt oversized aluminum Double 5-Star front hub
- 26" x 2.125" Quick Brick tires front & rear
- Fender-mounted license plates front & rear
- Decorative seat tube sleeve

CHIEF 3-SPD

- Hydroform steel tank frame
- Unicrown tapered fork
- Aluminum adjustable quill stem
- Super-wide Felt 50mm aluminum rims
- Shimano Nexus 3-spd coaster brake hub
- Felt oversized aluminum Double 5-Star front hub
- 24" x 3.0" antique white Thick Brick tires front & rear
- Alloy bullet valve caps

M.P. 3-SPD

- Hydroform steel tank frame
- Double-clamp fork
- Felt Drop-Zero threadless stem
- Super-wide Felt 50mm aluminum rims
- Heavy-duty 12g stainless spokes
- Shimano Nexus 3-SPDeed coaster brake hub
- Felt oversized aluminum Double 5-Star front hub
- 26" x 2.125" Quick Brick tires front & rear
- Front & rear full coverage fenders
- Battery-powered headlight
- Canvas saddle bag

SURF CITY USA® “BALSA” 3-SPD

When the Huntington Beach Conference and Visitors Bureau put their heads together with Felt to come up with a cool alternative to showcase their city, a beach cruiser fit the bill as the perfect way to keep an eye on the action in the ocean from one end of the beach to the other. With its Huntington Beach-inspired emerald green and balsa wood panel graphic emulating iconic “woody” surf wagons and emblazoned with the official Surf City USA® logo, this bike combines the look and feel of this laid-back community with all the energy of today’s surf culture.

- Cruiselite rust-free aluminum hydroform tank frame
 - Springer fork & semi-integrated headset
- Felt Cogswell aluminum CNC-machined chainwheel
 - Super-wide Felt 50mm aluminum rims
 - Heavy-duty 12g stainless spokes
 - Shimano Nexus 3-SPDeed coaster brake hub
- Felt oversized aluminum Double 5-Star front hub
 - Surfboard valve caps

TROY LEE DESIGNS “SPRAY” 3-SPD

The Spray represents the second exciting collaboration between Felt Bicycles and Troy Lee Designs. From his humble beginnings as a garage shop painter, Troy Lee and his band of designers have grown into one of the most renowned auto, moto and velo-related painters in the world. From Indy to Dakar, from the AMA circuit to the World Cup DH Series, Troy Lee Designs can be found on all the world's top pilots. Now, at a beach path near you, the all-new Felt/Troy Lee Designs Spray represents everything that is cool in both Felt and TLD. The Spray includes all of the classic frame and bike design features you'd expect from Felt, neatly wrapped into an unforgettable TLD exterior. Spray can not included.

- Cruiselite rust-free aluminum hydroform tank frame
- Unicrown tapered fork & semi-integrated headset
- Felt Cogswell aluminum CNC-machined chainwheel
 - Felt Backpedal II aluminum platform pedals
 - Super-wide Felt 50mm aluminum rims
 - Heavy-duty 12g stainless spokes
 - Shimano Nexus 3-SPDeed coaster brake hub
 - Felt oversized aluminum Double 5-Star front hub
- Felt Thick Brick 24" x 3.0" tires w/custom tire-to-rim graphics
 - Dice valve caps

RED BARON 3-SPD

- Cruiselite rust-free aluminum hydroform tank frame
- Unicrown tapered fork & semi-integrated headset
- Felt Drop-Zero threadless stem
- Super-wide Felt 50mm aluminum rims
- Heavy-duty 12g stainless spokes
- Shimano Nexus 3-SPDeed coaster brake hub
- Oversized aluminum drum brake front hub
- Felt cruiser saddle w/custom-embossed Iron

VINTAGE IRON “BOLT” 3-SPD

At Felt, we're always looking for creative ways to make cycling more fun and interesting. This year we have once again partnered up with Vintage Iron, a Southern California company specializing in the restoration of vintage motocross machines. The collaboration had already produced the wildly popular 400 Cross model and this year it gets even better with the Bolt.

The young sport of motocross was blown away when the Hurricane arrived in 1976 and won races in a way the sport had never before seen. The iconic lightning bolts became a symbol of relentless determination and domination around the world. The Vintage Iron Bolt pays homage to the man, the myth and the machine with this striking cycle that refuses to be ignored.

- Cruiselite rust-free aluminum hydroform tank frame
- Felt double-clamp fork & semi-integrated headset
 - Felt CNC aluminum motocross chainwheel
- Shimano Nexus 3-SPDeed coaster brake hub
 - Aluminum drum brake front hub
 - CNC-machined gas cap
- Felt custom “Berm-Master” knobby tires: 26” x 2.125” front/ 24” x 3.0” Rear
 - Limited edition serial number badge

HOT WHEELS “SIXTY-8” 3-SPD

For big boys who love all things retro or just want to feel like a kid again, Hot Wheels™ has teamed up with Felt to introduce the “Sixty-8”, a celebration of Hot Wheels' 40th anniversary. With a renegade rat rod inspired look, the design team was determined to create a unique, aggressive cruiser reflective of the culture from which it was modeled. The traditional built-in kickstand and chainguard were the first things to go. The usual coaster brake hub was replaced by a custom 3-speed cassette version featuring CNC compact cassette cogs, and an oversized 14mm hollow axle. The truly unique design includes classic retro CA-style Hot Wheels™ license plates, removable moto-style triangle kickstand, and bolt-on aluminum frame plates. Plastered with flat-track style graphics and stamped with an individually-numbered limited edition badge, each bike is a true collector's item.

- Cruiselite rust-free aluminum hydroform tank frame
 - Twin decorative aluminum frame plates
- Felt custom double-clamp fork & semi-integrated headset
 - Cable-actuated disc brakes with 180mm/160mm rotors
- Custom low-profile aluminum rear derailleur and downtube shifter
- Felt custom 3-Speed compact cassette hub w/14mm axle
 - Removable MX-style triangle kickstand
 - Stamped aluminum license plate
 - Limited edition serial number badge
